

EVERY WALK IN LIFE.

A. A. Boyce, a farmer, living three and a half miles from Trenton, Mo., says: "A severe cold settled in my kidneys and developed so quickly that I was obliged to work on account of the aching in my back and sides. For a time I was unable to walk at all, and every make-shift I tried and all the medicine I took had not the slightest effect. My back continued to grow weaker until I began taking Doan's Kidney Pills, and I must say I was more than surprised and gratified to notice the back ache disappearing gradually until it finally stopped."

The Bishop's Excuse.

The late Bishop Beckwith of Georgia was fond of his gun and spent much of his time hunting, says a representative from that State. One day the Bishop was out with dog and gun and met a member of his parish, whom he reproved for inattention to his religious duties. "You should attend church and read your Bible," said the Bishop. "I do read my Bible, Bishop," was the answer, "and I don't find any mention of the apostles going a-shooting." "No," replied the Bishop, "the shooting was very bad in Palestine, so they went fishing instead."

On the occasion of the hundredth anniversary of the death of Schiller (May 9, 1805), the Swiss Government intends to give every pupil in the public schools a copy of that poet's play, "William Tell." The sum of \$20,000 has been set aside for this purpose.

Deafness Cannot Be Cured by local applications as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever. No case of deafness caused by catarrh of the ear can be cured by local applications, as they are not absorbed into the system. We will give One Hundred Dollars for any case of Deafness caused by catarrh of the ear, if cured by Hall's Catarrh Cure. Send for circulars free. F. J. CENNY & CO., Toledo, O. Sold by Druggists, 75c. Take Hall's Family Pills for constipation.

A man brought up at St. Albans as an incorrigible rogue was proved to have married his aunt. His children are, therefore, his first cousins and he is his own uncle. His grandmother and her mother-in-law are the same person. Apparently the judge sympathized with him, for he was discharged.

Beef and Football.

As now played in our colleges and universities, football is confined entirely to men of great weight and power, with the exception of the quarterback, who must still be an alert and comparatively light player. Vigorous and active men of 160 to 170 pounds, who would have stood a chance of making teams 10 years ago, must now confine their ambitions to the second elevens or drop out altogether. Skill, speed and dash have given way to mere beef and brawn. —New York Evening Post.

Distributed 70,000 Bibles.

The eighteenth annual report of the New York Bible Society, which has just been issued, shows a distribution during the past year of 71,426 volumes of the Scriptures in 30 languages. Of this total, 42,408 volumes went to immigrants on Ellis Island, 9,778 volumes were placed among sailors in this port, 6,297 volumes were taken by churches, Sunday schools, missions and public institutions, and 12,943 volumes were placed in the hands of individuals or left in homes by the society's agents. —New York Times.

Webster's International Dictionary. Contains 25,000 New Words, Etc. New Gazetteer of the World. New Biographical Dictionary. 2,350 Quarto Pages. Should be in Every Home, School, and Office. Rev. Lynn Abbott, D.D., Editor of The Outlook, says: "Webster has always been the favorite in our household, and I have seen no reason to transfer my allegiance to any other dictionary."

Duff's College. Gives a broad-winning education, fitting young men for actual duties of the Post Office. Address: P. DUFF & SONS, Pittsburgh, Pa.

Dropsy New Discovery. Give quick relief and cures dropsy, edema, and all other ailments. Address: P. N. U. 50, 1904.

Piso's Cure for Constipation. Cures all cases of constipation, indigestion, and all other ailments. Address: P. N. U. 50, 1904.

FARM TOPICS.

HOG NOTES.

The best way of using cooked feed is to mix with some bulky material. If there is any one animal that enjoys comfort above another it is the hog. Feeding buttermilk tends to constipation. Giving a little oil meal will overcome this tendency. While the growing pig should never get so fat as to be unable to get up, the vicious feeder that makes a cannibal of the sow. For perfect comfort, shelter must be given along with liberal feeding. Usually it is not the stupid sow, but the vicious feeder that makes a cannibal of the sow. The good strains of pigs must be kept so by proper care, intelligent and "stick to it" feeding. Instead of early maturity being against the proper development of constitutional vigor, it is a great step to secure it.

TEACHING HORSES TO BACK.

It has been well said by a horseman that a horse knows only that which he has been taught, and after becoming used to the halter, young horses are easily taught to back by the trainer pressing the fingers of one hand between the point of the shoulder and the breastbone and using the other hand at the halter strap simply to keep the colt straight in line, to back in the colt backward by yanking at the halter or bit, but simply press on this sensitive chest cavity with the fingers, and the colt will naturally go backward, provided there is nothing of an obstruction behind it. When this pressure has been made to the front and the colt has moved backward (if it is only one step) it should be rewarded for this action; then try it again. About the third time this pressure has been made it is a good time to associate the word "back" with the pressure, and the reader will be surprised to see how soon the colt will comprehend what is wanted and how willingly the young thing complies with our every wish as soon as it understands what is wanted. —Indiana Farmer.

CROP ROTATION.

The Minnesota Station has studied the effects of the rotation of crops upon the humus content as well as upon the fertility of the soil. Wheat grown continuously for four years removed annually twenty-five pounds of nitrogen per acre, while 146 pounds were lost. This nitrogen was lost by the oxidation of the humus, by denitrification chemically, by wind storms, and through the loss of nitrates by drainage. As a crop of spring wheat occupies the ground during a short portion of the year, it may be seen that during the greater part of the year the other factors are at work in eliminating this element. In a rotation of wheat, clover, and oats, an average of 178 pounds of nitrogen per acre was removed annually, yet there was a gain for four years over and above this amount of 245 pounds of nitrogen. This nitrogen, it is believed, has been gained largely by the clover from the free nitrogen of the air. In this rotation not only was the nitrogen and humus content of the soil increased, but larger crops were grown.

The North Dakota station has taken up the study of a suitable rotation for the wheat farm. Experiments carried on for six years show that continuous wheat culture is unprofitable, while wheat in rotation increases in yield and improves in quality. Three crops of wheat and one of clover gave in four years almost as much wheat and more profitable returns than four crops of wheat in succession. Little was gained in rotating wheat with other cereals, as spring rye, barley and oats, but wheat after a cultivated crop gave a larger percentage of increase than wheat after summer fallowing millet, timothy and clover, flax, field peas, or peas and millet. The increase in the wheat crop over wheat after wheat was as follows: After cultivated crops, seventy-five per cent; after fallow, sixty-three per cent; after millet, forty-one per cent, and after timothy and clover, thirty-three per cent. When a cultivated crop will only pay for the labor of its production it is better than summer fallowing, as the succeeding wheat crop will show. A rotation for dairy farms recommended by the New Jersey station consists of (1) field corn, seeded to crimson clover in July or August; (2) crimson clover, followed by fodder corn, land seeded to winter rye; (3) rye fodder, followed by oats and peas; seeded to red clover and timothy; and (4) hay.

Some of the reasons for crop rotation are: All plants do not draw an equal extent upon the mineral ingredients of the soil. They send their roots to different depths and have a different solvent action upon the constituents they reach. By rotating crops insect enemies are more apt to be dispersed. Fungous diseases may also be materially reduced. The soil is maintained in good till, and bacteria which are beneficial for the plants are more likely to be increased. Weeds are more readily eliminated, the humus compounds of the soil increased, and the work of the farm more easily distributed. —U. S. Department Agriculture.

Of the ancient pagodas of Manchuria those of the first class have seven, nine or thirteen stories, while second-class ones have from three to five. They are still erected occasionally.

FINANCE AND TRADE REVIEW.

OUTLOOK PROMISING.

Predicted That Next Year Will Establish Remarkable Record in Industry—Trade Grows Steadily.

R. G. Dun & Co.'s "Weekly Review of Trade" says: Holiday goods are moving freely, and in staple lines there is more activity, even the products that are between seasons finding a fair market. Packing and shipping departments are increasing forces, and traffic congestion at several points indicates that the growth of business has overtaken railway facilities. Earnings of all roads reporting for November show an average gain of 7.1 per cent over last year. Weather conditions have favored jobbing and retail distribution of heavy wearing apparel, and also accelerated the marketing of new corn, but there is not sufficient moisture for winter wheat or coke production. A record-breaking yield of cotton is bringing the price nearer the point at which normal consumption may be resumed, although there is still much idle machinery at Fall River. Other manufacturing news is most gratifying, especially regarding the leading lines. Structural work increases, and car shops are crowded with orders, while many idle steel mills have resumed.

Foreign commerce at New York port for the last week shows an increase of \$2,044,398 in value of imports, as compared with last year, and a loss of \$2,035,171 in exports. Relations between supply and demand in the iron and steel industry must be largely in favor of the producer when quotations advance steadily without checking distribution. That these are not artificial changes is evidenced by the liberal movement, and contracts running into next year indicate that 1905 will establish a remarkable record in this industry. Increased offerings of native steers at 14 cents by Chicago packers tended to weaken the Chicago market, but, although branded varieties are still firmly held, and a large advance occurred in foreign dry hides. Leather is stronger. Eastern footwear factories are placing samples for next fall. Prices are firm. Although the decline in price of raw cotton will ultimately prove of great benefit in restoring activity at the mills, the first effect was to check business, as buyers were naturally inclined to look for better times.

Commercial failures this week in the United States are 245, against 205 last week, 217 the preceding week and 331 the corresponding week last year. Failures in Canada numbered 29, against 33 last week, 27 the preceding week and 23 last year.

MARKETS.

PITTSBURGH.

Table listing market prices for Grain, Flour and Feed in Pittsburgh, including items like Wheat, Rye, Corn, and various feeds.

Living in Clover.

There is a wonderfully clever fellow in New York who says he lives on the fat of the land yet never buys a meal. His hosts are life insurance agents. This is his tale of gloat: "Why shouldn't those chaps pay for my meals and drinks? They give me trouble enough. They hounded me nearly to death to take out a policy for \$20,000, and now I'm getting even. I promise 'manana, manana,' like the Mexican, but tomorrow never comes. In the meantime they treat me to the finest in town. Agents of four companies are after me in heated rivalry, and I'm playing one against the other. Of course, they'll tumble to me after a while, but I'm making hay while the sun shines. 'One generous chap has spent nearly the whole of his expected commission on me. No, they don't buy my clothes.'" —New York Press.

FITs permanently cured. No fits or nervousness after first day's use of Dr. Kline's Great Nerve Restorer, 231 Broadway, New York, N.Y. Dr. R. H. KLINE, Ltd., 331 Arch St., Phila., Pa.

Korean girls over seven are all taught at home.

Piso's Cure is the best medicine ever used for all affections of throat and lungs. —W. O. Emsley, Vanburnen, Ind., Feb. 10, 1900.

The man who first made steel pens got \$1 each for them.

Mr. Gobbler's Real Name. The original name of the turkey was Oocoooco, by which it was known by the native Cherokee Indians.

Reports made to the recent convention of the American Bankers' Association show that there were fifty successful bank burglaries in the United States and Canada during the year ended September 1 last. Our Western States lead in this record. Nine of these burglaries took place in Nebraska and six in Iowa—the two States having nearly one-third of the total number of successful bank burglaries placed to their account. It is to the small towns of the West that this somewhat old-fashioned crime is now mainly confined. The small towns of the Eastern States have frequent attempts at bank burglary, but they are rarely successful, and the thieves hardly ever get away with their swag when they have succeeded in breaking into the vaults.

Robbery of Banks. Reports made to the recent convention of the American Bankers' Association show that there were fifty successful bank burglaries in the United States and Canada during the year ended September 1 last.

Consumption of Alcohol. The per capita consumption of alcohol for beverages is 3.23 gallons in the United States, as compared with 4.99 gallons in Great Britain, 10.21 in France, 5.53 in Germany, 6.61 in Italy and 7.33 in Belgium. The United States makes a favorable comparison, but the Nation would be much better off if the consumption were enormously reduced.

Chilian Exposition. A short time ago Chile solemnly opened a permanent industrial exhibition. The president presided, surrounded by the leading people of Chile and the entire foreign diplomatic corps. The day is referred to as one marking a new era in the development of the country.

HAPPY CHILDHOOD. Right Food Makes Happy Children Because They Are Healthy.

Sometimes milk does not agree with children or adults. The same thing is true of other articles of food. What agrees with one sometimes does not agree with others. But food can be so prepared that it will agree with the weakest stomach. As an illustration—anyone, no matter how weak the stomach, can eat, relish and digest a nice hot cup of Postum coffee with a spoonful or two of Grape-Nuts poured in, and such a combination contains nourishment to carry one a number of hours, for almost every particle of it will be digested and taken up by the system and be made use of.

A lady writes from the land of the Magnolia and the mocking bird way down in Alabama and says: "I was led to drink Postum because coffee gave me sour stomach and made me nervous. Again Postum was recommended by two well known physicians for my children, and I feel especially grateful for the benefit derived. 'Milk does not agree with either child, so to the eldest, aged four and one-half years, I give Postum with plenty of sweet cream. It agrees with her splendidly, regulating her bowels perfectly, although she is of a constipated habit. 'For the youngest, aged two and one-half, I use one-half Postum and one-half skimmed milk. I have not given any medicine since the children began using Postum, and they enjoy every drop of it. 'A neighbor of mine is giving Postum to her baby lately weaned, with splendid results. The little fellow is thriving famously.' Name given by Postum Co., Battle Creek, Mich.

Postum agrees perfectly with children and supplies adults with the hot, invigorating beverage in place of coffee. Literally thousands of Americans have been helped out of stomach and nervous diseases by leaving off coffee and using Postum Food Coffee. Look in package for the little book, "The Road to Wellville."

Mrs. Bessie Emerson of Titusville, has made a gift of \$6,000 to the trustees of the Benson Memorial Library. The fund is to be invested and the earnings to be applied towards maintaining the library.

Homer Merl, a 14-year-old son of Mr. and Mrs. Thomas Gibson, of Pennsylvania, Butler county, was crushed to death under a log in the woods near his home.

Thomas S. Morne, 70 years old, a Civil War veteran, died at his home in Ellwood City. He is survived by his wife and two daughters.

Mrs. Elizabeth H. Thompson, of Lillydale, N.Y., Grand Worthy Wise Templar, and Member of W.C.T.U., tells how she recovered by the use of Lydia E. Pinkham's Vegetable Compound.

"DEAR MRS. PINKHAM:—I am one of the many of your grateful friends who have been cured through the use of Lydia E. Pinkham's Vegetable Compound, and who can to-day thank you for the fine health I enjoy. When I was thirty-five years old, I suffered severe backache and frequent bearing-down pains; in fact, I had womb trouble. I was very anxious to get well, and reading of the cures your Compound had made, I decided to try it. I took only six bottles, but it built me up and cured me entirely of my troubles. 'My family and relatives were naturally as gratified as I was. My niece had heart trouble and nervous prostration, and was considered incurable. She took your Vegetable Compound and it cured her in a short time, and she became well and strong, and her home to her great joy and her husband's delight was blessed with a baby. I know of a number of others who have been cured of different kinds of female trouble, and am satisfied that your Compound is the best medicine for sick women.'" —Mrs. ELIZABETH H. THOMPSON, Box 105, Lillydale, N.Y. —\$6.00 per bottle if original of above letter proving genuineness cannot be produced.

Oxygen for Firemen. An experiment has recently been made in Paris with an ingenious apparatus, invented by M. Gugliemmetti and M. Draeger, by means of which it is possible to remain without fear of asphyxia in places where it would otherwise be impossible to breathe, says the English World's Work.

It is composed of a tube containing a provision of oxygen, sufficient to last a man for breathing purposes for more than an hour, and a helmet of aluminum fitting the head exactly by means of a pneumatic pad. The oxygen is supplied automatically to the man's mouth and the air exhaled is received in a compressible bag. It passes through a regenerator with granulated caustic potash, which absorbs all the carbonic acid. A fireman, provided with this apparatus, went down into a cellar in which piles of damp straw had been lighted, and although there was suffocating smoke from this he remained in it for nearly three-quarters of an hour without being at all inconvenienced by it.

Silk Culture in the South. It is asserted on the part of the department of agriculture that a Southern farmer's family can earn more in eight weeks by silk culture than it could in a year by raising a crop of cotton, says the American Cultivator. The one crop, moreover, does not exclude the other. Mulberry trees, the leaves which form the food of silkworms, can be grown along the fences of cotton fields and in odd corners of the farm. No great outlay is required for stock or plant. In fact, silk growing can be prosecuted as a by-industry, like poultry raising, by women and children.

Dr. Thorley, a medical town councilor at Bolton, England, calls small bedrooms death traps, and the Council is seeking Parliamentary powers to prescribe a minimum cubic space for bedrooms.

The eminent Scotch physician Doctor Ginner. He will cure you of Cancer, Consumption, Nervous Diseases and long standing complaints. Note the address, 703 Penn Avenue, Pittsburg, Pa. All advice free of charge.

WANTED. \$8 to \$15 weekly easily earned by either sex knitting seamless hosiery for western market. Free proved family machine, with ribbing attachment furnished gratis. You own a machine, on easy payment plan; write at once for full particulars and complete making money to experience required. UNITED STATES WOOLLEN COMPANY, E. V. Detroit, Mich.
