

When Hot

Don't sweat and fret, but keep cool and take Hood's Sarsaparilla. This is good advice, as you will find if you follow it. Hood's Sarsaparilla is a first-class summer medicine, because it is so good for the stomach, so cooling to the blood, so helpful to the whole body. Make no mistake, but get only

Hood's Sarsaparilla

America's Greatest Med. Cine.

Hood's Pills

Take Liver Pills easy to cure. Liver Pills easy to operate.

How's This?

We offer One Hundred Dollar Reward for any case of Catarrh that cannot be cured by Hood's Catarrh Cure. F. J. CHENEY & Co., Props., Toledo, O. We, the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligation made by him in this respect. West & Traux, Wholesale Druggists, Toledo, Ohio.

WALDING, KINMAN & MARVIN, Wholesale Druggists, Toledo, Ohio. Hood's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Price, 75c. per bottle. Sold by all Druggists. Testimonials free. Hood's Family Pills are the best.

I can recommend Piso's Cure for Consumption to sufferers from Asthma.—E. D. TOWNSEND, Ft. Howard, Wis., May 4, '91.

Mrs. Winslow's Soothing Syrup for children teething, softens the gums, reduces inflammation, allays pain, cures wind colic, 25c. a bottle.

Devotional Oxen.

In many parts of Germany it is believed that oxen fall on their knees in the stalls at the moment of Christ's nativity.

Five Cents.

Everybody knows that Dobbin's Electric Soap is the best in the world, and for 25 years it has sold at the highest price. Its price is now 5 cents, same as common brown soap. Bars full size and quality. Order of grocer. Ad.

The reason why ships are not struck by lightning is attributed by German authorities to the general use which is now made of wire rope for rigging purposes, as well as to the fact that the hulls of ships are usually constructed of iron or steel. Thus the whole ship forms an excellent and continuous conductor, by means of which the electricity is led away into the ocean before it has time to do any serious damage.

To Cure A Cold in One Day.

Take Laxative Bromo Quinine Tablets. All Druggists refund money if it fails to cure. 25c.

The Massachusetts State Society of the Sons of the American Revolution has presented to the Connecticut society a bronze marker to be placed on the original grave of General Israel Putnam in Brooklyn.

To Cure Constipation Forever.

Take Cascarets Candy Cathartic, 10c or 25c. I.C.C. Call to outline, druggists refund money.

New Use for Peanuts.

A new use for peanut is developing as the peanut butter industry becomes better understood. The product of the peanut answers in the place of ordinary butter for the table use, and is said to be excellent for shortening purposes, and for gravies, sauces, etc. In point of purity it is well designed for the use of vegetarians who strenuously object to anything animal. There is already a considerable demand for this butter substitute, and it is very probable there will be an enlarged market for the nuts. At present the product of the United States is about 500,000 bags annually, and that of the world is 600,000,000 pounds.—West Coast Trade.

A Chinese Typewriter.

A missionary at Pung Chow has invented a Chinese typewriter machine. The characters number about four thousand, and are on the edge of wheels about a foot in diameter. Twenty or thirty wheels are required to carry all the characters, and two keys must be struck to make an impression. The first turns the wheel, and the second steps it at the required letter, which is then brought down to the paper. The machine is complicated, but the inventor (Dr. Sheffield) hopes to make it more simple. There are 18,000 characters in the Chinese language, each representing a distinct word. The 4,000 in common use have been selected for the new machine.

RELIEF FROM PAIN.

Women Everywhere Express their Gratitude to Mrs. Pinkham.

Mrs. T. A. WALDEN, Gibson, Ga., writes: "DEAR MRS. PINKHAM:—Before taking your medicine, life was a burden to me. I never saw a well day. At my monthly period I suffered untold misery, and a great deal of the time I was troubled with a severe pain in my side. Before finishing the first bottle of your Vegetable Compound I could tell it was doing me good. I continued its use, also used the Liver Pills and Sanative Wash, and have been greatly helped. I would like to have you use my letter for the benefit of others."

Mrs. FLORENCE A. WOLFE, 515 Mulberry St., Lancaster, Ohio, writes: "DEAR MRS. PINKHAM:—For two years I was troubled with what the local physicians told me was inflammation of the womb. Every month I suffered terribly. I had taken enough medicine from the doctors to cure anyone, but obtained relief for a short time only. At last I concluded to write to you in regard to my case, and can say that by following your advice I am now perfectly well."

Mrs. W. R. BATES, Hanstfield, La., writes: "Before writing to you, I suffered dreadfully from painful menstruation, leucorrhoea and sore feeling in the lower part of the bowels. Now my friends want to know what makes me look so well. I do not hesitate one minute in telling them what has brought about this great change. I cannot praise Lydia E. Pinkham's Vegetable Compound enough. It is the greatest remedy of the age."

FOR FARM AND GARDEN.

Shade for Stock.

If there are no trees in the pasture be sure and provide shade by building a cheap shed with roof but no sides. Better gains during the hot days will more than offset the cost. Keep the watering tanks full.

Chemical Weed Destroyers.

Professor Shutt of the experiment farms at Ottawa, Canada, recommends the following very simple compound for destroying weeds and grass: Two pounds of sulphate of copper, or blue vitriol, and six gallons of hot water. Dissolve and apply as a spray, or through an ordinary sprinkling pot. Anyone having considerable trouble with weeds and grass growing on roads and paths will do well to try this effective weed destroyer.

A Rose Umbrella.

A beautiful way to train a rose vine is on a big round frame like an opened umbrella. Instead of old-fashioned flat trellis or a simple fence-like support on which the vine runs wild, make a strong upright post at least six feet high and fasten securely the light supports radiating like the frame of an umbrella. The rose vine should be trained to twine closely around the handle of the umbrella and then made to cover the frame as closely as the branches will grow. A marshmallow, red rambler, or any rose vine can be so trained and be used as a summer house. Nothing could be prettier than such an umbrella well trained and full of roses in all stages of blossoms.

Starting an Asparagus Bed.

Asparagus roots may be planted in spring or fall, but unless the ground is well drained, spring is preferable. Good strong one-year-old roots are best. The soil should be made as rich as possible. If very stony the stones should be removed, as they are much in the way of cutting the stalks. In garden culture it is best to dig trenches about three or four feet apart and twelve inches deep; then put in a layer of manure to fill about half of the trench after it has been packed down. On this put two or three inches of soil on which place the roots, spreading them out in all directions, and cover with fine soil, packing down all around. The plants should not stand closer than two feet in the rows, and as they start to grow more soil should be drawn into the trenches until the surface is level again. All that is necessary during the season is to keep the ground loose and free from weeds.

Level Culture for Potatoes.

Practice of late years is largely in favor of level culture for the best results in potato growing, although the so-called trench system and the hill system have adherents. In former years on new rich soil shallow plowing and planting necessitated the hill system of culture in order to prevent the drying out of the tubers by the sun. As farmers learned the value of deep and thorough cultivation, as well as the advantage of running the weeder or cultivator through the rows before the plants broke through the ground, it was no longer necessary to throw up mounds of earth to protect the tubers. Then again, our best varieties may be grown to maturity in from ten to twelve weeks and protection against late frosts is no longer necessary as it was with most of the popular varieties of twenty years ago. If farmers will keep scrub from seed potatoes, plant them in deep soil and keep them under good cultivation on the level system, there is no reason why paying crops cannot be generally raised.

Chicks in the Hot Weather.

How are the chicks? If they are dying or seem drooping, examine very carefully for lice. If lice are found, and there is not much doubt but that they will be, dust with good insect powder and also dust the mother. Dust her extra well under the wings and around the vent. Rub coal oil on her legs. If they are really a few applications will clean them, and if smooth it will prevent the hen or chicks from having scaly legs. It is best for all reasons to dust the hen and chicks at roosting time and sprinkle coal oil on the under side of the coop. Sprinkle enough so that it will smell quite strong. Sprinkle with oil twice a week; it is much cheaper than having lice.

How Birds Fly and Glide.

Most people accustomed to an open-air life can tell almost any bird by its flight, but it would be difficult for the average man to describe how one bird differs from another in this respect. Scientists have, however, closely observed the motion of the wings, and this is their classification: Gliding flight—A sort of sliding over the air on fixed wings, practised by pigeons and swallows. Soaring flight—Sailing with occasional flaps, as in the case of hawks and eagles. Rowing flight—Progression by the ungraceful flapping we see in ducks, geese, partridges, pheasants and sometimes cranes. Sailing flight—Using the wind alone and going along with it as a barge goes with the stream. Vultures, the albatross and other large and heavy birds move about in this lazy way. Hovering flight—Remaining flapping over a fixed point as humming birds and skylarks do.—New York Journal.

Ostrich-taming in Africa.

Ostrich-taming is a very profitable industry in Africa; there it is computed there are over 150,000 tame birds.

TRADE REVIEW.

Prospects for Peace Encourage Business—Great Demand for Steel Rails—Farmers Holding Back Wheat.

R. G. Dun & Co.'s weekly review of trade reports as follows for last week: Prospects of peace stimulate many kinds of business. In spite of records, depression prevails that delay and hesitation have legitimately resulted from war, and larger contracts are in fact coming forward for iron products, with a better general demand in most industries. The volume of payments for steel rails during the week has been the largest ever known in July, being 8 per cent larger than in 1892 for the month, and for the past week 11.7 per cent larger. Most industrial works have a shorter vacation than usual, with fewer participating than usual. A few labor troubles only call attention to the fact that this season has been remarkably free from such hindrance. In spite of a promise of 700,000,000 bushels this year, the visible supply is 1-1/2 cents higher for the week. The disposition of farmer to hold back their wheat for prices more like those obtainable recently, accounts for receipts of a smaller amount than usual, but exports, including flour, were 2,641,647 bushels, against 2,559,725 for the same week last year, and for five weeks of the crop year 12,474,829 bushels, against 12,571,022 last year. The visible supply is extremely low, but exports at the present rate throughout the year would have little lifting power if the crop is about 200,000,000 bushels more than home needs for seed and food. Corn exports for the week have been only 1,734,347 bushels, against 2,725,000 last year, though the price has scarcely declined.

Cotton is unchanged and crop smaller than last year, but with acreage not quite half of 1 per cent advantage last year, some expect a crop nearly 1,000,000 bales larger. With all commercial and foreign mill stocks 1,100,000 bales larger than a year ago, and American mill stocks also larger to an unknown extent, the crop really foreshadowed cannot be consumed without a revolution in the world's demands for goods.

A rather better demand for staple cotton goods does not relieve the overproduction in print cloths, and goods are practically unchanged in price. Western stiffness in holding wool and the New England wool paper during this way and largely refused, indicates another attempt to tire out the manufacturers, who are actually offering for worsted wool 4 to 5 cents below asking prices, and buying scarcely any. Several mills have closed for the week, rather than pay prices asked for wool. The iron manufacture has, really, if not quite, resumed its full production, except in the valleys, where the summer producers are closing in line. Greater agreement to force prices upward. While there has been large demand for Pittsburgh steel concern, the steel furnaces at work, taking 2,500,000 tons more, the price there does not change as yet, nor does local pig-iron, Chicago, although with much better buying, one southern concern advancing its price 25 cents. Low phosphorus pig has risen 50 cents at Philadelphia, with better demand, but unchanged prices for other grades. The demand for rails includes bids for next winter and next year, a Chicago sale of 4,000 tons for Japan and eastern sales of 9,000 tons for American roads, 5,000 tons for Prince Edwards Island next year, and 24,000 tons deliverable in three years for Mexico. Plates are in unprecedented demand, both East and West, and structural works are full, with large contracts coming forward in all sections. Bars are so much stronger that many mills refuse less than \$1 for iron, though steel bars sell largely at 30 cents.

Failures for the week have been 195 in the United States, against 237 last year, and 21 in Canada, against 29 last year.

Our troops seized 5,000 pounds of rice at Ponce, Porto Rico.

Some persons say they are never influenced by an advertisement.

It is not expected that any one will buy Ivory Soap solely because it is suggested by an advertisement.

If you have never used Ivory Soap, you may be induced to ask some friend about it; should you find—as you probably will—that she is enthusiastic in its praise, then you may try it.

Millions of people use Ivory Soap; they use it because they like it. You too will like it. There is a difference in soaps.

Copyright, 1906, by The Procter & Gamble Co., Cincinnati.

Baltimore and Ohio engine No. 99, which has been just laid aside at Gratton, W. Va., and will be consigned to the scrap pile, has quite a history. It is one of the Ross Winans camel engines and was built in 1851. There are only four of this class of engines now remaining. During the late war this engine was one of several captured at Martinsburg by the confederates, and hauled across the country by pike to Staunton, Va., under direction of Col. Thomas H. Sharp. President John W. Garrett, after the war was over, hunted up Col. Sharp and appointed him Major of Transportation in recognition of the ability displayed in that unparalleled achievement.

There are 1,000 submarine cables in use all over the world, which have cost about \$100,000,000.

Beauty is Blood Deep. Clean blood means a clean skin. No beauty without it. Cascarets, Candy Cathartic clean your blood and keep it clean, by stirring up the lazy liver and driving all impurities from the body.
