Constancy.

Constancy.

A story is told of General Sir Alfred Horsford, who belived in a celibate army. A soldier once sought his permission to marry, saying he had two good conduct badges and \$25 in the savings bank. "Well, go away," sald Sir Alfred, "and if you come back this day year in the same mind you shall marry. I'll keep the vacancy." On the anniversary the soldier repeated his request. "But do you really, after a year, want to marry?" "Yes, sir, very much." "Sergeant major, take his name down. Yes, you may marry. I never believed there was so much constancy in man or woman Right face; quick march!" As the man left the room, turning his head, he said, "Thank" you, sir; it isn't the same woman."

A Kippered Salutation.

A worthy French Protestant pastor was guest in a Scottish manse. One morning kippered herrings were served at breakfast. The French pastor asked the meaning of "kipper." His host replied that it meant "to preserve." On taking his leave next day the French pastor, wringing his host's hand, said: "May the Lord kipper you, my good friend."—The Spectator.

The South African Native.

Generally speaking, the colonists treat the natives with kindness and consideration. Slavery and ill usage are unknown. You will see more poverty, slavery and sweating within of the House of the surphire will adhere to them here is the destroys the eggs, also the worms, when all our neighbors, who did not use our plan, had their cabbage destroyed by worms.

The Strawberry Crown Bore.

This is the most troublesome of all the insect enemies of the strawberry. It is a small brown beet when adult, not very different from the plum curculio, but smooth. The egg soft the leaves, and the young footless of the leaves, and the young footless grub bores down into the interior of the thick stem, completing its growth here and coming out as an adult in August and September.

Once a bed has become infested with this insect its destruction is only a question of t

The South-African Native.

Generally speaking, the colonists treat the natives with kindness and consideration. Slavery and ill usage are unknown. You will see more poverty, slavery and sweating within a half mile radius of the House of Parliament in Westminster than you will find in the whole of South-Africa.—South Africa.

IT'S THE FOOD. The True Way to Correct Nervous Troubles.

Nervous troubles are more often caused by improper food and indigestion than most people imagine. Even doctors sometimes overlook this fact.

A man says:
"Until two years ago waffles and butter with meat and gravy were the main features of my breakfast. Finally dyspepsia came on and I found myself in a bad condition, worse in the morning than any other time. I would have a full, sick feeling in my stomach, with pains in my heart, sides and head.

stomach, with pains in my heart, sides and head.

"At times I would have no appetite for days, then I would feel ravenous, never satisfied when I did eat and so nervous I felt like shrieking at the top of my voice. I lost flesh badly and hardly knew which way to turn until one day I bought a box of Grape-Nuts food to see if I could ext that. I tried it without telling the doctor, and liked it fine; made me feel as if I had something to eat that was satisfying and still I didn't have that heaviness that I had felt after eating any other food.

"I hadn't drank any coffee then in five weeks. I kept on with the Grape-Nuts and in a month and a half I had gained 15 pounds, could eat almost anything I wanted, didn't feel badly after eating, and my nervousness was all gone. It's a pleasure to be well again."

Name given by Postum Co., Battle sides and head.

Black Rot.

Black Rot.

A gangrenous condition of the comb and sometimes of the toes. It may appear in common with diseases of the liver. Causes: Feeding spoiled or damaged grains, more particularly grain affected with "spur" or "smut;" ergot poisoning. Large combed fowls are more often affected. Symptoms: Comb turns dark red or purple, may turn black at extremities; tips of points and other portions of comb may "dry rot" and drop off. May or may not have diarrhoea. Toes may become gangrenous and drop off. If not severely affected the bird may recover after losing portions of comb and toes. Treatment: Give tea made of fresh white oak bark freely in the drinking water, and mix food with it. Keep the bird in warm, sunny, well aired quarters. Feed fresh cabbage and onions, also steamed clover freely. Prevent by avoiding all spoiled or diseased stuffs.—Reliable Poultry Journal.

To Destroy Cabbage Worms.

Farm, Stock and Home gives the following method of destroying cabbage worms. Simply sprinkle the flour of sulphur freely on the cabbage. Fill the cover of a baking powder can with small nail holes, like a pepper box, fill the can with sulphur and use for a sifter. Do not wait until the worms appear on the cabbage before applying it, but begin with it as soon as the first white butterflies are seen circling over the cabbage patch. Immediately after a rain or while the cabbages are wet with dew sift sulphur over them, well down among the leaves, two or three times a week. If there is neither rain nor dew wet the cabbage with a watering pot or sprinkle with a whisk broom and pall of water, as the cabbages must be wet so the sulphur will adhere to them. It destroys the eggs, also the worms. We never failed to have fine cabbage free from worms, when all our neighbors, who did not use our plan, had their cabbage destroyed by worms. To Destroy Cabbage Worms.

raised.

(3) That the increase in milk consumption has been so great that a very large share of the cows of the country have been diverted from butter making to that business.

(4) That the increase of cows in this country is only about five perpent yearly, so it takes about twenty years to double the cow population.

(5) That the progress of dairy ideas among farmers is teaching them to weed out the unprofitable cows, thus reducing very receptibly the milk sup-

weed out the unprofitable cows, thus reducing very receptibly the milk supply for unprofitable butter-making.

(6) That the percentage of increase of population is much greater than the percentage of increase in cows, while the consumption of milk and butter per capita has been steadily on the increase. All these things tend to strengthen the dairy business in all its parts and keen prices to a healthy its parts and keep prices to a healthy grade.

The Hand Separator

New weeks. I kept on with the Grape-Nuts and in a month and a half I had gained 15 pounds, could eat at amost anything I wanted, didn't feel badly after eating, and my nervousness was all gone. It's a pleasure to be well again."

Name given by Postum Co., Battle Creek, Mich. Read the book, "The Road to Wellville," in pkgs. There's a reason.

The Hand Separator.

The dairy size cream separator has come to stay. To the dairyman remote from a market for his milk it has been a great boon, and has been the means of furnishing him a market for the output of his dairy. It has enabled him to sell cream at a good price where he formerly made it into butter and sold his product as "packing stock" at a low price.

To a farmer thus situated, it has brought the greatest benefits.

Then there are those who are patrons of local creameries and have purchased hand separators so as to have better skimmilk for feeding purposes. Whether they have accomplished their purpose in all cases is a deliatable question, but the fact remains that they have the hand separators, and it is poor business policy for any creamery to refuse to buy their product.

duct.

The more sensible plan is to employ tactics which will insure an improvement in the quality of the cream, and make the hand separator patron of the creamery understand that his product is just as welcome as that of the whole milk patron, provided he delivers a pure, wholesome product. Educate and help the hand separator patron instead of driving away his business just because he delivers his butter fat in cream instead of milk.—Boston Cultivator. Boston Cultivator.

Diseases of Trees.

Diseases of Trees.

The many diseases of trees seriously affect the production of fruit. The grower may be exceedingly careful and yet meet with obstacles, and he may even leave fallen fruit or any other refuse materials around the trees in winter. They are the vehicles of germs, and as the winds scatter light substances to other locations, the failure to clean away the refuse from a single affected tree may cause the spread of disease over the entire orchard. It is useless to cut away dead limbs and burn them if the spores of fungus diseases can be scattered broadcast by materials that could be easily cleared up in a short time. Work during the winter can be done to good advantage in destroying the borers, and the eggs of the millers, which produce worms, can be cleared from the trees; in fact, every tree will be benefited by scraping and washing with a strong solution of lye while spraying small orchards with a solution of whale oil soap is claimed to be a remedy for the scale insect, the lime-sulphur remedy being used in large orchards. The trees of an orchard usually show the effects of good treatment. The peach which sometimes appears to succumb to no apparent cause, will respond to severe pruning and take on new life. Many trees, especially those in old orchards, are just as they were when first set out, never having been trimmed. They can be improved by pruning, but it should be done judiciously, and not by going into the orchard and cutting off large limbs indiscriminately. Orchards that have never paid a dollar can be made to give good profits if the same amount of labor is given them as is bestowed on grain or grass crops.—Philadelphia Record. crops.-Philadelphia Record.

Handling Vicious Horses.

nearby are endangered and in course of time a place becomes so badly infesed that strawberries cannot be grown with profit on it.

It is especially important for the nurseryman to keep his plant beds free so that he may not be the means of disseminating the past. I am sorry to say that inspections show that sufficiently careful in this respect.—
Iniand Farmer.

Why Butter Prices Hold Up.

Much speculation is indulged in about the fact that with all the supposed great increase in creameries the prices of butter still hold up. Hoard's Dairyman says:

Those who speculate forget two or three things:

(1) That the cow is the source of the butter supply, not the creamery.

(2) That the more dense the cow population becomes in any section, the less proportion of heifer calves are raised. speak to film in a soloning cote, she if he persists give him a sharp blow between the ears with the butt of the whip. This will bring him down on all fours with amazing quickness.

Field cows and springers.

Kicking is certainly a vice. Sometimes, however, it is caused by fear, in which case much can be accomplished by gentle management. Exactly the opposite treatment of the rearing animal should be applied to the kicker. Hold his head up with might and main, for the horse cannot throw out both legs at once when his head is elevated. Kicking straps are what the name implies. A strap fastened to the shafts over the horse's croup prevents kicking; but this is only serviceable when driven in single harness. Shying is a dangerous fault.

A Japanese company, harness. Shying is a dangerous fault. It cannot properly be termed a vice; it is generally the result of defective vision. Gentle treatment, soothing words and patient persistence in ac-customing the animal to the dreaded object will often affect a cure. To lash a horse because he shies or is fright-ened only aggravates the evil. He will associate punishment with the frightful object and will fear it more and more each time he encounters it.—Country Life in America.

## FINANCE AND TRADE REVIEW FROM GIRLHOOD TO WOMANHOOD

CARS AND LABOR ARE LACKING

Industries Handicapped by Traffic De-lays—High Wages Fail to Secure Workmen.

R. G. Dun & Co.'s weekly "Review

R. G. Dun & Co.'s weekly "Review of Trade" says:

"Busines experienced the customary interruptions during election week, but a more permanent retarding influence was the inadequate supply of freight cars and labor. Many industries are severely handicapped by traffic delays. In other cases there is file machinery because hands cannot be secured, despite the high wages offered. This difficulty threatens to reduce the lumber cut materially.

materially.

"Retail trade is well maintained by lower temperature in some sections of the country and the full employment of labor at all points, while whole-sale business in holiday goods is very

of labor at all points, while wholesale business in holiday goods is very
heavy.

"Tardy deliveries still cause complaint in the iron and steel industry,
unprecedented production by the finishing mills falling behind the requirements of consumers. New lake
vessels have been ordered, which
means more business in plates, although the mills are already booked
beyond the first quarter of next year.
Standard steel rails are held steady,
but light rails have again advanced.
Several large pipe contracts are
pending, including one for India, yet
the mills have so much business on
hand that there is not the customary
sharp competition to get new business. More advances have occurred
in pig iron and the new ore season
has opened with a rise of from 50
cents to 75 cents per ton.

"Less interest is shown in the primary market for cotton goods, although there is a fair volume of
business in progress. The persistent
reaction in raw material has had influence at last, buyers now belleving
that concessions must follow a period
of indifference on their part. Little
export buying is reported. Better
conditions are noted in woolen
goods...

Interrupted movement of grain to

conditions are noted in woolengoods...
Interrupted movement of grain to
primary markets and the consequent
restriction of foreign business as well
as activity of Northwest flour mills
checked the upward tendency of quotations and caused some reaction.
"Phenomenally heavy port receipts of cotton carried prices still
lower, although there was the support of exports well above last year.

The activity of the French in the The activity of the French in the Sahara is the marvel of recent exploration, declares the New York Sun. They claim more than two-thirds of the great waste, and the present prospects are that they will seek out and map every sand dune, well and grazing area throughout their domain within the next two or three years.

Celery, says London Health, should be allowed to lie in water to which a little salt has been added for at least an hour before serving. This makes it crisp.

Mothers Should Watch the Development of Their Daughters-Interesting Experiences of Misses Borman and Mills.

Every mother possesses information which is of vital interest to her young daughter.

Too often this is never imparted or is withheld until serious harm has resulted to the growing girl through her ignorance of nature's mysterious and wonderful laws and penalties.

Girls' over-sensitiveness and modesty often puzzle their mothers and baffle physicians, as they so often withhold their confidence from their mothers and conceal the symptoms which ought to be told to their physician at this critical period.

When a girl's thoughts become sluggish, with headache, dizziness or a disposition to sleep, pains in back or lower imbs, eyes dim, desire for solitude; when she is a mystery to herself and friends, her mother should come to her aid, and remember that Lydia E. Pinkham's Vegetable Compound will at this time prepare the system for the coming change, and start this trying period in a young girl's life without pain or irregularities.

Hundreds of letters from young girls and from mothers, expressing their gratitude for what Lydia E. Pinkham's Vegetable Compound has accomplished for them, have been received by the Lydia E. Pinkham, which will be read with interest:

Dear Mrs. Pinkham:—

"I am but fifteen years of age, am depressed, have dizzy spells, chills, headache and back-Lydia E. Pinkham's Vegetable Compound has done for me. When a wrote you in regard to my condition, I had condition that five to you to tell you what your write to you to regard to my condition I had consulted several doctors, but the fleat the understand my case and I did not receive your advee, and book Lydia E. Pinkham:

The fact that the British war office has just announced its decisions in the cases of the officers tried by court martial for complicity in the Boer war irregularities, impresses anew the fact that a war paradoxically lives long after it is over in its scandals, and that no war need hope to escape them. So, in this respect, no nation can afford to point the finger of scorn of ancient times, undertaken from the purest and most patriotic motives, had to suffer this inherent trouble. General Sherman's historic phrase has summed up the reason in the terse statement of war's birthplace in the root of all bad passions.—Baltimore American.
