DEATH SEEMED NEAR.

How a Chicago Woman Found Help
When Hope Was Fast Fading Away.

Mrs. E. T. Gould, 914 W. Lake St., Chicago, Ill., says: "Doan's Kidney Pills are all that saved me from death of Bright's disease. I am sure, I had eye trouble, backache, catches when lying abed or when bending over, was languid and often dizzy and had sick headaches and bearing-down pains. The kidney secretions were too copious and frequent, and very bad in appearance. It was in 1903 that Doan's Kidney Pills helped me so quickly and cured me of these troubles, and I've been well ever since."

Foster-Milburn Co., Buffalo, N. Y. For sale of all druggists. Price, 50 cents per box.

Feeding Eggs to Calves.
J. S. Dowdy, of this region, feeds most of the hen eggs laid on his premises to his calves. He says that he will never sell him fruit for less than 16 cents a dozen as long as he had any calves to swallow them. Mr. Dowdy claims that it pays very handsomely to feed raw eggs to young cattle. He says that the calves grow fat and tall on raw eggs, and that they relish them to an astonishing degree. He says that egg-fed veal is exceedingly toothsome and nutritious.—Kansas City Journal.

The Erie Railroad has arranged for the immediate expenditure of \$225,000 for the installation of the most modern and efficient railway signal that has yet been put on the market. It is known as the Hall Electric Semaphore Signal Clear System, and is operated by stationary storage batteries. The line between Bergen, N. J., and Middletown, a distance of 83 miles, is to be equipped at once. For the first 32 miles the signals will be put two-thirds of a mile apart; for the rest of the distance, about one and one-third miles apart. It will require five power plants for charging the batteries, which will be located at Rutherford Junction, Ridgewood Junction, Suffern, Oxford and Middletown. The line to be equipped has two air lines, and is at different places and is the most congested part of the Erie system. Hitherto a manual block, which is a tower with signals operated by a power plant, has been used as a block protection, but it has been deemed best to install an automatic system for further protection and to accelerate the movement of trains. The new system will be extended over the entire line in the future.

Long Submarine Tunnels.

Much attention has been attracted to the opening of the new subway tunnel under Boston Harbor, but the longest tunnel under water is in England, where there is a tunnel under the River Sever four miles 624 yards long, of which two and one-half miles are actually under water. The proposed tunnel under the English channel will be 23 miles in length, and the latest project is the construction of a tunnel to connect France with England, which would be 33 miles in length and would lie at a depth of 500 feet below the bottom of the channel. The longest submarine tunnel actually in course of construction is that connecting the islands of Sicily with the Italian mainland, which will be eight and one-half miles long.—New York Herald.

Incomplete Education

Professor William James, of Harvard university, in a recent address said: "There is not a public abuse on the whole eastern coast which does not receive the enthusiastic approval of some Harvard graduate." And he added: "Fifty years ago the schools were supposed to free us from crime and unhappiness, but we do not induce in such sanguine hopes to any such extent to-day. Though education frees us from the more brutal forms of crime, it is true that education itself has put even milder forms of crime in our way. The intellect is a servant of our passions and sometimes education only makes the person more adroit in carrying out these impulses."

HONEST PHYSICIAN.

Works With Himself First.
It is a mistake to assume that physicians are always skeptical as to the curative properties of anything else than drugs.

Indeed, the best doctors are those who seek to heal with as little use of drugs as possible, and by the use of correct food and drink. A physician writes from Cairo, to tell how he made a well man of himself with nature's remedy:

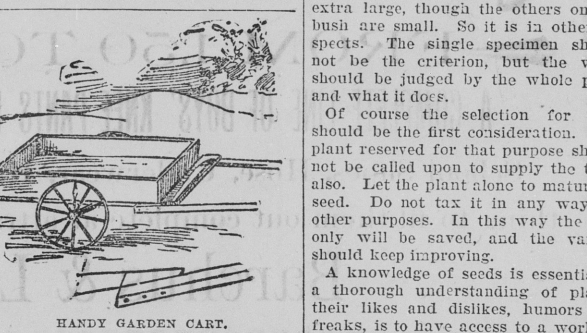

"Before I came from Europe, where I was born," he says, "it was my custom to take coffee with milk (cafe au lait) with my morning meal, a small cup (cafe noir) after my dinner and two or three additional small cups at my club during the evening.
"In time nervous symptoms developed, with pains in the cardiac region, and accompanied by great depression of spirits, despondency in brief, 'the blues.' I at first tried medicines, but got no relief, and at last realized that all my troubles were caused by coffee.
"I thereupon quit its use forthwith, substituting English Breakfast Tea.
"The tea seemed to help me at first, but in time the old distressing symptoms returned, and I quit it also, and tried to use milk for my table beverage.
"This I was compelled, however, to abandon speedily, for while it relieved the nervousness somewhat it brought on constipation. Then by a happy inspiration I was led to try the Postum Food Coffee. This was some months ago, and I still use it. I am no longer nervous, nor do I suffer from the pains about the heart, while my 'blues' have left me and life is bright to me once more. I know that leaving off coffee and using Postum healed me, and I make it a rule to advise my patients to use it." Name given by Postum Co., Battle Creek, Mich.
There's a reason.

The Farm

Development of a Colt.
The full, rounded development of a colt depends principally upon its feed during the first year and a half of its life. If the mare is a good milker the colt gets started naturally, but many mares are not good milkers and the colt requires additional feeding at an early age. In order to raise valuable colts it is necessary to watch their progress. It is easy to see when a colt is doing well. A stunted colt never makes a good horse. It is folly to go over the trouble and expense of raising a colt and neglect proper feeding, as this is the finishing without which the greater time, money and labor practically are thrown away.

Poor Cows.
Some time ago I came across a few lines, of which I made a note. They were to the effect that a poor man keeping poor cows is a sight to make one sigh at the shortsightedness of man. There is a world of truth in this remark—a poor man cannot afford to waste his money in the feeding of poor cows, and it is quite contrary to all experience to say that he cannot afford to own good cows. A man who is going to own cows had far better invest his money in the purchase of half a dozen really good animals than in a dozen inferior ones. If he wants to increase his herd he can do so by breeding from good animals, and with a far better chance of obtaining worthy members of the dairy than he would by breeding from ordinary stock.—C. G. F., in American Cultivator.

A Handy Garden Cart.
No one realizes how handy a small cart is on the farm until one has used it; the wheelbarrow is all right in its place, but there are times when the hand cart answers the purpose much better. The illustration shows how one of these carts may be made with a little lumber, and any old wheels from a mower one may have. If there are no such wheels and shaft on the farm, the local blacksmith can probably supply the want from articles of the kind that come to him. The illustration shows plainly the mode of construction.

HANDY GARDEN CART.

Have a box of convenient size, being careful not to make it too large, else it cannot be pulled except with considerable effort when filled. The width will, of course, depend upon the length of the axle. Thills may be made of any suitable material, if one cannot obtain a made pair, and if they are home constructed it will be easy to bring the outer ends nearer together by placing a two-inch block between the ends next to the box and the box. At the front end of the box a strip of board is placed, to which the slight tree is attached.

The Care of Tools.

To keep the farming and gardening tools clean and free from rust, apply a coat of wagon grease to the steel parts, such as plowshare, cultivator shovels, blades of the hoe, etc., whenever they are not in use. This leaves them in perfect condition, so not a moment is lost when one is ready to go to work with them. Another plan which is especially good to follow when storing tools when idle is this: Take crude petroleum and stir enough mineral paint into it to make it spread evenly. Apply with a brush to the tools and it will prevent rusting, yet it is easy to remove, and will leave the tools bright and clean.

If the small tools have been neglected and are found badly rusted in spring, the easiest way to clean them is to let the working parts soak twelve hours in the whey from sour milk. At the end of the time the rust can be rubbed off with a stiff brush or coarse cloth, and after they are thoroughly dried a good coating of kerosene will improve them.

Most of us have trouble with tools disintegrating, and whether from dishonesty or carelessness on the part of neighbors, marked tools seem to stay with us better. Clean a spot on the smooth steel and cover it with a layer of melted beeswax. Then with a sharp instrument mark the name or initials on the wax, being careful to cut through it to the steel. Fill these lines in the wax with nitric acid, letting it remain a few hours, afterward washing it off carefully with clean water. After the wax is cleaned off the letters will show perfectly plain on the metal.

For tools with wooden handles a name can be put on with stencil, either by burning or with paint. Or a band of some bright color can be painted around the handle which shows as far as the tool can be seen.—Michigan Farmer.

Possibilities in Popcorn.

Though we may regard popcorn as simply a pastime for children it is capable of being made not only a luxury but a substantial addition to the

FINANCE AND TRADE REVIEW

ENCOURAGING OUTLOOK
Demand is Broadening—Many Plants Have Orders Running Into Next Year.

Industrial, commercial and agricultural progress continues satisfactory. Nothing has occurred to weaken confidence, the disposition being to extend the plans further into the future, and many plants have their facilities engaged well into next year. As demand broadens there is a natural tendency to enlarge capacity, which adds to the already exceptional structural activity.

Jobbers have secured much more forward business than at this date last year, especially in drygoods lines, and the frequent reminders of autumn temperature stimulate retail distribution of wearing apparel. Thus far the weather has not been cold enough to harm the crops that remain to be harvested, and another week of favorable conditions should assure an unprecedented yield of corn. Several settlements maintain labor disputes at the minimum and mercantile collections continue prompt. A few complaints of inadequate transporting facilities from manufacturing centers are attributed to the requirements of grain moving.

Railway earnings thus far reported for September were 3.7 per cent. larger than last year, while foreign commerce at this port for the last week showed gains of \$2,364,180 in value of exports and \$97,851 in imports, as compared with 1904. The official report of exports of staple products from all ports of the United States in August exhibited a gain of \$16,833,961 over the same month last year, of more than 50 per cent. Each week brings better news from the iron and steel industry, demand broadening and production keeping pace. One of the most promising features is the business improvement abroad, which is calculated to increase still more the already heavy export demand for steel shapes.

Purchases of leather are not yet as liberal as they will be later in the season, as shoe manufacturers are operating moderately, but the tone is very firm and a fairly large export movement gives support. Failures this week numbered 194 in the United States, against 224 last year, and 29 in Canada, compared with 21 a year ago.

Tumors Conquered Without Operations

Unqualified Success of Lydia E. Pinkham's Vegetable Compound in Cases of Mrs. Fox and Miss Adams.

One of the greatest triumphs of Lydia E. Pinkham's Vegetable Compound is the conquering of woman's dread enemy, Tumor.

So-called "wandering pains" may come from its early stages, or the presence of danger may be made manifest by excessive menstruation accompanied by unusual pain extending from the ovaries down the groin and thighs. If you have mysterious pains, if there are indications of inflammation ulceration or displacement, don't wait for time to confirm your fears and go through the horrors of a hospital operation; secure Lydia E. Pinkham's Vegetable Compound right away and begin its use and write Mrs. Pinkham of Lynn, Mass., for advice.

Wonderful Grape Vine.

The celebrated grape vine in the conservatory at Hampton Court, England, planted in 1769, had a stem 11 inches in girth and a principal branch 114 feet in length, and the whole vine occupying more than 160 square yards, and in one year it produced 2,200 bunches of fruit weighing on an average a pound—in all, about a ton of fruit.

Old Manuscript Found.

While pursuing his studies of the history of astronomy and astrology at the Imperial Library, in Vienna, the Norwegian professor, Dr. Axel Bjornho, has discovered a most valuable manuscript in the handwriting of the first north pole explorer, known as Claudius Clausen.

Canada last year paid \$8,330 to immigration agents for sending immigrants to the agricultural districts.

Disfigured by Eczema.

"I had eczema on the face for five months, during which time I was in the care of physicians. My face was so disfigured I could not go out, and it was going from bad to worse. A friend recommended Cuticura. The first night after I washed my face with Cuticura Soap and used Cuticura Ointment and Resolvent I changed wonderfully. From that day I was able to go out, and in a month the treatment had removed all scales and scabs, and my face was as clear as ever. (Signed) T. J. Soth, 317 Stagg Street, Brooklyn, N. Y."

There are 100 palmists in Coney Island alone, from the gypsy girl, who affects an Eastern costume, to the gray-haired professional, whose very looks inspire "confidence."
