JOYS OF MATERNITY

A WOMAN'S BEST HOPES REALIZED

Mrs. Potts Tells How Women Should Prepare for Motherhood

The darkest days of husband and wife are when they come to look forward to childless and lonely old age.

Many a wife has found herself incapable of motherhood owing to a displacement of the womb or lack of strength in the generative organs.

Mrs. Anna Potts

Frequent backache and distressing pains, accompanied by offensive discharges and generally by irregular and scanty menstruation indicate a displacement or nerve degeneration of the womb and surrounding organs.

The question that troubles women is how can a woman who has some female trouble bear healthy children?

Mrs. Anna Potts, of 510 Park Avenue, Hot Springs, Ark., writes:

My Dear Mr. Pinkham: During the early part of my married life I was delicate in health; both my husband and I were very anxious for a child to bless our home.

Actual sterility in woman is very rare. If any woman thinks she is sterile, let her try Lydia E. Pinkham's Vegetable Compound and write to Mrs. Pinkham, Lynn, Mass. Her advice is free to expectant or would-be mothers.

HOUSEHOLD AFFAIRS

ELECTRICITY IN THE KITCHEN.

Not yet can the busy housewife turn on the cold in her refrigerator by twisting the same switch which controls the electric lights, but that is only because inventors have so far failed to put on the market an electric refrigerating plant of small enough capacity.

MARKING THE LINEN. How many women adhere to the old-fashioned method of marking linen with a new steel pen and marking ink?

HEMMING TABLE LINEN. Table linen should, of course, be hemmed by hand. That is "the correct thing," but the hemmer of the machine can be made very useful for this purpose in the following manner:

SOME LEFT-OVERS. Housewives are often in a dilemma as to what to do with left-over cornbread, gems, biscuit, etc.

CARE OF BRASS WORK. A housekeeper who lights her dining room and bedrooms with candles smiled at a request to explain the exquisite neatness of her brass candlesticks.

HOUSEHOLD RECIPES: Graham Gems—Use two cups of sour milk, three cups of Graham flour, half a teaspoonful of soda; beat together a few minutes, drop it into hot greased gem pans and bake in a quick oven for ten or fifteen minutes.

Cormeal Bread (Creole Recipe)—Rub a piece of butter the size of an egg into a pint of corn meal. Make it a batter with two eggs and some new milk. Add a spoonful of yeast. Set by the fire an hour to rise. Butter little pans, fill them and bake.

Swan Pudding—Half box of gelatine dissolved in one pint of warm water. When cool add three-quarters pound sugar and the whites of two eggs and juice of two lemons; beat all together with an egg beater until stiff; put it in the dish in which it is to be served, and set on ice or in a cool place. To be eaten with soft custard.

Toasted Graham Gems—Split the gems, toast carefully, and while they are toasting heat some rich milk to the boiling point, add a little salt and butter and thicken with flour moistened with cold milk and pour over the toasted gems. Gems left over from the day before may be used for the next morning's breakfast.

Monkey Pudding—Take about half a loaf of stale bread. Let it soak in as much good milk as you would use for a bread pudding for several hours. Add a little cream. Put in three heaping spoonfuls of brown sugar, two heaping spoonfuls of powdered cinnamon and a few stoned raisins. Cook in the oven with a slow fire until it looks like an old monkey. Serve with a stiff sugar and butter sauce.

Mutton Cutlets—Have the butcher cut what are known as English chops; have them neatly trimmed. Broil on a gridiron (not too much); before removing from the fire pour over melted butter with parsley minced fine. Place on a large hot platter and on the end of each bone place a little cap; those made of white paper can be had at any house-furnishing store, or they are easily made by folding paper and fringing it. Cut the size of the bone. They will last three or four times.

FINANCE AND TRADE REVIEW

DUN'S WEEKLY SUMMARY

Feeling of Confidence in Future of Business in All Lines—Manufacturing Plants Busy.

R. G. Dun & Co.'s Weekly Review of Trade says: Business conditions certainly warranted a day of gratitude this year more than ever before, but in many industries it was difficult to take time for a holiday without falling still further behind orders and increasing the complaints of importunate purchasers.

Christmas trade opens with a volume that promises to eclipse all earlier records, and the feeling of confidence in the future is strengthened by the encouraging statement that the strike of structural iron workers may not become general.

Crops supply the foundation of this country's commercial prosperity, and the value of all farm products, according to the annual report of the Department of Agriculture, was even greater than estimated.

Progress is fully maintained in the iron and steel industry. Quotations of all forms, from ore to finished steel, are firmly maintained, several small advances being noted and all available statistics testify to unprecedented activity.

Bread and butter should not be given to infants under 18 months of age except in small quantities. When given the bread should be cut as thinly as possible. Gravy or beef tea may be given with vegetables for dinner to children under two, but they are better without any meat. Children should never be allowed to eat between meals.

THE EGYPTIAN FAMINE.

An Important Monument Found Corroborating the Biblical Account.

Among the most important of the finds around the great city of Thebes or Luxor, in Egypt, is a great rock on the Island of Sehel below the first cataract. This has the hieroglyphics in a fairly good state of preservation, and they set forth that in the reign of King Zoser the Nile failed to rise for seven consecutive years, and that in consequence a terrible famine prevailed in the land in which innumerable people perished of hunger.

New Use for Glass. The use of glass for the dressing of wounds as put in practice by Dr. Ayraud of Paris, is so sensible and simple a proposition that the wonder is it was not invented ages ago.

W. L. Douglas, merchant of Parkersburg, W. Va., says: "Driving about in bad weather brought kidney troubles on me, and I suffered twenty years with sharp, cramping pains in the back and urinary disorders. I often had to get up a dozen times at night to urinate. Retention set in, and I was obliged to use the catheter.

I took to my bed, and the doctors failing to help, began using Doan's Kidney Pills. The urine soon came freely again, and the pain gradually disappeared. I have been cured eight years, and though over 70, am as active as a boy."
