To Be Dedicated During "Old-Home Week," September 5.

The beautiful white marble shaft erected by the State of New York in Niagara Square, Buffalo, N. Y., to the memory of President McKinley, is to be formally dedicated Thursday, September 5, and the event will be the central feature of Buffalo's Old-Home Week, September 1 to 7. Former residents of Buffalo and the public at large are cordially invited to attend the dedication and the gay carnival that will run all the week.

McKinley The McKinley monument was planned and executed under the direction of a commission of prominent men at a cost of over \$150,000. Buffalo's Old-Home Week will be

a succession of civic and military pageantry, carnival, sports and games, and the electric city will be ablaze with twinkling lights and patriotic with twinkling lights and patriotic decorations. Former residents of Buffalo are asked to send their names and addresses to James W. Greene, chairman Old-Home Week Committee, Buffalo, N. Y. A beautiful souvenir invitation will be mailed to each. The railroads will offer excursion rates to and returning from Buffalo.

### BOY KNEW HIS RIGHTS

But Did Not Think Very Much About His Duties.

His Duties.

A boy went into a shop to work for a man. He was a lad of considerable intelligence and knew himself. Hesides, he had large ideas of his personality, and had thought a great deal over what were his rights. He knew exactly what he was entitled to and what the other fellow was entitled to, and between the two there was a deep definite division. He observed this line very closely, and did not cross it-for an instant. If engaged on a piece of work, and quitting time came, he quit right then, even if he could have finished it in three minutes. In doing so he never three minutes. In doing so he never thought for a moment of having talked with Bill Jones for fully 20 minutes that very afternoon about a baseball game that came off the day

before. He was simply looking to his rights and no one else's.

This was his way. Of course he didn't stay long. He hadn't apprehension enough of his duty or a sufficient of the stay long. hensical enough of his duty of a sufficient recard for his service to put him in sympathy with his work. He was a misfit. He did as little as he could for his employer. He stood on his rights and no more. That was some years ago. Now he is driving a team up in Cleveland for \$1.50 a

day.

When he left the shop another boy

When he left the shop another boy when he left the shop another boy went in. He knew his rights, but he didn't insist on them too much, for he believed in doing things. If time was up and he could finish a thing with a few minutes over work, he would do it every time; he made himself worth something. Pretty would do it every time; he made himself worth something. Pretty soon that employer saw he couldn't get along without him. He kept advancing his wages and finally took him into partnership, and now the business is a great one and that boy has a grand home, a big salary and a lovely family, all because he was a boy of get up, gumption and thought more of his duties than he did of his rights.

# Solomon's Temple Reproduced.

Joseph Doctorovitz, a teacher of ebrew, and a student of old Jewish institutions, has put on exhibition in New York a complete reproduction of the Temple at Jerusalem. It is 15 feet square and includes the several

### SOAKED IN COFFEE Until Too Stiff to Bend Over.

"When I drank coffee I often had sick headaches, nervousness and bil-iousness much of the time, but when to visit a friend I got in the habit of drinking Postum.

"I gave up coffee entirely, and the result has been that I have been en-tirely relieved of all my stomach and

nervous trouble. "My mother y mother was just the same We all drink Postum now and, without coffee in the house for 2

without conee in the nodse for 2 years, we are all well.

"A neighbor of mine, a great coffee drinker, was troubled with pains in her side for years and was an invalid. She was not able to do her work and could not even mend clothes or do anything at all where she would or do anything at all where she would have to bend forward. If she tried to do a little hard work she would get such prins that she would have to lie down for the rest of the day.

"At last I persuaded her to stop drinking coffee and try Postum Food.

Coffee and she did so, and has used Postum ever since; the result has been that she can now do her work, can sit for a whole day and mend and can sew on the machine and she nev-er feels the least bit of pain in her side, in fact, she has got well, and it shows coffee was the cause of the whole trouble.

'I could also tell you about several other neighbors who have been cured by quitting coffee and using Postum in its place." "There's a Reason." pkg. for the famous little book, "The Road to Wellville."

Blue Grass Ideal.

Blue grass makes the ideal early and ate pasture, but it is rather difficult to get it set. It requires a firm seed-bed and the seed needs plenty of moisture and soil warmth. Blue grass will readily crowd out other grasses, and will soon cover a field if it is allowed to seed itself.—Indiana Farmer.

### A Remarkable Cow.

The world's record milk production for a year by a single cow has been broken by the Guernsey, Dollie Bloom, according to the report of Secretary William H. Caldwell at the annual meeting of the Guernsey Cattle Club. Dollie Bloom's record for the year was 17,297 pounds, or about 2023 gallons. She is owned by F. A. Ames, of Boson.-Weekly Witness.

New Law on Trading Horses. The last Indiana legislature passed aw on horse trading which contains

the following feature:
"Whoever shall sell or offer to sell r exchange any horse or mule, kno v ing the same to be afflicted with 'glanders' or any infectious or contagious disease, or knowing it to be afflicted with the 'heaves' or to be 'broken winded' or a 'cribber' and shall conceal the existence of such disease from the person to whom he is offering the animal, shall be fined not more than \$500, to which may be added imprisonment in the workhouse not longer than six

### Five Cows Equal to Nine.

Recent investigations among herds which supply the Pennsylvania State college creamery with milk and cream, show that on some farms it requires nine cows to produce as much net profit as produced by five average cows in the herd of grade dairy cows kept by the college. Some men receive as little at \$0.99, \$1.05 to \$1.20 for each dollar's worth of feed consumed while others receive from \$1.50 to \$1.80 for each dollar invested in pasture, hay, grain, etc. As a result of this work in Pennsylvania some farmers are now keeping records to determine which are the least profitable cows Samples of each cow's milk are being tested by the college creamery free of charge and in this manner the important matter of individual herd testing is being encouraged throughout the state.

# Breeding of Hogs.

There is no "best" breed of hogs but there are "best" individuals among Every observing feed er has found out long ago that one animal is not as good as another, and his profits are measured by his judgement in picking out the real good aninale. Some feeders always have nice, even bunches of fattening stock, and male hey seldom lose on their expectations Others will pick up most anything and try, by heavy feeding, to turn them nto fit animals. They are apt to los out. There is this difference in animals,—some will fatten easily, some will make big raw frames but never get fat. Every man who raises his own feeding stock should study these characterictics and select breeding stock which will likely produce the easy-feeding, well-proportioned animal -Indiana Farmer

# Barns Without Collars.

At one of the farm meetings Maine, after a professor from the West had given utterance to a vigorous at-tack on the manure cellar for dairy barns, Prof. G. M. Gowell, of the Mainstation, quietly remarked that Maine butter had been scored by experts as high as ninety-eight, and that milk had kept sweet twenty days, and al-ways kept sweet for seven days. Cleanliness, he said, was the watchword at the experiment station dairy, and these results had been obtained in spite of the fact of the manure cellars. The barn cellar seems to be a pet point of attack brought up familiar with some other plan. The excellent results ob-tained at other experiment stations as well as in Maine indicate that reason able care will produce as good dair, products when the herd is kept in parns with cellars, and the cost of labor is considerably reduced as compared with any other method that has been suggested.

# Soy Beans.

As other grain crops, soy beans may be sown either in drills or broadcasted Just which of these two methods is best will depend principally on what disposition is to be made of the crop-that is, whether it is being grown fo hay or seed, and whether or not cultivation of the crop is desired. When planted in drills, about three pecks of seed to the acre is required, and when broadcasted, about five pecks are need ed. The time for planting may somewhat from the midale of until the first of July, or perhaps a lit tle later, although the success of such planting will largely depend upon the subsequent conditions of the season The soy bean is a het weather crop, and cold, damp weather is not the best for its development. Maturity can be expected in from one hundred to one hundred and fifty days, according to some first than the control of ing to variety and growing conditions Sowing in corn at the last would hardly seem the best to might prove a fair success. We would

prefer, however, to grow them alone and plant as soon as possible after the season had well advanced. We are inclined to believe that rape sown in the corn would give better satisfaction, although we have had no practical experience with the soy bean. Rape matures in a shorter time and is as well, if not better, suited for use as hog pas ture.—Farmers' Guide.

#### Fertilizers.

Decidedly the best fertilizer that can be used is well rotted stable manure. In most cases where commercial fertilizers are used some manure should be used with it. It is important in fertilizing soil to improve its physical condition, as well as its chemical com-position. It should be made loose, so that the roots of plants may readily absorb the food it contains. For this purpose manures are unexcelled.

The physical properties of soil have a large influence on its fertility. The most common means of loss of fertility is through leaching, or the mechanity is through feaching, of the mechanical washing away of nourishing properties. Soils which have a large proportion of clay are finely grained and compact, thus making it easy for the plant food they contain to be washed away. At the same time the compactness frequently retains the elements of fertility tenaciously against their use by plants.

If a commercial fertilizer is used it should be a mixture that gives a complete fertilizer, supplying all the elements needed to make rich soil. The commercial fertilizer is preferred to manure for use on lawns, because of its greater cleanliness and the fact that it contains no weeds. Manure is fre-quently full of seeds of weeds. An excellent fertilizer for use on lawns is a mixture of hard-wood ashes and bone meal. This has been declared to contain all the elements needed for the successful growth of grass.—Washington Star.

### Farm Poultry.

It is a well known fact that there are thousands of hens and hundreds of cows kept in every section of the world at a financial loss, the result of careless methods, unsanitary houses and improper feeding. On the one hand a good profit is made from keeping hens, while on the other, considerable finan-cial loss is sustained. For these rea-sons we do not hesitate to state that every one living in the rural dis-tricts should keep as much poultry as they can look after in the right way, with the understanding that if ne-glected, they will prove a financial loss, but if properly cared for and looked after, that they will be a bless-ing and a profitable investment to those who keep them.

The farm is the ideal place for the poultry. They should not, however, be kept close to the back door, fed and cared for there, and allowed to disfigure and disgrace the domicile of the family by running over, scratching, and feeding at the door-steps. Cows, and feeding at the door-steps.

hogs and sheep are not usually kept in
this way, and poultry should not be.

The resultry quarters should be

The poultry quarters should be fenced off in a healthy well-drained locality, looked after and cared for to the most minute detail, and kept just as warm, dry and clean as the family cow or the driving horse. If there is one place in the world where the phrase "cleanliness is next to godliness," it is in the poultry house. Without cleanliness, proper sanitary conditions, and good care, there can not be any success in poultry growing. With it, success is assured.

When poultry houses are neglected for some length of time, they are almost certain to be overrun with insect vermin, which carry with them to the negligence of the owner, or the one in charge; the blame should never rest with the poultry. Those who court success through good manage ment, are almost certain to gain a profit from keeping poultry upon the farm.-The Feather.

# Strange Storms in Missouri.

"The shower of fish which fell Sun day afternoon, says W. Rufus Wilson one of the oldest inhabitants of Inde pendence, 'is not surprisig to me, Back in the '40's one day people were surprised at teh sudden appearance of a pinkish looking cloud in the northwest. The rather warm winter's day changed to bitter cold, and the provide of the surprise snow began f. ling. Soon large flake came down and it snowed pink bugs

"The pink bugs and the snow wer packed closely together when the struck the earth. People of this sec tion have never seen anything like it since that day. The bug which came down on the snowflakes was not a na tive of this country at all, and evident ly came from some far southern clime "How extensive this snow was

cannot say, but the ground was carpet ed with snow and pink bugs as far ts the eye could reach, and it was a beauful sight."-Kansas City Journal.

# Oh. Dear!

Speaking of Julia Ward Howe, the Brooklyn Eagle asserts that President Roosevelt is now "The Battle Him of the Republic." But for the matter of sex, Mrs. Carrie Nation doubtless feels that it might have been Ben Hur.—Richmond Times-Dispatch.

# FINANCE AND TRADE REVIEW

DUN'S WEEKLY SUMMARY

Trade Reports from Leading Cities Compare Favorably With Those of Corresponding Week Last Year.

Trade reports from the leading cities are singularly uniform in making favorable comparisons with the corresponding week in any previous At most western and southern ocints the improvement in the crop prospects has brought out liberal fall orders. There is evidently more confidence in the future than at any time since it was found that many of the principal farm products had made bad start.

Jobbing houses are preparing for winter trade on a scale seldom equal

winter trade on a scale seldom equaled. The consumption of seasonable goods promises to deplete stocks most satisfactorily.

Manufacturers are still receiving orders in abundance, few clothing cancellations appear, and it is the exception when plants have smaller contracts than a year ago. More detailed reports for the first half of 1907 add to the earlier testimony that all records for six months were far surpassed.

Settlement of the ore strike removes any danger of interruption to

Settlement of the vre strike removes any danger of interruption to activity at pig iron furnaces, which promise to establish a new record of output during the second half of the year. According to the regular report of the American Iron and Steel Association, all previous figures were surpassed during the first six months with an aggregate of 13,478,044 tons, an increase of 753,103 tons over the previous maximum. previous maximum.

Vigorous activity continues at cot-ton mills. Prices are fully sustain-ed by the volume of orders on hand with the high quotation of raw cotton, and confidence in well maintained consumption. Export inquiries are noted, but no actual business results because of the high position of

quotations. Woolen goods make slow progress, although practically all lines are now open. Some branches move satisfactorily, liberal sample pieces are being taken, but many clothiers do not appear prepared to operate freely. Interest is most noteworthy in the worsted division.

"Footwear factories are well engaged on old orders, but buyers in the Boston market did not purchase as freely as was anticipated.

Leather is quiet. Shoe manufacturers show no disposition to anticipate needs. Demand is therefore limited to immediate requirement. Woolen goods make slow progress

ited to immediate requirement

CHERRY SOUP.

This is a popular Swedish and German dish, most refreshing on a ho day. Crush a quart of cherries, add to them the juice of two lemons, two level tablespoonfuls tapioca or sage and sugar to taste. Simmer in a quart of water for half an hour, then rub through a puree sieve. Reheat add a pinch of salt, then cool and place on the ice before serving. Save a few fine cherries to put in the iced soup at the last. This quantity will make nearly two quarts of soup .-

# ALL WOMEN SUFFER

from the same physical disturbances, and the nature of their duties, in many cases, quickly drift them into the horrors of all kinds of female complaints, organic troubles, ulceration, falling and displacements, or perhaps irregularity or suppression causing backache, nervousness, irritability, and sleeplessness.

Women everywhere should remember that the medicine that holds the record for the largest number of actual cures of female ills is

MRS. A. M. HAGERMANN

# Lydia E. Pinkham's Vegetable Compound

made from simple native roots and herbs. For more than thirty years it has been helping women to be strong, regulating the functions perfectly and over-oming pain. It has also proved itself invaluable in preparing for child birth and the Change of Life.

Mrs. A. M. Hagermann, of Bay Shore, L. I., writes:—Dear Mrs. Pinkham:—'I suffered from a displacement, excessive and painful functions so that I had to lie down or sit still most of the time. Lydia E. Pinkham's Vegetable Compound has made me a well woman so that I am able to attend to my duties. I wish every suffering woman would try Lydia E. Pinkham's Vegetable Compound and see what relief it will give them."

### Mrs. Pinkham's Standing Invitation to Women

Women suffering from any form of female illness are invited to write Mrs. Pinkham. at Lynn, Mass. for advice—She is the Mrs. Pinkham who has been advising sick women free of charge for more than twenty years, and before that she assisted her mother-in-law Lydia E. Pinkham in advising. Therefore she is especially well qualified to guide sick women back to health.

# Profit in Flowers.

Profit in Flowers.

If report is true there are vast sums of money to be made in the cultivation of flowers in the Riviera. In one season alone \$2,000,000 worth were shipped away to foreign countries, and, oddly enough the majority were sent to England. It is a long fourney for delicate blooms to make, but they are so perfectly packed and kept en route that they reach their destination in excellent condition to gladden the hearts of and adorn England's fairest women.

# FEARFUL BURNING SORES.

Boy in Misery 12 Years—Ezeema in Rough Scales, Itching and In-flamed—Cured by Cuticura.

flamed—Cured by Cuticura.

"Cuticura has put a stop to twelve years of misery I passed with my son. As an infant I noticed on his body a red spot and treated same with different remedies for to get larger I put him under the care of doctors. Under their treatment the disease spread to four different parts of his body. During the day it would get rough and form like scales. At might it would be cracked, inflamed and badly swollen, with terrible burning and itching. One doctor told me that my son's eczena was meurable, and gave it up. I decided to give Cuticura a trial. When I had used the first box of Cuticura Ointment there was a great imcura a trial. When I had used the first box of Cuticura Ointment there was a great improvement, and by the time I had used the second set of Cuticura Remedies my child was cured. He is now twelve years old, and his skin is as fine and smooth as silk, Michael Steinman, 7 Sumner Avenue, Breoklyn, N. Y., April 16, 1905."

The Bank of England property covers over two acres.

Opium Consumption Increased.

Opium imports into China increased from 6,922,667 pounds in 1905 to 7,215,600 pounds in 1906, and it is stated that the use of native opium also showed a general increase, while morphia importations, in spite of 200 per cent duty, have grown larger, although the total volume reported is insignificant.

Opium Consumption Increased.
