Magnet as Labor Saver.

Magnet as Labor Saver.

The Pennsylvania Railroad Co., has installed a powerful magnet at its South Altoona foundry plant to transfer castings weighing up to two tons, from one part of the shop to another, thus doing away with much hard work. The magnet is merely an experiment, but so far has worked successfully. It has sufficient power to attract heavy objects which may be a distance of three feet away. To remove the magnet, all that is required is to shut off the electricity.
