And his cure by Hood's Sarsaparilla.
"I was taken sick last October with gastric fever, and my recovery was considered almost hopeless. After 7 weeks the fever slowly left me, but I could not eat the simplest food without

Terrible Distress
It seemed that I had recovered from the fever to die of starvation. I took peppin compounds, blin-muth, charcoal, cod liver oil and malt meal my physician confessed that he did not know what else to try. Everything I took seemed

WITH MUCH POMP.

The Investiture of the Khedive of Egypt at Cairo.

KHEDIVE ABBAS.

The investiture of Egypt's Khedive took place at the Abdin Palace, Cairo, a few days ago. The ceremony was celebrated with much pomp. All the British and Egyptian troops were massed in Abdin Square, fronting the palace, Tribunes had been erected on the sides of the square, and these were filled with officials and others. The Khedive and his Ministers assembled on a dias in front of the palace, where they received Ahmed Ryouf Pasha, who arrived at ten o'clock, accompanied by a brilliant escort of cavalry.

The firman of investiture was read by an official, who also read a telegram from the Sultan of Turkey, conferring upon the Khedive the administration of the Sinai Peninsula. Upon the conclusion of the reading the assembled troops thrice saluted the Sultan, and a band played the Turkish anthem. After this the troops saluted the Khedive three times, and the Egyptian anthem was played. Then a salute of 102 guns was fired. The native spectators displayed the greatest enthusiasm throughout the whole ceremony.

Afterward the Khedive received the congratulations of the Ministers and diplomats. The city was decorated with flags and bunting, and the day was generally observed as a holiday. That night the city was illuminated.

CONDITION OF BUSINESS.

Encouraging Signs Seen For This Season of the Year.

R. G. Dun & Co.'s Weekly Review of Trade says: A better demand is seen for pig and plates in the east, and also at Chicago, and the pipe business is reviving at Pittsburg. Coal is unchanged and dull, copper waiting for the expected combination of foreign producers, but speculatively strong, and lead very firm. Wool sales are large for the season, and since January, I have been 6 per cent. greater than last year, the demand for goods having somewhat improved, and for knit goods being far better than was recently expected.

News from other cities is rather better as to the East, cheering as usual from the West, but somewhat less satisfactory as to the South. Boston reports particularly active retail trade, jobbing trade in dry goods better than a year ago, woolen mills well employed, and wool slightly firmer, with a few factories busy. Sales of dry goods at Philadelphia decidedly exceed last year's, and collections are improving, while wool is hardening, through buyers are cautious.

Iron mills at Pittsburg are all in operation, and a few pushed, though prices are weakening. The glass trade is encouraging, the hardware trade good and coal 30c. Cleveland notes better trade in nearly all lines.

Southern trade at Cincinnati is not satisfactory, but machinery is active in the carriage business a little better. Detroit notes good jobbing and manufacturing trades, in some lines better than last year. Chicago merchants and sales considerably exceed last year's, and fully equal expectations. Receipts of wheat and barley are double last year's, of flour, corn and cattle increased one-half, of these one-half, with some increase in hogs, wool, butter lard and cured meats.

Business at Little Rock is depressed, at Nashville and Memphis dull, somewhat improved at Montgomery, but rather flat at New Orleans, and slackening at Savannah. Speculative markets have been more active, wheat falling 3/4 cent, with sales of 94,000 bushels here, and corn 1 cent, while oats are slightly higher. Western receipts of wheat continue at the rate of 3,000,000 bushels weekly, with exports shrinking, but Western receipts of corn have been 800,000 bushels in three days and exports 750,000.

The financial situation is remarkably free from unfavorable signs. Collections in nearly all parts of the country are better than usual, though delay is seen at some points in the South, and the money markets are everywhere amply supplied. Nor is there reason to apprehend disturbance on account of foreign trade.

The business failures during the last seven days number for the United States 191, Canada 36, total 227, as compared with 238 last week and 218 the week previous to the last and 221 for the corresponding week of last year.

THE WORLD'S FAIR.

The Appeal for an Additional Appropriation of \$7,000,000.

WASHINGTON, April 16.—General St. Clair, Francis W. Breed, of Massachusetts, and Judge Harris, of Virginia, members of the national commission of the World's fair, were heard before the World's fair committee of the house in support of the proposed loan or appropriation of \$7,000,000 by the government in aid of the fair. General St. Clair said: There was no question as to the necessity of the appropriation, as it had been shown that \$18,000,000 would be required before opening the gates of the fair. Instead of \$10,000,000, as at first estimated, The bill authorizing the fair never contemplated having the local corporation raise over \$10,000,000. This amount they had secured. The government should not allow the fair to be a failure for the need of a few million dollars. The exposition was not a Chicago fair or Illinois show, but an exposition of the United States.

ARSON AND ANARCHY.

Two Austrian Villages Almost Consumed by Incendiary Fires.

VIENNA, April 15.—Seventy houses were consumed and four persons burned to death in a fire in the Bohemian village of Mollchen. In a fire in the Moravian village of Moeldlan, 45 houses were burned and three persons suffocated. Both these fires were caused by anarchists, and it is now known that the recent conflagration at Leufenfelden, in upper Austria (where the best part of the village was consumed), was caused in the same manner. Great uneasiness prevails.

IN THE PROMISED LAND.

A GREAT RUSH OF BOOMERS FOR THE SIBERIAN RESERVATION. Some Interesting Scenes. One Squatter Killed.

LEADERSWOOD, S. D., April 16.—A blast from the bugler's trumpet at noon to-day gave the signal to allow the boomers to make a rush for the Siberian reservation.

It was a strange sight as the hour of noon approached. Scattered along in an uneven line to the north and south were three companies of cavalry, each man fully armed with sabre, revolver and carbine. Back of these were grouped, or rather herded, a heterogeneous mass of men—white, yellow and black—all nationalities of the Caucasian race, with a liberal mixture of halfbreeds and negroes. There were women in the crowd, too, and here and there could be seen a baby held in the arms of its mother as she sat on her horse, determined to be one of the first to enter the promised land, which was to be opened to-day.

As the first note of the bugler, a signal for advance, rang out, there was a crack from the muzzle of the soldier next to him, which was quickly echoed by one further down the line. The shots rang out clear in the crisp air, and as the volleys rattled down the lines on either side it was answered by the hoofs of hundreds of horses, spurred on by riders reckless of life or limb in the race for land. A cloud of alkali dust rose as the money army charged for the line of the reservation, and soon all that could be seen from the crest of the ridge was a black mass of huddled horsemen, closely pursued by a whirl of yellow dust.

A man on a Kentucky thoroughbred got a good start, and when the line was reached he was ten lengths in advance of the next rider, a cowboy who rode like a centaur, but who was at a disadvantage as to his mount. Behind the two leaders strung out a long line of horsemen, men in buggies, others in spring wagons, and others still in huge prairie schooners, the rear being brought up by a man from Pike county, Missouri, whose wife, children and household effects were contained in a Conestoga wagon drawn by a yoke of oxen. On and on went the flying column, and within half an hour the last man and vehicle had vanished from sight beyond the foothills, and the soldiers, at the word of command, wheeled and returned to camp, their duty in opening the reservation being finished.

A Courier just in from the reservation reports the killing of a squatter.

When Traveling.

Every Russian passenger carries tea and sugar, usually in a little calico bag. Bread and lemons are bought at the stopping places and every steamer keeps a lubberly, unwilling sort of youth, whose duty is to provide plenty of hot water. Teapot and glasses are obtained from the steward, and the Russian family by means of these ingredients manage to pass no small share of their time drinking tea and sweetened water. The Russian would probably rebel against the insinuation of sweetened water, but the straw-colored fluid that is yielded by the unwilling leaves after the teapot has been replenished over and over again with hot water is not to be converted into tea by a mere politeness of the tongue.

Change in Watches.

Watches were appreciably reduced in size after the invention of the fusee to obviate the inconvenience of variations of power of the mainspring. The watches made early in the sixteenth century generally strongly contrasted in size and portability with those worn in fobs by men in the eighteenth century, and which were round, thick and heavy.

Sanitary Walls and Ceilings.

Q. Does the Bible have anything to say respecting sanitary walls? A. Read Leviticus, 14th Chapter, 38-41 verses. Q. What do modern sanitarians say? A. That wall paper and glue salampoms are directly responsible for much of the sickness, ignorantly attributed to other causes. The Chicago Inter-Ocean, in an article on papering walls, under the caption of "Nasty Practice," has this to say: "Our Health Officer, Dr. De Wolfe, says the free passage of air through walls of living rooms is an important element in proper ventilation. The practice of repapering rooms by layer upon layer of wall paper, made adhesive by glue or paste, which adds a decomposing material to the nasty practice, can receive nothing but condemnation from the sanitarian. The perfect wall for domestic habitation is of material which resists decomposition in every form, and which permits the free passage of air. It seems to me that Alabastine is admirably adapted for the purpose." The Doctor agrees with the Inter-Ocean, that a special law should be passed to prevent the practice of pasting repeated layers of paper on the walls. Write the Alabastine Co., Grand Rapids, Mich., for supplement from the report of the Michigan State Board of Health, entitled: "Sanitary Walls and Ceilings." Remember the name, Alabastine, made from alabaster rock.

A REMARKABLE SUCCESS.

What Ability and Research Accomplishes.

There is the widest difference in the world between the study of a profession and its practice. Experience, practical knowledge from real cases, is the most essential material in building up any profession. Physicians frequently disguise

from patients their true condition, because of their inability to provide a successful remedy. With twenty-one years' experience as a practitioner, I can conscientiously say that I have never used a preparation with such uniform good results as that attained by Dr. Kilmer's Swamp-Root. It is a veritable discovery and as such is an inestimable acquisition to medical science. I have prescribed this remedy in many of the worst kidney and bladder disorders, both in acute and chronic cases where the patients presented the most complicated and alarming symptoms, and have noted with great interest its effect. The results have been most satisfactory. Its action on the affected kidneys and bladder and consequent disordered liver and digestion has been gentle yet immediate, the relief speedy and the cures permanent. I have found it a most invigorating tonic in broken-down constitutions, La Grippe, and in other cases where the vitality has been greatly wasted and enfeebled.

WHAT'S WHY REMINGTON TYPEWRITERS ARE IN DEMAND.

Some idea of the present wonderful growth of the typewriter business may be gained from the fact that the sales of Remington typewriters for January and February, 1892, exceeded those of the corresponding months of 1891 by \$160,000.

The great and constantly gaining popularity of the Remington is clearly shown by the fact that the business has more than doubled within three years. The Remington factory at Ilion, N. Y., employs 700 men to fill the demand created by the sales agents, Wyckoff, Seaman & Benedict, who dispose of machines at the astonishing rate of one every five minutes.

FOR THE CHILDREN.

My little girl suffered for three years from a large Abscess on her hip, the result of a fall and dislocation. The Abscess was large, with six openings, all of which discharged puss. I was induced by friends to give her S. S. S., and
