

Cure For The Blues

ONE MEDICINE THAT HAS NEVER FAILED

Health Fully Restored and the Joy of Life Regained

When a cheerful, brave, light-hearted woman is suddenly plunged into that perfection of misery, the BLUES, it is a sad picture. It is usually this way: She has been feeling "out of sorts."

For some time, head has ached and back also; has slept poorly, been quite nervous, and nearly fainted once or twice; head dizzy, and heart-beats very fast; then that bearing-down feeling, and during her menstrual period she is exceedingly despondent. Nothing pleases her. Her doctor says: "Cheer up; you have dyspepsia; you will be all right soon."

But she doesn't get "all right," and hope vanishes; then come the brooding, morbid, melancholy, everlasting BLUES.

Don't wait until your sufferings have driven you to despair, with your nerves all shattered and your courage gone, but take Lydia E. Pinkham's Vegetable Compound. See what it did for Mrs. Rosa Adams, of 819 12th Street, Louisville, Ky., niece of the late General Roger Hanson, C.S.A. She writes: Dear Mrs. Pinkham: "I cannot tell you with pen and ink what Lydia E. Pinkham's Vegetable Compound has done for me. I suffered with female troubles, extreme nervousness, and that awful feeling, 'the blues,' and I was advised to try Lydia E. Pinkham's Vegetable Compound, and it not only cured my female derangement, but it has restored me to perfect health and strength. The buoyancy of my younger days has returned, and I do not suffer any longer with despondency, as I did before. I consider Lydia E. Pinkham's Vegetable Compound a boon to sick and suffering women."

If you have some derangement of the female organism write Mrs. Pinkham, Lynn, Mass., for advice.

What London Pays Policemen. A London policeman earns, as long as he remains a patrolman, from \$5.84 to \$7.79 a week. He may lodge in a section house for only 24 cents a week, and get his board for \$1.70. His uniform is supplied free.

FITs permanently cured. No fits or nervousness after first day's use of Dr. Kline's Great Nervine. \$2.00 per bottle. Treatise free. Dr. R. H. KLINE, Ltd., 931 Arch St., Phila., Pa.

There are in Germany twenty-one universities.

Mrs. Winslow's Soothing Syrup for Children teething, softens the gums, reduces inflammation, allays pain, cures wind colic, 25c a bottle.

Winnipeg, Manitoba, is said to be the fastest growing city in the world.

Do not believe Piso's Cure for Consumption is an equal for coughs and colds.—J. W. LLOYD, Trinity Springs, Ind., Feb. 15, 1905.

The production of quicksilver in 1904 is estimated at 3381 tons.

German shopkeepers are appealing to the government to restrain the rapidly growing tendency towards cooperative stores.

CATCHING FISH WITH CORMORANTS

How These Birds Are Utilized by the Ingenious Japanese.

TERRAPIN AND GOLDFISH FARMS IN JAPAN.

THE origin of cormorant fishing in Japan is lost in a very remote antiquity. At least a thousand years ago it is known to have flourished, and there is a tradition of its existence upward of two thousand years ago. Much romance and history are connected with the fishery in the early days, and the names of some of Japan's greatest warriors and statesmen are associated with it. While a commercial enterprise, it does not, however, give employment to many people and is not conducted in many places. It is confined to rivers, and the most extensive, interesting and famous fishery is that in the Nagara River and most noted of the cormorant fishing villages is in the outskirts of the large city of Gifu.

At the time of my visit, the chief cormorant fisherman, whose ancestors for many generations had engaged in this fishery in the same locality, attired himself in the peculiar dress of the profession for the purpose of exhibiting his birds and the methods of handling them. Later he and all the other fishermen on the river went to a rendezvous and gave a practical demonstration of cormorant fishing.

The cormorants are controlled by means of a slender cord, which passes around the bird's breast and is tied in the middle of the back. The cord is made of woody fibers of the crypocera tree, with the exception of a short section next to the bird, which consists of whalebone. There is a supplemental cord tied around the neck at the lower end of the gullet for the purpose of preventing the fish from passing so far that they cannot be recovered. The tying of this cord is a delicate operation for if too tight it will injure the bird and if too loose it will allow the fish to be swallowed.

The fishery is conducted from boats, which are of a special type, being long, narrow dugouts, propelled primarily by paddles, but when en route to the fishing grounds often provided with a sail. Each boat has a crew of four men and a complement of sixteen cormorants. Late in the afternoon the boats start for a place in the river where fishing will begin, the cormorants being stowed away in pairs in bamboo baskets. The fishing grounds cover many miles, and operations are confined to successive sections of the river nightly, in accordance with law. Stretches several thousands yards in length are set aside as imperial reserves, on which no fishing is permitted.

As soon as darkness prevails a blazing fire of pine wood is kindled in the iron basket overhanging the bow of the boat, and the boats drift down stream together, sometimes in a mixed group, sometimes in a line extending across the river, each guided and propelled by two men. The captain, standing near the bow, manages twelve cormorants and his assistant four, the cords being held between the fingers and frequently shifted as the birds move about. With the cormorants diving and darting in all directions, those of different boats often mingling, it is a wonder that they do not soon become inextricably tangled, but so skillfully are they managed that the lines rarely become fouled. In a short time the cormorants' gullets begin to bulge with ayu; when they are well filled the birds are pulled up to the gunwales one by one and their catch is gently squeezed into baskets. This continues for several hours, and each cormorant may fill its gullet fifteen to twenty times.

Spectators usually go to the fishing grounds in a kind of barge, illuminated by lanterns, and eat their dinner on board while waiting at a convenient point for the fishing boats to arrive. During the evening when I witnessed the fishery the seven boats in whose operations I was particularly interested averaged 700 or 800 fish apiece, and the aggregate catch was worth \$150—a very respectable sum to Japanese fishermen.

The fishery is prosecuted with enthusiasm by both men and cormorants, and the shouts of the fishermen, the hoarse croaking of the birds, the rush of the mountain stream, the splashing and creaking of the paddles, the hissing of the embers as they fall into the water, the weird lights and shadows combine to make a performance which a Westerner is not likely soon to forget.

TERRAPIN FARMS. The cultivation of water products has gone hand in hand with the fisheries, and in certain lines has attained greater perfection and extent than in any other country. The raising of terrapin, which with us is an unsolved problem and has only recently been seriously considered, has for years been very successfully carried on by the Japanese. I visited a terrapin farm near Tokio, where 50,000 to 60,000 artificially grown terrapin are placed on the market annually. Without any outside aid or suggestions, the Japanese have evolved special methods for the cultivation of many kinds of mollusks, including the pearl oyster, the ark-shell, and several clams, and various other lamellibranchs, and in addition, the common oyster.

That the Japanese should realize the importance of oyster culture is not strange; but that they should have taken it up a century before our nation was born and have recognized

the most essential factor in successful cultivation, namely, individual ownership or control of the oyster bottoms, comes as something of a shock to our national pride when we remember that in the most important oyster region in the world, within a short distance of the capital of the United States, the vital principles of oyster culture are ignored and efforts to apply them are resisted sometimes by force of arms. The cultivation of oysters has reached greatest perfection in the Inland Sea near Hiroshima, and some very ingenious methods have been evolved, which are described in a paper by Dr. Bashford Dean recently published by the United States Bureau of Fisheries.

Among the fishes regularly cultivated are the eel, the mullet, the carp, the goldfish, and several salmon and trout. The important salmon fishery in northern Japan having suffered from depletion of the streams, the government sent a representative to this country twenty years ago to study our hatching methods. It goes without saying that he took home with him a well-filled note book, and, in addition, the plans of one of our salmon hatcheries, and shortly afterwards from those plans built in Hokkaido the first salmon hatchery in Asia. With this as a model and centre, salmon culture in Japan has steadily grown, until there are now eighteen salmon hatcheries in Honshu and Hokkaido, and Japan has become the only competitor of the United States in the artificial propagation of salmon.

The carp has been cultivated from very ancient times and now receives much attention. In the Tokio district alone 225 acres of pools are devoted to carp culture, and the annual crop is upward of 400,000 pounds, valued at \$15,000. In one village in the Gifu prefecture 250 acres of paddy fields, in which there is growing rice, have recently been devoted to carp culture by the local agricultural society, and 25,000,000 young fish are now procured there annually and sold for stocking purposes. It is a significant fact that the carp not only does not injure the rice plants, but benefits them by devouring destructive insects, whereas in this country one of the very loudest and longest walls against the carp is that it uproots aquatic vegetation.

FINANCE AND TRADE REVIEW

STRUCTURAL STEEL DEMAND Premiums Offered for Quick Delivery and Producers Are Considering Advance in Prices.

R. G. Dun & Co.'s "Weekly Review of Trade" says: Seasonable merchandise goes into consumption more freely than usual, retail trade exceeding expectations at many points, and preparation for fall and winter business is on a liberal scale, except in a few agricultural communities, where there is a disposition to await definite assurances regarding the crops. The official report was more encouraging as to grain, and later dispatches from the principal farming centers indicate that good results are being attained, despite some excess of moisture.

Manufacturing reports are regular, the cotton industry being unsettled by the rise in raw material; woollen mills have a similar, but less sensational obstacle; footwear shops are shipping less freely, but are maintaining the higher level of prices and current dullness in pig iron does not weaken confidence in an early resumption of liberal purchases. Dun's Index Number on July was 988.32, against 988.759 a month earlier, and \$97,192 a year ago. Railway earnings for the first week of July exceeded last year's by 5.3 per cent, and foreign commerce at New York for the last week showed gains of \$1,520,462 in imports and \$580,449 in exports, as compared with the corresponding week of 1904. Mercantile collections have improved. In striking contrast a dullness and weakness of the raw material, structural steel is so urgently sought that premiums are sometimes paid for quick delivery, and producers are considering the advisability of a general advance in list prices. Many large building contracts have appeared during the past week, and the tonnage of new bridge work is a feature.

Failures this week were 233 in the United States, against 225 last year, and 26 in Canada, compared with 20 a year ago.

Work the Supreme Need. The advice of the President to parents to bring their children up to work is sound. What this country imperatively needs is a system by which men can get money only by earning it. The other ways are bringing all our institutions perilously near destruction.—Baltimore American.

Hundreds of Indians Want Work. John R. Brennan, Indian agent at Pine Ridge agency, has sent a circular broadcast over the Western country, stating that he has at his disposal 800 able bodied Ojibwa Sioux Indians who want employment for the season. He calls the attention of contractors to the fact that these men are good workers. They will work at railroad grading, ditch digging, sheep herding or ranching.—Custer Correspondence Denver Republican.

A VETERAN OF THE BLACK HAWK, MEXICAN AND THE CIVIL WARS.

CAPT. W. W. JACKSON.

Sufferings Were Protracted and Severe—Tried Every Known Remedy Without Relief—Serious Stomach Trouble Cured by Three Bottles of Peruna!

Capt. W. W. Jackson, 705 G St., N. W., Washington, D. C., writes: "I am eighty-three years old, a veteran of the Black Hawk, Mexican and the Civil Wars. I am by profession a physician, but abandoned the same.

"Some years ago I was seriously affected with catarrh of the stomach. My sufferings were protracted and severe. I tried every known remedy without obtaining relief.

"In desperation I began the use of your Peruna. I began to realize immediate though gradual improvement.

"After the use of three bottles every appearance of my complaint was removed, and I have no hesitation in recommending it as an infallible remedy for that disorder."—W. W. Jackson.

Address Dr. S. B. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

Cuticura SOAP

MAY BE USED FROM THE HOUR OF BIRTH

Physicians, nurses, pharmacists, and chemists throughout the world endorse Cuticura Soap because of its delicate, medicinal, emollient, sanative, and antiseptic properties derived from Cuticura, the great Skin Cure, united with the purest of cleansing ingredients and most refreshing of flower odors. For preserving, purifying, and beautifying the skin, as well as for all the purposes of the toilet and bath, Cuticura Soap, assisted by Cuticura Ointment, the great Skin Cure, is priceless. Guaranteed absolutely pure, and may be used from the hour of birth.

"Two Soaps in one at one price—namely, a Medicinal and Toilet Soap for 25c.—Foster Drug & Chem. Corp., Sole Mfrs., Boston, Mass. Mailed Free, "How to Care for Baby's Skin, Scalp, and Hair."
