

PAIN

Pain in the head—pain anywhere, has its cause. Pain is congestion, pain is blood pressure—nothing else usually. At least, so says Dr. Shoop, and to prove it he has created a little pink tablet. That tablet—called Dr. Shoop's Headache Tablet—coaxes blood pressure away from pain centers. Its effect is charming, pleasant, delightful. Gently, though safely, it surely equalizes the blood circulation.

If you have a headache, it's blood pressure. If it's painful periods with women, same cause. If you are sleepless, restless, nervous, it's blood pressure—blood pressure. That surely is a remedy, for Dr. Shoop's Headache Tablets stop in 20 minutes, and the tablets simply distribute a unnatural blood pressure.

Bruse your finger, and doesn't it get red, and all, and pain you? Of course it does. It's congestion, blood pressure. You'll find it where pain always. It's simply Common Sense.

We sell at 25 cents, and cheerfully recommend

**A PROMPT, EFFECTIVE
REMEDY FOR ALL FORMS OF
RHEUMATISM**

Lumbago, Sciatica, Neuralgia,
Kidney Trouble and
Kindred Diseases.

GIVES QUICK RELIEF

Applied externally it affords almost instant relief from pain, while permanent results are being effected by taking it internally, purifying the blood, dissolving the poisonous substance and removing it from the system.

DR. S. D. BLAND
Of Brewton, Ga., writes:
"I had been a sufferer for a number of years with Lumbago and Rheumatism in my arms, legs, and tried all the remedies that I could gather from medical works, and also consulted with a number of the best physicians, but found nothing that gave the relief obtained from 'S-DROPS.' I shall prescribe it in my practice for rheumatism and kindred diseases."

DR. C. L. GATES
Hancock, Minn., writes:
"A little girl here had such a weak back caused by Rheumatism and Kidney Trouble that she could not stand on her feet. The moment I put her down on the floor she would scream with pain. I treated her with 'S-DROPS' and today she runs around as well and happy as can be. I prescribe 'S-DROPS' for my patients and use it in my practice."

FREE

If you are suffering with Rheumatism, Lumbago, Sciatica, Neuralgia, Kidney Trouble or any kindred disease, write to us for a trial bottle of "S-DROPS."

PURELY VEGETABLE

"S-DROPS" is entirely free from opium, cocaine, morphine, alcohol, laudanum, and other similar ingredients.

COAL IN PENNSYLVANIA IN 1906.

The total production of coal, anthracite and bituminous, in Pennsylvania, in 1906, was 200,575,617 short tons, having a spot value of \$262,208,345.

The anthracite production amounted to 63,645,010 long tons (equivalent to 71,282,411 short tons), having a spot value of \$131,917,694.

The production of bituminous was 129,293,206 short tons, having a spot value of \$130,290,651.

In the combined production of anthracite and bituminous in 1906 the state exceeded any previous record.

Compared with the total production for 1905, which amounted to 196,073,487 short tons, the output last year exhibits an increase of 4,502,130 short tons, or 2.3 per cent., in quantity, and of \$6,938,837, or 2.7 per cent., in value. All of the increase was in the production of bituminous coal, which showed a gain of 10,879,569 short tons over the 1905 production. Anthracite production, however, decreased 6,377,439 tons.

James E. Roderick, chief of the Department of Mines of Pennsylvania, reports that in 1906 there were 557 men killed and 1212 injured in the anthracite mines, and 477 killed and 1160 injured in the bituminous mines. In the anthracite regions 43 fatal accidents were due to explosions of dust and gas, 214 to fall of roof, 28 to explosions of powder, and 171 to other causes inside the mines. There were 101 fatal accidents outside the mines. In the bituminous regions 10 deaths were due to explosions of dust and gas, 305 to falls of roof, 1 was due to an explosion of powder, and 139 resulted from other causes inside the mines. Twenty-two fatal accidents occurred outside the mines.

Pennsylvania alone produces more coal than any other state or country in the world, except Great Britain and Germany, and its output exceeds the combined production of Austria, France and Belgium, which rank, respectively, as fourth, fifth and sixth among the coal-producing countries of the world.

THIS IS WORTH REMEMBERING.

As no one is immune, every person should remember that Foley's Kidney Cure will cure any case of kidney or bladder trouble that is not beyond the reach of medicine. Sold by All Druggists.

COAL IN MARYLAND IN 1906.

The coal production of Maryland in 1906 amounted to 5,435,453 short tons, having a spot value of \$6,474,793, exceeding the production of 1905 by 326,914 short tons (6.4 per cent.), and reaching the highest figure in the history of the state. The maximum output prior to 1906 was 5,271,609 short tons, mined in 1902, when the anthracite mines of Pennsylvania were idle on account of the great strike which made that year notable in the annals of coal mining. Compared with 1902, the output for 1906 exhibits an increase of 163,844 short tons, or a little more than 3 per cent.

The coal-producing area is confined entirely to Allegany and Garrett counties, in the western part of the state, and from this area, estimated at 510 square miles, there has been mined, up to the close of 1906, over 142,000,000 short tons of coal. The output has not varied materially in the last ten years, having ranged from a minimum of 4,024,688 tons in 1900 to the maximum of the last year, and averaging 4,852,761 short tons for each year of the decade. The restricted area of the field and the fact that it is already well developed make it improbable that any marked increase in production will be obtained.

The total number of men employed in the coal mines of Maryland in 1906 was 5438, who worked an average of 250 days, against 5048 men for an average of 252 days in 1905. The average production per man in 1906 was 944 tons, and in 1905, 858 tons. The daily average per man was 3.41 tons in 1905 and 3.38 tons in 1906.

Practically all the mines in Maryland are operated 10 hours a day. Out of a total of 6438 men employed in the coal mines of the state, 6358 men, in 45 mines were reported as working 10 hours a day.

According to the report of the Maryland Geological Survey, coal was discovered near Frostburg in 1804. The first shipment was recorded by the Cumberland Coal Trade in 1842, but as early as 1830 some coal had been loaded on barges at Cumberland and floated down the Potomac to Washington. This method, however, was so destructive to life, and was the cause of so much loss in coal that it was soon abandoned. The first shipments over Chesapeake and Ohio canal from Cumberland were made in 1850.

A SIGNIFICANT PRAYER.

"May the Lord help you make Bucklen's Arnica Salve known to all," writes J. G. Jenkins, of Chapel Hill, N. C. It quickly took the pain out of a felon for me and cured it in a wonderfully short time." Best on earth for sores, burns and wounds. 25c. at E. H. Miller's drug store.

HAVE YOU A WANT?—If so, try a small "ad" in THE STAR. Many wants can and are promptly supplied if advertised in this paper.

The Oil Producing States and How They Rank.

Petroleum is produced in the United States only in Indian Territory and the following named states: California, Colorado, Illinois, Indiana, Kansas, Kentucky, Louisiana, Michigan, Missouri, New York, Ohio, Oklahoma, Pennsylvania, Tennessee, Texas, West Virginia and Wyoming.

Pennsylvania at one time produced all the petroleum used in the United States, and long after other states had producing wells, Pennsylvania produced more petroleum than all the other states combined. But the Keystone state no longer ranks even first in the production or value of petroleum, as her oil territory is becoming exhausted.

In the quantity of petroleum produced, California now leads all other states, but the product is of a very inferior quality, and in the value of her petroleum products, the Golden state ranks only 5th, while Ohio ranks first and Pennsylvania second in petroleum value. In the value per barrel of petroleum, Pennsylvania still ranks first, as no other state produces so excellent a quality of petroleum as the old Keystone state.

LINGERING COLD.

WITHSTOOD OTHER TREATMENT, BUT QUICKLY CURED BY CHAMBERLAIN'S COUGH REMEDY.

"Last winter I caught a very severe cold which lingered for weeks," says J. Urquhart, of Zephyr, Ontario. "My cough was very dry and harsh. The local dealer recommended Chamberlain's Cough Remedy and guaranteed it, so I gave it a trial. One small bottle of it cured me. I believe Chamberlain's Cough Remedy to be the best I have ever used." This remedy is for sale at Miller's Drug Store. 12-1

London Capitalists Start Factory in Sweden to Convert Peat Into Paper, Through an American Process.

The peat bog furnishes the latest substitute for wood in the manufacture of paper. Paper making from peat on a commercial scale has already begun in Sweden, where a company, capitalized at more than a million dollars, has made extensive purchases of peat bogs and prepared plans for the erection of mills for turning out wrapping paper and paste board.

The money for the enterprise comes largely from London, but the process by which the vegetable fiber of the peat will be converted into paper is covered by an American patent. An account of the successful launching of the enterprise is given in a report of United States Consul, Mr. R. S. S. Bergh, of Gothenburg, Sweden.

This is not the first effort at paper making from peat. Some years ago a paper mill was operated by water power at Culbridge, Ireland. The patriotic people of the neighborhood put forth their best efforts to place the new commodity on the market, and it was enthusiastically announced that "making paper from the soil of old Ireland is an established industry." However, it remained for American tests to satisfy capitalists that peat-made paper would command a price that would make its manufacture profitable. It is claimed that a ton of paper worth thirty dollars can be made from peat at a total cost of fifteen dollars, thus leaving a satisfactory margin of profit. It is further claimed that it takes only two hours to convert the peat into paper.

It should not, however, be expected that peat as a material for paper making can take the place of wood pulp for all purposes. It helps to meet the demand for the coarser grades of paper, and thus relieves the pressure upon the timber supply, it will do a great deal for the forests of the United States. The quantity of peat in the world is enormous. It exists in all the countries of Northern Europe and has been used as fuel for centuries. Deposits from ten to fifty feet deep and many miles in extent are not unusual. Siberia has thousands of square miles of peat, and much exists in the United States and Canada. It is a vegetable substance, deposited by slow accumulations during thousands of years, the process being similar to that by which coal was formed.

Many good qualities have been claimed for paper made from peat. It is said that an article wrapped in it will not be attacked by moths, and for that reason it is assumed to be peculiarly fitted for boxes and bags for storing furs and woolen clothing. It is further claimed that a process of bleaching will give the paper a snow-white color, and thus make it equal to the best pulp papers for printing purposes, but this claim does not appear to have been established by actual tests on a commercial scale. Wrapping papers, card boards, and paper boxes made from peat possess greater strength than similar articles made from straw.

WHEN A MAN TELLS YOU it does not pay to advertise, he is simply admitting that he is conducting a business that is not worth advertising, a business conducted by a man unfit to do business, and a business which should be advertised for sale.

How He Told Her.

Rastus—Dat was a Black Hank gang dat was after our chickens when I went out with ma gun.
Chloe—Wow do you know?
Rastus—I seen de hand.—Prince-ton Tiger.

The Marvels of Science.

Amateur Hypnotist—See, I make the passes—one-two-three; now try to step back. You can't do it!
—Pick Me-Up.

A Bad Sign.

Mary Ann—Please, sir, Master John tried to kiss me just now in the dining room, and I wish to complain about it.
The Master—Dear, dear! If you notice any other signs of Insanity about him I hope you won't fail to let me know.
—Pick-Me-Up.

Comrades.

Patron—Do you know the head waiter of the hotel down the street?
Walter—I do, sir, and a fine man he is.
Patron—Well, send down and ask him if he'd loan me a napkin.

Everybody Satisfied.

"Bella is quite self-possessed."
"She has to be—no one else wants to possess her!"

As he Saw It.

English Actor—You Americans are given to extravagance even in your common speech. Your railway signs read: "Dangerous to walk on the track," when really, my dear sir, you mean "wearisome."
