

**Nursing Mothers and Over-burdened Women**

In all stations of life, whose vigor and vitality may have been undermined and broken-down by over-work, exacting social duties, the too frequent bearing of children, or other causes, will find in Dr. Pierce's Favorite Prescription the most potent, invigorating restorative strength-giver ever devised for their special benefit. Nursing mothers will find it especially valuable in sustaining their strength and promoting an abundant nourishment for the child. Expectant mothers too will find it a priceless aid in preparing the system for baby's coming and rendering the ordeal comparatively painless. It can do no harm in any state, or condition of the female system.

**Plant Glorinas.**  
If you want the most distinguished flowers ever shown at a lawn party, or used for temporary porch decoration, plant glorinia bulbs bought in November. They need to be potted as quickly as you get them. Among large, tender, bell-shaped flowers they have no equals in purity of reds and blues and beauty of throat spotting.

**The Turbit.**  
The Turbit, as shown in the accompanying cut, is one of the most highly prized of the family of "toys," of which it is the very foundation, and from it were made all orientals such as Frills in their numerous varieties, the Domino, the Nun, the Priest, and the Ohio.

**Bury the Apples.**  
Keeping apples by burying them in the ground proves successful when other methods fail, provided every apple is sound and free from blemish when harvested. The reason is that the temperature in the ground or mound in which the apples are kept varies but little, and they are always cool. The same results will be obtained if a cold and even temperature can be secured in a cellar.—Philadelphia Record.

**Keep Hens at Work.**  
To prevent disease keep the hens at work by making them scratch for their grain food. Overfeeding is the cause of bowel diseases in the summer, or, rather, too much concentrated food is given, and not enough of that which is bulky. If the quarters are kept clean there is little danger of contagious disease unless an addition is made to the flock by bringing a bird from some other farm. When "new blood" is wanted procure a sitting of eggs of the breed desired, as it is very important that when the coops are clean, and the fowls free from disease, no fowls from other places be introduced, as a flock may thus be stocked with lice or infected with disease.—Philadelphia Record.

**Filter Trap For Cistern.**  
This is a barrel placed between the eaves, spout and the entrance to the cistern. In the barrel is a float, and above the float about eight inches from the top is a diaphragm with a hole in the center. The head of the barrel is replaced, but several vent holes are bored in it. In the diagram, the upper pipe represents the supply pipe from the roof and the lower the outflow to the cistern. With every shower, the barrel being empty, or nearly so, the first flow of water brings most of the impurities (bird dung, leaves, dust and dirt, etc.) off the roof and they are caught in the barrel before it fills. When the water rises as high as the diaphragm, the float closes the hole and the pure water then rises and flows into the cistern. After the rain the water in the barrel should be drawn off. It is useful for watering plants, washing flagging, wagons, etc.—Ford Durfee, Newark, N. Y.

**Angora Goats.**  
The Angora goat is destined to become one of the most valuable of the domestic animals, and their recent popularity is something that they have long deserved. Formerly the public was prejudiced against Angora venison, but the growers and butchers have demonstrated its excellence, and now there are but few mutton eaters who do not like goat meat. The result is a steady remunerative market demand for Angora goats, but the raising of them is confined almost exclusively to the Rocky Mountain and Pacific coast States. In Colorado, New Mexico and Arizona there are many herds ranging from 200 to 3000 in each flock. The average price obtained for mohair for a six months' clip is 23 1/2 cents per pound. This is a good average price and decidedly remunerative. Nearly all the goat raisers in those localities are paying special attention to the breeding of fine stock, and the result during the past six years has developed some very fine stock and for which good prices have been obtained.

**Mountaineers.**  
The year 1906 has been distinguished for performances in mountain climbing. The Duke of Abruzzi, whose ascent of Mt. St. Elias has been eclipsed on the North American continent by Dr. Cook's more recent feat, succeeded last June in surmounting the second highest (19,024) summit of the Rwenzori range in central Africa. The highest summit (Mt. Kibo) of this range being 19,912. But the achievement of Dr. and Mrs. William H. Workman last August, over-shadows that of the Italian duke in Africa, for they succeeded in climbing to 23,294 feet on the peak of the Chago Lungma glacier in the Himalayas. This, I believe, is a record in height, though by no means so difficult an undertaking as McKinley. The Workmans camped for two nights at 21,000 feet, which becomes also a record for a mountaineer's camp. Thus, the mountain climbing honors of 1906 may be said to justly belong to America, for Dr. and Mrs. Workman and Dr. Cook are Americans.—Outing Magazine.

**TORTURED WITH GRAVEL.**  
Since Using Doan's Kidney Pills Not a Single Stone Has Formed.  
Capt. S. L. Crute, Adj. Wm. Watts Camp, U. C. V., Roanoke, Va., says: "I suffered a long, long time with my back, and felt draggy and listless and tired all the time. I lost from my usual weight, 25, to 17. Urinary passages were too frequent and I have had to get up often at night. I had headaches and dizzy spells also, but my worst suffering was from renal colic. After I began using Doan's Kidney Pills I passed a gravel stone as big as a bean. Since then I have never had an attack of gravel, and have picked up to my former health and weight. I am a well man, and give Doan's Kidney Pills credit for it."

**WHAT JOY THEY BRING TO EVERY HOME**

as with joyous hearts and smiling faces they romp and play—when in health—and how conducive to health the games in which they indulge, the outdoor life they enjoy, the cleanly, regular habits they should be taught to form and the wholesome diet of which they should partake. How tenderly their health should be preserved, not by constant medication, but by careful avoidance of every medicine of an injurious or objectionable nature, and if at any time a remedial agent is required, to assist nature, only those of known excellence should be used; remedies which are pure and wholesome and truly beneficial in effect, like the pleasant laxative remedy, Syrup of Figs, manufactured by the California Fig Syrup Co. Syrup of Figs has come into general favor in many millions of well informed families, whose estimate of its quality and excellence is based upon personal knowledge and use.

Syrup of Figs has also met with the approval of physicians generally, because they know it is wholesome, simple and gentle in its action. We inform all reputable physicians as to the medicinal principles of Syrup of Figs, obtained by an original method, from certain plants known to them to act most beneficially and presented in an agreeable syrup in which the wholesome Californian blue figs are used to promote the pleasant taste; therefore it is not a secret remedy and hence we are free to refer to all well informed physicians, who do not approve of patent medicines and never favor indiscriminate self-medication.

Please to remember and teach your children also that the genuine Syrup of Figs always has the full name of the Company—California Fig Syrup Co.—plainly printed on the front of every package and that it is for sale in bottles of one size only. If any dealer offers any other than the regular Fifty cent size, or having printed thereon the name of any other company, do not accept it. If you fail to get the genuine you will not get its beneficial effects. Every family should always have a bottle on hand, as it is equally beneficial for the parents and the children, whenever a laxative remedy is required.

**MEXICO TAKES WARNING.**

**Government Feared Americans Would Cut Railroads.**  
Mexico's government has made arrangements to become the owner of the principal railroads of the country, not heretofore public property. The government has for some time owned several railroads, but those now acquired will vastly increase its holdings, and in fact practically abolish private ownership of this means of transportation in the republic. Minister of Finance Limantour, in explaining to the Mexican congress the reasons which prompted the government to consummate the great railroad merger by which the republic comes into possession of the two great trunk lines of the country, together with thousands of miles of subsidiary lines, said that if this defensive action had not been taken by Mexico, some of the great railway systems of the United States would have entered the republic and swallowed its transportation facilities. The minister further declared that the government was first forced to go into the railroad business in 1903, when it purchased the National railroad to prevent it being merged with the Central.

**Hypothetical Question.**  
When Nathan M. Morse was trying the Tuckerman will case before Judge McKim, Dr. Jelley, the well-known expert on insanity, was one of the witnesses. One of the hypothetical questions asked of the witness by Mr. Morse contained no less than 20,000 words. The lawyer started this pithy question at the opening of court and closed only a few minutes prior to the noon adjournment. The point that Mr. Morse was endeavoring to bring out related to the mental condition of the testator when he made his will. This is said to have been the longest single interrogation ever made in a court of law, and the answer comprised just three words: "I do not."—Boston Herald.

**Does What Other Stoves Fail to Do**  
In almost every house there is a room that the heat from the other stoves or furnaces fails to reach. It may be a room on the "weather" side, or one having no heat connection. It may be a cold hallway. No matter in what part of the house—whether room or hallway—it can soon be made snug and cozy with a

**PERFECTION Oil Heater**  
(Equipped with Smokeless Device)  
Unlike ordinary oil heaters the Perfection gives satisfaction always. First and foremost it is absolutely safe—you cannot turn the wick too high or too low. Gives intense heat without smoke or smell because equipped with smokeless device. Can be easily carried from room to room. As easy to operate as a lamp. Ornamental as well as useful. Made in two finishes—nickel and japan. Brass oil found beautifully embossed. Holds 4 quarts of oil and burns 6 hours. There's real satisfaction in a Perfection Oil Heater. Every heater warranted. If not at your dealer's write our nearest agency for descriptive circular.

**The Rayo Lamp**  
makes the home bright. Is the safest and best lamp for all-round household use. Gives a clear, steady light. Fitted with latest improved burner. Made of brass throughout and nickel plated. Every lamp warranted. Suitable for library, dining room, parlor or bedroom. If not at your dealer's write to nearest agency.
