CROP BEPORTS NOT FLATTERING. Business Generally Reported in Good Condition.

H. G. Dun & Co.'s weekly review of trade says: Crop reports are not quile up to expec-tations, and are construed as indicating a deficient supply of corn and oats, while any possible deficiency in wheat and cotton will be more than met by surplus stocks. But prices have advanced quite sharply and ex-ports of domestic products fail below last year's. The great industries are all doing remarkably well excepting the iron manu-facture.

The Bear touched at St. Mathew's Island June 3, and took off a manamed Peter Viani, who was in dire distress trom lack of provisions. He said to other men named Fred Burns and J. B. Pulsford, who had been left on the visland with him, had started in a dory May 4 for Hairs island, since which time he had heard nothing. The Bear visited Mal's island but did not find the men. Traces to have been abandoned three weeks before, captain Healy says he thinks the men must have been drowned at sea by the capsizing of their boar.

to Terms. The Western iron scale of the Amalgama-ted Association of Iron and Steel Workers was agreed upon, and fixed for the coming year by the action of the Conference Com-mittees of the Amalgamated Association and the Pittsburg iron manufauturers. The base of the new scale—that is the rate of pud-ding, is the same as it has hear for some

and the Pittsburg iron manufauturers. The hase of the new scale—that is the rate of pud-dling—is the same as it has been for some years, \$5 50 at on. But in the finishing de-partment, a reduction of 10 per cent. was agreed upon by the two sides. The settlement was arrived at after 16 conferences, by concessions on both sides. The manufacturers conceeded the \$5 50 rate for pudding. Their demand was for a \$4 50 rate. The Amaigamated Association con-ceeded to the manufacturers the reduction asked in the finishing departments. The mills that have already signed the scale, ex-cept the sheet and wire rod mills will be affected by the agreement arrived at. They will all get the benefit of the 10 per cent. cut for finishing, as they signed the scale with the stipulation that they would be governed by any changes made. In Pittsburgh about 20,000 iron. workers are affected by the agreement, while out-side of the city about 15,000 men are affected. The join scale for the entire country is now settled, with exception of that in the Ma-honing and Shenango valleys, and his will probably be signed shortly. The settlement occurs after an idleness of 41 days, and in some cases this time will probably stretch into two months before the mills are started.

An Extensive Swindler Arrested. New Yonx, Aug. 13.—Henry Gottlieb, a lawyer with an office on Park Row, was au-raigned on a charge of forgery. The police say they have as many as 50 cases against him of swindling and forgery. Gottlieb once practiced law in Chicago, and it is as-serted that he is a fugitive from instice in that city.

ROAD DRAINAGE. It Is Absolutely Indispensable to the Best of Results.

<text>

When the roadbed is to be graveled or macadamized, the crowning earth foundation should be nicely smoothed and then rolled until quite solid. It is well, also, in this case to put the clay subsoil from the ditches on to the surface. When rolled, it makes a hard, smooth surface, almost imper-vious to water, and over which will flow, off to the ditches at the sides, the rainwater that may sink through the gravel or macadam. When the surface is to be of earth only, the clay subsoil should be kept under-neath, and the natural soil be placed on top. The surface soil will usually afford much better drainage than the subsoils, and make a better road sur-face.—American Agriculturist. The witness asked for water. The

Workerse, Mass, August 10.—Four em-ployees of the Washburn & Moen wire mill, al Quinsigamond village, were hor-ribly burned by sulphnic acid yesterday. The acid is used for cleaning copper wire, and is forced into the annealing room through lead pipes. Only a small amount of acid had been pumped from the tank, when suddenly one side of the iron recepta-ele burst outward, throwing the awful fluid over the four men who were standing near. All were severely burned. Their clothing was eaten off and the screams uttered were heartrendering. Two of the men tors off their clothing and jumped into the river.
