SUFFERED FROM CATURH OF LUNGS
SO COMON IN WINTER.
CURED BY PL-RU-NA.

A COID ON THE LUNGS THREATENS TO BECOME SERIOUS.

s H. E. Adams, ex-President Pal-oClub, of New Orleans., I.a., writes 10 Garfield Court, South Bend, Ind.,

A PLAIN TALK

On a Plain Subject in Plain Language

On a Plain Subject in Plain Language

On the Plain Language

O

The coming winter will cause at least one-half of the women to have catarrh, colds, oughs, pneumonia or consumption. Thousands of awomen will lose their lives and tens of thousands will acquire some chronicailment from which the House.

EEP PERUNA

IN THE HOUSE.

The will never recover.

Unless you take the necessary precautions, the chances are that you (who rehous add this) will be one of the unfortunate ones. Little or no risk need be run if Peruna is kept in the house and at the first appearance of any symptom of catarrh taken as directed on the Peruna is a safegrard.

Sounding the Praises of Peruna.

Mr. Frances Wilson, 32 Nelson St.,
Inton, Mass., writes:
"Ild you seen me at the time of my illess and now, you would not wonder that
the delight in sounding the praises of
erun.
"No allment was a severe cold which atteled the bronchial tubes and lungs.

and at the man at the man and at the man at the man and at the man Her law school course illustrates ander trait in her character. She is reful, judicious, an excellent busi-

be mopped with borax water, a pail of warm water with half a cup of borax dissolved in it. The borax water will remove all soil without touching the hand to the unop-for you should have one that wrings itself at the side of the pail—and leave the foor hygienically clean, destroying both moths and microbes.

Then with another mop of soft old flannel, oil the floor; put just a little oil on the cloth, so that no rubbing in its compiled with all the requests for money which she receives, it would take her something less than two years to dispose of it. She receives adult 100 letters a day asking for subs which make a weekly total of alput \$150,000. She is asked to buy visels for old sea captains, to raise mortgages on Western farms, to train the voices of embryo Pattis on the pairles, to educate young men for the ministry, to contribute to ladies as society fairs in country villages, to endow all sorts of institutions. Ferself a strikingly unextravagant woman in matters of dress and all personal expenditure, she is asked by rospective brides to provide suns hinging as high as \$2,000 for their nodest trousseaux. Parents write her actuals asked the substitutions of young Helen Miller Gould smiths or Joneses, and saying how arefully a nucleus for these young hidies' future dowries will be received. In one banner week the begging puble—including, of course, the respectable beggars for worthy charities as well as the mere preyers on unso, histicated kindness—asked for an illion and a half dollars.—Harper's Bazar.

A Lot of Trouble From Too Much Starch Food.

A RECIPE FOR CHEERFULNESS. Mary Fanton Tells How to Make Home Pleasant Place to Live In.

Mary Fanton Tells How to Make Homes
Pleasant Place to Live In.

A woman has not made a successful home unless it is a cheerful place. She may be the best housekeeper in town, the best cook, the most dexterous hand at fancy work; but she is not a real home-maker, if you don't feel happy in her home, if you don't recognize an air of brightness and gladness as soon as she greets you.

And a home can't be cheerful unless it is a piensant place to live in. It musn't remind you all the while that some one is worn out taking care of it. If the chairs are hidden away in pinafores, and the pretty carpet covered with a crash bib, and the chandeller draped, and each thing in the spot to which it has been apparently nailed, a room won't impress the merriest

her draped, and each thing in the spot to which it has been apparently nailed, a room won't impress the merriest guest as cheerful.

A room to make you welcome must look as though the family liked to live in it: it must look simple enough not to suggest work and pretty enough to suggest taste, and it must seem ensy to keep in order, and just enough in order to prove it is not neglected.

There must be light, and if possible, an open fire, and eushions near it, and books at your hand wherever you sit, and bookshelves low enough to reach, and little tables handy for workbasket or book or lamp.

In other words, a room must have a pleasant expression to win liking, which is true of people as well.

Where a woman does her own housework, as so many charming American

Where a woman does her own housework, as so many charming American women do, of home must be as simple as is consistent with the expression of her love for good arf and cheerfulness. And in furnishing her rooms she must consider just two points of view: What will be effectively durable and what will be easy to keep clean.

First of all, she must do away with her carpets. Bare floor and rugs are healthful, economical and artistic. They bury fathoms deep that most terrible fetish of house cleaning. They add a variety of beauty to a room, and any one can be cleaned separately in case of accident.

Their hygienic value is incalculable.

any one can be cleaned separately in case of accident.

Their hygienic value is incalculable. There are no corners to make safe hiding for microbes, no holding of dust for a season. Every time it is swept it is clean all over.

There is an immediate protest from many women to the effect that bare floors are too much trouble to keep clean. I know there is such a tradition, and if floors were oiled daily and waxed weekly, every busy housekeeper would be justified in refusing them. But they are very little trouble, indeed, if one just knows exactly how to take care of them. Once a week, in a room that is much used, they should be mopped with borax water, a pail of warm water with half a cup of borax dissoived in it. The borax water will remove all soil without touching

and full of work.

Most housekeepers work more than they rost in their sitting rooms. While they, most of all, should have the joy

A Lot of Trouble From Too Much Starch Food.

A little boy of eight years whose parents did not feed him on the right kind of food, was always nervous and suffered from a weak condition of the stomach and bowels. Finally he was taken down with appendicitis and after the operation the doctor, knowing that his intestinal digestion was very weak, put him on Grape-Nuts twice a day.

He rapidly recovered and about two months thereafter, his Father states, "He has grown to be strong, muscular, and sleeps soundly, weight 62 pounds, and his whole system is in a fine condition of health." Name given by Postum Co., Battle Creek, Mich.

It is plain that if he had been put on Grape-Nuts at an earlier period in his life, and kept from the use of foods that he could not digest, he never would have had appendicitis. That disease is caused by undigested food decaying in the stomach and bowels, causing irritation and making for the growth of all kinds of microbes, setting up a diseased condition which is the growth of all kinds of microbes, setting up a diseased condition which is the could not digest. He never would have had appendicitis, and this is more marked with people who do not properly digest white bread.

Grape-Nuts is made of the selected parts of wheat and barley and by the peculiar processes of the cooking at the factory, all of the starch is turned into supar ready for immediate digestion and the more perfect nourishment of all parts of the body, particularly the brain and nerve centres.

Read the little book, "The Road to Wellville," found in each pkg.

FINANCE AND TRADE REVIEW!

A HOPEFUL VIEW.

Greater Prosperity Promised Than Was Even Anticipated at Opening of New Year.

R. G. Dun & Co.'s "Weekly Review of Trade" says: Erratic weather produces irregularity in retail distribution of merchandise at many points and Southern business is quiet because of the depression in cotton, but the general outlook is considered very bright. Manufacturers report that confidence is warranted by the num-ber of new orders, while deliveries on old contracts are of satisfactory vol-

confidence is warranted by the number of new orders, while deliveries on old contracts are of satisfactory volume.

The best news comes from the iron and steel industry, while footwear factories are busy, woolen mfils in exceptionally good condition, and activity is assured among cotton spinners as soon as the raw material market becomes settled. Fallures for January thus far compare very favorably with last year's returns, railway carnings increased 5.8 per cent. over those of 1904, and foreign commerce at this port for the last week shows a gain of \$6,10,1867 in imports and a loss of only \$981,933 in exports.

Although business is distributed somewhat irregularly owing to local conditions as to supply of fuel and other materials, the iron and steel industry is moving steadily forward. Statistics of pig iron production and consumption at the opening of the year testify to even greater prosperity than was anticipated. Nor is stability threatened by speculative inflation of prices as yet, although that is a danger that usually menaces any revival of industrial activity. Coke ovens in the Connellsville region are producing at maximum capacity and there is no handicap to progress in Pittsburg, but storms and strikes still effect fuel supply at some other points. Railways are placing large contracts for all forms of equipment, and the demand for billets and bars is so urgent that premiums above list prices are recorded on some transactions. Thus far the new year has not brought the anticipated demand for leather, but anners are confident that the activity will not be long delayed. Prices are fairly steady.

Fallures this week numbered 324 in the United States, against 324 lest year, and 28 in Canada, compared with 24 a year ago.

 BALTIMORE. Eggs NEW YORK.

Evolution of the lehthyosaur. It appears that the ichthyosaur race sprang from small, land-living, scaly lizards, with feet armed with claws; and in the last few years, in various parts of the world—in North America, Italy, Wurtemberg—savants have worked out almost the whole narrative of a wonderful transformation into large, scaleless or smooth-skinned swimmers, resembling the dolphins among mammals, and bringing forth their young alive and at sea.—Century.

Italian Silk Workmen. Italian Silk Workmen.

In Italy there are 172,000 skilled workmen engaged in the manufacture of silk. In 1902, 800,000 of her people enigrated. More than 3,000,000 of her people have left their country during the last 10 years, yet there is a gradual increase in population.

intendent of Streets of Lebanon, Ky, says:

"My nightly rest was broken, owing to irregular action of the kidneys. I was suffering intensely from severe pains in the small of my back and through the kidneys and annoyed by painful passages of abnormal secretions. No amount of doctoring relieved this condition. I took Doan's Kidney Pills and experienced quick and lasting Pills and experienced quick and lasting relief. Rhinoceros Butts Train.

A collision recently occurred on the Uganda railway, British East Africa, that would be possible nowhere else on earth. A huge bull rhinoceros rushed out of the bush and charged os rushed out of the bush and charged at full speed the so-called "up-mix-ed" train, which was slowing down as it approached the station Sultan Hamond, 218 miles from Mombasa. The train was stopped, and the "rhino" was discovered about 100 yards down the track. Slowly he returned to the jungle, and was lost to sight. He did not escape unharmed, for pieces of his thick skin were found adhering to the train, but the fierceness of his assault smashed the engine step and splintered the inchanda-half footboard of the first carriage.

A Fortune in Orchids.

Miss Ames, of North Easton, Mass., has the finest private collection of orchids in America. It is worth between \$300,000 and \$400,000. Many of the specimens were brought direct from Borneo or the Indies.

John D. Crimmins is endeavoring to trrange for the exhibition in New York city of the Irish exhibit at the St. Louis fair, and has obtained an option on a building in which to put the exhibit on show.

Among the property enumerated by ex-President Paul Kruger in his will was a bottle of snuff, an ear tube, a silk hat, a straw hat and purses containing about \$20 in Transvaal and British coins.

Railroading in Japan.

Japan has 4236 miles of railway, of which 210 miles were constructed in 1903. The number of passengers carried on these railways in 1903 was 110,000,000, the freight transported was 16,122,671 metric tons and the cash receipts amounted to about \$23,-500,000.

Beware of Ointments For Catarrh That Contain Mercary, as mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the muceus surfaces. Sucharticles should never be used except on prescriptions from reputable physicians, as the damage they will do is ten fold to the good you can possibly derive from them. Hall's Catarrh Care, manufactured by F. J. Caneny & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally, and made in Toledo, Ohio, by F. J. Cheney & Co. Testmontais free.

Sold by Druggists: price, 75c. per oottle. Take Hall's Samily Fills for constipatios.

His Views For Sale.

The story is told by President Hadley, of Yale University, who enjoys a good story none the less if he himself be the victim. Mr. Hadley was traveling in Yellowstone Park when he chanced upon a young man, who from his appearance he judged was a student.

"This is a wonderful scene, isn't it?"

"This is a wonderful scene, isn't it?" said the Professor.

The stranger smiled, nodded to his questioner and turned without speaking to look at the view.
"Do you think," asked Professor Hadley, now confirmed in his idea that he was talking to a student, "that this chasm was caused by some great up heaval of nature, or is it the result decrosion or glacial action?" What are your views"—

"My views," said the stranger quickly, opening a bag he carried containing photographs, "are only \$2 a dozen and are cheap at the price. Let me show you some samples."
