# PE-RU-NA STRENGTHENS THE ENTIRE SYSTEM.

Mr. Chas. L. Sauer, Grand Scribe, Grand Encampment 1. O. O. F. of Texas, and Saistant City Alditor, writes from the City Hall, San Antonio, Tex.:
"Mean Harding and Sanger S

of 100,000 souven'r medallions of bronze and silver. Could Not Act for Both. The late Ogden Goelet, when a di-frector in a gas company, was called upon to pass upon the making of a contract with another company. He said to his fellow-directors: Gentle-men. I happen to be a director in that company, and I never will consent to be a director' in one company and pass upon the business with another company in which I am a director. I will resign first." And resign he did.

## DOCTOR'S SHIFT

Now Gets Along Without It.

A physician says: "Until last fall I used to eat meat for my breakfast and suffered with indigestion until the meat had passed from the stom-ach.

<text><text><text><text><text><text><text><text><text><text><text><text><text><text><text>

Court Makes Rules For Servants. Police Judge A. J. Mathis, of Des Moines, Iowa, has hald down rules to govern the relations of housewives and servants. He did this after spending more than three weeks in hearing the disputes between A. J. Ruhl, the man-ufacturer, and his two servants. The result of his deliberations follow:

Don't quarrel with your employer

FASAIONS OP A THE DAY

The Origin of "Deadhead." The term "deadhead" is in various connections very much to the fore at the present time. How did it arise? Its origin is purely transatlantic. Sxty years ago all the principal are-nues of the City of Delaware led in one direction, to a toligate close to the Elmwood Cemetery road. This cemetery having been laid out long before the construction of the plank rad beyond the toligate, funeral pro-cessions were allowed to pass along it toll free. One day as Dr. Price, a well-known physic.an, stopped to pay his toil, he observed to the gatekeep-er: "Considering the benevolent character of the profession to which have the honor to belong, you ought to let us pass toll free." "No, no, doctor," the man replied. "we can't afford that. You send too many deadheads thro here as it is." This story soon traveled far and wide until the term came to be ap-plied to anyone who claims the privi-lege of traveling on a railway sys-tem of passing into a place of amuse-ment free of cost.—London Tribune. "Tortoise Shell Hair" Now. "Tortoise shell hair" is the latest craze of the pretty Parisienne. The fashionable hair-dressers are dying their up-to-date customers' hair a strange orange yellow, resembling the color of a tortoise shell cat's coat, which shades off in places to darker patches. The effect is weird. Honeymoon Sign. When a man will eat spring onlons at a free lunch before going home in the evening it is a sure sign that the honeymoon is a thing of the past.— Detroit Free Press.

## Electricity Dispels Fog.

Electricity Dispels Fog. Fog dissipation by electric dis-charges has proved more effective when the fog contains dust or smoke than when it is water only, the solid particles seeming to become charged and to be then repelled, precipitating particles of vapor with which they collide. With a bundle of spikes as radiator, a space of some yards can be cleared in a few seconds.

## AWFUL ECZEMA ON HANDS.

# Troubled From Childhood With Skin Eruptions-Skin Now in Splendid Condition-Cured by Cuticura.

Eruptions-Skin Now in Splendid Condition-Cured by Cutlevra. "From childhood 1 had always been troubled with skin eruptions, more or less, and in winter my hands would erack open all over the back. You could hay a straw in any of them, but since using the Cuticura Remedies for the eczema about five years ago I have not been troubled in any way. At that time, I think, I got the eczema from handling imported hides at the Cuticura Remedies tores. I doctored for it for over a month without relief. It was on my hands and face, and my hands were swollen twice their size. After los-ing time, I was told of a woman whose finger nails had fallen off and was cured by the Cuticura Remedies, so I tried them and I was cured, and my skin is in splen-did condition now, and does not crack in cold weather. Henry O'Neill, 4946 Girard Ave., Philadelphia, Pa., July 2, 1905."

## Largest Loaves of Bread.

The largest leaves of bread baked in the world are those of prance and Italy. The "pipe" bread of Italy is baken in leaves two feet or three feet baken in lcaves two feet or three feet long, while in France the lcaves are made in the shape of very long rolls four feet or five feet in length, and in many cases very six feet. The bread of Paris is distrbuted almost exclusively by women, who go to the various balchouses at 5:30 a.m. and spend an hour polishing up the lcaves. After the lcaves are thoroughly clean-ed of dust and grit, the "bread porter" proceeds on the round of her custom-ers. Those who live in apartments or flats find their lcaves leaning against the door.—London Tit-Bits.

## Origin of "Spanking."

Making It Rain in India.

Making It Rain in India. One of the ouest rain-making plants is the invention of a native of one of the Indian provinces. By means of a rocket he sends more than a mile into the air a reservoir of ether attached to a parachute. This being released at the highest point floats gently back to earth the con-densation being cause by the evapo-ration of the ether. It is said to be decidedly efficacious even where there is a scarcely a trace of cloud.—New York Herald.

# **OPERATION AVOIDED**

**EXPERIENCE OF MISS MERKLEY** 

She Was Told That an Operation Was Inevitable How She Escaped It.

When a physician tells a woman suf-fering with serious feminine trouble that an operation is necessary, the very thought of the knife and the operating table strikes terror to her seart, and our hospitals are full of women coming for just such operations.

Miss Margret Merkley ....

There are cases where an operation is the only resource, but when one con-siders the great number of cases of menacing female troubles cured by Lydia E. Pinkham's Vegetable Com-pound after physicians have advised operations, no woman should submit to one without first trying the Vegetable Compound and writing Mrs. Pinkham, Lynn, Mass., for advice, which is free. Miss Margret Merkley, of 275 Third Street, Milwaukee, Wis., writes:

Street, Milwankee, Wis., writes: Dear Mrs. Finkham: "Loss of strength, extreme nervousness, shooting pains through the pelvic organs, bearing down pains and eramps compelled me to seek mediced advice. The doctor, after making an examination, said I had a female trouble and ulceration and advised an opera-tion. To this I strongly objected and decided to try Lydia E. Finkham's Vegetable Com-pound. The ulceration quickly heated, all the bad symptoms disappeared and I am once more strong, vigorous and well." Fermile troubles are streadily on the

Female troubles are steadily on the increase among women. If the month-ly periods are very painful, or too fre-quent and excessive—if you have pain or swelling low down in the left side, bearing-down pains, don't neglect your-self, try Lydia E. Pinkham's Vegetabla Compound.

and rarely takes a vacation-indeed, under circumstances which would pre-vent the ordinary person from indulg-ing in serious work she clings to her task with a fidelity that is remarkable.

In summer instead of seeking rest she usually pursues her arduous studies at the observatory.—Boston Herald.
