THE STRICKEN CITIES.

Latest News From Oil City and Titus ville, Pa. All Bodies Recovered.

OIL CITY, Pa., June 13—The list of dead is completed. The last body identified, that of William White, found at Emlenton, was the last of the list missing. Frank Yeager, the last of the its missing. That of of Sivelyville, who was rescuing people by means of a boat when the flames came, lost his reason to-day through the terrible strain upon his mind. Other reports of a like nature may be expected at any time, as a great many persons are still prostrated from fright.

nature may be expected at any time, as a great many persons are still prostrated from fright.

Trusyllle, P.A., June 13.—Memorial services were held in all the churches Sunday and were largely attended. It is estimated that 10,000 peopie were in the city from the neighboring towns. The recovery of Bert Osmer on Saturday morning brings the number of dead up to 60.

Work in the ruins were suspended Sunday to give the exhausted laborers an opportunity for rest.

A reporter Saturday went down Oil Creek from Titusville to Oil City in a boat, searching for bodies. The bushes along both banks are laden with every description of clothing and furniture. The high water mark reaches in some places halt way to the tops of tall trees, whose roots are on the bank of the stream. The old Drake well, a mile below this city, is washed away. Twenty-five other derricks along the banks just below the Drake well are entirely obtterated. Two iron tanks, of 500 barrels capacity, have lodged in the lower branches of a big oak, Several houses from Titusville are stranded in the channel a distance of five miles from the city.

From Titusville to Pioneer the debris is thickest.

Five large iron tanks which were swept from Titusville, are lodged at various inter-

trees and the willow branches all along the creek.

A small dwelling carried from Titusville stands 30 feet inland, surrounded- by brush and trees and wedged between two gigantic oaks upside down. Only three bridges of the 25 which formerly spanned Oil creek between this point and Oil City remain intact. The others are either totally or partially wrecked. No bodies were found.

A notable difference appears in the character of the disasters which have overtaken Oil City and Titusville. Here the elements of fire and water together wrought the awful destruction of hie and property. At Oil City the flood caused but a small portion of the loss, and fire did the rest.

A flose as a Telephone Line.

A couple of bright young men of Cincinnatt have invented and patented an electrical device whereby the pipenen of a fire engine company may be able to telegraph from the nozzle end of a line of hose to the engineer. By a code of signals given on a small electric bell the pipemen can notify the engineer when to start the stream and when to close down. It like manner a distress call may be given to show that the men in a building are in danger from suffocation or other cause.—New Orieans Times-Democrat.

GOLD IN GEORGIA. Where It is to be Found in Paying Quan-

A RICH DEPOSIT DISCOVERED NEAR DAHLONEGA, GA.—HOW THE GOLD IS SECURED.
Great excitement prevails in the gold belt
of North Georgia, and mineral property is
rapidly being "gobbled" up by capitalists,
and mining men from the North and West.
The whole gold belt, and particularly that
immediately about Dahlonega, promises this
year to be the scene of gigantic energy in
mining operations, the like of which has not
been witnessed since the early days in California.

This tremendous revival of an industry
which has been prosecuted in a listless sort
of way for upwards of fifty years in this
field, is occasioned by the result of certain
experiments recently completed on a large
scale, in the concentration and subsequent reduction by chlorination, of
the metallic particles contained in neerly
all of the ores of this camp. These experiments have demonstrated that the old
processes in vogue saved only a small parcentage of the actual value of the ores, and
that by the introduction of methods long
practiced in the west, but, strangely enough,
never before tried here, many mines before
regarded as of little value, can be worked
at enormous profits. The ores are all more
or less supiniretic, and increasy in sulphur
as well as gold as depth is attained. Some
of the richest ore the writer has ever seen
came from water level and below, but contained so much sulphur that the stamp mill
process alone would not save the gold
it. The new processes introduces of being in
expensive and meanly applicable to the
mills now at ready applicable to the
mills now at ready applicable to the
mills now and ready applicable to
the five great gold-bearing belts of
Lompkin County, an old mine has been reopened and some marvelously rich deposits
of gold quartz and gravel were discovered.
One small spot is reported to have yielded
4000 in three days' work of two men, while
the whole product of the mine, under crude
operations, entirely without machinery, is
estimated at upward of \$60,000.

The mine covers one whole land lot of 40
acre

weighs but 35 pounds.

Deafness Can't be Cured
