What Ails You?

Do you feel weak, tired, despondent, have frequent headaches, coated tongue, bitter or bad taste in morning, "heartburn," belching of gas, acid risings in throat after eating, stomach gnaw or burn, foul breath, dizzy spells, poor or variable appetite, nausea at times and kindred symptoms?

If you have any considerable number of the above symptoms you are suffering from biliousness, torpid liver with indigestion, constipation, etc. Dr. Pierce's Golden Medical Discovery is made up of the most valuable medicinal principles known to medical science for the permanent cure of such abnormal conditions. It is a most efficient liver invigorator, stomach tonic, bowel regulator and nerve strengthener.

The "Golden Medical Discovery" is not a patent medicine or secret nostrum, a full list of its ingredients being printed on its bottle wrapper and tested under oath. A glance at its formula will show that it contains no alcohol, or harmful habit-forming drugs. It is a fluid extract made with pure, triple-refined glycerine, of proper strength, from the roots of the following native American forest plants, viz., Golden Seal root, Stone root, Black Cherry bark, Queen's root, Bloodroot, and Mandrake root.

The following leading medical authorities, among a host of others, extol the foregoing roots for the cure of just such ailments as the above symptoms indicate: Prof. R. Barlow, M. D., of Jefferson Med. College, Phila.; Prof. H. C. Wood, M. D., of Univ. of Pa.; Prof. Edwin M. Hale, M. D., of Hahnemann Med. College, Chicago; Prof. John King, M. D., Author of American Dispensary; Prof. J. M. Scherer, M. D., Author of Specific Medicines; Prof. Laurence Johnson, M. D., Med. Dept. Univ. of N. Y.; Prof. Finley L. McCall, M. D., Author of Materia Medica and Prof. in Bennett Medical College, Chicago. Send name and address on Postal Card to Dr. R. V. Pierce, Buffalo, N. Y., and receive free booklet giving extracts from the above medical authorities and many others endorsing in the strongest possible terms, each and every ingredient of which "Golden Medical Discovery" is composed.

Dr. Pierce's Pleasant Pellets regulate and invigorate stomach, liver and bowels. They may be used in conjunction with "Golden Medical Discovery" if bowels are much constipated. They're tiny and sugar-coated.

Dream Made Plumber Rich.

Watts, a plumber in Bristol, made \$50,000 through a dream. One night he dreamed that while soldering up some defect on the roof of a church he let the ladle of molten metal slip from his hand into the street below. On hastening down to recover the utensil he found to his surprise that the lead which it contained, instead of lying in an intact mass, was scattered around in a myriad minute globules. On awakening his curiosity prompted him to repeat the experiment, when to his surprise the falling metal behaved as it had done in his dream. This discovery, which he at once adapted to the making of lead shot, brought him in the above substantial fortune.

A TERRIBLE EXPERIENCE.

How a Veteran Was Saved the Amputation of a Limb.

B. Frank Doremus, veteran of Roosevelt Ave., Indianapolis, Ind., says: "I had been showing symptoms of kidney trouble from the time I was mustered out of the army, but in all my life I never suffered as in 1897. Headaches, dizziness and sleeplessness first, and then dropsy. I was weak and helpless, having run down from 180 to 125 pounds. I was having terrible pain in the kidneys and the secretions passed almost involuntarily. My left leg swelled until it was thirty-four inches around, and the doctor tapped it night and morning until I could no longer stand it, and then he advised amputation. I refused, and began using Doan's Kidney Pills. The swelling subsided gradually, the urine became natural and all my pains and aches disappeared. I have been well now for nine years since using Doan's Kidney Pills."

For sale by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

Plenty of Maple Sugar.

There is a plant in Chicago which manufactures more maple sugar in a month, said Dr. W. H. Wiley in a recent address, than is produced by nature in the whole of the State of Vermont in a year.

The newspaper files of the British Museum have been moved to a special depository at Hendon, seven miles from London, where they occupy six miles and a half of shelving.

W. L. DOUGLAS \$3.50 & \$3.00 Shoes

W. L. Douglas \$4 Gilt Edge Line cannot be equalled at any price.

W. L. Douglas's Jobbing House is the complete in this country. Send for Catalog.

SHOES FOR EVERYBODY AT ALL PRICES. Men's Shoes, \$5 to \$1.50. Boys' Shoes, \$3 to \$1.50. Women's Shoes, \$4 to \$1.50. Misses' and Children's Shoes, \$2.25 to \$1.00. Try W. L. Douglas's Women's, Misses' and Children's shoes; for style, fit and wear they equal any other make.

If I could take you into my large factories at Brockton, Mass., and show you how carefully W. L. Douglas shoes are made, you would then understand why they hold their shape, fit better, wear longer, and are of greater value than any other make.

Wherever you live, you can obtain W. L. Douglas shoes. His name and price is stamped on the bottom, which protects you against high prices and inferior shoes. Take no substitutes. Ask your dealer for W. L. Douglas shoes and insist upon having them.

New Field for Tobacco.

The newly appointed Government tobacco expert for the Transvaal, in South Africa, has informed the Transvaal Agricultural Union that the colony can produce as good cigars, cigarettes and pipe tobacco as America and Cuba. He regards the industrial prospects as very bright.

Beware of Ointments For Catarrh That Contain Mercury.

Mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is ten times as great as the good you can possibly derive from them. Hall's Catarrh Cure, manufactured by E. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally and made in Toledo, Ohio, by E. J. Cheney & Co. Testimonials free. Sold by Druggists; price, 75c. per bottle. Take Hall's Family Pills for constipation.

Mail Record Beaten.

The Canadian Pacific Railway Company is boasting that it has accomplished the feat of landing British mails in Hongkong in 29 days from the dispatch from London, or nearly a week less than the previous record.

FOUR YEARS OF AGONY.

Whole Foot Nothing But Proud Flesh—Had to Use Crutches—"Cuticura Remedies Ease Earth."

"In the year 1896 the side of my right foot was cut off from the little toe down to the heel, and the physician who had charge of me was trying to sew up the side of my foot, but with no success. At last my whole foot and way up above my calf was nothing but proud flesh. I suffered untold agonies for four years, and tried different physicians and all kinds of ointments. I could walk only with crutches. In two weeks afterwards I saw a change in my limb. Then I began using Cuticura Soap and Ointment often during the day, and kept it up for seven months, when my limb was healed up just the same as if I never had trouble. It is eight months now since I stopped using Cuticura Remedies, the best on God's earth. I am working at the present day, after five years of suffering. The cost of Cuticura Ointment and Soap was only \$6, but the doctors' bills were more like \$600. John M. Lloyd, 718 S. Arch Ave., Alliance, Ohio, June 27, 1905."

In Germany more than 500 out of every thousand women reach the age of 50 years, while only 413 men live so long.

Mrs. Winslow's Soothing Syrup for Children teething, relieves all kinds of sore throat, allays pain, cures wind colic, 25c a bottle.

Doctrine of Hatred in War.

It is a fresh experience to take up a book which preaches a doctrine of hatred on the ground that a "living personal hatred is a most valuable fighting asset, and this is all that can be said in favor of these 'Hersies of Sea Power.'" Mr. Jane quotes Nelson to support his curious theory, and declares that a crude desire to kill Russians contributed materially to the success of Japanese arms in the late war. It is unfortunate for his argument that Nelson should have been so consistently chivalrous to opponents and that the Japanese seem to have been anxious to spare and save life whenever killing served no useful purpose. The attempt to connect blood lust with victory shows how difficult it may be for a civilian to understand the peculiar sympathy which exists between fighting men of different nations. "I am going, I hope and trust to join Nelson," said Gravina on his deathbed, and from what we know of Nelson he was probably the first to greet his old enemy in the Halls of Valhalla.—Saturday Review.

Aniline Dyes Don't Go.

Some time ago the Amerer of Afghanistan forbid the import into his country of carpets colored with aniline dyes. The Kashmir of Durbar has now decided to charge the high duty of 45 per cent on all aniline dyes at the frontier, and at a certain distance within the frontier to confiscate and at once destroy them. By this measure it is hoped the beautiful arts for which the Vale of Durbar is famous will be preserved from deterioration.

NO DAWDLING

A Man of 70 After Finding Coffee Hurt Him, Stopped Short.

When a man has lived to be 70 years old with a 40-year-old habit grown to him like a knot on a tree, chances are he'll stick to the habit till he dies.

But occasionally the spirit of youth and determination remains in some men to the last day of their lives. When such men do find any habit of life has been doing them harm, they surprise the Oseleties by a degree of will power that is supposed to belong to men under 40, only.

"I had been a user of coffee until three years ago—a period of 40 years—and am now 70," writes an N. Dak. man. "I was extremely nervous and debilitated, and saw plainly that I must make a change."

"I am thankful to say I had the nerve to quit coffee at once and take on Postum without any dawdling, and experienced no ill effects. On the contrary, I commenced to gain, losing my nervousness within two months, also gaining strength and health otherwise."

"For a man of my age, I am very well and hearty. I sometimes meet persons who have not made their Postum right and don't like it. But I tell them to boil it long enough, and call their attention to my looks now, and before I used it, that seems convincing."

English Praise of Baseball.

In many ways baseball is a game particularly suitable for the youth of England. To excel at it requires many of those qualities which are particularly lacking in British sport generally.—Fry's Magazine, London.

POPULAR SCIENCE

Dr. Jean Charcot is organizing an expedition to the South Pole and the Belgian Oceanographic Society one to the North Pole.

The range of years over which cancer is likely to occur is practically the same in both sexes—46-44—but the mean age of incidence of the disease is 55.2 years in males and 49.9 years in females.

Instead of the long celluloid film, a London photographer uses circular glass plates for the cinematograph. The pictures are taken in a spiral, and a plate fifteen inches in diameter holds several hundred, recording a story lasting about four minutes.

Aluminum, cadmium, zinc, magnesium, etc., affect the photographic plate, though not classed as radioactive. A late remarkable observation is that the electric spark sometimes lessens it, while the reverse, though so superficial that slight sand-papery removes it—persists for months.

In the latest fight against the rabbit pest in Australia, the attempt is made to destroy the animals in their burrows. A specially constructed boiler is used with a length of flexible metallic hose, and steam at high pressure is forced into the burrow, after first closing all openings except that for the hose. The early results have been very encouraging.

Ordinary clothing, it is pointed out, keeps the skin of man in almost complete darkness. A London physician advises that consumptives wear white clothing and that if be linen or cotton, never of silk. Brown and violet pass the higher rays fairly well, and might be worn, but red, black, yellow and green transmit little but heat rays, and should be avoided.

Two languages have died out in modern Europe, according to Rev. W. S. Lach-Szyrna. In a recent paper to British archaeologists, he doubted whether anyone could fix the time or place when Prussian disappeared, for the death of a language may be a lingering and obscure one, but Cornish seems to have passed away in its English home in quite recent times. The last Cornish drama bears date of 1611. A considerable manuscript and printed works, and the language has left its impress in the names of places and families. A few words, including the numerals, are still used by the miners.

According to a description of his experiments given by Mr. Marconi, the confining of the electric waves used in wireless telegraphy to certain predetermined directions is a problem admitting of an easy, if not a complete, solution. A simple method is to substitute for the usual vertical antenna employed as radiator or absorber of the waves, a straight horizontal conductor, placed at a comparatively small elevation above the surface of the ground or water. Experiments show that the radiation reaches a maximum in the vertical plane of this horizontal wire, and gradually dies out on each side of it. Similarly at the receiving-station the maximum effect of the waves is felt in the vertical plane of the horizontal absorbing conductor. To attain the transmitting and receiving apparatus, their conductors are pointed in the same direction.

THE BRIDE'S FIRST KISS.

"Best Man's" Protest Against Plea For its Abolition.

The Vicar of Tintwistle, England, having declared that the "foolish and irreverent" custom of kissing the bride after a wedding ceremony should be stopped, he is thus answered by one signing himself "Six Times a Best Man" in the London Mail:

"As I have on six occasions filled the invidious position of best man, I trust you will grant me space to deliver an emphatic protest against the abolition of this good old English custom, which is, apparently, wished by some clergymen and many curates."

"Is there to be no reward for the unfortunate 'best man,' who has borne for hours on his shoulders all the worries and responsibilities of the important ceremony; the rallying of the trembling bridegroom, the supervision of all the social arrangements, and the departure of the happy pair from the church, to say nothing of the lavish scattering of largesse to every hanger-on within and without, for which, by the way, he is very seldom reimbursed? I repeat, is there no reward for all these manifold difficulties, successfully accomplished?"

"To the bride and bridegroom it is the solemnly joyous moment of their lives. All the playfulness of eager friends and even the ecclesiastical chivalry of the minister should not be allowed to rob the parties of a kiss, the remembrance of which will remain with the happy pair all their lives."

FINANCE AND TRADE REVIEW

WEATHER AFFECTS BUSINESS
Stimulates Sale of Heavy Weight Wearing Apparel—Crop Reports Say Cotton is Short.

Lower temperature brought out much business in seasonable lines of wearing apparel and most reports from wholesalers tell of the largest volume of trade ever transacted. Shipping departments are limited in activity by inadequate railway facilities, and this difficulty is becoming aggravated by the free movement of grain and coal as the season advances. Crop reports covering conditions on October 1 is in most cases satisfactory in grain, but damage has reduced the yield of cotton and caused a violent rise in prices. To this fact is due some irregularity in trade and collections at a few Southern cities, but most centers report expanding business and confidence regarding the future. In the leading industries it is impossible to secure prompt deliveries, even contracts for shipment during the first quarter of 1907 being difficult to place with the steel mills and the long-continued lassitude in primary markets for cotton goods has been succeeded by an eagerness to purchase that is advanced quotations.

Conditions in the primary markets for cotton goods show a radical change from the recent indifferent demand and endeavor to obtain concessions in prices. Now that the raw material has advanced beyond general expectations and there is prospect of higher prices there is a sudden rush to provide for future needs, but the producers exhibit as much indifference as was formerly shown by purchasers. Conditions in the woolen industry do not show a similar broadening of interest, few duplicate orders having been placed, and the market still waits for some definite attitude by clothing manufacturers. New England footwear manufacturers reserve the usual spring orders from jobbers in all sections of the country with the best demand for heavy stock such as grain and split goods. Producers have large contracts on hand for winter and spring orders for late fall delivery. That the early advent of snow and frost has done some damage is evident in reports of injury to fruit orchards, vines and tobacco plants at the West and rumors of frost damage to cotton at the South.

The railways seem to be finding increased difficulty in handling the traffic offering, and fears of future great congestion are expressed.

WHO SHE WAS

SKETCH OF THE LIFE OF LYDIA E. PINKHAM

And a True Story of How the Vegetable Compound Had Its Birth and How the "Panic of '73" Caused It to be Offered for Public Sale in Drug Stores.

This remarkable woman, whose maiden name was Estes, was born in Lynn, Mass., February 9th, 1819, coming from a good old Quaker family. For some years she taught school, and became known as a woman of an alert

restore the family fortune. They argued that the medicine which was so good for their woman friends and neighbors was equally good for the women of the whole world.

The Pinkhams had no money, and little credit. Their first laboratory was the kitchen, where roots and herbs were steeped on the stove, gradually filling a gross of bottles. Then came the question of selling and for always before they had given it away freely. They hired a job printer to run off some pamphlets setting forth the merits of the medicine, now called Lydia E. Pinkham's Vegetable Compound, and these were distributed by the Pinkham sons in Boston, New York, and Brooklyn.

The wonderful curative properties of the medicine were, to a great extent, self-advertising, for whoever used it recommended it to others, and the demand gradually increased.

In 1877, by combined efforts the family had saved enough money to commence newspaper advertising and from that time the growth and success of the enterprise were assured, until today Lydia E. Pinkham and her Vegetable Compound have become household words everywhere, and many tons of roots and herbs are used annually in its manufacture.

Lydia E. Pinkham herself did not live to see the great success of this work. She passed her reward years ago, but not till she had provided means for continuing her work as effectively as she could have done it herself.

During her long and eventful experience she was ever methodical in her work and she was always careful to preserve a record of every case that came to her attention. The case of every sick woman who applied to her for advice—and there were thousands—received careful study, and the details, including symptoms, treatment and results were recorded for future reference, and to-day these records, together with hundreds of thousands made since, are available to sick women the world over, and represent a vast collaboration of information regarding the treatment of woman's ills, which for authenticity and accuracy can hardly be equaled in any library in the world.

With Lydia E. Pinkham worked her daughter-in-law, the present Mrs. Pinkham. She was carefully instructed in all her hard-won knowledge, and for years she assisted her in her vast correspondence.

To her hands naturally fell the direction of the work when its original passed away. For nearly twenty-five years she has continued it, and nothing in the work shows when the first Lydia E. Pinkham dropped her pen, and the present Mrs. Pinkham, now the mother of a large family, took it up. With woman assistants, some as capable as herself, the present Mrs. Pinkham continues this great work, and probably from the office of no other person have so many women been advised how to regain health. Sick women, this advice is "Yours for Health" freely given if you only write to ask for it.

Such is the history of Lydia E. Pinkham's Vegetable Compound; made from simple roots and herbs; the one great medicine for women's ailments, and the fitting monument to the noble woman whose name it bears.

And investigating mind, an earnest seeker after knowledge, and above all, possessed of a wonderfully sympathetic nature.

In 1843 she married Isaac Pinkham, a builder and real estate operator, and their early married life was marked by prosperity and happiness. They had four children, three sons and a daughter.

In those good old fashioned days it was common for mothers to make their own home medicines from roots and herbs, nature's own remedies—calling in a physician only in specially urgent cases. By tradition and experience many of them gained a wonderful knowledge of the curative properties of the various roots and herbs.

Mrs. Pinkham took a great interest in the study of roots and herbs, their characteristics and power over disease. She maintained that just as nature so bountifully provides in the harvest-fields and orchards vegetable foods of all kinds; so, if we but take the pains to find them in the roots and herbs of the field there are remedies expressly designed to cure the various ills and weaknesses of the body, and it was her pleasure to search these out, and prepare simple and effective medicines for her own family and friends.

Chief of these was a rare combination of the choicest medicinal roots and herbs found best adapted for the cure of the ills and weaknesses peculiar to the female sex, and Lydia E. Pinkham's friends and neighbors learned that her compound relieved and cured and it became quite popular among them.

All this so far was done freely, without money and without price, as a labor of love.

But in 1873 the financial crisis struck Lynn. Its length and severity were too much for the large real estate interests of the Pinkham family, as this class of business suffered most from fearful depression, so when the Centennial year dawned it found their property swept away. Some other source of income had to be found.

At this point Lydia E. Pinkham's Vegetable Compound was made known to the world.

The three sons and the daughter, with their mother, combined forces to
