

A Medical Dilemma.  
A woman who was ill and found herself in a trying position explained her woe to a friend. "You see, my daughter, Harriet, married one of those homeopath doctors and my daughter, Kate, an allypath. If I call the homeopath, my allypath son-in-law and his wife will get mad, and if I call my allypath son-in-law, then my homeopath son-in-law and his wife will get mad, and if I go ahead and get well without either of 'em, then they'll both be mad, so I don't see but I've got to die outright."

**RUNNING SORES ON LIMBS.**  
Little Girl's Obstinate Case of Eczema—Mother Says: "Cuticura Remedies a Household Standby."  
"Last year, after having my little girl treated by a very prominent physician for an obstinate case of eczema, I resorted to the Cuticura Remedies, and was well about six weeks we had completely well, and there has been no recurrence of the trouble. We find that the Cuticura Remedies are a valuable household standby, living as we do twelve miles from a doctor, and where it costs from twenty to twenty-five dollars to come up on the mountain. Mrs. Lizzie Vincent Thomas, Fairmount, Waiden's Ridge, Tenn., Oct. 18, 1905."

**Debts of Two Great Cities.**  
The net debt of London is \$225,000,000; that of New York is \$21,557,114 last November. The budget of the London county council for one year is \$50,000,000; that of New York, including some costs not borne in London by the council, is more than twice as great. They grow in London about extrava-gance.—New York World.

**Catarrh Cannot Be Cured**  
With LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Catarrh is a blood or constitutional disease, and in order to cure it you must take internal remedies. Hall's Catarrh Cure is taken internally, and acts directly on the blood and mucous surface. Hall's Catarrh Cure is not a quack medicine. It was prescribed by one of the best physicians in this country for years, and is a regular prescription. It is composed of the best tonics known, combined with the best blood purifiers, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what produces such wonderful results in curing catarrh. Send for testimonials, free.  
F. J. CHENEY & Co., Props., Toledo, O. Sold by druggists, price, 75c. Take Hall's Family Pills for constipation.

**Where Life is Held Sacred.**  
A traveler who recently visited the coast of Labrador says that nowhere on earth are life and property held so sacred as in that little known and barren land. A thousand miles of lonely seaboard, along which is scattered a population of some 10,000 persons, about one-third of whom are white, would seem to give every opportunity for crime, yet there is no police officer of any kind, no court, and no jail. Nor are they needed. The only criminal charge within 50 years was one against an Eskimo who shot a rival in love. In addition to the resident population the coast is visited every summer by about 10,000 Newfoundland fishermen, and while Newfoundland itself is not by any means free from criminals, none appears to come among the fishers, or else the example of the natives of Labrador causes them to refrain from any wrongdoing while there. About 40 years ago a Circuit Court visited the coast every summer, but as it found nothing to do, it was abolished. Now should any serious charge be made against a man, a magistrate would be sent from Newfoundland to investigate it.—Harper's Weekly.

**Taking Fuel Along.**  
Patrick and Michael were crossing the ocean on their way to America. All went well the first half of the voyage. One day, however, Pat became ill and died. The usual preparations for burial at sea were made, and in place of leaden weights, which had been lost, chunks of coal were substituted. The remains were finally ready for the last rites, and long and earnestly did Mike look at his friend. Finally he blurted out sorrowfully:  
"Well, Pat, Oi always knew ye were goin' there, Oi'm domed if Oi thought they'd make yer bring yer own coal."—Magazine of Fun.

**THE DOCTOR'S WIFE**  
Agrees With Him About Food.  
A trained nurse says: "In the practice of my profession I have found so many points in favor of Grape-Nuts food that I unhesitatingly recommend it to all my patients.  
"It is delicate and pleasing to the palate (an essential in food for the sick) and can be adapted to all ages, being softened with milk or cream for babies or the aged when deficiency of teeth renders mastication impossible. For fever patients or those on liquid diet I find Grape-Nuts and albumen water very nourishing and refreshing. This recipe is my own idea and is made as follows: Soak a teaspoonful of Grape-Nuts in a glass of water for an hour, strain and serve with the beaten white of an egg and a spoonful of fruit juice or flavoring. This affords a great deal of nourishment that even the weakest stomach can assimilate without any distress.  
"My husband is a physician and he uses Grape-Nuts himself and orders it many times for his patients.  
"Personally I regard a dish of Grape-Nuts with fresh or stewed fruit as the ideal breakfast for anyone—well or sick."—Name given by Postum Co., Battle Creek, Mich.  
In any case of stomach trouble, nervous prostration or brain fog, a 10 days' trial of Grape-Nuts will work wonders toward nourishing and rebuilding, and in this way ending the trouble. "There's a reason," and trial proves.  
Look in pkgs. for the famous little book, "The Road to Wellville."

### SCIENCE

The Nile is noted for its variety of fish. An expedition sent by the British museum brought home 9,000 specimens.

Birds cannot open the foot with the leg bent; that is the reason they do not fall off their perches. When a hen winks, its toes close as it raises its foot and open as it touches the ground.

While we look upon the egg as a masterpiece of creation, we must not forget the wonderfulness of the feather which combines in a remarkable manner lightness, complete ventilation, a first-rate non-conductor of heat and a dirt repeller.

The possibility of terrestrial magnetism being due to the rotation of the earth, the outer crust of which is electrified by the presence of ions escaping from the interior, is pointed out. Supposing that electro-magnetic mass could be detected by a balance, it follows that those atoms whose electrons are moving the most rapidly will be the heavier, and the ratio of the atomic weights will not be the ratio of the number of electrons. Deviations from Prout's law could thus be expected.

A novel use of compressed air is made by some railway companies in the Southern states of America, says the Railway News. When the loads of cotton for export are being taken to the coast, there is always some danger of such highly inflammable material becoming damaged through sparks from the locomotives. To prevent this, the locomotive boilers are filled with compressed air. A train load of several thousand bales of cotton can be hauled by these locomotives at a rate of twelve miles an hour, although no fire whatever is used in working them.

A report had already been published which shows how closely the growth of trees is dependent upon rainfall. Not only was this seen in the case of one and two-year old trees, but in an investigation extending over a period of twelve years, during which time the annual rings of growth were carefully examined. With an annual precipitation of from thirty to thirty-five inches a width of ring was produced varying from .11 to .15 inch. If, on the other hand, there was either an unusually large or small rainfall in any given year this was followed by a corresponding tree growth in the following year.

**THE COLOR OF WATER.**  
Result of Recent Experiments Made by European Physicists.  
L'illustration (Paris) gives the following results of recent experiments on the subject of the color of water: "After long hesitation, scientific men agree today in admitting that water physically pure, seen in mass, is sky blue. This color is that taken by the white light of the sun when absorbed by the water, in consequence of a phenomenon the explanation of which would be a little long. It is not due to the chemical purity of the water, since the sea (which is the bluest water) is also that which contains the most salt. Nevertheless, according to Lorel's experiments, the matter in solution should be the predominant cause of the modifications of color; upon which act besides the matter in suspension, the color of the bottom and the reflection of the sky and of the banks. Consequently blue water is pretty rare in nature; a good many seas and lakes that give us the impression of this tint are green. The water at present acknowledged to be the bluest is that of the Saragossa Sea, between Cape Verde Islands and the Antilles. The water of the Mediterranean off the French coast and around Capri is bluer than that of Lake Lemana, much less blue itself than that of the Lakes of Kandersteg and Arolla, in Switzerland. Hitherto they have not exactly determined the relation between the color of water and its degree of purity. The Belgian Professor Spring, who has been a long time studying this delicate question, has just communicated to the Academy of Sciences at Brussels some interesting figures. Pure water containing a millionth part of ferric hydrate appears brown under a thickness of six meters; a ten-millionth is sufficient for it to be green and, in order that it may remain blue, is needed less than a twenty-millionth. As to humic matter, it causes the blue coloring to disappear in a quantity less than a forty-millionth. The calcic compounds should have a great influence upon clarification as they eliminate up to a certain state of equilibrium the ferric and humic compounds."

**Truce in Plainmen's War.**  
The sheepmen of eastern Oregon can afford to carry the manifold troubles of the range smilingly. Sheep are bringing high prices, wool is soaring, and buyers with plenty of money are in substantial evidence. Stockmen of Umatilla county last week disposed of 10,000 yearling sheep and are \$30,000 richer by the transaction. The winter has been devoid of blizzards, spring is just at hand, there is a truce to the war with cattlemen, and altogether sheep owners are upon the top wave of prosperity, not only in Oregon, but throughout the great range country between the Missouri and the Columbia rivers.—Portland Oregonian.

### FEATS OF INDIAN MAGIC.

An Entertainment by Pawnees on an Open Prairie.  
T. H. Tibbles, vice-presidential candidate on the Populist ticket in 1904, has spent years and years on the frontier and among the Indians, and he can tell some good stories about Indian magic. Here is one of them.

"Once during the border days I found myself camped near a village of Pawnees. The Pawnees paid our camp a formal visit, and to amuse them one of our party, who was quite a prestidigitator, did some simple tricks with cards, etc. The Indians smiled and invited us over to their village next day, where they said they would show us some Indian tricks.  
"We went. The day was fine and sunny and about noon we were invited out on the open prairie to see the tricks. As far as we could see there were no preparations whatever. We stood around in a big circle outlined by the trail.  
"Finally a tall Indian walked out into the center of the ring and arranged the crowd for a few minutes. Then another Indian came over to me and asked if I wanted to examine a deer's head, freshly killed, which he had brought. I looked it over carefully. It was all right. I was then told to take the head into the ring to the magician.  
"That Indian didn't have a stitch of clothing on, but on the ground lying near was a red blanket. I picked up the blanket and examined it. It, like the deer head, was all right. I took a good look at that Indian, too. I then paced out to the edge of the circle, keeping my eyes on the Indian and the deer head.  
"This head was an ordinary sized one, and had two big antlers on it. And that Indian picked up that head, stuck one end of an antler in his mouth, and right before us all gradually swallowed it. It took him five minutes to get it down, but it gradually went down his throat, or somewhere else. But, remember, he was entirely naked, and there was no place to hide it.  
"After finishing the head the Indian turned around and bowed to the four points of the compass. And then, suddenly, there stood another Indian beside him. While that second Indian came from none of us could tell. He certainly did not walk across the open circle.  
"The second Indian reached down, took up the blanket from the ground and cast it over the first Indian. The blanket gradually sunk to the ground and lay flat.  
"We white people were beckoned to come forward. I picked up the blanket. There was nothing under it. The first Indian had disappeared, and in his place stood the second Indian, who was not at all like the first.  
"Now, all that took place right out of the open prairie, and in the center of a ring of whites and Indians. I had myself examined the deer's head, had shaken hands with the Indians, had lifted that blanket from the ground. It was the greatest piece of magic I ever saw."  
The modern Indian has, to a great degree, lost the power to do these feats of magic, which the old-time Indian was versed in, and the best he can do is a few sleight of hand tricks which can be done by almost any person.

**A Prayer for the Season.**  
Our God and Father, we thank Thee for the awakened earth; for the sweet incense of renewing Nature; for the fair light of the sun and the genial breezes; for the brightening vistas before our eyes and the increasing hopes within us; for singing birds and humming bees and budding plants and crooning insects. Lord, these are Thine. From Thy hand they have come, even as we ourselves. Grant that we may find joy in them and may serve Thee in that joy. Arouse in us the spirit of the time, that we may be quickened to grow and to give Thee praise in joyful development, and to give our fellowmen and every creature cheer and brightness. Lord, on Thee do we depend, for life, for growth, for hope, for joy. Grant that we shall receive these in such measure as we need, and let us not forget from Whom they are received and to Whom they must be returned. Amen.

**Julius Caesar Up-to-Date.**  
One of the famous orators of Texas was Col. Tof Bouie, an unlettered genius, who had much language at his control and a few facts.  
Bouie referred to the assassination of Julius Caesar in one of his speeches. This is what he said of that historic incident:  
"One beautiful summer day, when Julius Caesar was walking down the streets of Spain, happy and free from care, along came Brutus and snuck up behind him with stealthy tread. Then Brutus drew his bowie knife and plunged it into the immortal ribs of Julius Caesar, and that grand old man, completely taken by surprise, turned on Brutus, and in tones of thunder said: 'Is that you Brutus, you dirty dog?'—Saturday Evening Post.

**A Sure Sign.**  
Tess—Have you seen May's fiancé?  
Jess—No, but I'm sure he's as home-ly as a mud fence.  
Tess—Why, how do you know?  
Jess—She's got 'em into the habit lately of forever quoting: "Handsome is as handsome does."—Philadelphia Press.

The Iowa House has passed a bill which prescribes that 12 eggs shall weight 24 ounces.

### FINANCE AND TRADE REVIEW

**TRADE UNUSUALLY HEAVY**  
Prospect of Bountiful Harvests Add to Confidence in Business Conditions.

R. G. Dun & Co.'s Weekly Review of Trade says:  
Relief from drought in many important farming sections restored prospects of bountiful harvests, and the business of the Nation has maintained a volume that is exceptionally heavy for the season. Some evidences of conservatism regarding production beyond assured demands are noted, but in many of the leading industries contracts have been placed for the entire country during the balance of the year, while steel mills are booked well in 1907.

One of the best features of the week was the settlement of coal mining troubles in Ohio, concessions being made by both contestants that resulted in resumption of work by 35,000 miners. The only serious struggle threatened for July 2 was in the textile industry, and manufacturers granted the desired increase in wages on Thursday.

Activity in real estate and building operations is fully maintained, and the movement of lumber and materials is very heavy. Winter wheat harvesting has begun, the usual complaint regarding the scarcity of labor being frequently heard.  
Railway earnings thus far available for June show a gain of 10.5 per cent over last year's figures, and foreign commerce at this port for the last week exceeds the volume in 1905 by \$5,781,920 as to imports, and \$2,515,542 as to exports.

Failures numbered 185 in the United States, against 195 last year, and 20 in Canada, compared with 29 a year ago.  
Bradstreet's says:  
Wholesale trade is quieter in consequence with the advanced stage of the season, and retail business except in the Southwest reflects lower temperatures in great consuming sections; but crop developments are very favorable, more generally so in fact than at any previous time this year, and the volume of fall business is in advance of the same time a year ago.

Says Samuel Merwin in "Success Magazine": "The President's 'muck-rake' speech, in spite of its frank and outspoken plea for honest, merciless exposure of rascals high and rascals low, was at once seized on by the rascals and their newspapers as gleefully as if it were a defense of second-story work and porch climbing. Already the rebaters and bribers and adulterers and respectable grafters are beginning to walk abroad with the old smile, and to say, 'After all, this is a pretty good country and a pretty good world.'"

### Engineers and Politicians.

A citizen of Memphis who wanted a drink went into a saloon in the vicinity of the meeting place of the Brotherhood of Engineers day before yesterday, rather expecting to find a good many of the engineers therein. To his surprise he was the only seeker for a thirst extermiator among those present. The saloon was deserted. Thinking that perhaps the men of the meeting had found a more congenial rendezvous, he, as a matter of curiosity, visited all the other saloons in the vicinity, and he found in none of them any evidence whatever that there was a single engineer in Memphis.  
Nothing, perhaps, could throw a brighter light on the character of the United States than this incident. If a like number of politicians had assembled in Memphis to attend a convention all the saloons of this city would be holding overflow meetings.—Memphis Commercial Appeal.

**The Youngest Veteran.**  
Perhaps the really youngest soldier in the Union army of the Civil War has been discovered at last. We have in Springfield a veteran who at 13 years of age was driving the artillery horses at Gettysburg in the hottest place of the second day. But it seems that Gilbert Van Zandt, now a vigorous young man of 55, Past Commander of the Grand Army at Kansas City, enlisted as drummer boy in the Seventy-ninth Ohio Regiment, August 6, 1862, being then 10 years 7 months and 16 days old. He served until the close of the war. During Sherman's march to the sea he was dispatch carrier; his father was sergeant in the same company. He was described in his discharge papers as "13 years old and four feet high."—Springfield Republican.

**Hat and Church Architect.**  
A milliner who works in a large city says that one day a woman came in to the store very much excited and wanted the trimming on her new hat changed. She said it had been trimmed on the wrong side.  
"But," said the saleswoman, "the trimming is on the left side. That is where it ought to be."  
"It doesn't make any difference whether it ought to be in front or back, or right or left, it's got to be on the church side."  
"Church side!" grasped the astonished girl.  
"Yes, church side. I sit right next the wall in church, and I'm not going to have all that trimming next to the wall. I want it on the other side, so the whole congregation can see it."—Youth's Companion.

**The Oldest Tree.**  
The oldest tree in the world is said to be the famous dragon tree of Tenerife, which is estimated to be from 4,000 to 6,000 years of age. This wonder of the plant world was 70 feet or more in height until the year 1810, when during a terrific storm one of the large branches was broken off. A similar storm in 1867 stripped the trunk of its remaining branches and left it standing alone. This tree derives its common name from a reddish brown exudation known as dragon's blood, found in the sepulchral caves of the Guanches, and supposed to have been used by them in embalming their dead. It is said to have been at one time an important article of export from the Canaries, and has never fallen entirely into disuse.—London Graphic.

**A Brown Monument.**  
They are going to erect a monument of marble some 12 feet high, to John Brown, at Ossawatimie. Why didn't they do the thing picturesquely, by upending the name of the place?—Boston Globe.

**Dr. H. H. Kline's Dance-Nervous Diseases** permanently cured by Dr. Kline's Great Nerve Restorer. \$2 trial bottle and treatise free. Dr. H. H. Kline, L.D., 301 Arch St., Phila., Pa.

**Duse has no birthplace.** She was born on a swiftly moving train.  
Mrs. Winslow's Soothing Syrup for Children teething, softens the gums, reduces inflammation, allays pain, cures wind colic, 25c a bottle.

**Bank of England notes** cost a half-penny apiece to produce.

**THE DAISY FLY KILLER** destroys all daisy control to every home. One 25c. box kills the daisy. Harmless to persons. Clean, neat and will not soil or injure anything. Try them once and you will never be without them. It is the best of daisy killers. Sold by dealers, 100 Bushels per acre. HAROLD SORRELLS, 100 Bushels per acre. Brooklyn, N. Y.

**FOR GOOD FARMS**  
Delightful Homes, in mild climate, at bargain prices. Send for description. Address, KERR & TAYLOR, Denton, Maryland.

**Chickens Earn Money!**  
If You Know How to Handle Them Properly.  
Whether you raise Chickens for fun or profit, you want to do it intelligently and get the best results. The way to do this is to profit by the experience of others. We offer a book telling all you need to know on the subject—a book written by a man who made his living for 25 years in raising Poultry, and in that time necessarily had to experiment and spent much money to learn the best way to conduct the business—for the small sum of 25 cents in postage stamps.  
It tells you how to Detect and Cure Disease, how to Feed for Eggs, and also for Market, which Fowls to Save for Breeding Purposes and indeed about everything you must know on the subject to make a success.  
SENT POSTPAID ON RECEIPT OF 25 CENTS IN STAMPS.

### ALL HAIL PE-RU-NA.

A Case of STOMACH CATARRH.

Miss Mary O'Brien, 306 Myrtle Ave., Brooklyn, N. Y., writes:  
"Peruna cured me in five weeks of catarrh of the stomach, after suffering for four years and doctoring without effect. In common with other grateful ones who have been benefited by your discovery, I say, 'All hail to Peruna.'"

Mr. H. J. Henneman, Oakland, Neb., writes:  
"I waited before writing to you about my sickness, catarrh of the stomach, which I had over a year ago.  
"There were people who told me it would not stay cured, but I am sure that I am cured, for I do not feel any more ill effects, have a good appetite and am getting fat.  
"So I am, and will say to all, I am cured for good.  
"I thank you for your kindness.  
"Peruna will be our house medicine hereafter."

Catarrh of the stomach is also known in common parlance as dyspepsia, gastritis and indigestion. No medicine will be of any permanent benefit except it removes the catarrh.  
**A Great Tonic.**  
Mr. Austin M. Small, Astoria, Ore., writes: "During the hot weather of the past summer I lost my appetite. I tried Peruna, and found it pleasant to take, a splendid appetizer and a great tonic."

**Libby's Food Products**  
are economical as well as good. You don't pay for bones or gristle when you buy them.  
Nothing goes into a Libby can but clean, well-cooked meat that is ready to eat.  
Libby's Products are neat and wholesome and money-savers—and appetite stimulators.  
Libby's Bonless Chicken with Mayonnaise Dressing makes a quick salad, yet as delicious as one you ever ate. It is all chicken, and all good chicken—mostly white meat.  
Try it when you're hurried or hungry.  
Booklet free, "How to Make Good Things to Eat." Write Libby, McNeill & Libby, Chicago

### YOU CANNOT CURE

all inflamed, ulcerated and catarrhal conditions of the mucous membrane such as nasal catarrh, uterine catarrh caused by feminine ills, sore throat, sore mouth or inflamed eyes by simply dosing the stomach.  
But you surely can cure these stubborn affections by local treatment with Paxtine Toilet Antiseptic which destroys the disease germs, checks discharges, stops pain, and heals the inflammation and soreness.  
Paxtine represents the most successful local treatment for feminine ills ever produced. Thousands of women testify to this fact. 50 cents at druggists.
