POPULAR SCIENCE. Pure alcohol is colorless and transpa-

To every 1009 males in London, Eng-land, there are 1123 females.

The population of the United States increases by 1,000,000 persons yearly. There are said to be 20,000 different kinds of butterflies, of which two-thirds are named.

It is said that the curled leaf of the peach is prevented in France by spraying with a solution of copper.

A smoke consuming locomotive has ust been built in Illinois from which not one puff of smoke escapes.

Forty-five per cent. of the water con-sumed or drawn for domestic purposer in London, England, is wasted. A British army officer has invented a rifle which a cavalryman may discharge by means of a little dynamo fitted in his saddle.

An electric snow plow has been de-Signed, with a thirty-horse power motor for propelling the car, and independent reversible motors for running the brushes. It is intended for use on street railways

The French Admiralty has adopted for covering the boilers of war ships mattresses or cushions made of asbestos bloth and stuffed with some non-conducting material, such as silicate cotton or asbestos fibre.

Australian butterflies bathe. One will

Australian butterflies bathe. One will alight close to the water, into which it back until the whole of the body is sub-merged, the fore legs alone retaining their hold on dry land. In a moment it will fly away, apparently refreshed. It is reported that the electric separa-ting plant which was established at the Michigamme mine, at lehpeming, Mich., has proved a great success. By the operation of the plant a large quantity of low grade ore has been converted into high grade Bessemer ore. A gradner of Mauritius has tried to

high grade Bessemer ore. A gardner of Mauritius has tried to raise sugar-cane from seed. A hundred seeds planted in 1890 yielded tive min-ute seedlings, of which one has survived and flourished. He believes that by cross-fertilizing the best varieties it is possible to produce a sugar cane that may be raised from seeds and would be of greatly improved quality. A German professor recommends the

of greatly improved quality. A German professor recommends the following receipt for a liquid scap for medicunal use in wounds, etc. One part of caustic potash, dissolved in an equal weight of water. To this add four parts of olive oil, and one-fourth part of alcohol. Stir thoroughly for ten minutes, shaking repeatedly. After about an hour mix with an equal quan-tity of water. Let it then stand several days, then filter it, and it is ready for use.

Professor Eugene Hilgard notes how Professor Eugene Hilgard notes how weeds common in the Atlantic States make no headway on the Pacific, while kinds that are not troublesome here are great pests there. The common mus-tard takes possession of abandoned fields, and soon crowds out everything else. So rugorous is it there that it is frequently tall enough to hide a horae with its rider. California could supply the world with mustard seed only for the black aphis, which everywhere covers flower, bud and fruit. The respiration of insects has been

flower, bud and fruit. The respiration of insects has been studied by M. Contejean, who has found that, contrary to what occurs in verte-brates, the movement of inspiration is passive and that of expiration active. The air is driven from the body when the heart contracts; hence, when the in-sect is wounded, the flow of blood oc-curs at each expiration. He finds that respiration is not interrupted by cutting off the head, nor by the absorption of curate, which produces an immediate cessation in man. cessation in man.

Curiosity of Geography.

Curlosity of Geography. Buccaneering romances team with references to the "Spanish Main," yet probably few people nowadays know what or where the Spanish Main," yet main is a contraction of mainland, and was applied to the part of the north coast of North America washed by the Carribean Sea. The name is a relic of the time when that part of the Cofiti-nent belonged to Spain, and was used to distinguish it from the West India Islands, which also then,bolonged to that country. Where is El Dorado? This was a question which actually exercised the con-tent with the spoils of these unfortunate countries, the Spanialds argued that countries, the Spanialds argued that

countries, the Spaniards argued that that there must be another and richer country in the interior, supposed to be somewhere to the north or west of Peru. They called it in prospective, "The Golden Land." Sir Walter Raleigh tried to find it in Guines. It has not ret here to find it in Guiana. It has not yet been to had it in Guada. It has not yet both discovered however. The Spaniards very likely found their El Dorado when the plundered Mexico and Peru; and the English buccaneers—of whom Sir Walter Raleigh was by no means an in-significant specimen—found their El significant specimen-found their I Dorado in plundering the plunderers.

-

The banker Dill case ended abruptly at Clearfield with a verdict of not guilty, but the defendant to pay the costs. Mrs. Mary Oxtoby, an aged immate of the Washington county home, committed sui-cide Monday evening by hanging herself to an iron grating.

cide Monday evening by hanging herself to an iron grating.
The Blair and Cambria Lumber company, of Hollidaysburg, failed and A. B. Hicks, of Duncansville, was appointed its assignce.
The Hemlock Lumber Association, of Northern Pennsylvania, met at Williams-port and advanced the price of hemlock stock, all grades, 50 cents per thousand.
Hiram Rice and wife, of New Castle, died of the grip within a day of each other. This is the third case within it wo weeks where both husbaud and wife died within a fow hours of each other.
Treston M. Gernet, of Bethlehem, s young member of the Northampton county bar, shot himself in the Court House at Easton. He was on trial for emberzing funda coming into his hands as attorney. He cannot recover.
At Greensburg Osborn Morgan was con-victed of illegal liquor selling and sentenced to pay 5000 and spend eight monthe in the workhouse. Petrox Marial, for the same offense, was found guility, sentenced to cipht and to the work house and fined \$700 and costs.
Governor Pattison has issued a proclama-tion calling attention to the wast proportion.

and costs. Governor Pattison has issued a proclama-tion calling attention to the vast proportions of the famine in Russia, recalling the bounty of the world sent to the Johnstown flood sufferers, and advising the citizens of the State to send contributions for the relief of the Russian Pesansits to the Russian Psanine Railef Committee in Washington. Abrahsm Patterson, a young farmer of Railef Committee in Washington. Abrahsm Patterson, as young farmer of miles from Sharon, was struck by a tree while chopping in the woods, and instantly killed.

Edward Allison, a brakeman, fell from his train at Radebuugh, near Greensburg, and was ent to pieces. He had only worked about three weeks on the road.

about three weeks on the road. Charles Mackey was drowned in Catfish creek, Washington. The creek at this point is only 18 inches deep, and Mackey's face was barely under water. It is believed be-fell into the creek and was unable to rise, as he was drunk.

be was drunk. Edward Turner, the oldest member of the furgerne county bir, died at Wilkesbarre, he allowed a traveling doctor to operate on a bunicr and blood poisoning followed. Solomo Shaffer, 16 years old, of Greens. The altificulty between pupils at the Tair was found frozen near his home. The altificulty between pupils at the Tair was choud, near Millersdale, Westmore struck and kicked by another pupil named. But and the altificulty of the structure of the structure and the structure of the structure of the structure and the structure of the structure of the structure But and the structure of the structure of the structure means of the structure of the structure of the structure the structure of the structure of the structure of the structure means of the structure of the structure of the structure the structure of the structure of the structure of the structure the structure of the structure of the structure of the structure the structure of the struct

setters. A fire occurred in the Columbus Catholic church at Johnstown, damaging that edifics to the extent of \$3,000. This is the church presided over by Father Davis at the time of the flood, and where newspaper men were so well received. Harry Viscont calculation

so well received. Harry Vincent, colored, died in the com jail at Carlisle. He was in for some mi oftense, but seemed determined to die in to take food, but he fought them successfully, and after days of starvati he cooly turned his face to the wall a died.

did. Stephen DeAyla was placed on trial at Wilkesbarre for the murder of his wife at Seranton. He broke down and wept like a child. District Attorney Kelly, who read the indictment, was much affected. The latter was the murder's best man at his wedding and a fellow classmate in col-lege.

latter was the murderer's obst man at me wedding and a fellow classmate in col-lege. The family of A. J. Campbell, of Kelly's station, on the Allegheny Valley milroad, has been saily depleted by diphthenia re-cently. Jennie Campbell, aged 14 years, was taken ill about two months ago. Mary Campbell, aged 11, was stricken and died a few weeks latter. Her remains were removed from the house through a window that Jennie might not learn of her sister's death. Katie Gampbell, 5 years old, took sick on the day of the funeral and died 10 days after. Mabel, seven years old, John, 9 years, and s baby are still ill with the disease. A number of other cases of diphtheria are reported in the vicinity of Kelly's station. The distillery of George Dengler, in Alba for alleged violation of the revenue laws. The distillery on tained 452 gallons of apple brandy. Patrick Dungan, a farmer residing near

cry out, "There is a king eating an ox."
