The smallest on the list is the university at Fourah Bay, Sierra Leone, Africa, with twelve students and five instructors.

A historical society has been organized in Chester County, Pennsylvania, to mark places of historical interest with memorial stones, beginning with the Brandywine battle-field and following the movements of the American and British forces in the Revolutionary War, so that the line of march may be traced along the roads of the county.

Doctor A. C. Bernays, of St. Louis, is reported by the Star Sayings of that city to have greatly interested Surgeon-General Sternberg, of the War Department, by a discovery that when a man is shot in the abdomen shortly after eating a hearty meal, the danger is much greater. But it is doubtful whether the doctor has popularized himself with the rank and file of the army, because the Surgeon-General announces that the principal lesson he gathers from the information is that soldiers should do all their fighting before breakfast.

Says the New York Independent: "The train robbers have of late become so bold in their operations, not restricting them, as in the past, to the far West, but invading the hitherto unmolested territory of the East, that express and railroad companies have, on the through lines, provided them selves with burglar proof safes, which are absolutely dynamite proof, and train hands with Winchester rifles and repeating revolvers. The summary taking off of a few more train robber will undoubtedly have an excellent effect in preventing future operations.

It is a mistake to suppose that Rus sia possesses great facilities for big undertakings in Asia in the way of free convict labor. As a matter of fact, the convict problem is not less difficult in Siberia than in America, where, as has been seen, there are constant revolts against the employment of prison labor in competition with free labor. The introduction of convicts on to the works of the Traps-Siberian Bailway led to complete disorganization and frequent scenes of violence. Neither the Russian free laborers nor the sol-

THE TIDE IN TRADE TURNS.

A Distinct Improvement in Business Especially Manufacturing, R. G. Dun & Co.'s Weekly Review of

rade, New York, says: The turn of the tide has come. Since the ections there has been a distinct improve-

ment in business, and particularly in man racturing. There is some increase in actual transactions, and much more in the tone of business. Men of all parties feel that there is ground for greater confidence, the silver question being put definitely out of the way and the chance of disturbing action in other respects being lessened, while the right of the people to rule their rulers has been vin-

The people of rule user taxing a dicated. While it is yet too early to look for great changes, there is already a distinct improve-ment in the demand for manufactured pro-ducts since the action on the silver bill, some increase in the output of pig iron and in sales of wool, in the building trades in several cities and the failures for the week latest reported show lower liabilities. In brief, the recovery which began with the silver repeal bill passed continues with im-creased trength. The volume of domestic trade, though smaller than a year axo, showscomsiderably

Creased strength. The volume of domestic trade, though smaller than a year asc, showsconsiderably less decrease than appeared in September or October, the exchanges at clearing houses outside even york being only 17 4 per cent. smaller than for the corresponding week last year. Railroad earnings also exhibit some relative improvement, as the decline for the latest week reported is only 2.4 per cent. although analyzes of the returnshow that the decrease in freight movement, separately considered was decidly larger. Money is sbundent and cheap, for although the commercial demand has quite percept-ibly expanded, the supply accumentated at the chief financial centers is extraordinarily large.

Ine chief infance is the set of chief of the fu-fure monetary affairs since the repeal of the silver bill, and it is the common esti-mate that the result of the election will tend to prevent further scion in the direc-tion of aliver coinage or paper inflation. The failures for the past weeks have been 361 in the United States, sgainet 210 for the same week of last year and in Canada 37, against 26 of last year.

There is no farmer of good sense and good health anywhere in the West, Mr. Morton de clares, who cannot make a good living for himself and family, and that is as well as the majority of men are doing in any other pursuit. The man who owns a farm and sticks to it is certain to profit by it in the future. There is practically no more land to be added to the area of cultivation. The supply of agricultural products has reached its limit in the United States, and must now remain stationary, while the demand will go on increasing every year. This implies a gradual improvenent in prices, and a steady appreciation of the value of farming lands.
