About twenty seconds is required to kill the hair are painful, as well as very tedious, forly and fifty hairs may be destroyed as a stitug and without injury to the most dedicate skin, of course the teatment is only practicable when there is a growth of coarse irregular hards on the arms cannot be removed by this method, the larks are too attainerous, and the rest thing to use for the growth on the arms cannot be removed by the arms of the fact the fine the formation is to under the fall the perhaps beyond remedy. About twenty seconds is required to kill the hair are the injection of the electric needle. While the operation is to under the children of these sky brothers under the children of these sky brothers and the children of these sky brothers under the children of these sky brothers and the children of these sky brothers in the back longer in front, and very much fuller the front and very much full

TWENTY SEVEN SHARKS Caught on One Hook When Deep Ses Fishing Was Good. "Did you ever hear of catching twen-ty-seven sharks with one hook?" asked

Pishing Was Good.

"Did you ever hear of catching twenty-seven sharks with one hook?" asked Bo's L. W. Eacott of the British bark Antigua, recently. The bark Captain Brady Hes' at the foot of Richards street, Brooklyn.

"I never heard tell of such a thing until fair and full winds left us on the homeward way from Buenos Ayres, just above the equator. The ship hadn't been becalmed in the tropics more'n fifteen minutes when along came an ordinary sized shark nosing around.

"Word was passed up forra'd and a chunk of pork as big as my head was baited on a hook and cast astern. The shark took right hold and we hauled it alongside and aboard.

"It was a peculiar kind of shark that didn't have no teeth whatever, and its tail, which had two flukes to it, was about half as long as its body.

"Well, we cut open the shark to see if we could find any curios inside. There were no curios, nor nothing of that sort. All there was in that shark that we could find was twenty-six little sharks, so that made twenty-seven sharks all toid caught with one hook.

"The little ones were about six inches long, all alive, and all were toothless and having white stomachs.

"I wanted the cook to make a shark stew, for young shark is tender and good eatin', but the other hands wouldn't listen to it, so we threw 'em all overboard and the cook put another bit of beef in soak."—New York World.

all overboard and the cook put another bit of beef in soak."—New York World.

## WISE WORDS.

The process of repentance is bitter, but its fruits are sweet.

A changed life and a changed mind are both essential parts of true repentance.

You cannot start the fire of feud without getting the smoke in your own eyes.

An instantaneous perfection would be as valueless as an instantaneous education. A man is diligent to cultivate his corn, but expects his character to grow

without. No girl can be provident of her time who is not prudent in the choice of her

company. Don't keep any company in your heart that you have to apologize to

yourself for. One thorn of experience is worth a whole wilderness of warning.—James Russell Lowell.

There is more danger in the under-

ground currents of desire than in the over-head winds of temptation. When we look on the world as our own plum we are almost sure to find that we have eaten it too green.

Civility is a charm that attracts the love of all men, and too much is better than to show too little.—Answers.

Where Skulls Are in Demand.

In the northern Shan States, on the border of Burma, is a tribe called the Wild Was. These people propitiate with human skulls the demons whom they worship. Outside every village in their country there are many posts, all in one line, decked with human skulls. A niche is cut in the, back of each post, with a ledge on which the skull can rest and grin through a hole in front of it. Every village has a dozen and some as many as a hundred dozen and some as many as a hundred dozen and some as many as a hundred of these head posts. Fresh skulls are in special request at harvest time and are purchased for large sums, those of distinguished visitors being particularly desired. So, as Mr. Scott, the British superintendent of the States, remarked some years ago: "The Was States are, therefore, no place for missionaries."

The Research Assistants.

There is one feature in the work of the Carnegie Institution, which is of widespread importance, and that is the selection of twenty-five "research assistants," to each of whom is given a sum of \$1000 or \$1200. These "research assistants" are for the most part young persons who have already been well trained and are prepared to prosecute definite lines of investigation under the guidance of older, higher qualified leaders. These men are not alfied leaders. These men are not aluse of that word, nor to engage in instruction.

United Ages Mark 480 Years.
Six Shaffer brothers, sons of John Shaffer, of Highland County, Ohio, were photographed in a group at Hillsborough, Ohio, a short time ago. The oldest is eighty-six years of age, and the youngest seventy-four, Their united ages amount to 480 years. Their father's children numbered thirteen, and the children of these six brothers number, respectively, eleven, eight, nine, thirteen, twelve and five, giving the list in the order of the fathers' ages.
