TREATY SIGNED.

Nicaragua, Costa Rica and Colombia Clear the Way for Isthmian Canal Treaties. Details Await the Senate.

Secretary Hay for the government of the United States and Senator Corcoran, the Nicaraguan minister, for his own government, have signed a treaty whereby the latter government concedes to the United States the right to construct the Nicaragua canal, and to exercise the necessary rights and privileges with it, in her bestowal for the construction of the Nicaragua canal.

Pending the submission of the treaty to the Senate which must ratify the agreement, the terms will be made public. It is understood, however, that generally Nicaraguan grants the canal to the United States and the Pacific coast, including the right to free use of the San Juan river and of Lake Managua as part of the water course. Nicaragua also agrees to free itself of any outstanding treaties that would tend in any way to abridge the privileges of the United States in the canal. It is understood that Nicaragua is to receive in compensation a certain amount of the securities of the canal construction company. It is believed that possible now to learn the figure set down in the treaty, it is figured to approximate \$5,000,000.

GERMAN TRADE NOT FALLING.

American Exports and Imports Show an Increase for the Year. A good deal of anxiety seems to have been wasted with reference to the trade relations between the United States and Germany. Fear was expressed some months ago that trade restrictions proposed by Germany might seriously interrupt the commercial relations between the two countries. The United States, and especially decrease our exports in agricultural products. Figures just issued by the Treasury show that our exports to Germany in the 10 months ending with October, 1909, were \$27,000,000 greater than in the corresponding months of last year, an increase of about 20 per cent., and that our imports from Germany show an increase of \$8,000,000, a gain of over 10 per cent. Of the 40 great articles which compose the bulk of our exports to Germany more than two-thirds show an increase in 1900 as compared with the corresponding months of last year.

Copper shows an increase of more than \$1,000,000, mineral oils \$2,000,000, tobacco \$1,000,000, and manufactured cotton over \$2,000,000 while in the decrease are such articles as wheat, a little more than \$2,000,000.

CAPE TOWN VERY ACTIVE.

Farmers throughout the Colony Buying Arms and Ammunition in Large Quantities. Reports from all the Dutch districts throughout Cape Colony are to the effect that the farmers are buying arms and ammunition, the latter in unusual quantities. In Cape Town the dealers have almost exhausted their supplies, and are encouraged to resist, but no reason is given for these purchases except that game is plenty and that the farmers are afraid of the lion and other wild animals. The Cape Colony is not only a hunting ground, but also a place where the lion is much bolder and even insolent, especially toward the Dutch.

The authorities are not successful in tracing any connection between the Boers of the Transvaal, now in arms, and the Dutch districts in Cape Colony, but no doubt is entertained that such a connection exists, and that the former are being supplied with arms and ammunition by the latter. The Cape Colony is not only a hunting ground, but also a place where the lion is much bolder and even insolent, especially toward the Dutch.

Advices from Pretoria show that the Boers are more active than for a long time past. The British forces exercise no authority beyond their own lines, and any small force apart from the main army is at once attacked. The British troops are being sent to the Cape Colony to excite the enemy to greater activity. There is no sign of relief for the British troops in the Cape Colony.
