His Glass Eyc.

Two men at Chanute engaged in a fight the other day and one, by a a fight the other day and one, by a ficrce blow, destroyed one of the other man's eyes. The man who lost his eye had the other man arrested on the charge of mayhem. It devel-oped in the evidence that the eye which was destroyed was a glass eye, and the defonce claimed that the charge of mayhem could not be main-tained. The court was of the same opinion, and it was suggested that a charge of malicious mischief be sub-stituted in its stead, for breaking the glass eye, or in other words, suggest-ed the judge, "for breaking the win-dow to his soul, the pane in his face." —Kansas City Journal.

Proved His Faith.

The Emperor of China sacrificed to the god of agriculture on the second day of the third moon. He person-ally plowed a portion of the ground in front of the altar "as a proof that the profession of agriculture is an honorable one.

KIDNEY TROUBLES

Increasing Among Women, But Sufferers Need Not Despair THE BEST ADVICE IS FREE

Of all the diseases known, with which the forme organism is afflicted, kidney disease is the most fatal, and statistics show that this disease is on the increase

The second 1 LIN A CO

Mrs.Emma Sawyer Mrs.Emma Sawyer The farmers and stock raisers of this country would save millions of dollars every year if they could but realize that the basis of all perform-ance of more than ordinary worth is blood. Any cow will give some milk, any steer or hog will make some meat, any sheep will produce some kind of a lamb or some sort of wood, and any horse pull, run or trot some-but what every farmer needs and should want is an animal that does its part well. We have seen hundred of the kidneys or notices a brick dust sediment in the urine, she should lose no time in commencing treatment with Lydia E. Pinkham's Vegetable compound, as it may be the means of saving her life. For proof, read what Lydia E. Pinkham's Vegetable compound as the terrible suffering I

Salting Asparagus.

Swedish Turnips a Good Crop. The continuous wet and cold weath-er in this section during the past three seasons so seriously affected both grain and forage crops that we resolved last spring to grow some ad-ditional crop not easily influenced by such atmospheric conditions, and de-cided upon the Swedish turnip, or rut-abaga, as likely to prove the most satisfactory, all things considered. It is a crop which, if properly fer-The old and widely accepted idea that heavy applications of common salt were necessary to grow aspara-gus has been throughly disproven by modern practice as well as by a chemindeern practice as wen as by a chem-ical examination. Good asparagus, as is well known, may be grown without sait, but sometimes upon soils of the sandy type better asparagus may be grown with it. Some tests made at the Arkansas experiment station call attention to these facts and advise those growing asparagus for home It is a crop which, if properly fer-tilized and cultivated, gives enormous returns, yields of 10 and 15 tons per acre not being at all uncommon, it is repeating which are being at all one of steel those growing asparagus for home use to plant it in open rows instead of in the thick bed, as has been the custom in the past.—Farmers' Home Journal.

Clean Water Troughs.

Only water troughs or fountains that can be easily cleaned should be used in the poultry yard. Wooden troughs sometimes become slimy, though the water in them appears to be clear and clean. A broom and soapsuds should be used on such trouchs effectived s ringing those up soapsuds should be used on such troughs, afterwards rinsing thorough-ly with clear water. If this task is attended to once a week and the troughs filled with fresh water every morning the hens will be amply sup-plied with all the fresh water that they need. If ducks are kept the troughs should have slats of lath across the top, to prevent them from wallowing in the water and making it filthy.

filthy. Corn for Young Pigs.

Corn for Young Pigs. At the Wisconsin station an experi-ment was conducted to determine tae effect of feeding corn to young pigs. Two lots of pigs consisting of three each were used in the experiment. One lot was fed cornmeal. The pigs were given all the meal mixed with enough skim-milk to make a thick slop. These pigs were at an age when they should have been growing uone and muscles and the corn fed lot were they should have been growing bone and muscles and the corn-fed lot were given unnatural treatment. The mixed feed lot made a profit four times as great as the other, made four times as much gain, and their thigh bones were -50 percent stronger. Corn is one of the best feeds that we have to-day but these who use it with certain day, but hose who use it with certain classes of animals would do well to always bear in mind that although it is an A1 food its use should not be abused when feeding it to growing stock.—Weekly Witness.

The Slow Horses.

The farmers and stock raisers of this country would save millions of good animal of their class because they were not bred right. When we make fun of a man who goes to the races with a slow horse let us think

FINANCE AND TRADE REVIEW DUN'S WEEKLY REVIEW. General Disposition to Provide for a

Large Volume of Fall and Winter Trade.

And Winter Trade. R. G. Dun & Co's "Weekly Re-view of Trade" says: Hot weather tanded to retard activity in many productions and undertakings and postponed forward business that could be delayed without loss, but acclerated the consumption of sea-sonable merchandise and advanced the crops much nearer maturity. Confidence in the future increases with each day favorable for harves, ing, and much of the winter wheat is now beyong danger, while lat a corn is rapidly gaining lost ground Inquiries indicate a general disposi-tion to provide for a large volume of fall and winter business, clothing and manufacturers receiving liberal orders from traveling salesmen, while cancellations are exceptionally few. Real estate transfers are large and building operations numerous, often overtaxing facilities for delivery of lumber and other materials. There sult hall commercial and manufact-turing branches is exceptionally sa-tisfactory for this mid-summer per-fod, which is usually the dullest of the year. Some improvement is noted in de-mand for pig iron, which has been the least active of the industrial un-dertakings, while footwear factories are less cager to secure forward bus-iness because of another advance in hides. Real way earnings thus far reported for July exceed last year by 7.4 per

hides. Railway earnings thus far reported for July exceed last year by 7.4 per cent, and foreign commerce at New York alone for the week shows gains of \$2.105,120 in exports, and \$3.667.648 in imports, as compared with the corresponding week in 1904. Collections are improving, money is easy and fluctuations in securities narrow. Failures last week numbered 193

Caution to Purchasers of Winchester Guns

Caulion to Furchasers of Winchester Guns We find Winchester Repeating Ritles and Shotguns are being offered by certain of the trade, not customers of ours, at cut prices, and that such guns have been altered since leaving the factory, includ-ing the changing and obliteration of the factory serial numbers. Not knowing to what further extent these arms have been tampered with, we take this opportunity of advising the public in general that' we assume no re-sponsibility whatever connected with any such arms, and caution all buyers to see that the numbers have not been changed or obliterated. All genuine Winchester Repeating Rifles and Shotguns are numbered and all Win-chester Single Shot Rifles are numbered, and the Thumb Trigger Model. WINCHESTER REPEATING ARMS CO. Uses of Salt.

 \end{array}$ Uses of Salt. Salt may be made useful in many directions besides table use. First, as tooth powder, it will keep the gums hard and the teeth beautifully white. Also, if you have a tooth extracted and the bleeding does not stop, rins-ing the mouth with salt and water will prove a quick remedy. Mixed with hot water it makes a good gargle for a sore throat and if a little is put with lemon juice stalns on fingers from lemon julce stains on fingers from ink, peeling totatoes, etc., will be eas-ily removed. When teacups are dis-colored rub a little salt on the stains before washing them and the blemish quickly disappears. DISFIGURING ULCER

People Looked at Her in Amazement-Pronounced Incurable-Face Now Clear as Ever-Thanks God For Cuticura.

as Ever-Thanks God For Cutieura. Mrs. P. Hackett, of 400 Van Buren St., Brooklyn, N. Y., says: "I wish to give thanks for the marvelous cure of my moth-er by Cutieura. She had a severe uleer, which physicians had pronounced incur-able. It was a terrible disfigurement, and people would stand in amazement and look after her. After there was no hope from doctors she began using Cutieura Soap, ointment and Pills, and now, thank God, she is completely cured, and her face is as smooth and clear as ever."

Bull Fighting Pays. "Bomblita," the greatest of the Span-ish toreadors, has retired at 30 years of age, with a fortune of \$400,000, without counting jewels worth about \$80,000 more, presented to him by ad-niring enthusiasts.

To treat Pimples and Blackheads, Red, Rough, Oily Complexions, gently smear the face with Cuti-cura Ointment, the great Skin Cure, but do not rub. Wash off the Ointment in five minutes with Cuticura Soap and hot water, and bathe freely for some minutes. Repeat morning and evening. At other times use Cuticura Soap for bathing the form bathing the face as often as agree-able. No other Skin Soap so pure, so sweet, so speedily effective.

plants and takes less time. About the middle of June the seed was broadcasted in the bed, and fine young plants were ready for trans-planting in July in the field. The soil of this field was sandy and very light and poor. We first grew a good crop of peas by means of the mineral fer-tilizers, and after these were re-moved, the vines which were about 2 1-2 feet in height, were turned under to furnish humus, and allowed to re-main undisturbed in the moist earth for two weeks to decay, then the field was prepared for the turnip plants, which were set in rows 30 feet apart for horse cultivation, and about ten inches apart in the rows. All members of the turnip family All members of the turnip family are voracious feeders upon potash and equally fond of phosphoric acid, while equally fond of phosphoric acid, while a liberal amount of nitrogen must be given. Barn manures particularly of cows or sheep will furnish this satis-factorily, but horse manure is not con-sidered as good for this crop. The or-ganic nitrogen usually contained in the ready mixed fertilizers answers the unready more academic and begins

Swedish Turnips a Good Crop.

greatly relished by all kinds of stock, and is about equal in value to corn sil-age, although in some cases costing

somewhat more to grow. Frequently the seed is drilled in the field and afterward thinned to six or eight inches apart in the row, but we always prefer to sow the seed in a bed, and transplant. This, according to our own experience, gives stronger plants and takes less time.

somewhat more to grow.

the ready mixed fertilizers answers the purpose equally well, and having on hand such a fertilizer especially prepared for root crops, we make a liberal application to the soil about the young plants, afterward working it in. About four weeks later the application was repeated. These young plants thrived from the start, rains were less frequent than earlier in the season, but the moisture con-tained in the soil, dissolving the plant foods, rendered them directly avail-able, and there was no check in growth until the crop had matured, except upon low-lying plots, where growth until the crop had matured, except upon low-lying plots, where there was not sufficient drainage to completely carry off the surplus rain-falls. The turnips upon such ground were much inferior in size to those grown upon the well-drained portions of the field, which were of great size and of the finest quality for table use. The estimated yield was at the rate of 12 tons per acre. A portion was disposed of for table using, bring-ing from 50 to 60 cents per bushel, the rest were placed in the vegetable cellar and twice each day since they were gathered have been a highly rel-ished and beneficial food for the stock on the farm.

LIVE STOCK. Union Stock Yards, Pittsburg.

The Libraries of the Country. The United States commissioner of education has in his annual report a chapter on the libraries of the country. Only those containing 1,000 volumes or more are counted. There are nine librarics that contain more than 300,-000 volumes each, and 59 that have over 100,000 each. It is shown that the North Atlartic States contain more than half the entire number of libra-ries enumerated, 3,006 libraries con-taining in the aggregate, 27,805,890 volumes. New York is at the head of the States, having 934 libraries, with 9,079,863 volumes; Massachusetts next, with 624 libraries and 7,616,994 volumes. These three States have nearly 30 per cent of the libraries and 40 per cent of the number of volumes reported for the whole country. Tak-ing the country as a whole, there is one library containing at least 1,000 volumes for every 11,000 of the popu-lation. Failures last week numbered 193 in the United States, against 231 last year, and 23 in Canada, compared with 20 a year ago.

Let Common Sense Decide

Do you honestly believe, that coffee sold loose (in bulk), exposed to dust, germs and insects, passing through many hands (some of them not over-clean), "blended," you don't know how or by whom, is fit for your use? Of course you don't. But

LION COFFEE

is another story. The green berries, selected by keen judges at the plantation, are skillfully roasted at our fac-tories, where precautions you would not dream of are taken to secure periect cleanliness, flavor, strength and uniformity.

From the time the coffee leaves the factory no hand touches it till it is opened in your kitchen.

This has made LIGN COFFEE the LEADER OF ALL PACKAGE COFFEES

Millions of American Homes welcome LION COFFEE daily. There is no stronger proof of merit than continued and increas-ing popularity. "Quality survives all opposition." (Sold only in 1 h. packages. Lion-head on every package.) (Save your Lion-heads for valuable premiums.)
