Superintendent of Schools—D. W. Seibert.

County Surveyor—A. E. Rayman.
Chairmen Political Organizations—N. B. McGriff, Republican; Alex. B. Grof, Democratic; R. M. Walker, Berlin, Prohibition; O. P. Shaver, Friedens, Lincoln.

While other great men saw wood and say nothing, Mr. Rockefeller plays golf and keeps his wig on straight.

"Where will woman stop?" asks the Roanoke World. Wherever there appears an "ad" reading, "Was \$7, now \$8.98."

RAILWAYS are not nearly so cheerful in obeying a law that establishes a two-cent fare as they are in heeding one that abolishes passes.

SENATOR Bob Taylor goes Richmond Pearson Hobson several better by asserting that he shall need a hundred battle-ships with which to fight Japan.

A CALIFORNIA professor says 10 cents worth of peanuts is more nourishing than a porterhouse steak. Walk up to a peanut stand and get a dinner for a dime.

The Ohio man who has appealed to the courts to compel the return of his mother-in-law, would be sent to the insane asylum if tried before a jury of married men.

ENGLISH battle-ships are to be equipped with refrigerators for keeping the powder cool. One of these days, perhaps, a similar equipment may be installed for the use of the officers.

In a recently published list of Democratic Presidential possibilities, the name of Mr. Bryan was omitted, but his feelings were probably not hurt, since he regards himself as a sure thing.

The Boston Transcript charges that during the recent Coney Island fire the most terrified of the freaks was the fire eater. Perhaps like a good many of us, he dreads the result of an over loaded stomach.

A WESTERN man put off applying for a divorce until his wife had thrown bottles and mirrors at him, poisoned his coffee, told him she preferred other men, and chased him through the flat with an army revolver. But being a man, he will undoubtedly be suspected of having acted hastily in the matter.

ACCORDING to a Southern paper, Col. Watterson has built a Democratic platform which has a leg on each corner and a foundation that will catch it in case it sags in the middle. Evidently the colonel has excepted the inevitable that is providing for Mr. Bryan's increasing weight.

AUGUST 23d is the day set for the court to hear the objections filed by the coal companies against the present assessment of coal lands. The coal men charge that unfairness and inequality has been used against them, and we think they will prove it, too, beyond all peradventure of a doubt. The Somerset Coal Company's holdings alone are assessed a half-million dollars more than three years ago, and an increase in value in that proportion cannot be shown. Coal lands owned by farmers and held for higher prices, which they expect to realize some day, have not been subjected to the increased assessments the coal companies are asked to pay taxes on, and there is nothing fair or right in it. The Rockwood Gazette is the latest paper to cry

out against the great and glaring inequality. The coal companies have brought prosperity to this county, and there should be no disposition to discriminate against them in the matter of taxation, simply because they are coal companies.

WHAT A NEW JERSEY EDITOR SAYS.

M. T. Lynch, Editor of the Phillipsburg, N. J., Daily Post, writes: "I have used many kinds of medicines for coughs and colds in my family, but never anything so good as Foley's Honey and Tar. I cannot say too much in praise of it." Sold by all Druggists. 9-1

LIBEL SUIT NO. 2.

Geo. B. Walker Brings Second Libel Suit Against Editor of The Star.

Week before last George B. Walker sued the editor of this paper on a charge of criminal libel, and on Monday of this week he brought another suit against THE STAR man, the second action being a case of trespass for libel. The plaintiff asks for damages in the sum of \$5,000, alleging that he was greatly damaged, etc., by certain things printed in THE STAR concerning him in recent issues.

THE STAR man is not losing any sleep over the pending suits. However, we have no comment to make at this time concerning the suits instituted and the things that led to them, other than to state that everything will come out in the "washing," when they come up in court. We expect to be thoroughly prepared to win out, not only in the suits now pending, but in two or three others that we expect to have a hand in as one of the plaintiffs, as soon as possible after Walker's suits have been disposed of by the court.

WARNING.

If you have kidney and bladder trouble and do not use Foley's Kidney Cure, you will have only yourself to blame for results, as it positively cures all forms of kidney and bladder diseases. Sold by all Druggists. 9-1

TWO COMMANDMENTS.

The absurd self-righteousness of the proposition to conduct the Democratic campaign of this state on the commandment "Thou shalt not steal," has reacted upon those responsible for the suggestion. The newspapers of the state, many of them with Democratic sympathies, are already denouncing that sort of canvass.

As indicated by this newspaper when the matter was first broached, the commandment "Thou shalt not bear false witness against thy neighbor," is as important and as binding as the other. Any campaign of the Democracy based upon the assumption that the Republican candidate for State Treasurer shall be defeated because of the alleged wrong-doing of others, is so preposterous as to work its own defeat.

When the Democratic party or any other party presumes to claim all the virtue and honesty among the people, it is time for the truth to be told. When John O. Sheatz was nominated for State Treasurer, newspapers of all shades of political belief commended the selection as one worthy to be made, and the career of the Republican candidate is the best answer to the phariseism of his political opponents. It is wrong to steal, but it is just as wrong to bear false witness against one's neighbor.

These two commandments must go together in the campaign which the Democrats propose to wage, and when they by direct charge or inference asperse the character of John O. Sheatz, by urging the eighth commandment, they must expect to hear thundered from the housetops:

"THOU SHALT NOT BEAR FALSE WITNESS AGAINST THY NEIGHBOR."—Harrisburg Telegraph.

Local Coal Barrons off to Kentucky.

D. I. Hay, W. S. Martin, Wm. Cochran, Jr., and Port Hartline started for Kentucky, last Sunday, on business. Hay, Martin and Cochran all have an interest in a coal mine in operation in the Blue Grass state, and they went there to look after their property interests. Hartline went with them with a view to keeping a boarding-house in the vicinity where the mine is.

TEN YEARS IN BED.

"For ten years I was confined to my bed with disease of my kidneys," writes R. A. Gray, J. P., of Oakville, Ind. "It was so severe that I could not move part of the time. I consulted the very best medical skill available, but could get no relief until Foley's Kidney Cure was recommended to me. It has been a Godsend to me." Sold by all Druggists. 9-1

A GIGANTIC ENTERPRISE.

How Nature's Forces Are to be Harnessed in Garrett County, Md., for Light and Power.—More Trolleys to be Built.

A certificate of incorporation was recorded in Oakland, Md., last Saturday, for the "Youghiogheny Light and Power Company of Garrett County, Maryland."

The possible developments of Garrett county, resulting from this enterprise, if successfully carried out, will surpass anything ever dreamed of in the history of the county.

The plant will be located below the Deep Creek falls, seven miles north of Oakland, at which point the wasted water power of the Swallow falls, in "Yough" river, the Deep Creek falls and the Muddy Creek falls, nearby, will be concentrated and utilized for the purpose of generating several thousand horse power. The light and power thus produced will be leased, at a minimum cost, and wired to all points desired within a radius of at least fifty miles. Electric light can thus be supplied to Oakland, Mt. Lake Park, Deer Park, Grantsville, Accident, Friendsville and other towns in Garrett county, Kingwood and other towns in West Virginia, also Uniontown and other places in Pennsylvania.

Power can be supplied to run the cars on trolley roads, and lateral branches to all points within the above mentioned area. This light and power plant will be in reach of numerous undeveloped coal fields extending into three different states, and will materially increase the value of all coal and timber lands within a radius of at least fifty miles from the plant.

Full gauge trolley roads to carry coal, lumber and other freight cars can be built and operated at less than one-half the cost of steam roads, and over much steeper grades.

All land owners within the above radius will be wise to lend a helping hand to this important enterprise, which is designed for their mutual benefit. Plans have already been outlined for several full standard gauge trolleyroads that can be made possible and profitable by this important power plant.

One is up Muddy Creek, with a lateral branch to Kingwood, and by straight line from Cranesville to Uniontown, Pa., about 35 miles distant. This road will pass through the rich and undeveloped coaling coals of North-western Garrett county, Md., Preston county, W. Va., and Fayette county, Pa.

Another line proposed is from Frostburg, Md., to Uniontown, Pa., via the old National road. Another across the country from Oakland, Maryland, via the Tower, Netbkin, Kimmel, and numerous other undeveloped mines along Roman Nose, Negro and Meadow mountains to Grantsville, Salisbury and Meyersdale, Pa. Large companies engaged in the manufacture of pulp, furniture, spokes, handles, etc., will be offered special inducements to locate plants at various points along the Kendall Lumber Company's railroad up "Yough" river, and receive their motive power from this plant. Several of the largest manufacturing firms, in this line, in the country are now preparing estimates and proposals for the erection and equipment of this immense plant with modern machinery.

After all the plans have been decided upon and the total cost ascertained, the directors will hold a meeting for the purpose of increasing their capital stock sufficiently to cover all costs. Further facts and details can be had by applying to Hiram P. Tasker, Hotel Manhattan, Oakland, Md.

Photographing The Breath.

Photography of the breath is the latest science. This was explained recently at the annual meeting of the Roentgen Ray Conference, at which cinematographic pictures of the breathing of sick and healthy persons were thrown upon a screen.

The inventor of the method is Dr. Koehler, of Wiesbaden. His system shows accurately the sympathetic action of the lungs and heart in connection with inspiration and expiration.

It is expected that the discovery will play an important role in the diagnoses of tuberculosis and similar respiratory diseases.—Berlin Dispatch.

LIFE INSURANCE.

For twenty-five cents you can now insure yourself and family against any bad results from an attack of colic or diarrhoea during the summer months. That is the price of a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy, a medicine that has never been known to fail. Buy it now, it may save life. For sale at Miller's Drug Store. 9-1
