

History of the Strike.

The world-famous Homestead strike is practically at an end. It began June 23, and has been attended with the terrorizing features of actual warfare. It has cost the Carnegie Steel Company, Limited, almost a million dollars in securing and caring for a sufficient number of non-union men to man the plant. It has nearly impoverished the Borough of Homestead and has brought hundreds of strikers and their families to a condition verging on starvation, but it is now about ended, at least so far as the mechanics and laborers are concerned. The scramble for positions, which was inaugurated Thursday morning by the Huns and Slavs, was continued without cessation from an hour before daybreak Friday morning until 4 o'clock in the afternoon. Up to that time about 1,000 men, counting the 300 who headed Thursday's break, had applied for work. Not over 300 men secured employment, but they were principally Hun and Slav laborers.

The scene along the Munhall road, from City Farm lane to the company offices, were interesting as well as amusing. All day long there was a constant stream of men going to and from the works. It was an easy matter to pick out those who had secured employment. Their faces wore a broad smile, and they seemed to be literally walking on air. Those who had not been so fortunate were easily distinguished. They had fondly hoped that if they had to do was to apply and they would be received with open arms. The faces of these men were a study. Chagrin and disappointment stood out in bold relief on their countenances; they realized for the first time that they had held off too long.

Homestead business men make no secret of their gratification at the turn affairs have taken.

Although loath to make known to the public the details of their meeting Thursday evening, Amalgamated men were found yesterday who talked freely on the subject. A committee of mechanics and laborers were present with the ultimatum of the men they represented. The latter desired to be released from all obligations, to remain out of work, to be paid for the strike, and to have the strike declared null and void. A committee of Amalgamated men, headed by William Weibe of the Amalgamated Association, about 500 members of which organization were present, was called to order. The question of the strike was discussed, and the committee declared that they would not take the responsibility of declaring the strike off, and would continue to demand financial aid as long as the strike remained firm. Then followed a vote in declaring the strike off, so far as the mechanics are concerned, which resulted in 224 yeas to 123 nays.

After considerable wrangling a secret ballot was taken, which added 25 votes to those in favor of declaring the strike off. This did not change the result. A motion to release the men at the Lawrenceville and Beaver Falls plants was lost. Vice President Carney made aousing speech, in the course of which he explained why the Amalgamated Association could not allow sympathetic strikers to return to work and handed out a card of sympathy to the strikers without gloves. Mr. Carney declared that the existence of the Amalgamated Association depended upon every member connected with the strike remaining firm.

The members of the mechanical department, snarling under what they considered unfair treatment, then took the Amalgamated Association and knowing full well that the financial resources of that organization had been exhausted, were not one in making any further demands. They should have left Thursday night at 11 o'clock, but they were told that there would be a meeting of the mechanics and day laborers on Friday morning. This standing vote, so unanimous and decisive, indicated more forcibly than anything else what has been working in the minds of the mechanics and laborers from the day their strike began. The vote reduced from \$4 to \$3 in the case of former and from \$3 to \$2 in the latter. After a few brief addresses the meeting came to an end and the second rush for positions commenced.

The rush continued without a break until 4 p. m., when Superintendent Schwab announced that no more applications would be received that day. The mechanics and laborers numbered 2,400. It is estimated that 1,050 of these men had applied for work, and that about 300, principally laborers, were given employment. Very few mechanics are needed, and consequently there is much disappointment on the part of those who failed to get work.

Assistant Superintendent Wood stated to a reporter that the company had no intention of turning afloat any of its non-union employees, of whom there are about 2,700, in order to make room for old employees. The company gives them the chance of obtaining work, but is not going to disturb the men who have helped it out. Consequently there are about 2,500 men—2,000 mechanics and 500 Amalgamated Association men—who are still on the outside. Should the mechanics fail to obtain employment, they will be placed in a worse position than ever, as they have no means of obtaining financial aid.

THE FINAL ADMISSION THAT THE HOMESTEAD STRIKE IS OVER.

BY A VOTE OF 101 TO 91, THE MILL WAS DECLARED OPEN TO AMALGAMATED MEN.—SUMMARY OF THE PRINCIPAL EVENTS SINCE THE HOMESTEAD STRIKE BEGAN.

The Homestead strike, or, technically speaking, lockout, was brought to an end Sunday morning at a meeting held in the Homestead rink, which was presided over by Chairman Richard Hotchkiss and attended by Secretary K. M. Gillon, Vice-President Carney and Treasurer Madden, officers of the Amalgamated Association. The vote that opened the Homestead Steel Works to Amalgamated men stood 101 yeas to 91 nays. The meeting was red-hot all the way through and at one time it looked as though Burgess Hollingshead would have to interfere. Charges and counter charges were the order of the day. Newspaper men were excluded but it was learned from a reliable source that those in favor of declaring the mill open had the hardest kind of a time to carry their point.

On the night of the failure of the Chicago promise of \$200,000, together with the non-fulfillment of other promises, all came in for consideration by the strikers. They could not live on promises, and so told their leaders, who, seeing that it would be useless to try to hold the men together longer, took steps to place their brethren on an equal footing with the mechanics in the grand rush for work.

According to Assistant Superintendent Wood, of the Homestead works, not more than 800 or 900 of the total number of old employees will be able to secure work. Before the break of last Thursday there were left in Homestead about 2,800 of the original 3,800 men who came out on the 25th day of June. Of these 2,800 men 2,200 were mechanics and laborers, and 600 Amalgamated Association men. Up to date about 1,100 men have applied for work, and it is estimated not more than 350 men have got it.

Saturday's meeting was attended exclusively by the Amalgamated members, other strikers not being out to that organization being excluded. The meeting was not a large one, not more than 500 persons being present. Considerable surprise was caused when the announcement was made that Thomas J. Crawford had sent in his resignation as chairman of the Advisory Board to accept a position as head of the Pennsylvania Iron and Steel Works at Uniontown. The resignation was accepted and Richard Hotchkiss elected to fill the position. The steel workers were not in any way affected by the resignation. A strike arose and moved that the lock-out be declared at an end. Discussion of this motion continued without a break until 10 p. m., when adjournment was taken until Sunday morning.

When the adjourned meeting was called to order in the rink Sunday morning there were not more than 300 men present. They opposed to bringing the fight to an end, and struggled hard to stave off a ballot, pleading, arguing and predicting the disintegration of the Amalgamated Association in the event of the lockout being declared off. The steel workers, who, as they themselves have said time and again, would rather go naked and starve rather than acknowledge defeat, were in the minority. They knew it, but still they urged and pleaded with their brothers to stand firm if for no other reason than to show to the world that they had not forgotten the men who were in prison awaiting trial. It was of no avail. The question was put. The vote was a standing one. When the result was announced there was no joyous outburst. Dejections in demonstration such as that which followed the standing vote of the mechanics, declaring themselves independent of the Amalgamated Association.

For a few seconds the men sat and stared at each other. Then followed angry denunciations by some of what had been done. The men left the hall in two divisions. They seemed loath to leave the building, the very rafters of which have almost quivered with the declarations made a thousand times that victory was theirs if they would only be patient.

AS TO THE MEN EMPLOYED.

Asked how many new men had been taken into the works since the inauguration of the lock-out, Mr. Wood said: "A little time have there been over 2,600 men in the works since the start was made in July. There were that many at work up to last Thursday. Then about 1,100 were employed since the strike, the total will not go over 3,500. In prosperous times we have employed as high as 3,800 men, but the non-union men during July and August averaged about 100 per week. Since that period there have practically been no demerits."

Mr. Wood was asked whether the company had lost very heavily by the cancelling of contracts. He said: "All contracts were cancelled as a result of the strike. We were made with the provision that there might be trouble. We have lost nothing on contracts which were made prior to the strike, but we failed to enter orders which we otherwise would have received."

ALL BUT SIX WILL BE TAKEN BACK.

The sympathetic strike at the Carnegie mill at Beaver Falls, Pa., was declared Sunday afternoon. All the old hands, except the six members of the Advisory Committee of the strikers will be taken back.

HISTORY OF THE STRIKE.

IT WILL GO DOWN AS ONE OF THE MOST FAMOUS LABOR DISTURBANCES IN THE HISTORY OF THE COUNTRY.

The Homestead strike of lockout will go down as one of the most famous labor disturbances in the history of the country. The men were locked out June 23, five days before the expiration of the old lease, and from that time until July 9 the Carnegie Company made no attempt to get men into the mill. The Advisory Committee would allow no one to do it except clerks, watchmen and foremen employed by the company.

On the morning of July 6, the Pinkertons barged in to stand at the mill and 10 men met their lives as a result of the strike. They followed, besides 40 or 50 were wounded, some of whom were maimed for life. The surrender of the Pinkertons, after 12 hours' fighting, was the first step toward peace. Dynamite and burning oil were used, was followed by the terrible gauntlet-running and barbarous abuse of the captive ones, one of whom was driven insane by it and afterward killed himself.

BEYOND OUR BORDER.

The dispute between England and France arising from an English warship boarding in the waters of Madagascar a slave ship flying the French flag, has been settled. The British have agreed to pay a small indemnity.

Joseph Sura, the Berlin man who was charged with attempting to burn his wife to death; he might marry her younger sister, was sentenced to 15 years' penal servitude.

A letter just received from Cordoba, Mexico, gives a most distressing account of the state of affairs there. Yellow fever has raged with awful violence and carried away almost 1,000 of the people of the town. Most of the inhabitants have fled to the mountains and escaped the plague.

The despondent feeling in the tin plate district of Wales has been changed into one of rejoicing since Mr. Cleveland's election. A committee has been appointed to watch the developments of the American tariff.

At Hirschfeld, Hesse Nassau, a Roman Catholic priest named Thiel, has been arrested for having spoken in a derogatory way, in a sermon, of the Emperor's attendance at the Luther celebration in Wittenberg.

The Department of War has issued orders forbidding all officers of the Turkish army below the rank of major, to marry more than one wife. The order states that the pay of lieutenants and captains is insufficient to keep a "harem" decently.

A Reuter dispatch from Salamanca tells of a wedding party, numbering about two score from the better class of society, who were enjoying the occasion at a restaurant, when the building collapsed. Seven were killed and 30 wounded, more or less, severely.

A caboose and six cars broke loose from a Mexican National train which was climbing a steep grade. The cars flew down so fast that one after another left the track until only two crashed into a double-header freight train at the rate of 120 miles an hour, causing a terrible wreck. Several trainmen were dashed to death.

CREAM, THE POISONER, HANGED.

He is Sent to His Grave in a London Jail Yard.

Thomas Neill, alias Cream, the Canadian woman poisoner, was hanged at Newgate prison, London. He displayed wonderful nerve and declared that his last two days on earth were the happiest of his life.

Neill was probably guilty of more crimes than even Jack the Ripper and they extended over the United States, Canada and England. The first crime in April, 1891, was known as the Lambeth mystery in which Neill poisoned two girls of ill repute in Lambeth by giving them strychnine. The case caused a great sensation, but Neill was not found. Then in October a girl named Martha Overy died suddenly and the post mortem examination revealed the presence of strychnine. This death recalled the fact that another girl, Ellen Denby, had died in a similar manner. Denby's relatives and investigators showed she died of the same poison. At that time he attempted to blackmail a physician who had told him of the poison and he was arrested. Neill then fled to Canada, where he had a doctor in Canada, and had poisoned several girls, and that he had been sent to prison for malpractice in a woman in Chicago. Last September he went to London and was arrested. The evidence against him was so overwhelming that the jury found him guilty in five minutes.

LATER NEWS WAIFS.

At Providence, R. I., the Manville company notified its employees that their wages would be increased on December 5. The amount of the increase was not stated. About 1,500 are employed in the mill. This action is in line with that announced by the large cotton manufacturers of the State last week.

A boiler in the sawmill of John Kirsch, seven miles from Rosebud, Ill., exploded, fatally injuring John Kirsch, Au. Just Vogel and Andrew Frisch. The mill was wrecked.

A family of five persons were killed by a cyclone which passed over the southern portion of Boone county, Ark. More than a dozen people were badly injured. A great deal of property was destroyed.

AN INSANE MAN'S AWFUL WORK.

A German in Chicago Kills Two People and Wounds Two Others.

Herman Siegler, a German, who shows every indication of insanity, shot and killed his wife's father and mother, Henry and Caroline Sties, with whom Siegler and his family lived at 723 North Paulina street, Chicago. Mrs. Siegler escaped to neighbors with her three children, then returned and was shot in the neck by her husband and seriously wounded. Policeman Simonson arrived and was also shot and slightly wounded by Siegler. Simonson then shot him in the side, Siegler did his shooting with a shot gun, which he reloaded several times. The family had had no quarrel. Siegler suddenly entered the parlor and began shooting.

CONVICTS RISE IN MUTINY.

Outbreak in a Spanish Prison Results in Awful Slaughter.

A Reuter dispatch from Tarragona, capital of the province of the same name in Spain, states that a mutiny broke out among the convicts in the prison at that place. The convicts obtained virtual control of the prison, and the troops of the garrison were called to bring them under subjection. As the convicts persisted in refusing to surrender the troops fired upon them, killing nine and wounding 16. The others were then driven back to their cells.

The Chinese empire and dependencies, Mongolia, Manchuria, Chinese Turkestan, Kokonor and Tibet, occupy an area of at least 5,000,000 square miles, or about one-third of Asia. The population is estimated at from 380,000,000 to 450,000,000.

A CRUTE measuring three-quarters of a mile in length, in the logging camp at Clayton, Ore., is described as the longest in the world.

and Talks on Strikes and Immigration.

The sixteenth general assembly of the Knights of Labor at St. Louis completed its preliminary work at Tuesday's sessions, and on Wednesday entered upon the important business of the session. General Master Workman Powderly delivered his annual address, which occupied more than an hour. The reports of Secretary and Treasurer Hays and the general executive board were also heard.

General Master Workman Powderly in his annual address congratulated the assembly upon the present condition of the order, reviewed its many periods of prosperity and depression, and said that although since its inception the membership of the order had ebbed and flowed, yet it was to-day on the increase, and all through the exciting times incident to the presidential election had steadily grown in membership and influence. At no time, however, had the membership exceeded 600,000 in good standing. He deprecated the fact that the tendency of capital was to consolidate and centralize, that of organized labor was to divide into individual units. The result was division of strength, isolation and final death. The crying need of the hour was an organization, in which every interest might be cared for, and in which all might meet on common ground.

General Master Workman Powderly, in length on the question of ballot reform, and on the initiative and referendum scheme, and urging that the General Assembly take specific action on both questions. Mr. Powderly proceeded to dwell in detail on the matter of immigration. There should be a fixed term of years, 10 would be enough, during which the immigrants should be permitted to land, with a view to remaining unless he could prove that he had sufficient means to sustain himself and those depending upon him for one year. Unworthy motives might be attributed to him because of these sentiments, but they were honestly entertained, and no reflections would induce him to change his mind, for he foresaw great danger, not alone to labor but to the whole country, if the immigration question was not heroically handled in the near future.

Regarding strikes and lockouts, Mr. Powderly said that, during the last six months, the people of this land had witnessed such wealth and prosperity, and such a general well-being, as was never dreamed of before. Whether it was at Couer d'Alene at Homestead, at Buffalo or in Tennessee, the unjust which guided the rapacious hand was the same. The underlying cause, which directed these attacks all ran to the same center from all these places. The organization of labor will, if it has sense, take up these questions, and will be able to do so.

The campaign which has just closed, witnessed an interesting, if not a very intelligent discussion of the tariff, but there is more of a revenue legally. They could do it by pockets of merchants, manufacturers and workmen, in one month of the year by the roads and telegraphs than we pay in tariffs in one year. The people had its seed sown with them, must occupy the attention of the industrial organization of the future, and the strike of the future must be a strike for the benefit of the people. They could do it by pockets of merchants, manufacturers and workmen, in one month of the year by the roads and telegraphs than we pay in tariffs in one year.
