

THE DISCOVERER

Of Lydia E. Pinkham's Vegetable Compound, the Great Woman's Remedy for Woman's Ills.

LYDIA E. PINKHAM

No other medicine for Woman's ills in the world has received such widespread and unqualified endorsement. No other medicine has such a record of cures of female illnesses or such hosts of grateful friends as has Lydia E. Pinkham's Vegetable Compound. For more than 30 years it has been curing all forms of Female Complaints; Inflammation and Ulceration, and consequent Spinal Weakness. It has cured more cases of Backache and Local Weakness than any other remedy. It dissolves and expels tumors in an early stage of development. Irregularities and periodical pains, Weakness of the Stomach, Indigestion, Bloating, Nervous Prostration, Headache, General Debility quickly yield to it; also deranged organs, causing pain, dragging sensations and backache. Under all circumstances it acts in harmony with the female system. It removes that wearing feeling, extreme lassitude, "don't care" and "want-to-be-left-alone" feeling, excitability, irritability, nervousness, dizziness, faintness, sleeplessness, flatulency, melancholy or the "blues". These are indications of Female Weakness or some derangement of the organs, which this medicine cures as well as Chronic Kidney Complaints and Backache, of either sex. Those women who refuse to accept anything else are rewarded a hundred thousand times, for they get what they want—a cure. Sold by Druggists everywhere. Refuse all substitutes.

Power of New Warships.

Each Dreadnought shell weighs 850 pounds, is discharged by 265 pounds of cordite, the most powerful explosive known, and leaves the gun's muzzle at a speed of 2,000 miles an hour. That means a mile in 1.45 seconds. If that shell kept up its initial velocity it would fly from England to New York in an hour and a half, around the world in 12½ hours and to the moon in five days. The shell's energy as it leaves the gun is equal to the force required to pull 15 or 20 50-car freight trains of 30 tons to each car. A locomotive with such power could draw a train of loaded freight cars four miles long. Scientists say that if all the Dreadnought's guns could be combined into one and fired the projectile would never return to the earth, but would revolve forever about it as a tiny satellite. Single-handed, such a warship as the Dreadnought could have won the War of 1812. If the Confederates had had just one Dreadnought the Civil War would have been prolonged many years after the date which records Lee's surrender at Appomattox.—Cleveland News.

Horse With Artificial Foot.

The veterinary profession is much interested in a surgical operation which has been accomplished by Professor Udriski, one of the staff of the veterinary school at Bucharest. Having amputated a horse's leg at the fetlock joint, after several failures he succeeded in fitting a leather boot or artificial leg that enabled the animal to walk about and take exercise.

Thomas A. Edison, the noted electrician and inventor, is extremely fond of music.

Do You Think For Yourself?

Or do you open your mouth like a young bird and gulp down whatever food or medicine may be offered you? There is an intelligent thinking woman, in need of relief from weakness, nervousness, pain and suffering, who writes much to you that there is one tried and true honest medicine of known composition, sold by druggists for the cure of woman's ills.

The makers of Dr. Pierce's Favorite Prescription, for the cure of weak, nervous, run-down, over-worked, debilitated, pain-racked women, knowing this medicine to be made up of ingredients, every one of which has the strongest possible endorsement of the leading and standard authorities of the several schools of practice, are perfectly willing, and in fact, are only too glad to print, as they do, the formula, or list of ingredients, of which it is composed, in plain English, on every bottle-wraper.

The formula of Dr. Pierce's Favorite Prescription will bear the most critical examination of medical experts, for it contains no alcohol, narcotics, harmful, or habit-forming drugs, and no agent enters into it that is not highly recommended by the most advanced and leading medical teachers and authorities of their several schools of practice. These authorities recommend the ingredients of Dr. Pierce's Favorite Prescription for the cure of exactly the same ailments for which this world-famed medicine is advised.

No other medicine for woman's ills has any such professional endorsement as Dr. Pierce's Favorite Prescription has received, in the unqualified recommendation of each of its several ingredients by scores of leading medical men of all the schools of practice. Is such an endorsement not worthy of your consideration?

A booklet of ingredients, with numerous authoritative professional endorsements by the leading medical authorities of this country, will be mailed free to any one sending name and address with request for same. Address Dr. R. V. Pierce, Buffalo, N. Y.

Ossified.
The "ossified man" has his place in nature's beneficent plan. His shell is external, and so may be pardoned. But the fellow whose heart and conscience are hardened—He's your true ossified man.—Chicago Tribune.

Her Voice.
He—"A woman, I notice, always lowers her voice to ask a favor."
She—"Yes, and raises her voice if she doesn't get it."—Illustrated Bits.

Youth and Love.
"Johnny, what are you doing?"
"Washin' my neck and ears."
"What's her name?"—Denver Post.

Or a Duet.
She—"Married life should be one sweet song."
He—"Yes; like one of Mendelssohn's—without words."—Boston Transcript.

But That's Enough.
Parson—"I look upon all divorced men as merely a higher order of beasts."
Outsider—"Just 'lucky dogs,' I suppose."—New York Times.

Trouble Ahead.
Larry—"I'll never vote f'r'im!"
Ward Heeler—"What difference do you think that makes?"
Larry—"It makes a split in the party, be Jarge!"—Chicago Tribune.

Foresight.
"He is entertained constantly."
"I suppose he has a host of friends."
"Not that so much, but he's careful to be a friend of hosts."—New York Times.

Oh! Au!
"That new stenographer of ours is a very stylish speller."
"What on earth is a stylish speller?"
"Well, for instance, take the word 'loafer.' She spells it 'l-a-u-f-e-u-r.'"—Judge.

For Posterity.

Lieutenant.—"When are you going to dig this treasure up again?"
Pirate Chief.—"Treasure, nuthin! That's jest a lot of scrap iron for my grandchildren to dig up and sell for relics."—New York Journal.

A Common Attitude.
"She thinks her husband is a deep-eyed villain."
"Why?"
"Well, she's never been able to catch him doing anything wrong."—Courier-Journal.

He Was Flirting.
Jack—"You say you feel perfectly sure that she's only flirting with me?"
Tom—"Perfectly."
Jack—"Hang the luck! Why, when I began I was only flirting with her."—Somerville Journal.

The Plutocrats.
"What happens when an irresistible force meets an immovable body?"
"Why, they have a drink and a smoke together, and then proceed to frame up another scheme against the plain peepul."—Philadelphia Bulletin.

An Exception.
Knicker—"The child is father to the man."
Bocker—"Not much; the baby who rouses the neighborhood at night becomes the man who takes his shoes off so as not to wake his wife."—New York Sun.

Made No False Pretences.
Country Gent (late of the city) observing countryman raise his hat as he passes, throws him a shilling.
Countryman—"Thank'ee, sir (with emphasis), but I warn't takin' off my 'at to you. I wur a-scratchin' my head."—Punch.

Their Status.
"They say," remarked the mere man, "that 'because' is a woman's reason—and it is about all the reason she has."
"Yes," rejoined the pretty widow, "it's about all the reason she has for marrying a man."—Chicago News.

A Purpose Defined.
"I understand you have perfected another great invention."
"Yes," answered the scientist, modestly.
"Is it on the market?"
"Oh, it wasn't intended for the market. It's for the magazines."—Washington Star.

THE LAXATIVE OF KNOWN QUALITY

There are two classes of remedies; those of known quality and which are permanently beneficial in effect, acting gently, in harmony with nature, when nature needs assistance; and another class, composed of preparations of unknown, uncertain and inferior character, acting temporarily, but injuriously, as a result of forcing the natural functions unnecessarily. One of the most exceptional of the remedies of known quality and excellence is the ever pleasant Syrup of Figs, manufactured by the California Fig Syrup Co., which represents the active principles of plants, known to act most beneficially, in a pleasant syrup, in which the wholesome Californian blue figs are used to contribute their rich, yet delicate, fruity flavor. It is the remedy of all remedies to sweeten and refresh and cleanse the system gently and naturally, and to assist one in overcoming constipation and the many ills resulting therefrom. Its active principles and quality are known to physicians generally, and the remedy has therefore met with their approval, as well as with the favor of many millions of well informed persons who know of their own personal knowledge and from actual experience that it is a most excellent laxative remedy. We do not claim that it will cure all manner of ills, but recommend it for what it really represents, a laxative remedy of known quality and excellence, containing nothing of an objectionable or injurious character.

There are two classes of purchasers; those who are informed as to the quality of what they buy and the reasons for the excellence of articles of exceptional merit, and who do not lack courage to go elsewhere when a dealer offers an imitation of any well known article; but, unfortunately, there are some people who do not know, and who allow themselves to be imposed upon. They cannot expect its beneficial effects if they do not get the genuine remedy.

To the credit of the druggists of the United States be it said that nearly all of them value their reputation for professional integrity and the good will of their customers too highly to offer imitations of the

Genuine—Syrup of Figs

manufactured by the California Fig Syrup Co., and in order to buy the genuine article and to get its beneficial effects, one has only to note, when purchasing, the full name of the Company—California Fig Syrup Co.—plainly printed on the front of every package. Price, 50c. per bottle. One size only.

New Japanese Fad.

Many Christmas cards sent out by leaders of society were imported from Japan. The Japanese card fad is growing and there is a chance that the Orientals may create a charming revolution in the bits of engraved paste-board. The visiting cards that Japan is sending to New York show the perfection of simplicity. They are somewhat smaller than those which fashion has demanded over here. They are pearly white in hue. In the left hand corner is an exquisite little painting executed with much skill of quaint, idyllic pictures of birds, animals and flowers. And the cards have the supreme merit in many women's eyes—they are expensive. How pleasant it will be for them to say, "I have sent to the Far East for my new visiting cards!"

UTTERLY WORN OUT.

Validity Sapped by Years of Suffering With Kidney Trouble.
Capt. J. W. Hogun, former postmaster of Indianola, now living at Austin, Texas, writes: "I was afflicted for years with pains across the loins and in the hips and shoulders. I had headache also and neuralgia. My right eye, from pain, was of little use to me for years. The constant flow of urine kept my system depleted, causing nervous chills and night sweats. After trying seven different climates and using all kinds of medicine I had the good fortune to hear of Doan's Kidney Pills. This remedy has cured me. I am as well to-day as I was twenty years ago, and my eyesight is perfect."

Sold by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

Ancient Glass Mirrors.

An American scientist has lately interested the French Academy of Sciences in his researches concerning the glass mirrors that were used in ancient times in Thrace and Egypt. These mirrors were backed with a highly polished metal, the nature of which has been in question for many years. The American scientist has discovered that the metal was almost pure lead, and he believes that the method of manufacture was to pour the molten lead on the concave surface of discs cut from balloons of blown glass. In consequence of their shape the mirrors minimized the images of objects looked at in them.—Philadelphia Record.

Always to Be Depended Upon.

When a person gets up in the morning with a dull headache and a tired, stretchy feeling, it is an almost certain indication that the liver, or bowels, or both, are decidedly out of order. At such times Nature, the wisest and best of all doctors, takes this means to give warning that she needs the help and gentle assistance which can best be obtained from that old family remedy, Brandreth's Pills, which has been in use for over a century. They are the same fine laxative tonic pill your grandparents used, when doctors were few and far between and when people had to have a remedy that could absolutely be depended upon. Brandreth's Pills can be depended upon and are sold in every drug and medicine store, either plain or sugar-coated. Three separate societies in England are agitating for the abolition of the opium trade in India.

A Change of Masks.

Burglars stole only \$4,127 from the banks of the country the past year, but some bank officers got away with much more than that.—Philadelphia Press.

Piles Cured in 6 to 14 Days.
Pazo Ointment is guaranteed to cure any case of Itching, Blind, Bleeding or Protruding Piles in 6 to 14 days or money refunded, 50c.

The Fate of the Chamois.

Switzerland is awakening to the necessity of government intervention if the chamois is not to become as extinct in the Alps as the buffalo in America. In the Grisons the killing of chamois was prohibited last year. Shooting licenses have been issued this year, but next year again will be a close year, and so will 1909. Police reports show that between 1875 and 1905 the number of chamois slaughtered in the canton reached the huge total of 34,308. If the 5,000 chamois still surviving in the Grisons are to be preserved, and if the animal is not to be lost in other cantons, something more than alternate close years will be needed. When the sportsman took the risks of the rocks and went to shoot his chamois for food where he found him there was no danger of extermination. It is the safer but more cruel system of "drives" which causes whole herds to be shot down at once.—New York Tribune.

Indian's Word Was Good.

Indian devotion to a pledge is not a myth; it survives to this day. At the May term of court at Vinita Charles Boling pleaded guilty before Judge Parker at Sallisaw. He was sentenced to 60 days in the county jail and to pay a fine of \$25. He asked to be permitted to stay out of jail and make a crop in order to provide for his family, and Judge Parker granted the request, releasing Boling, who is a Cherokee, on a promise to appear at Vinita on December 1 to begin his sentence. Boling was waiting at the Court House one morning last week when the doors were opened and is now in jail serving his sentence. He says his crop is gathered, and his family is provided for during the winter.—Kansas City Journal.

Still Room at the Front.

The last three presidents of the Pennsylvania railroad rose from the machine shop or the surveying party, and there were never more opportunities than there are now for men of ability and character to get to the front.—Philadelphia Record.

Christmas in January.

In remote places in Eastern Kentucky they still observe January 6, or Old Christmas, never having changed the calendar. Their ancestors came from England about the middle of the 18th century, just when the change was being made there. They have been shut in here for these 150 years, with almost no communication with the outside world and have learned nothing of changes.—Travel Magazine.

SCALY ERUPTION ON BODY.

Doctors and Remedies Fruitless—Suffered 10 Years—Completely Cured by Three Boxes of Cuticura.

"When I was about nine years old small sores appeared on each of my lower limbs. I scratched them with a brass pin, and shortly afterwards both of those limbs became so sore that I could scarcely walk. When I had been suffering for about a month the sores began to heal, but small, scaly eruptions appeared where the sores had been. From that time onward I was troubled by such severe itching that, until I became accustomed to it, I would scratch the sores until the blood began to flow. This would stop the itching for a few days, but scaly places would appear again and the itching would accompany them. After I suffered about ten years I made a renewed effort to effect a cure. The eruptions by this time had appeared on every part of my body except my face and hands. The best doctor in my native county advised me to use arsenic in small doses and a salve. I then used to bathe the sores in a mixture which gave almost intolerable pain. In addition I used other remedies, such as iodine, sulphur, zinc salve, —'s Salve, — Ointment, and in fact I was continually giving some remedy a fair trial, never using less than one or two boxes or bottles. All this was fruitless. Finally my hair began to fall out and I was rapidly becoming bald. I used —'s —, but it did no good. A few months after, having used almost everything else, I thought I would try Cuticura Ointment, having previously used Cuticura Soap and being pleased with it. After using three boxes I was completely cured, and my hair was restored, after fourteen years of suffering and an expenditure of at least \$50 to \$60 in vainly endeavoring to find a cure. I shall be glad to write to any one who may be interested in my cure. B. Hiram Mattingly, Vermillion, S. Dak., Aug. 18, 1906."

Of languages which so widely differ among themselves as to be incomprehensible without particular study the number readily exceeds 1,000.

DROPSY NEW DISCOVERY! gives quick relief and cures most cases. Sent in bottles and 50¢ boxes (treated) Free. Dr. H. H. GREEN'S BROS., Box 8, Atlanta, Ga. P. N. U. S., 1907.
