Some Strange War Bets.

Some Strange War Bets.
Some extraordinary bets have been made on the Japanese-Russian war. A number of Japanese officers have bet that they would be killed in battle. The money was to go to their widows. One officer, on starting for the front, made the following wager: If he were killed within a month his heirs were to receive \$500. After that date he was to pay his opponent 10 yen (\$5) a day until he had survived 100 days, after which the bet was to rease. He undertook to expose himself to danger only when military conditions demanded it; in other words, he would not wilfully let himself be killed.—Kansas City Journal.

Trap for Auto Scorchers.

A photographic police trap for the apprehension of scorching automobilists has been invented in England. By the pressing of a button a photograph is made of any passing car with the time and date. A pair of these instruments with synchronized timing arrangements used at each end of a measured piece of ground would, it is believed, give absolutely accurate data as to the speed of automobiles. Trap for Auto Scorchers.

GRATEFUL TO CUTICURA For Instant Relief and Speedy Cure of Rav and Scaly Humor, liching Day and Night-Suffered For Months.

"I wish you would publish this letter so that others suffering as I have may be helped. For months awful sores covered my face and neck, seabs forming, itching terribly day and night, breaking open, and running blood and matter. I had tried many remedies, but was growing worse, when I started with Cuticura. The first application gave meinstantrelief, and when I had used two cakes of Cuticura Soap and three boxes of Cuticura Ontment, I was completely cured. (Signed) Miss Nelhe Vander Wiele, Lakeside, N. Y."

Japanese Favorite Tune.

"Marching Through Georgia" is said to be the favorite tune of the Japanese soldiers. Native music has no marches, as it is without "time." Patriotic composers have, however, since the war began, remedied this defect by adapting various foreign pieces. The soldiers have picked up the new airs and sing with great delight the Japanese words fitted to them.—Kansas City Journal.

Figo's Cure is the best medicine we ever used for all affections of throat and lungs.—WM. O. ENDSLEY, Vanburen, Ind., Feb. 10, 1900. Labor organization has until lately made slow headway in Spain.

# MEANDERING MIKE'S CONCLUSION FINANCE AND TRADE REVIEW

Now what's the use of sittin' down
An' agitatin' of my mind
An' tryin' hard to win renown
An' leavin' other folks behind?
The neighbor boy that reads a book
'Cause he gits licked unless he do,
Has made me take another look
And kind o' changed my point of view.

He says that Shakespeare never wrote
Them pieces that the boys recite,
And lots of sayings that we quote
Is plagiarisms left and right.
An' folks we call the real stuff
An' put up in the museum hall
Was nothin' only jest a bluff
An' sometimes never lived at all.

This world is seen an envious place!

It doesn't seem worth while to try
To benefit a human race
That is so quick to pass you by.
So what's the use o' sittin' down
An' struggle-in' for pomp or fame?
They'd only take my laurel crown
Off'n my forchead, jes' the same!

Gothic Type Again.

According to the Berliner Tagebiatt the short-sightedness of recruits is beginning to cause grave anxiety to the German War Office. "Bismarck himself," comments the London Chronicle, "who had to take to glasses long before he was out of office, was strongly of this opinion, though, from motives of patriotism, he would not hear of the abolition of the Gothie type, and invariably refused the gift of any book printed in Roman characters. But the anti-Gothie party is now gaining ground, and several newspapers and numerous scientific works are printed in Roman type, which the Emperor himself is said to favor." According to the Berliner Tagebiat

DUN'S WEEKLY SUMMARY

eading Industries Receive Large Orders and Less Idle Machinery is Reported.

Business continues to expand in a wholesale manner that promises well for the future. Reports from the leading branches of manufacture are unanimous in telling of an increasing volumns of orders and the percentage of idle machinery steadily diminishes. Textile plants make the best returns closely followed by footwear factor ies, and some divisions of the stee industry are engaged so far ahead that capacity is extended. Better that capacity is extended. Better prospects for the crops removes the only handicap that impeded the revival of trade and favorable weather for a few weeks will assure unprecedented production in the aggregate, although the yield of cotton will fall considerably behind last year's. The month of July made a most encouraging exhibit in so far as statistics are available, liabilities of failure being smaller than in any month since April, 1901, and rallway earnings surpassing last year's by 9.1 per cent. Foreign trade at New York for the last week shows gains of \$1,776,184 in exports and \$1,608,564 in imports, as compared with the same period of 1904. Quiet conditions in the leading iron and steel markets do not prevent activity at the mills, which operate freely on old contracts, and are preparing for a vigorous fall campaign. Prices of minor metals have risen still further, tin selling six cents higher than it did a year ago. Output of coke is moderate, but the market is quiet and prices are steady.

Leather is more active, especially hemlock sole and oak backs, with piaces sustained. Prospect of still higher prices for materials necessitates conservative action by manufacturers of boots and shoes! New England producers of footwear are fully occupied on current delivereies. Failures last week in the United States are 232 against 230 the corresponding week last year, and in Canada 26 against 18 last year. prospects for the crops removes the

FEAR FOR NIAGARA.

IMMENSE VOLUME OF WATER DI-

mmercial Enterprises Are Making Heavy Drains on This Famous Show-Place--Its Tremendous Electrical Pow or the Inducement.

Niagara Falls, August 7.—The vol-ume of water being diverted from the historic Niagara Falls is reaching such proportions that the people of the State are trying to pass laws which will pre-vent the possibility of a practical wip-ing out of this sublime natural spec-tacle.

Water sufficient to develop nearly Water sufficient to develop nearly five hundred thousand horse-power continuously, twenty-four hours per day, for industrial purposes, is now being taken from the river above the Falls, and further Gevelopments requiring more water are contemplated. Probably the largest user of the electricity produced by the waters of the mighty river is the concern which by the five or six thousand degree heat of the electric turnace brings lime and coke into unwilling union, thereby producing what is known as Calcium Carbide.

possibilities and to-day calcium carbide is being shipped everywhere and used for dispelling darkness in buildings of all descriptions, from the ordinary barn of the farmer to the country villa of the wealthy, as well as for lighting the streets of a large number of towns. Acetylene can be easily and cheaply installed, and the manufacture and sale of acetylene generators has become a business of recognized standing, has assumed large proportions and is steadily growing.

ily growing.

Horners and bees are not so apt to sting a person if he keeps absolutely still, but this is not necessarily due to the fact that they do not see readily, but simply that they do not recognize an enemy in a perfectly stationary body. The accumulated in tell'gence of generations has shown them that still objects, like posts, stones, or trees, are not enemies, and that disturbance of their nests is always occasioned by objects having power of motion. It thus follows that if a hornets' nest be disturbed or if a wild bees' nest

A father, with his three children, was in a waiting room in the north of England, and stopped before one of the weighing machines placed them one by one on the machine until all three were on it. Then he put one penny into the slot. The figure indicated was 125 pounds. Lifting one of his children carefully off he found the other two together weighed to pounds. The difference, therefore—47 pounds—was the first child's weight. In the same way he discovered the weight of the other two, and then went off highly gratified with his success.—Tit-Bits. Beat the Machine.

Pneumatic Tire Armor.

Dr. J. A. Vansickles, of Jefferson City, has filed application for patent on a pneumatic tire armor. The The armor is composed of light steel plates which overlap each other in such a manner as to render the rubber tire of an automobile or carriage puncture-proof. The parts of the armor are small and are held together by rivets, rendering it as flexible as the pneumatic tire itself.—

Kancas City Journal.

Japs are Gymnasts.

Every Japanese barracks has a gymnasium, and the Japanese soldiers rank among the best gymnasts in the world. In half a minute they can scale a 14-foot wall by simply bounding on each other's shoulders, one man supporting two or three others.

Shows He Knew What Food to Stick To
Forwarding a photo of a splendidly handsome and healthy young boy, a happy mother writes from an Ohio town:

"The enclosed picture shows my 4-year-old Grape-Nuts boy.

"Since he was 2 years old he has caten nothing but Grape-Nuts, He demands and gets this food three times a day. This may seem rather unusual, but he does not care for anything else after he has eaten his Grape-Nuts, which he uses with milk or cream, and then he is through with his meal. Even on Thanksgiving Day he refused turkey and all the good things that make up that great dinner, and ate his dish of Grape-Nuts and cream with the best results and none of the evils that the other foolish members of the family experienced.

"He is never sick, has a beautiful complexion, and is considered a very handsome boy. May the Postum Company prosper and long continue to furnish their wholesome food." Name given by Postum Co., Battle Creek, Mich.

There's a reason. Read the little book, "The Road to Wellville," in every pkg.

BIBLE IN STONE.

Buddhists Carved Their Holy Words on a Hundred Temples.

on a Hundred Temples.

Great as has been the amount of labor expended on the various Bibles of the world, the palm for execution must be given to the Kutho-daw, which is a Budhist monument near Mandalay in Burma.

It consits of about 100 temples, each containing a slag of white marble on which the whole of the Buddhist Bible, consisting of more than 1,000,000 syllables, has been engraved. The Burmese alphabet is used but the language is Pall. This wonderful Bible is absolutely unique.

The Kutho-daw was erected in 1857 by Mindon-Min, the last king but one one Burma. The vast collection of temples together forms a square, with a dominating temple in the center. Each of the marble slabs on which the sacred texts are inscribed is surmounted by an ornamental canopy in pagoda form.

bide.

Dry calcium carbide is lifeless as so much broken rock, but in contact with water it springs into activity and begets abundantly the gas Acetylene. The light resulting from the ignition of acetylene is the nearest approach to sunlight known.

These facts, though of comparatively recent discovery, were soon seized by men with an eye to the commercial possibilities and to-day calcium carbide is being shipped everywhere and used for disastive.

Meteor for a Tombstone.

One the oddest tombstones in America is above the grave of T. B. Lane, at Akron, O. A dozen years ago a meteor fell upon the Lane farm, at Talmadge, burying itself 16 feet in the earth. It was dug out, and on the death of Mr. Lane was utilized as a tombstone. The metoer, which resembles a mass of iron ore, is mounted on an oblong pedestal of polished granite, and is in marked contrast to the crude sculptures found in other parts of the cemetery where the grave is located.—New York Herald.

Sieep and Death.

An animal deprived of sleep dies more quickly than from hunger. One of the cruelest of Chinese punishments is to kill a man by preventing sleep, he dying insane about the fourteenth day. All animals sleep for some period of the 24 hours; how and when they do so depends upon their natural habits. But they all have this in common, that after any unusual exertion they sleep longer. longer.

FITSpermanently cured. No fits or nervous-ness after first day's use of Dr. Kline's Great NerveRestore, \$2 irial bottleand treatise free Dr. R. H. KLINE, Ltd., 931 Arch St., Phila, Pa.

Buhl work is said to be very popular now in England.

### A WOMAN'S ORDEAL DREADS DOCTOR'S QUESTIONS

Thousands Write to Mrs.Pinkham, Lynn, Mass., and Receive Valuable Advice Absolutely Confidential and Free

There can be no more terrible ordeal to a delicate, sensitive, refined woman than to be obliged to answer certain questions in regard to her private ills, even when those questions are asked by her family physician, and many

continue to suffer rather than submit to examinations which so many physicians propose in order to intelligently treat the disease; and this is the reason why so many physicians fall to cure female disease.

This is also the reason why thousands upon thousands of women are corresponding with Mrs. Pinkham. at Lynn, Mass. To her they can confide every detail of their illness, and from her great knowledge, obtained from years of experience in treating female ills, Mrs. Pinkham can advise women more wisely than the local physician.

Read how Mrs. Pinkham helped Mrs. T. C. Willadsen, of Manning, Ia. She writes:

Read how Mrs. Pinkham helped Mrs.
T. C. Willadsen, of Manning, Ia. She writes:
Dear Mrs. Pinkham:—
"I can truly say that you have saved my life, and I cannot express my gratitude in words. Before I wrote to you telling you how I felt, Ihad doctored for over two yea, steady, and spent lo's of money in medicines besides, but it all failed to do me any good. I had female trouble and would daily have fainting spells, backache, bearing-down pains, and my monthly periods were very irregular and finally ceased. I wrote to you for your advice and received a letter full of instruction just what to do, and also commenced to tal's Lydia E. Pinkham's Vegetable Compound, and I have been restored to perfect health. Had it not been for you I would have been in my grave to-day"

Mountains of proof establish the fact that no medicine in the world equals Lydia E. Pinkham's Vegetable Compound for restoring women's health.

ANNUAL SALE, TEN MILLION BOXES

# Truths that Strike Home

Your grocer is honest and-if he cares to do so-can tell you that he knows very little about the **bulk** coffee he sells you. How can he know, where it originally came from, how it was blended—**or with what**—or when roasted? If you buy your coffee loose by the pound, how can you expect purity and uniform quality?

LION COFFEE, the LEADER OF ALL PACKAGE COFFEES, is of necessity uniform in quality, strength and flavor. For OVER A QUARTER OF A CENTURY, LION COFFEE has been the standard coffee in millions of homes.

LION COFFEE is carefully packed at our factories, and until opened in your home, has no chance of being adultersied, or of coming in contact with dust, dirt. germs, or unclean hands.

In each package of LION COFFEE you get one full pound of Pure Coffee. Insist upon getting the genuine. (Lion head on every package.)
(Save the Lion-heads for valuable premiums.)

SOLD BY GROCERS EVERYWHERE WOOLSON SPICE CO., Toledo, Chio.
