U. S. DISPENSATORY

Describes the Principal Ingredients Contained in Pe-ru-na.

Are we claiming too much for Peruna when we claim it to be an effec-tive remedy for chronic catarrh? Have we abundant proof that Peruna is in reality such a catarrh remedy' Let us see what the United States Dispensatory says of the principal in-gredients of Peruna.

Take, for instance, the ingredient hydrastis canadensis, or golden seal. The United States Dispensatory says of this herbal remedy, that it is large ly employed in the treatment of de-praved mucous membranes, chronic rhinitis (nasal catarrh), atonic dyspepsia (catarrh of the stomach), chronic intestinal catarrh, catarrhal jaundice (catarrh of the liver), and in diseased mucous membranes of the pelvic organs. It is also recommended for the treatment of various forms of

diseases peculiar to women. Another ingredient of Peruna, cory-dalis formosa, is classed in the United States Dispensatory as a tonic. So also is cubebs classed as a stomachic and

as a tonic for the nucous membranes. Cedron seeds is another ingredient of Peruna, an excellent drug that has been very largely overlooked by the medical profession for the past fifty years. The seeds are to be found in very few drug stores. The United States Dispensatory says of the action of cedren that it is used as a bitter tonic and in the treatment of dysentery, and in intermittent diseases as a substitute for quinine.

Oil of copaiba, another ingredient

of Perana, is classed by the United States Dispensatory as a mild stimu-lant and diuretic. It acts on the stomach and intestinal tract. It acts as a ach and meeting tract. It acts as a stimulant on the genito-urinary mem-branes. Useful in chronic cystitis, chronic dysentery and diarrhea, and some chronic diseases of the liver and biddense.

Send to us for a free book of testimonials of what the people think of Peruna as a catarrh remedy. The best evidence is the testimony of those who have tried it.

Dismal Swamp Changing.

Dismal Swamp Changing.

Investigations of the scientists at Washington have recently developed the fact that at present the area of the Dismal Swamp is slowly sinking and Lake Drunmond, in its center, is growing larger. Similar changes have occurred in the past, periods of elevation and subsidence gradually succeeding one another. The average elevation above sea level is so slight that natural drainage is insufficient to remove the rainfall.

STATE OF ORIO, CITY OF TOLEDO, SS.

LUCAS COUNTY.

FRANK J. CHENEY makes eath that he is senior partner of the firm of F.J. CHENEY & CO., doing business in the City of Toledo. County and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLAIS for each and every case of CATARRI that cannot be cured by the use of HALL'S CATARRII CURE. FRANK J. CHENEY.
Sworn to before me and subscribed in my presence, this 6th day of December, A. D., 1886.

SCIENCE

The new Cincinnati waterworks are now ready to furnish about 12,000, 000 gallens daily to the high service system of the city. This supply is not filtered, as it will be some time before purification works are built

Shafting in use throughout the coun try is generally one-sixteenth of an nch less than two inches, two and a uarter or three inches, as the case any be, that is one and fifteen-six eenths, two and three-sixteenths, etc This is because it is generally turned from the rough iron or steel and one sixteenth is lost in the turning.

Vocal or instrumental music as therapeutic agent has been found by Dr. F. S. Kennedy to be a useful aid melancholia, insomnia, hysteria, family affliction, business reverses; de lirum, pain and mental or physical fatigue. A German physician has used music to lessen the distress and after effects of applying anaesthetics.

Since 1891, the electrolytic copper re fining industry has undergone enor mous expansion, chiefly in America and the number of electrolytic refiner ies in existence in 1905 was stated to e thirty-two, distributed as follows: Inited States, nine; Germany, nine United Kingdom, six; France, four; Russia, two; Austria-Hungary, two. To this total of thirty-two must be dded four refineries, which are report ed to be working in Japan.

German military authorities are experimenting with a device by which he location of troops using smokeles owder may be easily discovered. By this device it is proposed to surve the landscape through pale red glas The flash of smokeless powder at ears strong in red light, while ordi pears strong in red light, white out-nary objects are dimmed. By furnish-ing field glasses with the device in question, which is provided with screens of the proper tint, the position of concealed marksmen can b

The Heroult electric process for the production of steel is now in practical operation at Remscheid Haston in Germany, and it is reported that the steel produced is much superior in many ways to that made by older methods Steel of great purity and homogeneous quality is made from ordinary scrapiron rubbish, melted and then sub to the action of an electric oven in which the necessary carbon, man ganese, nickel and other substances re-quired to produce steel of various qualities are added to the liquid metal. The oven has a capacity of from one and one-half to two tons, and is heated by a current of 100 volts. The new steel is said to be stronger and more resistant to wear and tear than the old-fashioned crucible steel.

MOLASSES FOR PRIZE CATTLE.

Illinois Man Tries New Method of Feeding With Success.

Molasses liberally fed, may have ess of Jacob Funk, the veteran stockman of Bloomington, Ill., in winning the first prize at the International stock show held in Chicago, and also in reaching the record breaking price of \$17 per 100 on the hoof for this herd of 15 black angus cattle. Mr. Funk has been trying for many

years to reach the goal which is the ambition of every scientific stock breeder and feeder. He won second prize last year and in the year preceding. This year he tried a little differ ent process in feeding. In addition to the regulation feeding of the pasture and of corn and oats he introduced in the final month and a half before the big show a little different diet. In the forning he would feed oil meal and oats and in the evening corn with sprinkling of molasses.

The cattle greedily licked up the sweet stuff and it appeared to give an added glossiness to the hides and improve their appearance in every way
In addition he confined the herd to final week on the farm, not permitting the usual run of the pasture. This the usual run of the pasture. This gave an opportunity to dress up the animals and get them in the finest possible condition externally as well as

Mr. Funk also found it an advantage to soak in water all of the corn fed from 15 to 20 hours before feeding This softened the kernels and the grain was more easily digested. This was only resorted to where the corn was dry and hard during the recent summer

While the cattle were given all of the corn and oats they could eat they were not gorged and the feeder care fully watched their diet, gaging their rations by the weather.

On certain days the cattle

more hungry than on others. Every day had to be studied and the feeding governed accordingly. There is dan ger of foundering the animals by over feeding, and this had to be guarded gainst.

Mr. Funk believes that the black an gus breed is preferable to all others. He has found that herefords and short horns when fattened are inclined to become lumpy, while the angus are free from this fault.

The herd of 15 head was sold to New York butcher, who will exhibit them in the east as the champion herd of the west, bringing more money than any other herd in the records stock business.-New York Herald.

FINANCE AND TRADE REVIEW

BIG IRON DEAL

Cherry Valley Company Sells Out to New Concern.

The United Iron & Steel Company has purchased the holdings of the Cherry Valley Iron Company, comprising blast furnaces, ore, coal and limestone properties, and their appurtenances. The deal involves \$7,000.

The properties taken over include The properties taken over include the Cherry Valley furnace, at Leetonia, O., with an annual capacity of 70,000 tons; the Fannie furnace, at West Middlesex, Pa., with an annual capacity of 44,000 tons; ore properties in the Mesaba range, Lake Superior region; coal lands, mines and coking plants in Favette, county, Pa., and plants in Fayette county, Pa., and timestone properties in Pennsylvania and Ohio. All the properties are being operated by the Cherry Valley company and are said to be among the most profitable in the country. The paye owners will enlarge and improve new owners will enlarge and improve the properties.

The Boston Wool Market.

The wool market is quiet but firm. No upward tendency is noted, however. The demand for fine wools is good. For pulled grades there is also a fair request. Foreign wools are firm. Leading domestic quotations follow: Ohio and Pennsylvania XX and above, 34 to 34½c; X, 32 to 33c; No. 1, 40 to 41c; No. 2, 39 to 40c; fine unwashed, 26 to 27c; unmerchantable, 29 to 30c; half blood, unwashed, 33½ to 34c; three-eights blood, unwashed, 33 to 35c; quarter blood, unwashed, 331½ to 34c; delaine washed, 37 to 38c; delaine, unwashed, 30c. ever. The demand for fine wools is

EGGLESS FRUIT CAKE.

This recipe is sent in as being per fectly reliable, having been in use in the family for years; will make three

medium-sized loaves Two coffee-cupfuls of brown sugar one coffee-cupful of molasses (not glucose), one pint of strong, boiling coffee, one pound of fat salt-poris chopped fine, one tablespoonful of soda dissolved, one teaspoonful each of ground cloves, cinnamon, allspice of ground cloves, chimanon, anspect, ginger, and a little less of pepper, one pound of seeded raisins, one pound of currants (washed and perfectly dry), one-half pound of mixed shredded orange, lemon and citron peel (equal perfectly approaches). orange, lemon and citren peel (equal parts), one-half pound of chopped nutmeats. Free the pork from the rind and lean, and grind or chop very fine; over this pour the boiling coffee, then molasses with voda stirred in, then the sugar and spices, using flour to mix quite stie, add the fruit well floured, stirring in well, and bake slowly for two hours.—M. S. H. The Commoner. The Commoner.

Says the Detroit. News:—"Our surest guarantee of peace, our surest method of making Japan a faithful friend, indeed our only method, is to have a navy, have it as soon as the ships can be turned have it floating in the Pacific, to which that of no other Power or combination of Powers on that ocean can er's Weekly.

ENGLISH SCHOOLS

The Flooring Custom and the Way It Is Regarded.

About corporal punishment in England two curious facts lie beyond dispute. One is that while the working pute. One is that while the working class and the lower middle class dislike and resent it and will not in general allow their children to undergo it, the aristocracy tolerate it without complaint. The time is coming, one complaint. The time is coming, one might assert paradoxically, when it will be impossible to flog anybody but the son of a peer. And the other fact is that public school boys have often felt a special affection for the resters who have punished them most. In Westminster abboy stand side by side the tombs of a master and his pupil. The master was Dr. Busby who was head master of Westminster school for so long a time as 58 years. Nobody ever flogged so many boys as

Nobody ever flogged so many boys as he. The pupil was the theologian, Dr. South. It is told—I am sure the story is true—that when South came as a small boy to Westminster Busby greeted him with the ominous words: "I see great talents in that sulky little boy, and my rod shall bring them out." If so, he was no doubt as good as his word. But when South lay upon his deathbed it was his last prayer to be buried at his old master's feet, and the master and the pupil now rest Nobody ever flogged so many boys as and the master and the pupil now rest side by side.—Nineteenth Century.

FITS, St. Vitus Dance: Nervous Diseases per manently cured by Dr. Kline's Great Nerv Restorer. 32 trial bottle and treatise free. Dr. H. R. Kline, Ld.,931 Arch St., Phila., Pa.

The Society of Assurance for Widows and Orphans was the first known insurance company, and was established in London in 1699.

Garfield Tea, the Herb laxative, is mild and potent; take it to regulate a sluggish liver and to overcome constipation.

Life Without Mind.

The possibility of life without mind, while not subject to positive proof, is a theory that has gained considerable strength recently through its advocacy by Dr. L. Laloy, librarian of the Academy of Sciences, Paris. He believes that many of the smaller living organisms, as insects, are mere moving machines, having no more intelligence than may be ascribed to religence than may be ascribed to plants. He refers to the well-known fact that insects are attracted by light, often to their own destruction, and ascribes it to the same cause that inclines the plant to grow toward the light.

HARDSHIPS OF ARMY LIFE

Left Thousands of Veterans With Kidney Troubles.

The experience of David W. Martin, a retired merchant, of Bolivar,

an engagement my horse fell on me, straining my back and injuring the kidneys. I have been told I had a floating kidney. I had intense pain in the back, headaches and dizzy spells and the action of the bladder was very irregular. About three years ago I tried Doan's Kidney Pills, and found such great relief that I con-tinued, and inside a comparatively short time was entirely rid of kidney

Foster-Milburn Co., Buffale, N. Y.

A Military Exigency.
Military circles have been convulsed over a case of discipline that recalls the problem of the irresistible force meeting the immovable obstacle. An officer ordered an enlisted man to go to church and the man refused. The officer had no right to give the order, but the enlisted man had no right to refuse. This extraordinary situation has been solved by transferring the enlisted man to another post as a mark of disapproval, and sending the officer to another post of temporary duty.—Philadelphia Record.

TERRIBLE ITCHING

Eczema Affected Whole System-Unable to Rest Night or Day—Suf-fered 4 Years—Cuticura Cures.

"I suffered severely for four years from poison oak and ivy. My condition was serious, as I could not rest night or day and be free from a terrible itching sensation from scratching on my hands between the fingers, my feet and face. I got the best of advice and treatment from six different decears wherears averages. ferent doctors who were anxious to cure me. One of the doctors told me that when the poison was cured, eczema (a worse disease) would follow, which became true. My eyesight was affected, and I went to a hospital especially for the eyes and got relief, but eczema got a terrible hold on my system. I was about to give up all hope of ever being cured, yet I could not be reconciled to such results, as my health had been good and free from any disease all my life. My age is seventy-three years. In my extremity I happened to read of Cuticura Remedies for skin diseases. I was anxious about my condition and desired to evade any spurious imitation. This was in July 1905, and I called on a certain druggist for the Cuticura Remedies. I bought five boxes Cuticura Ointment, also some Cuticura Soap and Cuticura Pills as I required them. In four weeks' treatment my face was smooth, and the itching gradually left my hands and feet and I could rest comfortably, for which I am grateful and happy. W. Field Cowen, Justice of the Peace and Notary Public, Hartly, Del., May 15, 1996." ferent doctors who were anxious to cure me. One of the doctors told me that when

Carnegie and Eden.

Mr. Carnegie tells it to illustrate that a Celt is always a Celt in Scotland as well as in Ireland. In a sermon preached in a small church in Glasgow the pastor, after invelghing against slothfulness, said, by way of climax: "Do you think Adam and Eve went about the Garden of Eden with their hands in their pockets?"—Harper's Weekly.

AILING WOMEN

How Many Perfectly Well Women Do You Know?

"I am not feeling very well," "I am so nervous it seems as though I should fly." "My back aches as though it would break."

How often do you hear these significant expressions from women friends. More than likely you speak the same words yourself, and there is a cause

is a cause.

More than thirty years ago Lydia E. Pinkham of Lynn, Mass, discovered the source of nearly all the suffering endured by her sex. "Woman's Ills," these two words are full of more misery to women than any other two words that can be found in the English language. Sudden fainting, depression of spirits, reluctance to go anywhere, backaches, headaches, nervousness, sleeplessness, bearingdown sensations, displacements and irregularities are the bane of woman's gularities are the bane of woman's

The same woman who discovered the cause of all this misery also discovered a remedy. Lydia E. Pinkam's Vegetable Compound made from native roots and herbs holds the record for a greater number of absolute cures of female ills than any other one remedy the world has ever known and it is the greatest blessing which ever came into the lives of suffering women.

Don't try to endure, but cure the

Don't try to endure, but cure the cause of all your suffering. Lydia E. Pinkham's Vegetable Compound at once removes such troubles. The following letters prove this:

Coal Tar Color Industry.

Out of the making of gas has grown the great coal tar color industry. The history of the discovery of aniline, the basis of the various aniline dyes, is interesting. By the distillation of indigo M. Unverdorben produced a substance which he named crystalline. Some nine years later, viz., in 1835, Runge discovered in coal tar a substance which produced a beautiful blue color when treated with chloride of lime. This he named kyanol. Five of lime. This he named kyanol. Five years later a substance was obtained by treating indigo with caustic potash, and named aniline, from "anil," the specific name of one of the indigo plants. Then it was found that crystalline, kyanol, and aniline were chemically the same. Thus it was shown that aniline, the basis of the indigo dyes, occurred in the waste product of the manufacture of gas, and the possibilities of a new source and the possibilities of a new source of these dyes hinted at. And in 1858 Dr. Perkin took out a patent for the manufacture of a dye stuff made from aniline which became widely known as "Perkin's purple." Others follow as "Perkin's purple." Others follow-ed in quick succession, and the great coal tar color industry was estab-lished.—London Globe.
