I had been troubled five months with Dyspepsia. I had a fullness after eating, and a heavy load in the pit of my stomach. Sometimes a deathly sickness would overtake me. becessary to provide for the redemption of the Treasury notes issued for the bullion and any seignorage was to go to the Treasury. It was declared to be the established policy of the Nation to main-tain silver and gold at a parity. The provision of the Bland act requiring the coinage of not less than \$2000,000 and not more than \$4,000,000 worth of silver dollars per month was repealed. The Bland dollar practically ceased in 1891. From January 1 to June 30, 1892, only \$2,445,991 silver dollars were coinage of them has been very small. Since the passage of the Bland act of 1818, about 419,000,000 silver dollars have been coined, of which \$60,000,000 remain in circulation, the balance being covered by silver certificates or are lying wile in the Treasury. During that period the price of silver bullion hasso decreased the price of silver bullion has so decreased that the value of the silver in the dollat has fallen from 01.2 cents to as low as about 48 cents, and is now about 55 cents. Under the Sherman act up to the first of this month, 156,000,000 ounces of silver had been purchased, of which 26,-000,000 had been coined, the balance re-maining in the Treasury. The certificates issued for this bullion have been re-deemed in goid. The bullion in Treasury is now worth about 250,000,000 less than was paid for it.
