No other female medicine in the world has received such widespread and No other medicine has such a record of cures of female troubles or such

Lydia E. Pinkham's Vegetable Compound.

It will entirely cure the worst forms of Female Complaints, all Ovarian Troubles, Inflammation and Ulceration. Falling and Displacement of the Womb, and consequent Spinal Weakness, and is peculiarly adapted to the Change of Life.

It has cured more cases of Backache and Leucorrhoa than any other remedy the world has ever known. It is almost infallible in such cases, it dissolves and expels tumors from the Uterus in an early stage of development.

dissolves and expels tumors from the Uterus in an early stage of development.

Irregular, Suppressed or Painful Menstruation, Weakness of the Stomach, Indigestion, Bloating, Flooding, Nervous Prostration, Headache, General Debility quielkly yield to it. Womb troubles, causing pain, weight and backache, instantly relieved and permanently cured by its use. Under all circumstances it invigorates the female system, and is as harmless as water.

It quielkly removes that Bearing-down Feeling, extreme lassitude, "don't care" and "want-to-be-left-alone" feeling, excitability, irritability, nervousness, Dizziness, Faintness, sleeplessness, flatalency, melancholy or the "blues" and headache. These are sure indications of Female Weakness, or some derangement of the Uterus, which this medicine always cures. Kidney Complaints and Backache, of either sex, the Vegetable Compound always cures.

Those women who refuse to accept anything else are rewarded a hundred thousand times, for they get what they want—a cure. Sold by Druggists everywhere. Refuse all substitutes.

Palestine is a land of flowers. Bot-nalists tell us that there are 2500 dif-ferent kinds. The eastern sun gives the colors a brightness they seldom have in our hazy clime. The wild flow-ers are somewhat localized, so that acres, and indeed miles, take their hue from a single flower. from a single flower.

Diamond cutting up to a recent time was nearly all done abroad, Holland being the chief centre of the industry for some centuries, but of late a good deal of it has come over to America, where electrical machines are used in the week to great advantage in all where electrical machines are used in the work to great advantage in all ways. European work has always been done by hand, as it still is, and the lapidaries there are only just waking up to the knowledge that artificial power can be applied. Besides cutting real gems, the machinery employed here turns out great quantities of artificial ones, which now rule the markets of the world.

Weather forecasters in the Eritish Weather forecasters in the British Isles have worked at disadvantage. The disturbances largely approach from the west and southwest, and in those directions the Atlantic has kept the observing stations too far away for effective reports. The aid of wireless telegraphy is now being invoked. Efforts of the Meteorological Council to make arrangements with Lloyd's have falled, but private enterprise has now stepped in and the approach of future storms is to be signalled from ships crossing the ocean. It is expected that in winter, when the western coasts of Europe are often swept by severe gales, the warnings will be of great value.

When we read of the men who in-habited the caves of Europe at a time when mammoths dwelt on that continent, we seem to have gone back to a period so immensurably remote that we can hardly picture in the mind's eye the appearance which the representatives of our race, then presented. Yet, according to Professor E. B. Tylor, the natives of Tasmania "remained within the present century representatives of the immensely ancient Palebilthic period," Recent studies of the relies of the Tasmanians, who became extinct when brought into touch with modern civilized man, show that the workmanship of their rude implements was below that exhibited by the "drift and Cave men" of Paleolithie times. tinent, we seem to have gone back to : and Cave men" of Paleolithic times.

and Cave men" of Paleolithic times.

The Smithsonian Institution has published a new edition of Dr. Langley's "Experiments in Aerodynomics," first printed cleven years ago. In summing up Dr. Langley speaks of the prospects for the future somewhat as follows: Since that time, he says, he has demonstrated that mechanical flight is possible by actually performing it with steel flying machines nearly one thousand times heavier than air, driven by steam. These machines weighed from thirty to forty pounds, and flew from one-half to three-quarters of a mile at speeds varying from twenty to thirty miles an hour. It is believed by Dr. Langley that the time is now very near when human beings will be transported at high velocities, though perhaps at first under exceptional conditions, such as are demanded in the arts of war rather than of peace. ward Clarke and his proposal to call the Great Republic "Usona." "You're the Great Republic "Usona." "You're another," says the United States of North America to the United Kingdom of Great Britain and Ireland, and all the British dominions beyond the seas. "Ewisicasa! Yah!" For we are England, Wales, Ireland, Scotland, India, Canada, Australia, and South Africa, though we may not all approve of the order of the initials. But if we address our letters to "Usona" the repuly will come to "Ewisicasa."—London Chronicle. Day and Year the Same.

The latest tests of the motions of Venus indicate that astronomers have been correct in believing that the planet rotates on its axis in the same time it requires for a revolution around the sun. That is to say, a day in Venus is the same as a year in time. rather than of peace.

The influence of the editorial depends upon the character of the journal in which it appears, maintains Fourth Estate.

If the newspaper notoriously lacks sobriety of judgment, decency and se-riousness of purpose, its editorials are necessarily inconsequential trivial, silly and of no interest to intelligent

persons.

The opinions of a mountebank, who stands upon his head and twiddles his toes by way of expedium and to attract attention, are not listened to with respect, and it is not to be wondered at that in time he should come to the conclusion that the people do not want

A company has recently been organized at Rendsburg, Prussia, for the purpose of distilling alcohol from part. According to its process the company will be able to distill alcohol cheaper from peat than it can be obtained from any other substances and will, therefore, be able to sell its product for fuel purposes. It will also be in a position to do an export lawer recommended them to all my friends and company will be able to sell as product for fuel purposes. It will also be in a position to do an export business.

Vast Riches in Corn.

The greatest hoard of the yellow metal ever gathered in any country could not buy one year's harvest of the American corn and wheat. To buy one season's corn crop would take all the gold minted in this country in six years. In the last seven years all the gold mines have produced only enough to buy one year's yield of our six leading cereals.

Pica common togood would all the gold mines have produced only enough to buy one year's yield of our six leading cereals.

A Pittsburg educator tell us cooks are paid more than teachers. Oh, well, one must eat, while, on the other hand, at a pinch a man can make his murk to a contract involving millions.—N.

MILLS BEHIND IN ORDERS.

Rail Business Quiet, Although Large Contracts Are Pending-Activity at Tin Mills.

Progress is more rapid in manu facture than in distribution, but this is largely due to the effect of unseasonable weather at some points and the unsettled feeling in the South, where the collapse of cotton prices has retarded collections and caused many cancellations. That production is maintained by mills and furnaces may be taken as evidence of confidence in the future.

the future.

Iron and steel plants lead in activity, with woolens the feature in textile fabrics. Settlement of the protracted labor struggle at Fall River is encouraging, but the industrial atmosphere is disturbed elsewhere, although, on the whole; there is less than the customary idleness of this season. Prices of newly opened lines of woolens are higher, as was to be expected in view of the position of the raw material, but consumption is not curtailed. Similar strength in footwear has restricted, buyers in the Boston market placing few contracts. Railway earnings for Jenuary thus far show a gain of 2.3 per cent.

Foreign commerce at New York is

show a gain of 2.3 per cent.

Foreign commerce at New York is also better than a year ago, the last week showing gains of \$1,555,889 in value of imports and \$292,986, in exports. Scarcely any alteration in quotations of iron and steel is the best possible guarantee of continued activity. Conservatism now controls the situation, holding prices at a position that is attractive, considering the volume of business and cost of production. Coke ovens are establishing new records of fuel output and traffic conditions cause little delay. Very extensive contracts for machinery are pending, and a considerable quantity of pipes and tubes are wanted, while the Pittsburg mills are behind on deliveries of billets and bars. Tin plate mills are not only fully engaged but have orders running well into the future.

Structural steel and rails are quiet, although large contracts are negative.

into the future.

Structural steel and rails are quiet, although large contracts are pending. Hides are still firm as a rule, except that some declines are recorded on packer native, as these constitute the bulk of current receipts. This is a seasonable influence, and does not detract from the general tone of strength.

Failures this week numbered 335 in the United States against 355 last year, and 24 in Canada compared with 33 a year ago.

of coal in her stocking" is an adver-tisement of a Philadelphia coal deal-er. It is not clear whether this is a reflection on the size of the wifey's stocking or the amount of coal the

One Man Split.

A bench of seven magistrates at Walsall, England, announced that they were "equally divided" in opinion of a case, and that no decision would be given.

A number of struck farmers in New York and adjacent Status have tried irrigation for years and found it profitable. The new system to be applied in the arid region is likely to develop a general interest es time runs on.

FINANCE AND TRADE REVIEW | CAUGHT BY THE GRIP == RELEASED BY PE-RU-NA.

La Grippe is Epidemic Catarrh.

I T spares no class or nationality. The crutamed and the ignorant, the aristocrat and the pauper, the masses and the classes are alike subject to la grippe. None are exempt—all are liable.

Grip is well named. The original French term, la grippe, has been shortened by the busy American to read "grip."

Without intending to do so, a new word has been coined that exactly describes the case. As if some hideous giant with awing pin had clutched us in its fatal clasp.

Men, women, children, whole towns and cities are caught in the baneful grip of a terrible monster.

Have you the grip? Or, rather, has the grip got you? If so, read the following letters.

These testimonials speak for themselves as to the efficacy of Peruna in cases of la grippe or its after-effects:

A Southern Judge Cured.

Judge Horatio J. Goss, Hartwell, Ga., writes:

"Some five or six years ago I had a very severe spell of grip which left me with systemic catarrh.

Revival of Roller Skating.

"Cate divided me to try your Peruna, which I did, and was immediately benefited and cured. The third bottle completed the cure."—H. the threat of cured in a Few Weeks.

"Cured in a Few Weeks.

"During the past winter of 1901, I suffered for several weeks from a severe attack of grip, which left a serious catarrhaff condition of the threat and head.

"Some one suggested Peruna. As a last resort, after wasting much time and monety on physicians, I tried the remedy faithfully, and in a few weeks was as well as grippe or its after-effects:

A Southern Judge Cured.

Judge Horatio J. Goss, Hartwell, Ga., "Some one suggested Peruna in the following on public boards a number of times. He endorses Peruna in the following of the condition of the threat and hearty and hearty severe spell of grip which left me with systemic catarrh.

"Some and Peruna saving much time and money cert."—Jean Covgill.

"I make the dawner of the class."

"Jon. Jamsen R. Guil is one of the oldest and most esteemed men of Omaha, Neb. He has done much to make it

Revival of Roller Skating.

Forty or fifty roller skating rinks have been built and opened to the public in New England, New Jersey and other states within the last year.

All are well patronized and their pro-

Forty or fifty roller skating rinks have been built and opened to the public in New England, New Jersey and other states within the last year. All are well patronized and their promoters believe that this sport, neglected for 20 years, will again become popular. In the late '70s and early' 80s roller skating almost attained the dignity of a national amusement. No person was too old or too young to use the rinks. The hockey games, endurance races, and exhibitions of fancy skating arranged by rink owners attracted big audiences for four or five years before the popular appetite was satisfied.

Then, and almost in a moment, roller skating fell into disfavor. Only children clung to it, and on them it has never lost its hold. This sudden loss of popularity was due simply to the fact that the passtime was worked to death, for although a good many harsh charges were made by solemn moralists against it, these never could have killed it. Now it is returning, as a novelty, with another generation of pleasure seekers to appeal to, but it is improbable that it will ever regain the glory it once had. The out-of-doors cut has made great progress since 1885, and roller skating is an indoor game.—New York Sun.

Apple and Anointed.

George 111. was wondering how the apple got into the dumpting.

"Because the policeman on our beat prefers it that way," explained Queen Charlotte.

From that moment the King's mind began to totter.—New York Sun.

How's This."

We oher One Hundred Dollars Reward to-

Railroads Kill Most.

The railroads kill more people than battles. For the fiscal year ended June 30, 1904, 55,130 persons were killed and injured on the railroads of the United States and as many more in Europe. The capture of Port Arthur is estimated to have cost 80,000 men. The killed, wounded and missing at Waterloo were 54,400. Peace hath its dangers.

One hundred more double stars have been discovered and measured at the Lick Observatory.

COLOR BLINDNESS COMMON.

THERE IS NOTHING more painful than

Rheumatism and Neuralgia

but there is nothing surer to

St. Jacobs Oil The old monk cure. It is pene-trating, prompt and unfailing.

Price 25c. and 50c. ******
