Prices As Low As The Lowest!

We start with an entire new stock, and we handle only the best and purest brands of goods. We solicit a share of your patronage, and we guarantee a square deal and satisfaction to all.

Howard Meager & Co.

DR. WILLIAMS' FLY AND INSECT DESTROYER

Protects Horses and Cattle from Fly Pests and Vermin. Guaranteed to Kill the Flies. Perfectly Harmless. A Grand Disinfectant and Easily Applied.

It is possible to have positive freedom from flies, lice and vermin which usually affect fowls, cattle and all live stock. This is the first preparation which actually does all that is claimed for it. Farmers, who have spent many weary summers fighting flies and insects, and the following winters endeavoring to be rid of lice and vermin, in poultry houses, will find Dr. Williams' Fly and Insect Destroyer their "right-hand man."

After using this exterminator according to directions you will notice a decided improvement in all your stock. Where no agency has been appointed a sample tin free for your grocer's or hardware dealer's name.

THE F. WILLIAMS COMPANY, Madrid, N. Y.

Say, Mr. Man,

it will be but a short time until the long winter evenings are here, and to while away the time pleasantly, you ought to have a copy of Searight's

History of The National Pike.

It is full of fine illustrations, interesting tales of the old taverns, teamsters and coach drivers. Everybody is charmed with the work who reads it. Full of the humorous and pathetic, as well as daring robberies. A copy of the book can be seen at THE STAR office. Orders for the same filled at \$3.00 per copy, by

WM. SEARIGHT, Uniontown, Pa.

THREE TO TEN DOLLARS PER DAY NO MONEY REQUIRED.

IT IS BAD BUSINESS to allow people to look in vain through the columns of THE STAR for an advertisement of your business. 10-17

INTERESTING STATISTICS.

Money at Interest in the Various Boroughs and Townships of Somerset County.

Also Number of Taxables, Acres of Land, Horses, Cattle, etc.

R. M. Rininger, clerk of the County Commissioners, has completed a large and interesting report to the Secretary of Internal Affairs, showing the number of taxables, the number of acres of cleared and timber land, and the amount at which all the real estate and personal property, and all matter and things made taxable by the laws of this Commonwealth were valued, and the amount of taxes assessed thereon for State and County purposes, in the several assessment districts of the county. These figures are taken from the report:

No. of taxables, 17,742; acres of cleared land, 289,644; acres of timber land, 372,159; value of all real estate, \$19,896,896; value of real estate exempt from taxation, \$1,778,514; value of real estate taxable, \$18,118,382; number of horses, mares and geldings and mules over the age of four years, 8,959; value of the same, \$495,578; number of neat cattle over the age of four years, 10,423; value of the same, \$199,829; value of salaries and emoluments of office, professions, trades, etc., \$863,800; aggregate of all property taxable for county purposes at the rate of six mills on the dollar, \$19,878,389; aggregate amount of county tax assessed at the rate of six mills on the dollar, \$118,070.33; amount of money at interest, including mortgages, judgments, bonds, notes, stocks, etc., \$4,347,647; value of stages, omnibuses, etc., \$7,873; aggregate value of property taxable for State purposes at four mills on the dollar, \$4,355,520; amount of state tax assessed, \$17,422.09. The bonded indebtedness of Somerset county is \$242,000.

A few comparisons of the several districts show that Windber ranks first in the number of taxables, 1,771, and in the value of trades and professions, \$104,570. 27,928 acres of cleared land puts Somerset township away in the lead. Shade leads in timber land, with 30,028 acres. Brothersvalley becomes conspicuous by leading in the valuation of all real estate, \$1,870,813, but of this, real estate to the value of \$407,300 is exempt from taxation. Jenner has more real estate taxable than any other district, \$1,455,411. 781 horses in Somerset township puts that township in the lead in that particular, and she pays more county tax than any other district.

The amount of money at interest, including mortgages, judgments, notes, etc., in a measure shows the wealth of the inhabitants of the several districts, and are given below: Addison, \$94,875; Allegheny, \$35,214; Benson, \$11,289; Berlin, \$128,875; Boswell, \$18,082; Black, \$8,834; Brothersvalley, \$162,948; Casselman, \$8,809; Conemaugh, \$419,749; Confluence, \$28,776; Elk Lick, \$138,881; Fair Hope, \$5,315; Garrett, \$9,249; Greenville, \$33,872; Hooversville, \$12,071; Jefferson, \$53,192; Jenner, \$310,802; Jennertown, \$9,312; Larimer, \$20,892; Lincoln, \$91,813; Lower Turkeyfoot, \$18,292; Meyersdale, \$245,158; Middlecreek, \$75,206; Milford, \$61,530; New Baltimore, \$11,838; New Centreville, \$34,927; Northampton, \$11,468; Ogle, \$6,170; Paint Borough, \$26,927; Paint Township, \$98,819; Quemahoning, \$132,958; Rockwood, \$111,851; Shade, \$75,435; Salisbury, \$114,902; Somersetfield, \$22,583; Somerset Borough, \$637,296; Somerset Township, \$381,811; Southampton, \$9,348; Stonycreek, \$148,817; Stoystown, \$68,592; Summit, \$258,738; Upper Turkeyfoot, \$59,222; Ursina, \$7,407; Wellersburg, \$10,906; Windber, \$122,812.

Some Superstitions.

True, no man has ever stepped from the senate chamber to the presidential chair; true, also, that Pennsylvania has never had the Republican presidential nomination. But neither fact constitutes any superstitious hoodoo against a senator or a Pennsylvanian, especially when this state presents a candidate of the strength of the Hon. Philander C. Knox, of Fayette and Allegheny counties.

Pennsylvania can stand up in the national convention next year and say to all the other states of the Union: Match him if you can.
It is a good thing sometimes to break precedents. No man elected vice president was ever afterwards elected president until Theodore Roosevelt demolished whatever superstition lurked about that fact. And it was a good thing for the country that that particular hoodoo was thus demolished.

Next year will be a good time to set aside the superstition that neither Pennsylvanians nor United States senators are eligible to be president.—Uniontown News Standard.

Let Your Wife Read this and Take the Hint.

Certainly a wife should work. Here's some free advice to the inexperienced and unsophisticated: Ever since Eve inveigled Adam into eating that Ben Davis apple, her daughters have been doomed to toil. But some men are unreasonable about a wife's work. They want her to chop all the wood, when they could save her a lot of labor by

buying a sharp saw. She can be easily taught to file the saw and keep it in order. We know a man who makes his wife get up and carry the mules before breakfast. This is wrong. She should get breakfast first, as she is not so apt to shed mule hair in the butter. Horse hair is bad enough, but mule hair in the butter is an abomination. There is a great deal in properly training a wife. She should be taught to mix her bread with a paddle. If she uses her hands it is apt to make them tender and incapacitate her to some extent from using the brush scythe effectively. She should also be taught to split her kindling and get it in at night, especially in the winter. If she has to wade through the snow in the early morning after kindling, it is apt to make her cross all day.—Ex.

HOW TO CURE A COOLD.

The question of how to cure a cold without unnecessary loss of time is one in which we are all more or less interested, for the quicker a cold is gotten rid of the less the danger of pneumonia and other serious diseases. Mr. B. W. L. Hall, of Waverly, Va., has used Chamberlain's Cough Remedy for years and says: "I firmly believe Chamberlain's Cough Remedy to be absolutely the best preparation on the market for colds. I have recommended it to my friends and they all agree with me." For sale at Miller's Drug Store. 11-1

THE WORLD'S PRODUCTION OF COAL.

The world's production of coal in 1906 amounted to about 1,106,478,707 short tons, of which the United States produced 414,157,278 tons.

Since 1868, during a period of 39 years, the percentage of the world's total coal produced by the United States has increased from 14.32 to 37, and this country now stands far in the lead of the world's coal producers. It has been only 8 years since the United States supplanted Great Britain as the leading coal producer, yet the increase in this country has been so enormous that Great Britain can no longer be classed as a competitor. In 1906 the United States produced 43.7 per cent. more coal than Great Britain and 85 per cent. more than Germany. Exclusive of Great Britain the United States in 1906 produced more coal than all the other countries of the world combined.

It may also be noted that more than 98 per cent. of the world's production of coal is mined in countries lying north of the equator, the countries south of the line contributing less than 20,000,000 tons annually.

Detailed statistics of the world's production, by counties, are incorporated in an advance chapter from "Mineral Resources of the United States, Calendar Year 1906," on the production of coal in 1906, by E. W. Parker, Chief Statistician of the United States Geological Survey, which will soon be ready for distribution.

The Disadvantage of Poor Hearing.

A deaf old gentleman dined with a family where grace was always said. When the guests were seated the host bowed his head and began to repeat the accustomed verse in a subdued, reverent tone.

"Eh? What's that?" demanded the deaf old gentleman who sat beside him. The host smiled patiently and began again, in a louder, more deprecatory voice.

"Speak a little louder. I don't catch what you say," the old gentleman persisted.

A low ripple of laughter went round the table. The host, his face crimson with embarrassment, raised his voice and repeated the verse. The deaf old gentleman did his best to hear, but failed. He placed his hand upon his host's arm.

"What did you say?" he demanded irascibly.

"D—n it, I'm saying grace," he snapped.—Ex.

Winter Wheat Varieties.

As a result of continued experiments with wheat, the Pennsylvania Experiment Station says:

1. There is no relation between straw yield and grain yield in wheat.
2. No single variety of wheat can be pointed out as the best. The best variety of one season may be among the poorest of another, and vice versa.
3. Long year averages seem best for determining variety qualities. Taking yield as a basis, the best five varieties for conditions as they exist at the Station farm are: Fulcaster, China, Royal Red Clawson, Reliable, and Dawson's Golden Chaff.
4. The yield of wheat in Pennsylvania is too low. Good varieties and attention to the management of the culture of the crop will greatly aid in securing more wheat and greater profits.
5. No specific date for sowing wheat can be given. Too early or too late sowing should not be practiced. There is a rather long intermediate season during which wheat may be sown with likelihood of good results.

All kinds of Legal and Commercial Blanks, Judgment Notes, etc., for sale at THE STAR office. 10-17

KINDS OF COAL PRODUCED IN THE UNITED STATES.

The coal produced in the United States is reported to the United States Geological Survey as consisting of two classes—anthracite and bituminous. The bituminous product includes coal that may be classed as semi-anthracite, semi-bituminous, cannel, block, splint, and lignite or sub-bituminous.

In addition to the anthracite produced in Pennsylvania, 50,408 short tons were mined in Colorado in 1905, and 60,248 tons in 1906. New Mexico produced 24,415 short tons of anthracite in 1905, but reported none in 1906. Semi-anthracite was reported from Pennsylvania, Colorado, Indian Territory, Virginia, Montana and Arkansas.

Bituminous coal was produced in 27 states and territories in 1905, and in 24 in 1906, and forms by far the largest part of the total production.

Semi-bituminous coal is mined in 17 states and territories, with West Virginia first, followed in order by Pennsylvania, Maryland, Illinois, Virginia and Montana.

Wyoming leads in the production of lignite or sub-bituminous coals, over 70 per cent. of the production of the state being so classed. The so-called black lignites of the Rocky Mountain states are entirely distinct from the real lignites, or brown coals. They are not lignites in chemical composition, in color, or in physical characteristics, and as they lie between the lignites, or brown coals, and the true bituminous coals, the term sub-bituminous has been adopted by the United States Geological Survey to designate them. In the production of this variety of coal, Wyoming leads, Colorado is second, and New Mexico is third. A part of the product of California and Oregon should also be included under this head.

The principal producers of true lignite, or brown coal, are Texas and North Dakota.

The comparatively small production of cannel coal was obtained from 9 states in 1905, and 7 in 1906, of which Kentucky, Indiana and West Virginia are the principal ones. West Virginia is also credited with nearly all the splint coal production, while Indiana is the leading producer of block coal.

An advance chapter from "Mineral Resources of the United States, Calendar Year 1906," on the production of coal in 1906, by E. W. Parker, will soon be ready for distribution.
