EIGHTEEN SAILORS DROWNED

A STEAMSHIP STRIKES ON THE Porsal Rocks and Only One of the Crew

Escapes. Death Came Suddenly.

London, Dec. 17-The steamship Prince loaded with coals for St. Naziace, France, has been wrecked on the Porsal rocks, off Brest, and of the crew of 19, Keik, the mate, is the and of the crew of 10, Keik, the mate, is the only survivor. The most meager particulars only have been received. From these it appears the steamer struck on the rocks without warning and went down almost in-stantly. Those of the crew who were able to make a dash for life were speedily swal-lowed up by the wares, which were very high in that vicinity. Kelk was rescued in an almost exhausted condition.

WM. E. FITZGERALD HANGED.

WM, E. FITZGERALD HANGED, The Murderer of Officer Freed Pays the Death Panalty. Columbus, Ohio, December 19.--Murderer, William E. Fitzgerald was hanged in the penitentiary angex yesterday morning. Fitzgerald killed officer Freed, of Youngs-town, O., May 14, 1891, who was an all round thirf, had stolen a seal skin sacque, in the pocket of which was shiO. He was convicted and all the legal machinery used to save his neck, but withcut success.

THE LABOR WORLD.

CHICAGO, Ill., has a co-operative bakery. GREAT BRITAIN has 13,000,000 wage-bara-

LONDON (England) compositors have a hall. INDIANAPOLIS, Ind., has a Sewing Women's Union.

IN Germany glassblowers are paid only once a year.

ALEXANDRIA, Ind., is to have a plate glass mill to employ 300 men. QUEEN VICTORIA, of England, has sixty housemaids at Windsor Castle.

THE Massachusetts law prohibiting the fin-ing of weavers has been declared unconstitu-tional

ing of weavers has been declared unconstitu-tional. THERE are about 26,000 waiters and bar-tenders in New York City, of whom at least 17,000 are voters. Strager car conductors in Barlin, Germany, receive only sixty-two and one-half centes for a day's work of eighteen hours. Maour one hundrad union men are now imprisoned in Australia for alleged violence during the sheep-shearers' strike. The Childs-Drexal Fund for the Home for Aged Frinters amounts to about \$20,000 at present, \$45,000 of which has been spent on the Colorado building. The Chinese coolies imported by the land barons of Eastern Prussis' to replace the migrated peasants have refused to do the hard work imposed upon them, and many of them are on strike.

A work in Section 2 when the internation of the A NUMBER of prominent women in Wash-ington have formed an association for the purpose of training colored girls and women in the duties of house servants, seamstresses, landresses and cooks. James Burn's lately said at a labor de-monstration that the trades unions' effort to obtain an eight-hour day was a failure. The trades themselves cannot and will not en-force it, so the only hope is through legal enactment.

enactment. A LABOR paper, entitled the *Resolution*, has made its appearance in Japan. It first came out secretly under the name of *Liberty*, and was produced by means of the hecto-graph. The newspaper is printed from types made in England.

made in England. Thur shipbuilding firm of William Oranp & Sons, at Fhiladelphis, Penn., employes 300 men. The value of the ships at present under construction at that place is \$14,400,000, and the premiums earned by this firm by excess of speed in Government contracts has been \$318,734.

F315,724. BROCKLYN (N. Y.) unions request the city authorities to give or erect a building to be used for the wants of labor, as, for instance, a building where labor unions can meet and also establish as employment bureau, where persons out of work can be furnished em-ter of the second emission of the second e

INCOMPLETE resords show that for the year ending June 30, 1890, 860 brakemen were killed and 7841 maimed while engaged in coupling cars; and that the total number of employes killed during the year was 2451 and the number injured 23,390. The full re-cords would raise the figures twanty-five to thirty per cent.

POPULAR SCIENCE.

Versailles, Mo., claims a voin of coal eighty feet thick, the thickest vein on earth. Recent experiments in Queensland have shown that mother-of-pearl shells can be made to produce pearls artifically.

The only purely platinum mine in exis-tence has been discovered in Oregon. This mineral elsewhere occurs in con-junction with other minerals.

the ocean. An instrument invented at George-town (D. C.) College, known as the pho-tochronograph, is said to record with absolute accuracy and precision the time occupied by a star in its transit across the meridian. Professor Virchow is the originator of the cell-growth theory of disease, which has been characterized "the most impor-tant step in pathology" of the period, in that it has "little less than revolutionized pathological study."

subsolution and the broadside docking of vessels have been built at three of the principal ports of France. By this means vessels are to be hauled out of the water without straining, and the cost is less than by the ordinary means of placing in a dry dock.

A Norwegian farmer has devised a curious lock, in which the bolt is released by a stroke from a pendulum bob. The pendulum, invisible from the outside, is moved sufficiently by blowing sharply several times through a hole in the door, but the puffs of air can be given at the proper time only by swinging a key pendulum previously adjusted to vibrate in unison with the lock pendulum. The waste of a neare and puln mil

in unison with the lock pendulum. The waste of a paper and pulp mill, near West Troy, N. Y., is being util-ized as the basis of a new fuel, which is said to be of much value. The waste as it comes from the mills is uearly pure carbon, and by cleansing and chemical treatment it is converted into a form that permits of nearly perfect combus-tion. It is said to burn rapidly, with intense heat and with little of the un-pleasant features attendant upon the use of bituminous coal.

Any one who has made a trip to sea has seen the ingenious propeller-shaped appliance which is thrown overboard at the end of a long cord, and by means of which the officers get an approximate idea of their speed. This is not a new idea, for in ancient times the Romans had a similar appliance for ascertaining their rate of process at sea They 60 13 29 1 10 6 00 1 75 60 45 5 25 1 50 2 80 1 00 their rate of progress at sea. They dragged little paddle wheels behind their ships, the revolutions of which enabled them to estimate the distance which the ship had traveled.

ship had traveled. A new electric light support has been designed especially for, use around benches in machine shops and under various conditions when a light that is adjustable to any desired position re-quired. The extensible lamp-supporting arm is hung by a ball-and-socket joint from the ceiling and a set serew regu-lates the friction on the ball as the upper end of the first rod, to which is adjusta-1 02 52 47
