The Case of Miss Irene Crosby Is One of Thousands of Cures Made by Lydia E. Pinkham's Vegetable Compound.

How many women realize that men-struation is the balance wheel of a woman's life, and while no woman is entirely free from periodical suffering, itis not the plan of nature that women should suffer so severely.

Thousands of American women, however, have found relief from all monthly suffering by taking Lydia E. Pinkham's Vegetable Compound, as it is the most thorough female regulator known to medical science. It cures the condition which causes so much discomfort and robs menstruation of its terrors,

Miss Irene Crosby, of 313 Charlton Street East Savannah, Ga., writes "Lydia E. Finkham's Vegetable Compound is a true friend to women. It has been of great benefit to me, curing me of dregular and painful menstruation when everything else had felled, and I gladly recommend it to other suffering women."

Women who are troubled with painful or irregular menstruation, backanche, bleating (or flatulence), leucorrhea, falling, inflammation or ulceration of the uterius, ovarian troubles, that "bearing-down" feeling, dizziness, faintness, indigestion, nervous prostration or the blues, should take immediate action to ward off the serious consequences, and be restored to perfect health and strength by taking Lydia E. Pinkham's Vegetable Compound, and then write to Mrs. Pinkham, Lynn, Mass., for further free advice. Thousands have been cured by so doing.

Horse Stealing in New York.

There is an epidemic of horse stealing on Washington Heights. A wagon of some kind is usually attached to the horse. The thefts go on in day time as well as at night. Nothing in all New York is so easy to steal, but to get away with the goods is extremely difficult. A boy of 12 drives a delivery wagon up to the curb, jumps out, enters an apartment house basement to send semething up on a dumb walter, and is gone 10 minutes. Mr. Thief, if he has the nerve, walks to the wagon deliberately, assumes a busy air, climbs in and drives off. Who is there to stop him? Who knows the horse and wagon do not belong to him? Who among the four million, New Yorkers is looking for trouble?

BILL NYE'S REPLY.

The late Bill Nye replied as follows to a correspondent who inquired about his habits of work and life:

"When the weather is such that I cannot exercise in the open air, I laye a heavy nair of dumbhells at my breathless anxiety."

road.

The English woman picked herself up uninjured, but was horrified to see her aged hostess lying on the ground unconscious. Running to a nearby farmhouse, she knocked for some time before she finally succeeded in bringing a sunbonneted woman to the door.

"A lady has been hurt—thrown from a carriage. She is lying down there in the road. Can you give me some whisky for her?" cried the visitor in breathless anxiety.

Spinning by Electricity. Spinning by Electricity,
The manufacturers of Lancashire.
England, are greatly interested in a
new spinning mill, of \$4,000 spindles,
which is to be both lighted and operated by electricity. The current is
taken from the mains of a power company. This is the first establishment
of the kind in England, but there are
many mills so operated in this country.

The Secretary of Agriculture, in his last amual report, makes the statement that all the gold dug from all the mines of the earth since the time of Columbus would not be enough to pay for the farm products of the United States for the years 1903 and 1904. He points, out, further, that agricultural progress is so rapid that the products of 1904 are 42 per cent greater than the total products reported by the census of 1900.

#### Filipino Fire Maker.

Filipino Fire-Maker.

A curious contrivance is used by some of the natives of Northern Luzon, Philippine Islands, for the purpose of obtaining fire.

This consists of a hardwood tube of about one centimeter internal diameter and six centimeters in length and a piston of sightly less diameter and length. The tube is closed at one end by an air tight plug or, instead, the piece of wood of which it is made is not bored completely through its entire length. The inside of the tube is smooth and highly polished. The piston has a handle and resembles the piston of the small boy's "pop gun."

The end of the piston is made to fit, the tube airtight by a wrapping of wax thread, and directly in the end as hallow cavity is cut. Lint scraped from weather-beaten timber and well dried is used for tinder. A small bit of this is placed in the cavity at the end of the piston, the latter is inserted a half-inch in the open end of the tube and then driven quickly home with a smart stroke of thepaim. Upon withdrawing the piston the lint is found ignited, the sudden compression of air generating the necessary heat.—Scientific American.

### The Age of Steel.

The Age of Steel.

About 1890 some railroads commenced to build small spans and plate girders of steel, and, for eyebars, steel was almost exclusively used. At that time most of the rolling mills, which had formerly manufactured wrought iron, were equipped with steel furnaces, but continued for some time to make both kinds of material, until they found it more profitable to confine themselves to the manufacture of structural steel only, and discontinued the manufacture of wrought iron. In 1894 it was practically impossible to obtain wroughtiron shapes, and from that time forward steel entirely superseded wrought iron as the modern structural material. The year 1894, therefore, may be considered as the commencement of the present epoch.—the Steel Age.

#### An Old Minister

An Old Minister.

Rev. Daniel March, D. D., of Woburn, Mass., recently celebrated his eighty-ninth birthday. He has been an ordained minister for 60 years. As a writer of works on travel and religious topics Dr. March has won a reputation as a scholar in inearly every civilized country. He was pastor of a congregaional church in Philadelphia for four years.

Woman Finds Gold.

Mrs. Alice Rollins, of San Francisco, is one of the few successful women gold-seekers of the Klondyke, She made gold seeking a study before starting, and the claim she chose was a rich one, with the result that she is now a millionaire.

Makes Others Nervous Too.

A Berlin doctor lays it down that the piano should never be used by a child under 16 years of age. Out of 1,000 girls who played before the age of 12 he found 600 cases of nervous diseases.
