MILFORD - NEW YORK

NOT IN ANY TRUST

Many newspapers have lately given currency to reports by irresponsible parties to the effect that **THE NEW HOME SEWING MACHINE CO** had entered a trust or combination; we wish to assure the public that there is **no truth** in such reports. We have been manufacturing sewing machines for over a quarter of a century, and have established a reputation for ourselves and our machines that is the envy of all others. Our "New Home" machine has never been rivaled as a family machine. It stands at the head of all High Grade sewing machines, and stands on its own merits.

The "New Home" is the only really HIGH GRADE Sewing Machine on the market.

It is not necessary for us to enter into a trust to save our credit or pay any debts we have no debts to pay. We have never entered into competition with manufacturers of low grade cheap machines that are made to sell regardless of any intrinsic merits. Do not be deceived, when you want a sewing machine don't send your money away from home; call on a "New Home" Dealer, he can sell you a better machine for less than you can purchase elsewhere. If there is no dealer near you, write direct to us.

THE SPORTING WORLD

The Designer of Shamrock III, William Fife of Fairlie, Scotland, is the designer of Shamrock III, the new and third challenger for the America's cup built by Sir Thomas Lipton, and his previous experience in constructing racing craft should make him a dangerous man for American designers to oppose. Fife has the assistance of George Watson, designer of Shamrock I, and consequently the coming challenger will represent the highest type of a British racing machine.

Although many diversified reports concerning Lipton's new boat have been received on this side of the Atlan-

WILLIAM ("WULL") FIFE.

tic, but little is definitely known as to the details of its underbody. Certain it is, however, that the vessel is fashioned on the same general lines as the Columbia, which Charlie Barr twice sailed to victory. Shamrock III will be built of aluminum and steel, whereas our ninety footer is to be constructed of bronze.

Young Corbett's Temper.

Young Corbett seems to be very much nettled and his temper to have been stirred up by the refusal of two states to permit his championship battle with McGovern. When told that Jimmy Britt, the Californian, had included him in his offer to knock him out in ten rounds or forfeit \$5,000, the champion made this reply: "Britt has been making all kinds of offers to me. Now, I'll make him one. I will agree to stop him in ten rounds for \$10,000 side bet if he will make 128 pounds. I am featherweight champion. Britt is a lightweight. He is now matched to box Frank Erne at 185 pounds at 6 o'clock. I'm fighting men in my class. Britt would do well to do the same or keep quiet."

Slosson to Play Abroad.

When the world's championship billiard tournament begins in Paris in a few weeks, George Slosson will be one of American's representatives. "The Student" will shortly sail for France and upon his arrival will prepare for the tournament, which will be opened with the preliminary round on Dec. 15.

The championship event, which has such experts as Vignaux, Cure, Fournie and Gibelin entered, will be eighteen inch balk line, two shots in, and it is expected that another championship will be played at eighteen inch balk line, with one shot in.

Wishard and the Drake Stable.

Enoch Wishard, the noted trainer of the John A. Drake stable, recently arrived at Lexington, Ky., to superintend the shipping of the Drake yearlings to Nashville, where they will winter. It is reported that Wishard will also make an offer for the crack colt Lem Reed, Imp. Victory—Mertie Reed, which Owner Wesley Fields says can run a mile over the Kentucky association track in 1:40. This feat has been accomplished by no horse since Ducat's time. Fields wants \$10,000 for Lem Reed.

Dan Patch's Long Stride.

Dan Patch is a tremendously long striding horse. Actual measurement at Memphis showed his stride at top speed to be 20 feet 9 inches. He is also very bold gait, especially for a pacer. In addition he has a little lost motion behind, not being a pure "line" pacer, but having a slight outward swing in his stroke that, when all conditions are not favorable, must surely impede his progress, if but a trifle.

California Rowing Coach.

Henry Peterson, the veteran Californian oarsman, who held the world's championship in the eights, has been signed as trainer for the University of California crews. The Californians have never made much of a showing in aquatic in the past, and the employment of Peterson is for the purpose of booming this branch of sport.

Mullen Refuses Big Offer.

George Mullen of the Detroit American league team has announced that he has refused to accept an offer of \$4,000 a year which had been made him by President Robison of the St. Louis National league. He has signed a Detroit contract and says he will play in that city next season.

HINTS FOR FARMERS

Have a Rural Phone Service.

The farmers in the vicinity of Grand Rapids, Wood county, Wis., wanted cheaper telephone service, so banded together and formed a company for themselves, says an exchange. An earnest, reputable citizen acted as leader, aided by a number of reliable assistants. They got out articles of incorporation and a city franchise on the mutual plan, then divided the work and procured rental contracts. When a sufficient number of telephone users had been obtained as subscribers to the new stock, a meeting of the stock subscribers was called and the organization completed by electing a board of directors.

Then the projectors tried to get their machines into the leading business places. The telegraph company at first refused to put the new phone into its office, but as soon as it realized the old company was defeated it wanted the new phone. The monthly rentals never exceed \$2.25 for business and \$1.25 for residence phones, less than half the prices charged in most places by the old monopoly. Most thrifty farm homes in that section are united by the new farmers' telephone line. Every rural community should own and operate its telephone system. Several independent manufacturers furnish the necessary outfit. There is no mystery about it.

Eggs In Winter.

At a New York state farmers' institute the reader of an essay on poultry gave his method of feeding to get eggs in winter. Take one part of corn and two parts of oats and have them ground together quite fine. To 200 pounds of this add 100 pounds of ground wheat or of bran and middlings. To ten quarts of this mixture add one quart of animal meal and moisten with skim milk if you have it. Feed this in the morning in V shaped troughs, giving as much as they will eat in fifteen minutes, and gather up what is left at that time. At noon give green feed of cabbage, beets or turnips cut up. An hour later give light feed of small grains scattered in chaff or straw. The night feed, at 3:30 p. m., is equal parts of wheat, oats and corn scattered in the straw, so that they will work until dark to find it. Keep oyster shells where they can pick them when they please. Have dust both of road dust or coal ashes for them and provide plenty of fresh water. Use kerosene oil on the roosts and insect powder in the nests. With early hatched pullets or young hens through their molt this gives eggs all winter.

Why Do We Plow?

Some one has said that after we know the why it is easy to determine the when and how, therefore we might ask, why do we plow? says L. W. Lighty. To make a seed bed for the next crop would be the general reply, but there are a number of specific reasons. To turn under manure, trash or undesirable plant or sod. If a field is badly infested with a perennial weed, setting the earth up on edge, covering the top and exposing the roots often work wonders in cleaning up foul land.

Potato Crop and Prices.

While there is considerable complaint in parts of New York and Vermont as to the condition of the potato crop with advanced prices, yet reference to the government crop report shows a general yield throughout the country above the average. All the large potato growing states except New York and Michigan report a yield per acre considerably above their ten year averages. This year's average yield per acre is 95.4 bushels as against only 65.5 bushels in 1901 and 80.8 bushels in 1900. Though potatoes may be scarce and high in some localities, yet the heavy crop throughout the country and the modern transportation facilities will prevent any marked general advance for the present.—American Cultivator.

Cowpeas With Corn.

A correspondent of the Southern Cultivator says he planted an early variety of cowpeas with his corn and again planted peas when laying by, so that all through the growing season the ground was shaded by the peas. The result was the heaviest yield of the largest ears of corn he had ever raised. This brings up a rather new question, Do cowpeas furnish nitrogen to the corn growing with them? If this correspondent states facts, there is a strong presumption that they do and that the shading of the ground also helps the corn. This is a matter that should be subjected to a systematic test.

A Favorable Fall.

Excepting for accident or sickness there has been but little excuse this fall for farmers not getting their work in excellent shape, says Stockman and Farmer. The weather in most sections has been all that could be asked for. Frost injured but few crops. While it has been too dry in some places for best results in seeding, as a whole the wheat crop has a fair start for winter. The weather has been ideal for the feeder, and live stock has had a good opportunity to make a good showing for the grain consumed.

FOR THE HOUSEWIFE

Rooms With Expression.

An expressionless room is no longer tolerated by people of refined taste, while rooms that mean something become more popular every day, and of these the colonial room, the oriental room and the deift room seem to have the largest number of admirers. The oriental room is particularly good when there are north windows and a warm, cozy effect is desired. The colonial style is not well adapted to small rooms, but under proper conditions it is decidedly satisfactory, and it appeals strongly to the wealthy, for it usually represents a large expenditure. These rooms are most attractive in delicate tints, and since cheap stuff will not take the dye in these tones it is impossible to produce cheap imitations, a fact very gratifying to the exclusively inclined. The deift rooms are most easily attained by the artistic housewife of small means, and this style is a real friend in need, for it can be made wonderfully pretty at little expense. There are beautiful cretonnes in deift and white that work into the furnishings most satisfactorily. Then there are white curtains embroidered with blue in deift patterns that are exquisitely beautiful, and rugs in deift and white may be obtained so cheaply that almost any woman may have one by doing without a new street suit. In upholstery hangings choose the bordered ideas if you want the latest. You can find them in the materials designed for almost every style of room. And that reminds me. If you can't achieve a room with expression, have a cozy corner and be happy, but don't put a Japanese cozy corner into a colonial room. That would suggest a crazy idea that no room would be willing to express if it had a voice in the matter.

Orange Cake.

Beat to a cream the yolks of four eggs with one cup of granulated sugar, to which add the whites of two eggs beaten to a stiff froth and a half cup of milk alternately with one and a half cups of sifted flour into which a teaspoonful and a half of baking powder has been well mixed. Beat well and bake, in three layers if the pans are large or four if small, in a quick oven from seven to ten minutes, try with a broom straw, and when it comes out clean remove from the oven. Don't let them bake a moment too long, or they will not absorb the icing. Filling: The whites of two eggs beaten to a stiff froth, to which add a cup of powdered sugar, pouring it in all at once and beating hard; then the grated rind of an orange—select one dark in color—and the juice. The mixture should be like a thick cream. Spread thickly on the cake while hot, and to what is left add enough sugar—about half a cupful—for frosting to harden. Ice the top and sides. This is a delicious cake, easily and quickly made.

A String Box.

A square cardboard box not less than five inches across should be used for the foundation. It should be lined with some pretty colored paper and covered with brocade, embroidered linen or fancy paper, which should be cut exactly to size and fixed carefully on by glue or secotine.

On one side two little pointed tabs are fixed by tiny stud buttons to form a case for the scissors. On each side of the lid a small pointed tab is fixed, which fastens to stud buttons sewed to the sides of the box itself.

A hole is bored in the center of the lid for the end of the string to pass through.—Young Ladies' Journal.

Salmon Loaf.

Take a can of salmon, four eggs beaten light, four tablespoonsful of melted butter and a cup of breadcrumbs; chop fish fine and season to taste with salt and pepper; stir in butter with a silver fork until a smooth paste is formed; beat the breadcrumbs into the eggs; then work all together, form into a loaf and steam an hour; serve cold, sliced thin.

To Cleanse Milk Vessels.

Wash vessels which have contained milk in cold water first and afterward scour them with hot water and soda. The use of cold water first insures greater cleanliness, for plunging at once into hot water is apt to set the milk and cause it to hang about the cans and pans to the detriment of the milk which is afterward placed in it.

The Gas Stove Toaster.

A toaster for the gas stove is like any other toaster in the upper part, with wires and a long handle, but below it and with supports which hold the toaster away from the fire from one-half to two inches is a piece of wire gauze through which the gas flames cannot pass.

Quaint Frames.

Quaint frames can be easily made by covering an old wooden frame with very rough sacking and then gluing on to one side a spray of dried grasses, Gold or silver the whole, and you will have a delightfully quaint and at the same time very inexpensive frame.

ALFRED SPEER.

THE ORIGINAL
Port Grape Wine Producer in America.

The first native wine made and used in San Francisco and Sacramento was from Speer's vineyard, N. J. vineyards, was shipped around Cape Horn. There was no railroad to California, and are now being used by physicians and first families. It is as the richest and best wine to be had.

The juice of the Port Grape Wine grape grown in N. J. is thick and rich same as the price of pears and other fruits grown here. From California pears you can squeeze water as from a sponge, so with all fruits grown in California; while those grown in New Jersey are solid in substance—less juice but thick and richer. The New Jersey apples, for instance, make a cider that was always popular the world over. If you want a wine for sickness or for entertainments don't take cheap, watery wines but choose a first class old, full bodied, high grade wine from Speer's Passaic vineyards. Sold by Druggists.

A WONDERFUL WORK.

To be a man who can excel one hundred thousand men in any one line is good; to be one in a million is better; but to be the only living man (and the only one in the world) who has drawn a perfect picture, is wonderful. This Mr. Fleming, author and illustrator of "Around the Pan," and "Around the Capital," (\$2.00 books) has done in his drawing of the "Around the Capital" paper, \$100,000 worth of work. His "Around the Capital" contains one full-page Washington life pen and ink sketches and five hundred pictures of prominent Americans, including the states and commanders of the Spanish-American War—comprising a collection of facts and figures in one volume, will interest the entire civilized world. The drawings do not surpass, in fact, for which those of John Ten Eyck, for which Queen Victoria was knighted by the Emperor of Austria. The honor is SENATOR QUAY, THE CARE OF PENNSYLVANIA. SHELL PUBLISHING COMPANY, New York, U. S. A.

Star Feed Grinder

Will grind Ear Corn and all kinds of small grain into a first-class Chop-Feed. By its use the farmer saves his grain, toll, hauling his grain to the mill; improves his stock and lines his pocket-book.

Write us for book on Ground Feed and Feed-Grinders.
