

### Cures Woman's Weakness.

We refer to that boon to weak, nervous, suffering women known as Dr. Pierce's Favorite Prescription.

Dr. John Fyfe one of the Editorial Staff of the *ECLECTIC MEDICAL REVIEW* says of *Unicorn root (Helonias Dioica)* which is one of the chief ingredients of the "Favorite Prescription":

"A remedy which invariably acts as a uterine invigorator... makes for normal activity of the entire reproductive system." He continues: "In Helonias we have a medicinal which more fully answers the above purposes than any other drug with which I am acquainted. In the treatment of diseases peculiar to women it is seldom that a case is seen which does not present some indication for this remedial agent." Dr. Fyfe further says: "The following are among the leading indications for Helonias (Unicorn root). Pain or aching in the back with leucorrhoea; atonic (weak) conditions of the reproductive organs of women; mental depression and irritability, associated with disorders of the reproductive organs of women; constant sensation of heat in the region of the kidneys; menorrhagic flooding, due to a weakened condition of the reproductive system; amenorrhoea (suppressed or absent monthly periods); abnormal condition of the digestive organs and general (thin blood) habit; dragging sensations in the extreme lower part of the abdomen."

If more or less of the above symptoms are present, no other woman can feel better than take Dr. Pierce's Favorite Prescription, one of the leading ingredients of which is Unicorn root, or Helonias, and the medicinal properties of which it most faithfully represents. Prof. H. H. Hart, another prominent ingredient of "Favorite Prescription," Prof. Finley Ellingwood, M. D., of Bennett Medical College, Chicago, says: "It is an important remedy in disorders of the womb. In all catarrhal conditions, and general debility, it is useful." Prof. John M. Scott, M. D., of the Cincinnati, says of Golden Seal root: "In relation to its general effects on the system, there is no medicine in use about which there is such general unanimity of opinion. It is universally regarded as the tonic useful in all debilitated states." Prof. R. H. Hart, M. D., of Jefferson Medical College, says of Golden Seal: "Valuable in uterine hemorrhage, menorrhagia (flooding) and congestive dysmenorrhoea (painful menstruation)." Dr. Pierce's Favorite Prescription faithfully represents all the above named ingredients and cures the diseases for which they are recommended.

### Composition of Alloys.

The Japanese are celebrated not only for their skill in making decorative articles, but also for the beauty of the materials used. It is said that the secret of the composition of some of their alloys of brass and copper has only lately been revealed. The finest Japanese brass, called *sinchu*, consists of 10 parts of copper and 5 of zinc. Another very beautiful alloy, named *shadko*, to which splendid hues are imparted by treatment with acids, is formed by mixing gold and copper, the proportion of gold varying from 1 to 10 per cent of the entire mass.—Philadelphia Record.

FITS, St. Vitus' Dance, Nervous Diseases permanently cured by Dr. Kline's Great Nerve Restorer. 82 trial bottle and treatise free. Dr. H. H. Kline, Ltd., 931 Arch St., Phila., Pa.

### Home Consumption.

The three great industrial nations, England, France and Germany, each consumes about 80 per cent of the manufactured goods produced at home. The United States sells only 5 per cent of manufactured goods abroad.

### Don't Use "Practically Pure" White Lead

There is no other pigment that is "practically" white lead—no other paint that has the properties of Pure White Lead Paint.

Pure White Lead, good paint that it is, cannot carry adulterants without having its efficiency impaired. To get Pure White Lead durability, see to it that every keg bears the Dutch Boy trade mark—a guarantee that the contents are absolutely Pure White Lead made by the Old Dutch Process.

### SEND FOR BOOK

"A Talk on Paint," gives valuable information on the paint subject. Sent free upon request.

**Libby's Food Products**

**Libby's Veal Loaf With Beef and Pork**

Do you like Veal Loaf? You will surely be delighted with Libby's kind, made from choice fresh meats, in Libby's spotless kitchens. It is pure, wholesome and delicious in flavor.

Ready for Serving At Once.—Simply garnish with sauce it is an appetizing treat for luncheon or dinner.

Ask your grocer for Libby's and insist upon getting Libby's.

**Libby, McNeill & Libby Chicago**

### Italy's Bold Explorer.

Italy has an intrepid explorer in the person of a young member of one of the aristocratic families, Don Livio Caetani, who has long been lost in the wild fringes of Somaliland and Abyssinia. He has marched through the wild regions of Bako, the Omo valley, Caffa, Gemma, and thence he turned off to Adis Abeba, from which point news has, for the first time, been heard from him for months. He penetrated to within nine days of Lake Rudolf, but a high mountain range, stretching for 48 miles to the lake itself, rendered access impracticable. The explorer everywhere met with a friendly spirit among the natives.—Philadelphia Record.

### HOME WEEK IN BOSTON.

Sons and Daughters of New England Capital to Visit Scenes of Youth.

The greatest event for Boston and for all New England this season will be the home-coming week in Boston. This will occur at the end of July, and will attract thousands of persons from every part of the country to the city and the section of the country where their ancestors lived and where their affections are centered.

The citizens of Boston have made liberal preparations for a grand celebration of the history and achievements of Boston and the Commonwealth of Massachusetts. There will be a week of midsummer reunions of families and of public festivities. The time selected is from July 28 to August 3.

The home-coming week in Kentucky attracted half a million visitors to Louisville and the home-coming for Georgia was likewise gratefully accepted. There is no doubt of the attraction to Boston of a far greater number of sons and daughters who cherish the traditions and the successes of the people and who venerate the history of the famous city which is the leader in the literature, art and the civilization of America.

### Wants Nurses in Navy.

Surgeon General Rixey is preparing to make a strong appeal to Congress at its next session to correct a lamentable deficiency in the medical branch of the naval service. The surgeon general points out that the American navy is without a single trained nurse. No matter how severe the illness of the officers and sailors nor how grave the injury or wound received in the line of duty, the American bluejacket must rely for his care in time of trouble upon a hospital steward and an attendant.

In ordinary times the ships' surgeons are often taxed to care properly for the normal number of sick and injured aboard ship. When there is an epidemic of fever, or measles (the latter often a serious malady among male adults), such as occurred not long ago on the battleship Connecticut, it has been found impossible to give the invalids the necessary scientific and careful nursing required by their illness.

Surgeon General Rixey has therefore worked out the details of a plan for the organization of a corps of trained nurses, such as the army has.

### Ice Shaped Like Spikes.

A remarkable form of ice, which the French-Canadians name *frazil ice*, is the cause of the packing up of ice and consequent floods in the St. Lawrence river. It forms in spiky shapes where the currents are too rapid for ordinary sheet ice to spread across them, and at the base of waterfalls. During the prevalence of cold winds the icy needles sometimes fill up open channels, and being carried long distances beneath the surface ice, gradually accumulate and consolidate, and are able to dam the channel even to depths of 80 feet.

### Island Red With Lobsters.

An old admiral well known for his powers of exaggeration was at supper one night describing a voyage. "While cruising in the Pacific," said he, "we passed an island which was positively red with lobsters." "But," said one of the guests, smiling incredulously, "lobsters are not red until boiled." "Of course not," replied the undaunted admiral, "but this was a volcanic island filled with boiling springs."

### CHILDREN SHOWED IT.

Effect of Their Warm Drink in the Morning.

"A year ago I was a wreck from coffee drinking and was on the point of giving up my position in the school room because of nervousness. "I was telling a friend about it and she said, 'We drink nothing at meal time but Postum Food Coffee, and it is such a comfort to have something we can enjoy drinking with the children.'"

"I was astonished that she would allow the children to drink any kind of coffee, but she said Postum was the most healthful drink in the world for children as well as for older ones, and that the condition of both the children and adults showed that to be a fact."

"My first trial was a failure. The cook boiled it four or five minutes and it tasted so flat that I was in despair, but determined to give it one more trial. This time we followed the directions and boiled it fifteen minutes after the boiling began. It was a decided success, and I was completely won by its rich, delicious flavor. In a short time I noticed a decided improvement in my condition and kept growing better and better month after month, until now I am perfectly healthy, and do my work in the school room with ease and pleasure. I would not return to the nerve-destroying regular coffee for any money."

"There's a Reason." Read the famous little "Health Classic," "The Road to Wellville," in pkgs.

## FINANCE AND TRADE REVIEW

### DUN'S WEEKLY SUMMARY

Lateness of Spring Retards All Lines of Trade Except Iron and Steel.

Seasonable merchandise goes into distribution slowly, which causes accumulation of spring and summer dry goods and millinery in the hands of dealers and retards collections, at the same time making operations of fall and winter much more conservative. At some points the last week of May brought pronounced improvement in commercial activity, but the holiday retarded recovery. Progress is slow. Manufacturing plants are producing at full capacity in most industries, orders covering outputs far into the future. More New England cotton mills employes have received advanced wages, making the change affect about 85,000 hands. Another evidence of progress in cotton spinning was the increase in quarterly dividends at Fall River to 2 1/2 per cent, against 1 1/2 per cent last year and 2 1/4 per cent in 1902, the most prosperous of recent years.

Current transactions in the iron and steel industry are of comparatively little significance, owing to the enormous tonnage of business under contract that will maintain activity far into the future, some sales covering the output of mills for the entire year 1908. Yet new orders are constantly appearing, including much foreign business. Deliveries are made as near as possible to specifications.

The output of pig iron is probably beyond all precedent. Movement of ore is so heavy that congestion results at lower lake ports and the inadequate supply of cars causes much accumulation on the docks, especially at Cleveland.

Rail and structural orders are the most urgent in demand for products of steel. Yet there is little evidence of curtailed plans because of unfavorable crop reports or the difficulty experienced in raising funds for new construction.

**Bill to Tax Whiskers.**  
A bill for the taxation of whiskers has been introduced by a New Jersey legislator. The proposed tax is to range from \$5 for ordinary whiskers to \$50 for a goatee, and red whiskers 20 per cent extra.

The railroads are raising the age limit of employes owing to the scarcity of labor.

**Worth the Price.**  
An English jury has awarded \$1,250 damages to a woman who before an accident could reach high C when she sang, but after it, could get no further than B flat. From this it would seem as if they thought the poor girl had been damaged. But this is doubtful. As a general thing reaching high C is much like what Dr. Johnson said about a dog's walking on his hind legs: "It is not done well, but you are surprised to find it done at all."—Boston Herald.

### Biggest Locomotive.

Pittsburg has just completed the largest and heaviest locomotive in the world. Engine and tender together weigh 204 tons, and after being built it had to be taken back into the shops in Manchester, Lower Allegheny, in order to have its wheel adjusted, so that it could tear under ordinary bridges without tearing anything away. This giant is known officially as "7067" and is destined for a passenger run on the Pennsylvania lines west.

### Special Trains—Nat'l Ed. Ass'n. and Chr. Endeavor Conventions.

Personally conducted special trains via the Chicago, Union Pacific & North-Western Line leave early in July for the Pacific Coast. Special all-expense tours at very low rates for the round trip, including sleeping car accommodations, meals, etc. All the advantages of a delightful and carefully arranged tour in congenial company. Write for itineraries and full particulars. S. A. Hutchison, Manager Tourist Department, 212 Clark Street, Chicago.

### German Military Training.

Germany, through the thrift, intelligence and prosperity of her people, illustrates to mankind the advantages of training in youth her manhood to the use of arms; the habits of discipline and the order and cleanliness of person are carried into after-life by all classes of modern Germans; this permeates the whole nation, and is today recognized as a national characteristic. The womanhood of the nation look with reproach upon a man ignorant of military training.—African Monthly.

### A WONDERFUL GAIN.

A Utah Pioneer Tells a Remarkable Story.

J. W. Browning, 1011 22d St., Ogden, Utah, a pioneer who crossed the Plains in 1848, says: "Five years ago the doctors said I had diabetes. My kidneys were all out of order, I had to rise often at night, looked sallow, felt dull and listless and lost 40 pounds. My back ached and I had spells of rheumatism and dizziness. Doan's Kidney Pills relieve me of these troubles and have kept me well for a year past. Though 75 years old, I am in good health."

Sold by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

I had spells of rheumatism and dizziness. Doan's Kidney Pills relieve me of these troubles and have kept me well for a year past. Though 75 years old, I am in good health."

Sold by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

### One Thing Needed.

Kuroki listened to the Yale yell, and hastily made a remark to an aide.

"What did the General say?" asked a student.

"He said," replied the aide, "that if his soldiers had been equipped with that yell at Liacyang, the Russians would have been scared beyond rifle range."—Philadelphia Ledger.

### SORES AS BIG AS PENNIES.

Whole Head and Neck Covered—Hair All Came Out—Suffered 6 Months—Cured in 3 Weeks by Cuticura.

"After having the measles my whole head and neck were covered with scaly sores about as large as a penny. They were just as thick as my could be. My hair all came out. I let the trouble run along, taking the doctor's blood remedies and rubbing on salve, but it did not seem to get any better. It stayed that way for about six months; then I got a set of the Cuticura Remedies, and in about a week I noticed a big difference, and in three weeks it was well entirely and I have not had the trouble any more, and as this was seven years ago, I consider myself cured. Mrs. Henry Porter, Albion, N. Y., Aug. 25, '06."

### An Anti-Tipping Law.

England has now an anti-tipping law which the courts seem disposed to enforce. It is known as an act for the prevention of corruption, and is based on the theory that a person who gives money to the employe of another to do that which he is not hired to do, is guilty of bribery. The first case under the new law was tried last month, when the Lancashire & Yorkshire Railroad Co. sued a clothier's clerk in Manchester for bribing one of its carters by giving to him in one case a shilling and in another 3d, for carrying parcels to customers. The facts were admitted, and the only defense offered was that it was the common practice to give "tips" in this way. The magistrate decided that the law was passed to stop this practice, and imposed a fine of £1 and ordinary costs upon the clerk, besides special costs of a little more than £1. It does not yet appear whether the court will hold that the law applies to tipping in restaurants.—Youth's Companion.

### SAWYERS' EXCELSIOR BRAND

Oiled Clothing and Slickers

Our Fireman's Coat is a dandy, suited also for general use.

Don't accept any waterproof coat from a dealer unless it bears our trade mark show a below "SAWYERS" arch.

If your dealer does not carry the "SAWYERS" oiled clothing and slickers write us for catalog and prices.

SAWYERS' EXCELSIOR BRAND

Color more goods brighter and faster colors than any other dye. One lb. package colors all fibers. They dye in cold water better than any other dye. You can dye any garment without ripping apart. Write for free booklet—How to Dye, Bleach and Mix Colors. MONROE DILLON CO., Unionville, Missouri

## MOTHERHOOD

The first requisite of a good mother is good health, and the experience of maternity should not be approached without careful physical preparation, as a woman who is in good physical condition transmits to her children the blessings of a good constitution.

Preparation for healthy maternity is accomplished by Lydia E. Pinkham's Vegetable Compound, which is made from native roots and herbs, more successfully than by any other medicine because it gives tone and strength to the entire feminine organism, curing displacements, ulceration and inflammation, and the result is less suffering and more children healthy at birth. For more than thirty years

### Lydia E. Pinkham's Vegetable Compound

has been the standby of American mothers in preparing for childbirth. Note what Mrs. James Chester, of 427 W. 35th St., New York says in this letter:—Dear Mrs. Pinkham:—"I wish every expectant mother knew about Lydia E. Pinkham's Vegetable Compound. A neighbor who had learned of its great value at this trying period of a woman's life urged me to try it and I did so, and I cannot say enough in regard to the good it did me. I recovered quickly and am in the best of health now."

Lydia E. Pinkham's Vegetable Compound is certainly a successful remedy for the peculiar weaknesses and ailments of women. It has cured almost every form of Female Complaints, Dragging Sensations, Weak Back, Falling and Displacements, Inflammation, Ulcerations and Organic Diseases of Women and is invaluable in preparing for Childbirth and during the Change of Life.

**Mrs. Pinkham's Standing Invitation to Women**  
Women suffering from any form of female weakness are invited to write Mrs. Pinkham, at Lynn, Mass. Her advice is free.

### Progress of Medicine.

Reviewing the progress of medicine during the nineteenth century, Dr. John S. Billings, United States army, has shown that the deaths of women from childbirth decreased during that period from 10 to 20 in 1,000 to 5 in 1,000 and that from all causes the deaths in New York city fell from between 25 and 40 in 1,000 to less than 20 in 1,000. He recalls the fact that 100 years ago yellow fever was epidemic in New York and Philadelphia for two years. For 39 years the disease has been almost unknown throughout the whole country; also that in 1800 the majority of persons one met were pitted with smallpox—the survivors of a much greater number—while now there are physicians who have never seen a case of smallpox; and that in the Napoleonic and Revolutionary Wars more died from disease than from wounds, while now hospital gangrene is unknown. Statistics show that in Chicago during the last 35 years the average age at death has increased from 12 to 32 years. No one disputes these facts or attributes them to any cause other than medical science—the measures employed partly in curing disease, but more especially in preventing its introduction or its spread when once introduced.—Philadelphia Record.

### Balloons as Targets.

The great interest aroused in the question of aerial navigation by Herr Martin's book, "Berlin-Baghdad," says a Berlin correspondent of the London Express, is about to find expression in a series of important experiments as to the possibility of taking aim at balloons and airships in midair. The experiments are to be conducted in the neighborhood of Dantzig. Small balloons of the capacity of 100 cubic meters are to be sent up, and they will be fired at by heavy guns and small arms. Balloons held captive by cables 3,000 feet in length will be towed by warships to within range of coast batteries at distances varying from three to nine miles. The experiments will be watched by a number of officers of the general staff as well as artillery officers and those attached to the ballooning department.

### Phonograph is a Witness.

The phonograph as a witness in the law courts was bound to come sooner or later, and it did so the other day in Brussels. A lawyer of that city had been continually annoyed by the noises of hammering, etc., at an iron foundry in his near neighborhood. Finding that complaints were unavailing, he brought the matter into court. Before doing so he placed a phonograph in his library for one whole day. When the case came before the fourth chamber he produced the phonograph and set going the specially prepared cylinder. An uproar and din as from the force of Vulcan was the result, and the ingenious lawyer won his case "hands down."—London Chronicle.

### Dees British Collieries.

Colliers employed in certain pits in the Manchester district are now working half a mile below ground. There are collieries in Ashton, Bradfield, Manchester and Pendleton which are more than half a mile in depth, and others are about to be sunk in other parts of southern Lancashire which will be 900 yards down. The men working at these great depths have to take huge amounts of liquid with them, owing to the great heat which prevails, many of them taking two quarts of cold tea in big tin cans. The Pendleton pit of Messrs. A. Knowles is more than 1,000 yards in depth.—Westminster Gazette.

### School for Aeronauts.

Arrangements have just been completed to establish at Chemnitz a training school for aeronauts and constructors of airships. A similar school has been in operation in Paris for a year past. The Chemnitz institution will be the second enterprise in the new pedagogical field. A one-year course is contemplated for the present. The school to be opened this month. This course, at the outset, is limited to the construction and use of balloons. It will be enlarged so as to include aeroplanes as soon as practical working types have been developed.—New York Herald.

MRS. JAMES CHESTER

### An Exceptional Opportunity

7% PREFERRED STOCK of the Regal Shoe Co.

(at Par, \$100 Per Share.)

An opportunity is offered to conservative investors seeking a safe yet remunerative security, to become interested in one of the most successful business enterprises in America.

This widely known concern, making as it does a universal necessity, and selling it for CASH at popular prices from 125 of its own stores and agencies, has received up to Jan. 1st, 1908, some 750,000 applications from various retail dealers for agencies. Only 40 of these, however, can be established now because of present market conditions, but in order to make possible these applications this stock is being offered to the public, the money from the sale of which will be used immediately to enlarge the factory at Whitman, Mass., so that it can produce the footwear required by this assured new business.

In 1906 the Regal earnings were over \$25,000, the indicated cash earnings for 1907 are \$20,000, yet the dividend requirements of this 7 per cent. Preferred Stock are only \$15,000.

The Preferred is in effect a First Mortgage on the company's entire assets and its dividend is the FIRST charge paid. It is significant that the men who started the business are still running it, will continue to run it and are not offering any of their common stock for sale. Write for full particulars to
