

ALL WOMEN SUFFER

from the same physical disturbances, and the nature of their duties, in many cases, quickly drift them into the horrors of all kinds of female complaints, organic troubles, ulceration, falling and displacements, or pains irregularly or suppression causing backache, nervousness, irritability, and sleeplessness.

MRS. A. M. HAGERMANN

Lydia E. Pinkham's Vegetable Compound

made from simple native roots and herbs. For more than thirty years it has been helping women to be strong, regulating the functions perfectly and overcoming pain. It has also proved itself invaluable in preparing for child birth and the Change of Life.

Mrs. A. M. Hagermann, of Bay Shore, L. I., writes:—Dear Mrs. Pinkham:—“I suffered from a displacement, excessive and painful functions so that I had to lie down or sit still most of the time. Lydia E. Pinkham's Vegetable Compound has made me a well woman so that I am able to attend to my duties. I wish every suffering woman would try Lydia E. Pinkham's Vegetable Compound and see what relief it will give them.”

Mrs. Pinkham's Standing Invitation to Women

Women suffering from any form of female illness are invited to write Mrs. Pinkham, at Lynn, Mass., for advice. She is the Mrs. Pinkham who has been advising sick women free of charge for more than twenty years, and before that she assisted her mother-in-law Lydia E. Pinkham in advising. Therefore she is especially well qualified to guide sick women back to health.

Smallest County in the Union.
The smallest county in the union is Bristol county, R. I., which has only 25 square miles.

FITS, St. Vitus' Dance, Nervous Diseases permanently cured by Dr. Kline's Great Nerve Restorer. 23 trial bottle and treatise free. Dr. H. R. Kline, M.D., 381 Arch St., Phila., Pa.

The highest mountain pass in the Western Hemisphere is at Humahuaca in the Andes, the highest point of which is 14,600 feet above the sea.

Mrs. Winslow's Soothing Syrup for Children teething, softens the gums, reduces inflammation, allays pain, cures wind colic, 25c a bottle.

The natives of Kisiba carry coffee in bags of dried banana leaves.

A Natural Remedy—Garfield Tea! It is made of simple herbs. Take it for constipation, indigestion, sick-headache; it regulates the liver, purifies the blood, brings Good Health.

New Submarine.
The newest design for a submarine by John P. Holland will not be a destroyer, but its object will be to put out of commission any boat it may attack rather than to destroy it. He believes that disarmament and not annihilation will be the object of future warfare.

STATE OF OHIO, CITY OF TOLEDO, Lucas County.
FRANK J. CHENEY makes oath that he is senior partner of the firm of F. J. CHENEY & CO., doing business in the City of Toledo, County and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of CATARRH that cannot be cured by the use of HALL'S CATARRH CURE. FRANK J. CHENEY.
Sworn to before me and subscribed in my presence, this 6th day of December, A. D. 1888.
A. W. GLEASON,
Notary Public.
Hall's Catarrh Cure is taken internally, and acts directly on the blood and mucous surfaces of the system. Send for testimonials, free.
P. J. CHENEY & CO., Toledo, O.
Sold by all druggists. The Hall's Family Pills are the best.

The Original Calendar.
To the modern world a "calendar" is merely a harmless necessary reminder of weeks and days, to be hung up on New Year's Day and consulted in dating letters throughout the year. It has no such mournful sound as "calendarium" had for the ancient Romans. The original "calendar" of their time was the money lender's account book, so called because interest was due from the debtor on the calendar, or first day of each month. That is why Seneca speaks of "calendar" as a word invented outside the course of nature on account of human greed. It is a word which may help persuade us that the world has grown kinder.—London Chronicle.

Poor Paint is Expensive
If one is rich enough to repaint his buildings every year for the pleasure of having a change of color scheme, the quality of the paint used may cut little figure. But if it is desirable to cut the painting bills down to the least amount possible per year, it is of the utmost importance that the paint be made of Pure White Lead and the best of Linseed Oil. There are imitations in the form of alleged White Lead, and there are substitutes in the form of ready-prepared paints.
We guarantee our White Lead to be absolutely pure, and the Dutch Boy on the side of every keg is your safeguard. Look for him.

Onion Eaters Good Humored.

"If people would eat more onions," said the man with the smothered beefsteak, "the world might have to hold its nose, but the population of St. Louis would be a great deal healthier."
"Most of us eat too much meat and grease and bread and butter and not enough vegetables, and the consequence is our systems get clogged up with grease and starch, our livers get out of order, and we grumble at our wives and scold our children and fuss when the baby cries and quarrel with the street car conductors, and get into rows at the office and lose our jobs, not because we are naturally sulky or quarrelsome, but because we are bilious. Why are we bilious? Because we don't eat onions. You never saw a dyspeptic man eating onions. He thinks they are poison, but, in fact, they are the medicine he most needs."
"Whenever you see an onion eater you see a whole-souled, open-hearted, jolly good fellow, who knows what he ought to eat to keep him good-humored. Talk about the staff of life, why bread is only a crutch. There is more nourishment in an onion than there is in a roll. The onion lovers keep the world moving, to say nothing of providing it with much of its fun."—St. Louis Globe-Democrat.

Tunnel Delimitation.
Delimitation in a tunnel is probably one of the novelties of international law. It has just been carried out between Italy and Switzerland in the Simplon. There have been several incipient disputes as to the precise point at which one jurisdiction ended and the other began, and to place such incidents out of the range of possibility for the future, a mixed commission was appointed to draw a boundary line in the bowels of the mountain. Their work has just been successfully completed. It is noted as a curious detail that the temperature in the tunnel during the work was about 52 degrees Fahrenheit.—Philadelphia Record.

Preferred Sword to Book.
Pope Julius II, who died in 1513, was the first Pope to allow his beard to grow in order, it was said, to inspire greater respect among the faithful. He was called the military Pope. When Michael Angelo was making his statue he said to him: "Holy Father, shall I place a book in your hand?" "No," answered His Holiness, "a sword rather—I know better how to handle it."

Camphor Farm.
A camphor farm is to be established near Floresville, Tex., under the auspices of the Bureau of Plant Industry of the United States Department of Agriculture. The government has already a large experimental farm in operation near Wharton, Tex. It is believed that the new industry has wonderful possibilities, and that the time is not far distant when Texas will be one of the greatest camphor producing regions of the world.

FIFTEEN YEARS OF ECZEMA.

Terrible Itching Prevented Sleep—Hands, Arms, and Legs Affected—Cured in 6 Days by Cuticura.
"I had eczema nearly fifteen years. The affected parts were my hands, arms and legs. They were the worst in the winter time and were always itchy, and I could not keep from scratching them. I had to keep both hands bandaged all the time, and at night I would have to scratch through the bandages as the itching was so severe, and at times I would have to tear everything off my hands to scratch the skin. I could not rest or sleep. I had several physicians treat me, but they could not give me a permanent cure, nor even could they stop the itching. After using the Cuticura Soap, one box Cuticura Ointment and two bottles Cuticura Resolvent for about six days the itching had ceased, and now the sores have disappeared, and I never felt better in my life than I do now. Edward Worrell, Band 30th, U. S. Infantry, Fort Crook, Nebraska."

Typhoid Decimates Army.
In India alone the losses to the British army from typhoid fever amount to half a battalion a year. The latest reports furnish proof that the practice of anti-typhoid inoculations in the army has resulted in a substantial reduction in the incidence and death rate of enteric fever among the inoculated.

A fresh fallacy is often more pleasing than a twice-told truth.

An English novelty designated as a muff and pocket warmer consists of a hermetically sealed tube which is declared to contain a special chemical preparation which will maintain its heat for an usually long time. To use it the case is immersed in boiling water for five to ten minutes and when taken out is incased in a red flannel felt cover. It is asserted that the warmer will retain its heat for from three to four hours.

Water-proof glue is manufactured of gum shellac three parts and India-rubber one part by weight, these constituents being dissolved in separate vessels in ether, free from alcohol subject to a gentle heat. When thoroughly dissolved, the two solutions are mixed and kept for some time in a vessel tightly sealed. This glue resists the action of water, both hot and cold, as well as most acids and alkalis. If the glue is thinned by the admixture of ether, and applied as a varnish to leather along the seams where this has been sewn together, it renders the joint or seam water-tight, and almost impossible to separate.

The cost of copper refining by electricity has been reduced greatly in recent years in the American refineries by the introduction of mechanical devices for casting the anode slabs of crude copper and for charging and discharging the vats. According to an article by Mr. John B. C. Kershaw in Cassier's Magazine, the expenditure on hand labor has thus been greatly reduced, and the time during which vats are laid off for recharging and cleaning has been curtailed. The current density used has also been greatly increased by the use of improved methods of circulating the electrolyte, and by the addition of a very small percentage of hydrochloric acid to the copper sulphate solution.

When natural gas was first brought into use in America there seemed to be a general idea that the supply was inexhaustible. It was sold at low rates and usually without measurement. This method encouraged waste in the consumption of gas, and was shortly abandoned by the larger companies. Today nearly all consumption is sold by measurement. It is believed, says the Iron Age, that the time has now come when it is possible to procure statistics of the quantity of gas consumed, and next year this will be undertaken. The method will give such figures in the future that a more direct knowledge will be obtained of the capacity of gas areas to maintain a commercial supply of gas for a certain number of years.

Carbon tetrachloride is being made an important new product in France, Chemical works at Montiers in Savoy, especially having undertaken its production on a large scale. It is a colorless, mobile liquid, like petroleum in appearance, and has the composition of about ninety-two percent, of chlorine to eight percent of carbon. It can be profitably made only where chlorine is an industrial residue, as in the production of soda or potash by the electrolytic method. It boils at 77 degrees C., is entirely volatilized without odor, and is so stable that it does not tack metals, fabrics or colors, even at high temperatures. It is inflammable and incombustible. It dissolves all fats, and it is expected to take the place of such extremely dangerous solvents as carbon sulphide, benzene, chloroform, alcohol and ether. It dissolves certain gums and resins, making it probably available in varnish manufacture.

Tunnel Work Kills Sixty-Eight.
According to the coroner's report for Manhattan for 1906, which was made public last night, 68 deaths were due to accidents in the various tunnels now building in and about the boroughs. Of these 43 are reported to have occurred in the Pennsylvania tunnels, 12 by caisson disease, 29 by fractures and other injuries caused by falling stone, descending elevator buckets, flying rock, etc., and 2 from drowning caused by the sudden inflow of water into the submarine tunnels.

In the Belmont tunnels the total loss of life is said to have been 204; by caisson disease, 9 by drowning in the Battery tunnel only two deaths were reported, one by fracture of the skull and one by caisson disease, and in the excavation under Church and Dey street three deaths all caused by caisson disease.—New York Tribune

Hicory and White Oak Scarce.
Since hickory and white oak timber have become scarcer and more difficult to obtain vehicle makers have turned their attention towards substitute for these woods, in the manufacture of spokes, axles and tongues. Now the eucalyptus or red gum of California is being used for spokes, and tests show it is as well adapted to this purpose as they avowed hickory or white oak. In making axles maple has taken the place of hickory and white oak, and for tongue and pole material yellow pine has been substituted for ash and hickory with satisfactory results. Farmers, fortunate enough to possess woodlands containing ash, hickory, white oak or maple trees will do well to be conservative in the matter of disposing of them at present. They will continue to increase in value.

In the towns of Peru the fire engines are drawn by men.

THE ELOCUTIONIST'S CURFEW.

England's sun was slowly setting—(Raise right hand to your brow).
Filling all the land with beauty—(Wear And a gaze of rapture now).
And the last rays kissed the forehead of a man and maiden fair
(With a movement slow and graceful you may now push back your hair).
He with sad, bowed head—(A drooping of your head will be all right. Till you hoarsely, sadly whisper) "Curfew must not ring tonight."

"Sexton," Bessie's white lips faltered—
(Try here to resemble Bess,
Though of course you know she'd never worn quite such a charming dress).
"I've a lover in that prison—(Don't forget to roll your r's
And to shiver as though gazing through the iron prison bars).
"Cromwell will not come till sunset—
(Speak each word as though you'd bite Every syllable to pieces)—"Curfew must not ring tonight."

"Bessie," calmly spoke the sexton—
(Here extend your velvet palm,
Let it tremble like the sexton's as though striving to be calm).
"Long, long years I've rung the curfew—
(Don't forget to make it y'ars
With a rift infection that a world of sorrow bears).
"I have done my duty ever—(Draw yourself up to your height once more).
For you're speaking as the sexton—
(Gyrl, the curfew rings tonight!"

Out she swung, far out—(Now here is where you've got to do your best:
Let your head be twisted backward, let great sobs heave up your chest.
Swing your right foot through an arc of ninety degrees and swing your left foot, and be sure don't bend your knees).
Keep this up for fifteen minutes till your face is worn and white.
Then gaze at your mangled fingers—
(Curfew shall not ring tonight!"

O'er the distant hills came Cromwell—
(Right here once more, the distance, let your eyes look down the distance, say above the entrance door)
At his foot she laid her stone—(Lift your hands as though they hurt)
And her sweet young face so haggard—
(Now your pathos you assert).
Then you straighten up—as Cromwell, and be sure you get it right:
Don't say, "Go, your liver loves!"—
"Curfew shall not ring tonight!"
—W. D. Nesbit, in Harper's Magazine.

FUNNY SIDE OF LIFE

"Is he a close friend?" "I should say so. He wouldn't even lend me a dollar."—Cleveland Plain Dealer.

"Dear, you know Jack was just crazy to marry me," remarked the new bride. "Yes, that's what everybody thinks."—Milwaukee Sentinel.

An English wit remarked of English women that while romance made wrecks of them, marriage made them look like public buildings.—Harlequin.
Copy Reader—Man dropped dead in a Turkish bath. How'd I head the story? Night Editor—Another Sweet Shop Outrage.—Cleveland Plain Dealer.

"I've just heard of an auto that will annihilate time and space." "Well, the present sort is good enough for me. It annihilates everything in sight."—Life.

Ethel: I hear that Mrs. Newwed is taking the Jiu Jitsu training.
Maude: Well, she had to do something to enable her to handle that baby.—Life.

Dentist—"I've filled all of your teeth that have cavities, sir!" Mahoney—"Well, thin, fill th' rist av them, too—thin whin th' cavities come they'll be already filled, b'gobs!"—Puck.

Mamma—"There, Dick, you just go right to bed without a mouthful of supper." Dick—"Oh, mamma, I can't sleep on an empty stomach." Mamma—"Then turn over on your back."—Judge.

Joakley—"I understand Crooks is anxious to be a Congressman-at-large." Coakley—"You mean ex-Congressman Crooks? Why he's in the penitentiary serving sentence." Joakley—"Exactly."—Philadelphia Press.

A joke came into an editorial sanctum where it was ill received. "Considered as a mere jest," it admitted, "I may not be without defects. Nevertheless, there is due to age such respect as should guarantee me civil treatment." This view, indeed, seemed so reasonable that in the end it prevailed.—Philadelphia Public Ledger.

British Stupidity and Art.

If Whistler and Wilde and Moore had had to deal with the French instead of the British public their entire devotion probably would have been given to art. Their "conscious superiority" would not have been aroused—their egotism would not have thrived on more or less exaggerated persecution. But perpetually reminded of British conservatism—their reverences, superstitions, hypocrisies, lies and stupidity—reminded always of British indifference to art—its antimacassars, chandeliers, public statues, its Dickens and Trollopes—they substituted the pose of superiority for the poise of supremacy.—Chicago Evening Post.

The Unkindness of Belle.

Kadley Rich—I saw a great deal of Belle Swellman last winter. I saw you talking to her this morning.
Goodley Bullion—Yes; she was telling me she hoped you were going to winter at Palm Beach again this season.
Kadley Rich—Ah! she's going there, eh?
Goodley Bullion—No; she's going to California.—Catholic Standard and Times.

Toledo lost its biggest tree recently—a silver maple and a very old settler.

PE-RU-NA A MEDICAL COMPOUND

In any medical compound as much depends upon the manner in which it is compounded as upon the ingredients used.

First, there must be a due proportion of the ingredients. Each drug in the pharmacopoeia has its special action. To combine any drug with other drugs that have slightly different action, the combination must be made with strict reference to the use for which the compound is intended. The drugs may be well selected as to their efficacy, but the compound ENTIRELY SPOILED BY THE PROPORTION in which they are combined.

It takes years and years of experience to discover this proportion. There is no law of chemistry, of pharmacy, by which the exact balance of proportion can be determined. EXPERIENCE IS THE ONLY GUIDE.

In compounding a catarrh remedy Dr. Hartman has had many years' experience. In the use of the various ingredients which composed the catarrh remedy, Peruna, he has learned, little by little, how to harmonize the action of each ingredient, how to combine them into a stable compound, how to arrange them into such nice proportions as to blend the taste, the operation and the chemical peculiarities of each several ingredient in order to produce a pharmaceutical product beyond the criticism of doctors, pharmacists or chemists.

WE REPEAT, THAT AS MUCH DEPENDS ON THE WAY IN WHICH THE DRUGS ARE COMBINED AS DEPENDS UPON THE DRUGS THEMSELVES.

The compound must present a stability which is not affected by changes of temperature, not affected by exposure to the air, not affected by age. It must be so combined that it will remain just the same whether used in the logging or mining camps of the northwest or the coffee plantations of the tropics.

A complete list of the ingredients of Peruna would not enable any druggist or physician to reproduce Peruna. It is the skill and sagacity by which these ingredients are brought together that give Peruna much of its peculiar claims as an efficacious catarrh remedy.

However much virtue each ingredient of Peruna may possess, the value of the compound depends largely upon the manner and proportion in which they are combined. The right ingredients, put together rightly, is the only way a medical compound can be made of real value.

Trolley in Damascus.
A French company has secured the franchise for the construction of a trolley line in the city of Damascus. The concession is virtually a monopoly of all electrical privileges, including telephones, telegraph, light and power transmission. The power will be secured from the falls of the River Barada, at Et Tekiye, 22 miles from the city. At the present time three and one-half miles of trolley line connecting the suburbs with the city are under construction.

Immense Area of Canada.
Canada is as large as 30 United Kingdoms. She has received over half a million immigrants in ten years.

People appreciate the delicate taste and natural action of Garfield Tea, the mild herb laxative. Best for liver, kidneys and bowels. Guaranteed under the Pure Food and Drugs Law.

A man is never too busy to listen when the lady on the dollar talks.

MOTHERS Of Skin Tortured Disfigured Babies

SHOULD KNOW THAT

Warm Baths With Cuticura SOAP

And gentle anointings with Cuticura, the great Skin Cure, afford instant relief, permit rest and sleep, and point to a speedy cure of torturing, disfiguring eczemas, rashes, itchings, and irritations of infants and children when all else fails. Guaranteed absolutely pure, and may be used from the hour of birth.

Mica Axle Grease
Best lubricant for axles in the world—long wearing and very adhesive.
Makes a heavy load draw like a light one. Saves half the wear on wagon and team, and increases the earning capacity of your outfit.
Ask your dealer for Mica Axle Grease.

STANDARD OIL CO. INCORPORATED.

PAINT YOUR VEHICLES

Shoddy or weather-beaten carriages, buggies, sleighs or other vehicles detract a great deal from the pleasure they should afford. You can make such vehicles look like new at a trifling cost with one coat of

Buffalo Carriage and Buggy Paint

mixed ready for use. No rubbing or varnishing necessary. Specially made for painting buggies and carriages, and can be easily applied by anyone who can handle a brush. Dries quickly and hard and gives you a bright, glossy, piano finish, unequalled by any other paint on the market. The kind of paint that wears and resists the ravages of the weather and muddy roads.
