Some day they will miss you when it is too late, if you give yourself no care.

It is painful to read the particulars of the numerous divorce suits that fill the columns of the daily papers. Many of these sad events are from good homes, and the interested parties stand high in social life, and not a few in times either would perfer death to this unhappy parting. For years they have lived together, and their lives have been blended into one. They have learned by bitter experience, as the years have gone by, that they are not suited to one another, and finally, in a moment of discord or passion, the silk-en cord has broken and they separate

TO ERADICATE A MINING EVIL.

For the protection of the mining inican Mining Congress has established a Bureau of Inquiry, through which information can be obtained as to the condition of the property and the standing of the company that has asked or is asking for the money of the investor.

The American Mining Congress is a

national organization of mining men, the directors of which are men of the highest standing in their own states, whose only interest is the up-lifting of the mining industry. To this end, and among other things, the organization is working for the creation of a depart-ment of Mines and Mining as a separate department of the national government, and for the enactment of laws in the church life. This separation between husband and wife is one of the sad scenes in human existence. Many or misrepresentation of any material fact concerning a mine upon which a fraudulent sale of stock is predicated a criminal offense.
In order that its Board of Directors

may be kept in touch with the general sentiment of the mining world, an an-nual session is held to which delegates are sent by the President of the United States, the governors of the several states, the mayors of cities, and the commercial bodies of America. At its tunity one could desire. The soil lies laden with riches awaiting only our efforts to extract them. Every field.

This Bureau of Inquiry will be absolutely impartial in its findings, its sole purpose being to prevent ill-advised mining investments and to save the West from the disgrace which follows dishonest mining promotion.

In order to thoroughly eradicate fake promotion, the American Mining Congress is pledged to give to inquiring mombers information absolutely un-biased, collected from unprejudiced sources, largely its own trusted cor-respondents, and to have but one end in view-the protection of the investor, its belief being that every dollar im properly invested is a damage to all legitimate mining, and that the highest good of the mining industry may be good of the mining industry may be served by warning investors against improper investments and furnishing such information as will guide them into channels which give promise of
