Teak Trees 2,000 Years Old. The teak wood of Hindoostan is al most indestructible. The tree reache a girth of from 10 to 15 feet and has a clear trunk of 70 to 80 feet to the first limb. The timber retains its fragrance to a great age. It is a wonderfully hard wood, durable and strong, and once seasoned does not split, crack, warp, shrink, or alter in shape. In certain portions of Burmah there is teak 2,000 RYE—No. 2 red. 45 years old. It weighs 40 pounds per cubic foot. Teak is used in India for construction, bridge-making, sleepers and furniture. It is exported to Europe chiefly for building railway carriages shipbuilding or making decks and lower mosts and for the backing of armor-plates on ironclads. It is pe culiarly useful for the latter purpose, owing to the resingus matter which it contains and which acts as a preventive of rust, the wood neither affecting the iron nor being affected by it.

Untangling Legislation on Patents

A measure of vast importance to the manufacturing and commercial inter-ists of the United States is the act of congress authorizing the president to appoint a commission to revise and amend the laws concerning patents, trade marks, and trade and commercial names. The laws, as they exist are inadequate to the conditions of the day. They are too complex, contra dictory, and susceptible of great fraud The United States courts, in decidin causes on the laws concerning patents have unintentionally done much to ren "confusion worse confounded." is to be hoped that the commission will stamp with its strongest disapproval the use of "Old Glory" and the Gen-eva Cross for purely business advan-These symbols are almost sa-

Novel Way to Clean Machinery The practice of cleaning machinery by means of blotting paper has been established in German workshops. The German workman formerly received on an average 250 grams of cotton waste, one new sponge cloth and one or two renovated ones per week; now he is supplied with 150 grams of cotton waste and eight to ten sheets of blot-ting paper, at a cost of 2½ cents, instead of as formerly, 6% cents. The paper is not only cheaper, but it can not soil the machine with fibers and dust, like sponge cloth and woolen refand it is far preferable to cotton te. Beyond this, it is not so combustible as other cleaning materials.

Entomologists report that of late years the annual crop of files is decreasing rapidly and steadily. The almost universal adoption of electric traction is credited with bringing about this desirable result. It has been this desirable result. It has been stated that stables are the chief breed-ing places for flies, and as the street car horse has been emancipated, the number of stables is growing less, hence the failure of the fly to be born in multitudes as in the past.

Feminine Charity. Helen-What did you think of Kate's new tea gown? Mattie-It was made rather stylish, but didn't you think the colors rather weak? Helen-Yes; but they matched her tea very nicely

MRS. PINKHAM'S ADVICE

What Mrs. Nell Hurst has to Say About It.

DEAR MRS. PINEHAM:—When I wrote you I had not been well for five years; had doctored all the time but got no better. I had womb trouble very bad. My womb pressed backward, causing I was in such misery I could scarcely walk across the floor Menstruction was irregula- and too pro-

fuse, was also troubled with leucorrhœa. had given up all hopes of getting well; everybody thought I had consumption After taking Lydia E. Pink-

ham's Vegeta-

ble Compound, I felt very much better and was able to do nearly all my own work. I continued the use of your medicine, and feel that I owe my recovery to you. I cannot thank you enough for your advice and your wonderful medicine.

Any one doubting my statement may write to me and I will gladly answer all inquiries.-Mrs. NELL HURST, Deep

, Mo. stantly being received, contribute not a little to the satisfaction felt by Mrs. Pinkham that her medicine and counsel are assisting women to bear their 'leavy

Mrs. Pinkham's add. essis Lynn, Mass. All suffering women are invited to write to her for advice, which will be given without cherge. It is an ex-perienced woman's advice to women.

TRADE REVIEW.

Money Coming Over From Foreign Investors-Risa in Wheat Heavy Orders for Iron.

R. G. Dunn & Co.'s weekly review of trade reports as follows for last week: The volume of business is larger than it ever has been. Investors across the water have caught the cue, and their purchases of American bonds and stocks have been heavy for several weeks.

water have caught the cue, and their purchases of American bonds and stocks have been heavy for several weeks.

Wheat has been about Ic higher in price for spot, with western receipts only about as large as those of last year for the week. No doubt some farmers have learned that it is a poor business to hold back for higher prices, and yet very many are doing it, and so are making inevitable a more disastrous decline in prices after a time. Atlantic exports for the week have been 2,325,100 bushels, against 4,243,356 bushels last year, flour included, and Pacific exports, 163,192 bushels, against 13,434 last year. Corn is a shade higher, one estimate promising only 1,750,600,000 bushels.

The cotton year has closed according to the Financial Chronicle, with a yield of 11,180,960 bales in 1887, of which 7,646,055 were exported, 1,856,000 were consumed in northern mills, 1,227,839 in southern mills stocks and 98,991 to commercial atocks. It is but fair to say that the Financial Chronicle makes no calculation of the quantity produced but not marketed, which the New Orleans cotton exchange reckons at 830,000 bales, presumably including cotton owned by southern mills, but not yet consumed.

The European mill stocks, according to Mr. Eillson, are 770,000, against 398,000 bales a year ago; the American 499,775, against 7,966 bales a year ago; the commercial stocks here and a broad, 1,641,000 bales, against 685,000 a year ago, and other allowances leave on hand for the coming year 2,031,000 bales, about as much as was estigated a month ago, and indicate a consumption of 3,083,939 bales in the largest previous year. The increase of 44 per cent in southern consumption during the past three years, with a decrease of nearly 9,3 per cent in northern, is significant.

Nobody can guess how great the demand for iron and steel products may

the past three years, with a decrease of nearly 9.3 per cent in northern, is significant.

Nobody can guess how great the demand for iron and steel products may be a month hence, but the manufacturer has the rare good sense to wait for the actual orders before hoisting prices. So far the advance has been remarkably moderate, in the average of all finished products only 3.3 per cent from the lowest price this year, while pig iron hag risen less than 3 per cent. Orders this week include 10,000 tons rails at Chicago, 5,000 tons pipe at Boston, with 16,000 to 24,000 tons coming at Philadelphia, 10,000 tons plate for a Baltimore shipyard, and heavy orders for bars, rods, and especially sheets, at all markets.

The sales of wool have been only 2,-285,500 pounds at the three chief markets, against 18,101,400 pounds for the same week last year, and 8,812,000 for the same week last year, and 8,812,000 for the same week last year, and an until wool sells at materially lower prices the manufacturer cannot meet the existing market for goods. Prices for goods do not change, and a considerable amount of the mills will shortly shut down unless the situation improves. In the cotton manufacture there is still a fairly strong demand, with print cloths and staple goods unchanged in price, but the stoppage of some eastern mills continue.

Fallures for the first week of September have been in amount of liabilities \$1,111,593, manufacturing \$224,602, and trading \$703,991. Fallures for the week have been 164 in the United States against 215 last year, and 16 in Canada against 35 last year.

Cubans Go to Work.

The Cubans at Santiago have begun to disarm. Two hundred of them came in from their camp at El Cobre the other day, turned their arms over to Gen. Lawton and asked for work.

Of Infinite Patience

Some men are great in silence, some are grand in talk. The Pennsylvania Railroad company has a man in charge of its bureau of information in Jersey City who answers on an average 10,000 questions a day, and the person does not live who has seen his eathers rumpled. Remarkable man! The traveling public can ask more fool questions than any other public on earth; but to interrogate stupidly, earth; but to interrogate stupidly, foolishly, idiotically or otherwise Mr. R. B. Caldwell is to discover a reversal of the Biblical injunction to answer a thick wit according to his asininity Over 300 trains go and come daily at the Pennsylvania station, and all these Caldwell must have at his tongue's end, as well as a complete map of th

niverse.

Caldwell is every one's main dependence. I have heard people inquire after lost parcels. I have heard others "Have you seen a man around here looking as if he expected to meet some one?" "Did a long, thin chap with eye-glasses leave a message here for me?" "Did a young woman with a child tell you she expected her husband to arrive on the Chicago limited? I'm the man." Caldwell knows at sight every politician that travels, every prominent man in public life, every regular and nearly every irregular pa-tron of his road. Being a man of varied knowledge he is in demand among his fellows when arguments wax hot. In political forecasts he has an unbeaten record.-New York Press

Following in Chicago's Lead.
The street cars in Belfast, Ireland,

contain a notice to this effect: "The habit of spitting in a public conveyance is a filthy one, and renders the person so offending a subject for the loathing of his fellow-passengers.' New St. Louis Headquarters

New St. Louis Headquarters.

The Baltimore & Ohio and Baltimore & Ohio South Western Railroads have secured a long lease to the magnificent room at the magnificent room at the purpose of consolidating under one roof the prepose of consolidating under one roof the treight and passenger offices, now located in that city. The new location is the ground floor of the American Central Building with & Steet on Broadway and 85 feet on Locust Street. The ticket office will be in the centre fronting on Broadway, the freight department on one side and the passenger department on the other, with General Agent Orrisoffice in the rear.

It is quite probable that these offices will be even handsomer than the B. & O. New York headquarters, which are the fluest in that city.

THE EXCELLENCE OF SYRUP OF FIGS

is due not only to the originality and simplicity of the combination, but also to the care and skill with which it is manufactured by scientific processes known to the California Fig Syrup Co. only, and we wish to impress upon all the importance of purchasing the true and original remedy. As the genuine Syrup of Figs is manufactured by the California Fig Syrup Co. only, a knowledge of that fact will assist one in avoiding the worthless imitations manufactured by other parties. The high standing of the California Fig Syrup Co. with the medical profession, and the satisfaction which the genuine Syrup of Figs has given to millions of families, makes the name of the Company a guaranty of the excellence of its remedy. It is far in advance of all other laxatives, manufactured by scientific processe far in advance of all other laxatives, as it acts on the kidneys, liver and bowels without irritating or weakening them, and it does not gripe nor nauseate. In order to get its beneficial effects, please remember the name of the Company—

During the civil war nearly as much heroism was shown by the women of our nation as by the brave soldiers. Many a woman weeping for her dead son, bound up the

On the Battlejiett. famed or-ganization known as the Woman's Relief Corps, whose ald to the soldier of to-day, fighting against the world for a living, is no less notable than the heroism of the early 60°s.

less notable than the heroism of the early '60's.

One of the most earnest members of the corps at Byron, Ill., is Mrs. James Houseweart, but illness once put a stop to her active work. A year or so ago, when she was nearing fifty years of age, the time when women must be most careful of their strength, Mrs. Houseweart was taken seriously ill. The family physician told her that she had reached a critical period of her life, and must be very careful. His prescriptions and treatment did not benefit her, and other treatment proved unavailing.

His prescriptions and treatment did not benefit her, and other treatment proved unavailing.

At last Dr. Williams' Pink Pink Fins for Pale People were brought to her notice, with indisputable evidence that they were helpful in cases such as hers, and with renewed hope she tried the reniedy. Last March she took the first box of the pills, which gave much relief. She was determined to be oured, and kept on with the medicine, until now eight boxes have been consumed, and she feels like a new woman.

Mrs. Houseweart said: "I have taken only eight boxes, but I have been improving since I took the first dose. I do not believe I could have lived without the pills. They certainly have done me more good than any physician or any medicine I have ever tried."

Dr. Williams' Pink Pills are sold in boxes (never in loose bulk) at 50 cents a box or six boxes for \$2.50, and may be had of all druggists, or direct by mail from Dr. Williams' Medicine Co., Schenectady, N. Y.

Deafness Cannot be Cured by local applications, as they earn treach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed Deafness is the result, and unless the restored to its normal condition, hearing will be destroyed forever. Nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the nucous surfaces.

We will give One Hundred Dollars for any case of deafness (caused by extarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

Smugglers Folled. Even Saxon courtesy may be carried a little too far. When about to ried a little too far. When about to a frontier from a Bohemian village to a frontier town in Saxony, the occupants of a sledge had their foot-warmers carefully rinsed out and replenished with full-bodied Hungarian wine. Thus they passed the guard post without let or hindrance to the merry fingling of the sleighbells. Laughing and joking at the success of their little dodge, they called at a wayside inn for refreshments. On resuming their seats one of the party exclaimed: "Why, the foot-warmers are quite hot!" Then the boots of the inn stepped forward and said, with a friendly grin: "The foot-warmers were quite cold, gentlemen, so just to oblige you, I emptied and filled them again with hot water."—Weekly Telegraph.
