

SCOUTS SLAIN IN SAMAR

Lieutenant and Thirty-seven Men Ambushed and Killed.

LIEUT. ABBOTT SUMMONED AID.

Commanding Officer Served During Boxer Outbreak and Distinguished Himself by Protecting the Flag.

The Pulajanes have ambushed and killed at Dolores, on the island of Samar, a lieutenant and 37 enlisted men of the Thirty-eighth company of native scouts. Two thousand Pulajanes it is reported, threaten the town of Dolores, and the situation is said to be critical. Lieut. Abbott, in command of the scouts, has requested that aid be sent him.

First Lieut. George F. Abbott, who commands the Thirty-eighth company of Philippine scouts, was a corporal in the Ninth United States Infantry in the fight at Tien Tsin, China during the Boxer troubles. Officers in Washington familiar with his record, say that he distinguished himself in that engagement by seizing the colors when the color bearer fell, and holding them in the line.

LEFT BY THE JAPS.

Christmas Gift Found by Russians in Deserted Trench.

A dispatch from Mukden says: The Russians succeeded in advancing the position of their siege guns four miles south along the wagon road in the face of a pretty heavy artillery fire.

Russian volunteers the night of December 21 occupied Japanese trenches opposite their positions. Three trenches were evacuated by the Japanese with scarcely a fight. The victors were surprised to find a box lying in plain view which they opened carefully, fearing that it might contain explosives, but they found in it wine, biscuits and sweets and a letter in Russian politely requesting its acceptance "from disturbing neighbors."

Along the front of General Oku's army during the night of December 20 the Russians made a determined attack on Lamuting, but were driven back with heavy loss. The Japanese sustained no casualties. Dismounted Russian cavalry attacked the cavalry on the extreme left of the Japanese line on the night of December 29 but were repulsed with heavy loss. Small detachments of Russians nightly attack Japanese outposts and patrols.

PURIFYING THE MAILS.

Obscene Publications and Suggestive Illustrations Excluded.

R. P. Goodwin, assistant attorney general for the Postoffice department in his annual report to Postmaster General R. J. Wynne, says that the number of fraudulent concerns has been greatly reduced in consequence of the vigorous enforcement of the postal laws. The result is shown by the marked decrease in the number of complaints received. There were 144 fraud orders issued during the year and 23 orders were issued against foreign lottery companies and their agents who were found to be operating through the mails. Much has been done in the direction of excluding from the mails publications containing obscene and suggestive illustrations, advertisements and other matter considered unfit for circulation.

Alaska's Needs.

The annual report of the Governor of Alaska, John G. Brady, made public at the Interior Department, estimates the total white population of that district at 26,550. The report says that this estimate for the whites will displace those who have steadily maintained the number is more than five times the figure given. No marked change has occurred in the native population. The report asks for better transportation facilities, representation by a delegate in Congress and legislation to encourage the home seeker and home builder.

NEW WAGE AGREEMENT.

Structural Ironworkers Announce a New Scale.

A new wage agreement for 12,000 bridge and structural iron workers throughout the United States has been decided upon by the executive committee of the International Association of Bridge and Structural Iron Workers, in session in Chicago for the last 10 days.

The scale provides for 25 to 45 cents an hour, according to locality. In some districts the new scale provides an increase, while in others it is about equal to the present rate of wages.

Members of the committee said tonight that all employers would be asked to sign the agreement and that strikes would be called wherever the request is refused.

Bank's Deficit \$800,000.

F. D. Kilburn, State superintendent of banks, has given out a further statement of the condition of the suspended German bank of Buffalo, N. Y. It shows that the surplus and capital stock of the bank were wiped out, the deficit being \$781,646.

Grafts Law Unconstitutional.

The supreme court of Ohio handed down a decision holding the Crafts bonding act of last winter unconstitutional. The decision was given in the case of McKell vs. Robbins, probate judge of Ross county. The Crafts act court, that is to say, administrators, trustees, guardians, etc., all public officials, excepting notaries public and the State superintendent of insurance should give a guarantee company bond. This is set aside by the decision of today.

EXCEEDED EXPECTATIONS.

A Large Part of Next Year's Steel Production Has Already Been Engaged.

Demand for holiday goods has exceeded expectations, but trade in staple merchandise is seasonably quiet. Business conditions are satisfactory, however, manufacturing plants producing freely, except where insufficient water supply restricts operation, and a large volume of option trading was recorded for the week at the leading commodity exchanges.

Dispatches from the leading cities are encouraging. Traffic returns continue favorable, railway earnings for December thus far exceeding last year's by 7.6 per cent. Foreign commerce at the port of New York during the last week showed increases of \$1,415,389 in exports and \$2,089,050 in imports, as compared with the same week in 1903.

Low water in the Connellsville region is the only disturbing factor affecting the iron and steel industry. Coke output and transportation are both unsatisfactory in consequence, and fires are banked as the supply of fuel becomes exhausted at the blast furnaces. Instead of having no extensive effect on the industry, it was at first hopelessly predicted, this scarcity of water is seriously retarding recovery in the Pittsburgh region, and it will be some time before normal conditions are restored. Were it not for this setback it is almost certain that the production of pig iron would now equal the highest point on record. There is less disposition to defer orders for steel rails, and a large part of next year's production has been engaged, or is now under negotiation.

Other forms of railway equipment are more active. Jobbers are placing orders for pipe on a scale that indicates expectation of higher quotations, and there is unusual interest for this season in structural material. Wire and tin plate works are reported as running close to their full capacity. Conditions in the cotton goods market are calculated to induce conservatism and trading is restricted to immediate requirements.

Business in woolens is brisk, buyers evidently anticipating an early advance in the newly opened heavy weight goods.

Failures this week numbered 251 in the United States against 284 last year, and 32 in Canada, compared with 22 a year ago.

FEDERAL CONTROL.

Report From Commissioner of Corporations Stir Things Up.

Characterizing the present State system of incorporation as a situation of anarchy, James R. Garfield, Commissioner of Corporations, in rendering the first report of his bureau's investigations of inter-State corporations, advocates Federal franchises or licenses as a solution of the problem. Independent State action, he declares, is totally inadequate. Callers at the White House say the President is as deeply interested in this as in the proposal to extend the power of the inter-State Commerce Commission. The views of Mr. Garfield are those of the President. Hence, the report is regarded as of the utmost importance. It is considered to be the first word officially spoken of a comprehensive program, revolutionary in some respects, which will be the most important work of the Roosevelt administration.

TERSE TELEGRAMS.

When Dr. Leroy Chadwick lands at New York he will be arrested on a charge of forgery.

In the case of Naa Patterson, on trial for the murder of Cassa Young in New York, the jury disagreed.

Governor Van Sant has announced his formal entry into the Senatorial campaign of Minnesota, as a successor of Senator Clapp.

Mrs. James Ferguson, of Warren, O., who has celebrated her eighty-seventh birthday, has lived all her life in the house in which she was born.

Congressman J. J. Esch, of La Crosse, Wis., has announced his candidacy for United States Senator to succeed Senator Charles V. Quarles.

The Washburn Railroad has closed a deal for the lighthouse property at Hancock, Md. It will be torn away to make room for a passenger and freight depot.

The houses of John Gibbs and Frank P. Smith, Salem, O., were entered in broad daylight by housebreakers, who carried away watches and jewelry worth about \$100.

Fire in Sioux City, Ia., destroyed property worth \$1,000,000, and a fireman lost his life. The City National Bank and the Northwestern National Bank were among the losers by the fire. Several other business blocks were destroyed.

Wants Libraries Abolished.

Mrs. Maud B. McNary, of Houston, presented a resolution in the Washington County (Pa.) Teachers' Institute, which provides for the amendment of the State constitution to the effect that the Bible be read in the school and that school libraries be abolished. Mrs. McNary says libraries are "a barrier to the cause of Christianity and the salvation of the pupils' souls." No action was taken on her resolution.

Recaptured the Hill.

Gen. Kuropatkin has telegraphed the general staff that he has received a report from Chinese sources that the Russians have recaptured 203 Meter Hill at Port Arthur, with the guns mounted by the Japanese.

Tribesmen in Rebellion.

A courier from Alcazar, about 16 miles northeast of Tangier, states that tribesmen have surrounded Alcazar and threaten to sack the town unless the French consul and one British subject are handed over to them.

SEVEN PERISH IN A MINE

Suffocated Owing to Fire at the Mouth of Mine.

NINE OTHERS WERE INJURED.

Rescued, but Their Condition is Critical—Others Taken Out Unhurt. Man Bravely Gives Warning.

Seven men were suffocated in the Indiana mine of the Reese-Hammond Fire Brick Company, near Bolivar, Pa., Twenty-two miners were in the workings when the checkhouse at the mine entrance took fire. Of this number 15 escaped death. Nine of the survivors are in a critical condition as the result of exposure, following their rescue.

The dead: Michael Mareno, 27 years old; Evan Banco, 18 years old; George Banco, 35 years old; Millen Norsuk, 22 years old; Joseph Mien, 30 years old; John Stimecek, 45 years old; John Gergewick, 19 years old.

All the dead were single, with the exception of George Banco, who is survived by his wife and a three-month-old child.

The injured were Fred Johns, Harry Johns, John Felton, Samuel Devlin, Henry Gibson, George Kernick, George Budick, Jacob Uchino, Andy Bucos.

The fire is supposed to have originated in a small shanty, where the miners left their clothing. It is believed a coat became ignited from a lamp which smoldered until the men entered the mine and then set fire to the shanty, the blaze being communicated to the checkhouse. The smoke was sucked into the main entrance. Jack Felton first noticed it. He ran back and warned the miners to get out. He was followed by a lamp which smoldered until the men entered the mine and then set fire to the shanty, the blaze being communicated to the checkhouse. The smoke was sucked into the main entrance. Jack Felton first noticed it. He ran back and warned the miners to get out.
