Misery Turned to Comfort

Kidney Troubles, Sieepiessness, Distress-All CURED. "Altion, Erie Co., Pa, Feb. 18, 93, "I can truly say that Hood's Sarsaparilla has done more for me than all the prescrip-tions and other medicines I have ever taken. For 14 years I have suffered with kidney troubles; my back being so Jame at times that I Could Not Raise Myself up out of my chair. Nor could I turn myself

about of my chair. Now could I turn myself in bed. I could not sleep, and suffered great distress with my food. I have taken 4 bothes of Hool's Sarshparilla with the most gratifying results. I feel like a new person, and my terrible sufferings have all gone.

Life is Confort compared to the misery it used to be. I can now go to bed and have a good night's rest; can eat heartly without any distress. I am

SUNDAY FAIR A FAILURE. OKLY ABOUT 50,000 PEOPLE WERE THERE. THIS NUMBER VERY FEW WERE WORKING-MEN. WHO WERE EXPECTED TO COME .BY THE THOUSANDS.

There was no great outpouring of the wage workers or any other class at the ex-position on Sunday. The oppressive heat and a heavy storm in the middle of the afternoon accounts in part for the small attendance. On the whole the second open Sunday can hardly be call-ad a process indeed by the stendard of midthe second open similar can hardy be can ed a success, jadged by the standard of pop ular ap roval and the presence of working men, for whose benefit and edification in particular the gates of the Fäfr are open The cafes and the beer gardens in the foreign

The cafes and the beer gardens in the foreign villages were liberally patronized. The New England State buildings and those of Penn-sylvania, New York, Missouri, North Dakota, Utah, Delaware. Maryland and Virginia were locked. Many of the finest exhibits were hidden from view because their exhibits were hidden from view because their exhibits were hidden all the visitors could be were big ornamen-tal booths and show cases disfigured with canvas, wood or iron sheeting. The exposi-tion authorities have no right to remove the coverings without the permission of the exhibitors, and no arrangements have yet been made for unveiling them on Sun-day.

The paid attendance at the Fair on Sun-day.

A dispatch from the Chickgo Recou says: The paid attendance at the Fair on Sun-day was 51.344 adults, and 2,960 children, or about 20,000 less than last Sunday, and many less than attended on certain other days of last week. The directors had confidentially counted on a Sunday attendance of not less than 200,000 to 250,000. Some rain fell thi afternoon, but ir was a pleasant day in thi main. Sunday opening is distinctly a fail ure.

All the Southern buildings were open to All the Southern buildings and Missouri.

FIGURES AWAY OFF. WORLD'S FAIR OFFICIALS FROVE THEY CAN'T GUESS AT A DAY'S ATTENDANCE. Just as the officials were mistaken in their estimates of the Sunday crowds by guess-ing too heavily, so they were wrong in the attendance on Decoration Day. Sunday the officials thought 150,000 persons had paid admissions, and the official figures showed less than 80,000. Their guess of Tuesday's half dollars paid in was under 100,000, while in fact 123,097 paid to enter the gates, and adding an estimate of 65,000 free passes the Decoration day attendance was nearly 190,-000. On the same day in 1876, also one of fine weather, the paid admissions to Fair-mont Park was 89,222. The marble room of the German artsec-tion was thrown open to the public without ceremony.

Fish Recognize Their Food.

Fish Recognize Their Food. It is a well-known fact that sea-anemones have a sense by which they recognize food. This has been studied tecently by Herr Nagel, at the Zoo-logical Station, in Naples, and he has endeavored to localize it. Among other experiments a small piece of a sardine was brought carefully to the tentacles of one of the animals; the tentacle first touched, then others seized the food and surrounded it, and the morsel was swallowed. A similar ball of blotting paper, satu-rated with sea water, brought near in the same way, was not seized. If, however, the ball was soaked in the juice of fish it was seized with the same energy as the piece of fish, but often liberated again after a time without being swallowed. Blotting paper saturated with sugar acted like the other, but more weakly. If saturated with quine, it was refused. the tentacles drawing back.

A Kansas man, B. D. Hanna of Cowley, has a plan for preserving wheat in the bin free from must or weevil. In 1891 he had 1,000 bushels of wheat and placed it in his granary. He first placed a stalk of green hemp in the bottom of the granary, and for every load of forty bushels he placed another stalk or a part of a stalk of green hemp, covering the top, when the granary was full, with ten or a dozen stalks. When he removed the wheat one year later it was bright, plump, and without a sign of must, mold, or weevil.—Live Stock Indi-cator. A Kansas man, B. D. Hanna of cator.

A Matter of Health

I costs more to make Royal Baking Powder than any other, because its ingredients are more highly refined and expensive. But the Royal is correspondingly purer and higher in leavening strength, and of greater money value to the consumer. The difference in cost of Royal over the best of the others does not equal the difference in leavening strength, nor make good the inferior work of the cheaper powders, nor remove the impurities which such powders leave in the food.

Where the finest food is required, the Royal Baking Powder only can be used.

Where the question of health is considered, no baking powder but Royal can be used with safety. All others are shown by official analyses to contain lime, ammonia or alum.
