

A FAIRY TALE OF INDUSTRY.

The Great Transformation Scene at Sault Ste. Marie.

Few people have any notion of the stupendous operations going on at Sault Ste. Marie, the little Canadian village on the shores of Lake Superior, where an industrial center of enormous magnitude is now being created. "Five years ago the sleepy little Canadian town of Sault Ste. Marie numbered 2500 inhabitants. Past its doors the sulphur waters of Lake Superior, mightiest of inland oceans, emptied into Lake Huron. Untold millions of horsepower energy lay latent in their idly flowing eddies, but only the slow turning wheels of a few old flour mills stood to mark their commercial usefulness, while but an occasional steamer or a paddle-propelled canoe disturbed the tranquil surface. Almost as in a night of metamorphosis has taken place. "Where once was a scattered group of village dwellings, great stone buildings with towers and shafts and connecting passageway now stand, and at their base deep-dug canals wind in and out, spanned by bridges of massive stone. Nine thousand workmen now earn their living in the shops of Sault Ste. Marie, besides the site where five years ago the total population was but quarter of that number. It is a wonderful story, this growth of the little frontier town into a great industrial center.

A Company has been organized in London with a capital of \$10,000,000 to work the extensive ore deposits of Dunderland, Sweden, by Edison's electrical process. As part of the equipment five large capacity steam shovels are being purchased and 40 steel dump cars. The mines are to be worked to supply ore to English furnaces.

Gray Hair

"I have used Ayer's Hair Vigor for over thirty years. It has kept my scalp free from dandruff and has prevented my hair from turning gray." -Mrs. F. A. Soule, Billings, Mont.

There is this peculiar thing about Ayer's Hair Vigor—it is a hair food, not a dye. Your hair does not suddenly turn black, look dead and lifeless. But gradually the old color comes back,—all the rich, dark color it used to have. The hair stops falling, too. \$1.00 a bottle. All druggists.

If your druggist supply you send us one dollar and we will express you a bottle. Be sure and give the name of your nearest express office. Address: J. C. AYER CO., Lowell, Mass.

RIPANS

To say that I am surprised at their action will convey but a slight idea of the value I set upon Ripans Tablets. I derived immediate benefit and to Ripans Tablets am deeply indebted for feeling as I do to-day. If the people of this country knew the efficacy of Ripans Tablets for stomach and head troubles they would be relieved from many afflictions.

The Busy Bee.
How doth the little busy bee Employ each shining second? At school he is most punctual And time has closely reckoned.

How doth the little busy bee Employ each shining minute? By tending to his lesson book And knowing all that's in it.

How doth the little busy bee Employ each shining hour? By doing all for others That he finds within his power.

How doth the little busy bee Employ each shining day? He perseveres, my child, until His will has found a way.

How doth the little busy bee Employ each shining week? He learns just what is right to do And how he ought to speak.

The Tumbling Clown.
To make the clown out of cardboard and paint in gay colors the four pieces you see represented in the accompanying illustration, only there must be two of each, excepting the part that represents the head and trunk of

the clown. That will give you seven pieces—one body, two of trousers, two legs and two arms. Now fasten the pieces together with thread or twine, after having placed them in position; that is, put an arm on each side of the body at the shoulder. Then slip a

ter a little practice you will succeed in moving the thumb (representing the lower lip and chin) up and down while you sing a song in a nasal voice or carry on a conversation with the audience in the voice of an old woman. To make the audience laugh heartily, let the old woman cough and sneeze, and open her mouth wide while she is laughing. To make the deception complete it is advisable to stand behind a sheet drawn across the room and let the doll perform a la Punch and Judy.—New York Tribune.

Clever Egg Trick.
With a large decanter and a hard-boiled egg a novel trick can be per-

formed. The decanter, however, must be quite dry and the egg must be shelled. First drop into the decanter a piece of lighted paper, and as the flame dies out put one end of the egg into the neck of the decanter after the manner of a stopper. In a few minutes the air will cool in the decanter and contract in volume, when the superior pressure of the atmosphere will force the egg through the neck down into the decanter without breaking.

How They Helped Mother.
Teddy and Freddy thought it a shame that mother should have all the house-cleaning to do, and after talking the matter over they decided to help her. Being two very little boys, they didn't know much about it, but they had seen a deal of scrubbing and washing going

threaded needle through the three pieces of cardboard. Draw the thread through and cut it off so that two inches of thread remain on each side. Knot the thread close to the arms on each side. Carry out the same plan with the trousers. Next fasten the legs to the trousers separately in the same manner. Make holes in the hands large enough to permit you tightly to insert a match. By twisting the match you can make the clown go through many interesting "monkey shines." The clown may be made of any size you desire. But if it is several inches high thin pieces of board should be used and stiff wire instead of thread.

The Singing Doll.
The experiment shown in the illustration is bound to find favor with grown up people as well as with young folks. All you have to do is paint

two eyes, and underneath them a nose, on the knuckles of your index and third finger, as shown in the lower part of the illustration. The thumb pressed against the index finger and moved up and down will represent a toothless mouth. The knuckle of the index finger forms the nose, above it are the eyes. By draping the face with a towel we have the feature of an old woman, especially effective when the light is not very bright. Af-

CURRENT TRADE IS GOOD.

Volume of Business Is Large—Future Prospects Bright, Liberal Buying in Leading Markets.

R. G. Dun & Co.'s Weekly Review of Trade says: Fuel scarcity is still the one serious industrial handicap. Protracted idleness at anthracite mines increased the pressure for soft coal and coke, and despite new records of output, deliveries are utterly inadequate owing to the lack of motive power. This freight blockade of coke trains has closed many furnaces, while the increasing call for transporting facilities on crop account gives little prospect of early relief. Notwithstanding the congestion, railway earnings this far reported for August show gains of 3.4 per cent over last year and 17 per cent over 1909. Weather conditions have been less uniformly favorable for agricultural products, yet no severe loss is reported. The current trade is of good volume for the season, while the outlook for the future is bright. Buyers are numerous in all the leading markets, placing orders liberally at well sustained quotations. As the active blast furnace capacity of this country decreases through want of fuel, foreign pig iron is purchased more freely, and Scotch warrants have advanced because of the steady demand. Domestic needs are now far beyond all precedent, and even with the available home capacity active there would be imports, although less than is now arriving. There is much that is gratifying in this state of affairs, but there is also a drawback. During the recent period for exceptional domestic demand many export orders have been sacrificed, which German and Belgian makers secured. Textile mills are well occupied, business gradually increasing in the cotton goods division, and demands for quick delivery emphasize the fact that stocks are low and requirements for consumption are pressing. Export trade in brown cottons is insignificant, but more inquiries are reported. New lines of light weight woollens and worsteds for spring wear are now fully opened, and buyers are placing much business. Quotations are steadily maintained. There is some evidence that supplementary orders will command higher prices, especially if raw wool makes any further advance. Footwear shops at the east have assurance of full operation for two months, although there is much complaint of quotations in connection with the sensational movement of the material. Packet hides at Chicago have attained new high record prices, and oak sole leather has advanced. Staple products average somewhat higher in prices, owing to less uniformly good news from the agricultural sections. No serious disaster occurred, but excessive rain retarded the development of grain and interrupted harvesting. Coffee recovered from within an eighth of the lowest point on record, rumors of frost in Brazil proving more potent than overwhelming supplies. Failures for the week numbered 207 in the United States.

MOTHER AND DAUGHTER

Cured by Peru-na of Systematic Catarrh.

An Interesting Letter From Mrs. M. K. Bousch, of Richmond, and Her Little Daughter, Pearl.

"I had catarrh all through my system for two years and could get no relief. I was advised to try Peru-na, and I have taken five bottles of it and am well and better now than I have been for years. I can advise any one who has catarrh of any part of the body to take Peru-na. My little girl, who is eleven years old, had catarrh, but was cured by Peru-na. Before I began to take Peru-na I was sick all the time, but now I am entirely cured and all praise is due Peru-na."—Mrs. M. K. Bousch.

Mrs. M. K. Bousch, Richmond, Va., writes: "When I was a baby I contracted catarrh, and was doctored by several good physicians, but none did me any good. My mother was taking Peru-na at the time and gave some of it to me, and I soon began to improve, and am now well and fat as a little pig. I am twelve years old. The doctors told mother I had the consumption, but it was only catarrh."—Miss Pearl Bousch.

It is no longer a question as to whether Peru-na can be relied on to cure all such cases. During the many years in which Peru-na has been put to test in all forms and stages of acute and chronic catarrh no one year has put this remedy to greater test than the past year.

Peru-na is the acknowledged catarrh remedy of the age. Dr. Hartman, the compounder of Peru-na, has written a book on the phases of catarrh peculiar to women, entitled, "Health and Beauty." It will be sent free to any address by The Peru-na Medicine Co., Columbus, Ohio.

If you do not derive prompt and satisfactory results from the use of Peru-na, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of the Hartman Sanitarium, Columbus, Ohio.
