GOOD INDIAN NOW.

Terror of Umatilla Reservation Has Embraced Christian Religion. Motanic, bad Indian, terror of the Umatilla reservation, southwest of Spokane, Wa, and leader of pagan customs among the Cayuse braves, has embraced the Christian religion,

and, as a consequence, there is re-joicing among the faithful in the Tu-tuilla Presbyterian Mission. The conversion of the chieftain was the dramatic climax to the ordin-ation of Rev. Edward Connor, a full bloded Cavuse as minister of the

blooded Cayuse, as minister of the gospel, a few days ago. gospel.

Following the singing of the Cay-gosnel. a few days acc. Following the singing of the Cay-use version of "Washed in the Blood of the Lamb," in which braves and squaws joined heartily, Motanic dressed in barbaric spiendor, arose from his seat, and facing the congre-gation, declared his intention to live a better life. He vowed he would abandon the pagan customs, bid good-by forever to the feathered head-dress and the red and orange paint, to participate no more in the festal parades, nor partake of the white man's fire water. He would not steal, ramble or cheat his fellowman or brother. or brother.

THOUGHT CHILD WOULD DIE.

Whole Body Covered With Cuban Itch-Cuticura Remedies Cure ... at Cost of 75c.

Itch—Cuticura Remedies Cure at Cost of 75c.
"My little boy, when only an infant of three months, caught the Cuban Itch. Sores broke out from his head to the bot-tom of his feet. He would itch and claw himself and cry all the time. He could not sleep day or night, and a light dress is all he could wear. I called one of our best doctors to treat him, and his treatment did not do any good, but he seemed to get worse. He suffered so terribly that my husband said he believed he would have to deter in had almost given up hope when a lady friend told me to try the Cutieura Remedies. I used the Cuticura Soap and applied the Cuticura Ointment and he at once fell into a sleep, and he slept with case for the first time for two months. After three applications the sores began to dry up, and in just two weeks from the day I commenced to use the Cuticura Rem-edies my baby was entirely well. The treat-ment only cost me 75c, and I would have gladly paid \$100 if I could not have got it any cheaper. I feel safe in saying that the Cuticura Remedies saved his life. He is now a boy of five years. Mrs. Zana Miller, Union City, R. F. D., No. 1, Branch Co., Wich., May 17, 1906."

The First War Balloon.

In view of the success of the new, army airship and the part it will probably play in the next war, it is interesting to note that balloons were first used in war as long ago as 1794, when Guyton de Morveau made two ascents and obtained important in-formation during the battle of Fleu-

rus. Their next appearance was during the battle of Solferino, in 1859, and two years later the Federal army emtwo years later the Federal army em-ployed from near Washington, while their use for conveying the mail bags out of besieged Paris is almost too well known to need mention. The word balldon, by the way, has many meanings, although it is now almost entirely confined to the geronautical

sense. Originally a balloon was simply a large inflated ball, like a football, from which it came to be applied to the game in which it was used. A large, short necked glass vessel and large, short necked glass vessel and a method of training fruit trees are also among its meanings, while the King of Slam travels in his balloon, which is, however, a state barge of gorgeous design.—Dundee Advertiser.

Unbalanced Farms

A great deal of timber has been cut to pay off the mortgage on the farm or to secure an emergency fund for a "rainy day," but in doing this many farms have been so thrown out of balance because of the lack of thick. Leave this till it has dried sufficiently to hold up a man. Then make a box out of inch lumber that sufficient timber for fuel purposes and the necessary repairs of the buildings.—American Cultivator;

Care of Geese.

"When the fattening season arrives," says an experienced goose farmer, "keep the geese shut away from bathing water and feed barley meal, cornneal and beef scraps and chopped celery and keep in a sub-dued light for three or four weeks, then let out for a couple of days to enjoy the use of a pond. Then return to their clean quarters and feed on barley meal and milk and chopped celery for two or three days, letting them go for twenty-four hours before killing, and you will have gcese fit for a king."

Breaking Up a Setting Hen.

A writer in Rural World says: To preak a hen from setting, take a steel trap, wrap a piece of thin cloth around each jaw of the trap, set it and place it in the nest, and when you hear the hen squaling loose her out of the trap and set it again in the nest. I never knew but one hen to try the trap the second time. If you have a trap strong enough to hold a hog or a dog it will also break them from trespassing. So far as I know I am the originator of this recipe, and it is free to all. the nest. Construction of the substantian of the states of the bole. This box should be used in making the three perpendicular sides of the tank, but the slanting after the other three walls have dried. When this box is set into on either side of the sides and four inches on the perpendicular end of the box and the walls. Fill in the mortar in this opening and leave til it has sufficiently dried to remove the box. Then the floor on the slant should be made. Start at the bot-tom and put on a layer of cement

When to Plow Sod.

The damage done by cut worms has become so alarming in some secwhether the practice of furning over sod in the spring has not something to do with it. Some figure out that by allowing their sod ground to of the late negative Sod ground to of the late negative Sod ground to finishing with another layer of cement six inches wide, place a piece of two by two so that it will extend one inch above the surface of the cement. Then put another layer of cement six inches wide above this in the slant, finishing with another two by two. of the late pasture. Sod ground should be turned in the fall. Make it as late as you want, but get it turned before the ground freezes up. This late plowing will enable one to get the full worth of the late fall growth and the ground is in just the growth, and the ground is in just the condition to weather till spring. If condition to weather till spring. If there were no other reason, fall plowing is better, as it will help get rid of the cut worms and other in-sects which have been hurting corn during the past four or five years. Many complain that their soils are not as nice to work as they were several years are. That no doubt several years ago. That no doubt is due to the system of plowing and cultivation. We do too much spring plowing, with the result that the seed-bed is spongy or soggy all through the summer. Turn under the sod this fall, and then disc next spring. That's the place to expect the bumper yield of corn.—L. C. spring. That's the place t the bumper yield of corr Brown, in National Farmer.

A Forty Acre Lot.

Here is a statement of facts rela-tive to timber growth and increase

in valuation. For a convenient example I will take a tract of average timber land of forty acres, such as are to be seen in the Forts. in the Eastern townships and North-ern Vermont. The total average ern Vermont. The total average stumpage would perhaps be about twelve thousand feet per acre, mak-ing a total of 480,000 feet. For the in the price of stumpage has been keeps out lice and mites.

IRON TRADE IS HOPEFUL Increased Activity After Holidays Is Generally Anticipated.

1 12

FINANCE AND TRADE REVIEW

R. G. Dun & Company's "Weekly Review of Trade" says: Holiday trade assumed normal pro-portions this week, partially recover-ing earlier losses in comparison with previous years, and in staple lines there was a better movement in 're-sponse to more seasonable weather. Although actual business did not Although actual business did not increase in the leading industries, there was a more confident senti-ment regarding the future, numerous

ment regarding the future, numerous inquiries encouraging manufacturers to anticipate a stendy improvement in orders early in 1908. While several plants resumed, others were added to the idle list, and the change was small. The best news of the week was the official re-port of foreign commerce in Novem-ber that far surpassed any previous port of foreign commerce in Novem-ber that far surpassed any previous monthly record of exports, and sup-plied a favorable international trade balance of \$93,655,751. This should make it possible to retain much of the net imports of gold. Sentiment is more hopeful at lead-ing centers of the iron and steel in-dustry, increased activity being gen-erally anticipated after the holidays. No further curtailment of output has occurred, reduction already made proving sufficient to prevent accumu-So in the reduction already made proving sufficient to prevent accumu-ation, and few changes were an-nounced in quotations, except that jg iron in Birmingham has sold at ess than \$15.

pig iron in Harminghali has sold at less that \$15. Plates sell more freely, and new permits for buildings promise a good demand for structural shapes. Plants are resuming that were closed and less delay in securing payment is causing more readiness to accept specifications. At some points it is difficult to find any improvement as yet, conservatism deferring all action until after the end of the year, and advantage is taken of the opportuni-ty for repairs and inventories. Increased inquiries are considered encouraging signs in the primary market for cotton goods, although little new business has transferred, and improvement is thus far chiefly in sentiment.

HEARS THROUGH MOUTH. Jersey Lad Without Ears, but Under-

stands What Is Said. John Hetzel, a bright little 10-year-

John Hetzel, a bright little 10-year-old boy senit from Jersey City to the New Jersey State Home for Deaf Mutes at Trenton, is a wonder to the faculty and to medical experts who have examined him. The little fellow has no ears, only lobes about the size of gold dollars with no openings. But he hears what is sold to him and understude what is said to him and understands

it. The little fellow constantly keeps his mouth open and it is believed that he hears through the mouth but this has not been determined.

Taken from Men's Names. The word "tram" is derived from a man's name—Outram, the surname of Thomas Outram, who lived in

The word tram is derived from a man's name—Outram, the surname of Thomas Outram, who lived in Derbyshire, England, and in the be-ginning of the last contury invented a peculiar sort of track that dimin-ished the friction between the wheels of vehicles and the roadbed. These tracks of Outram's, though not much like the trolley tracks of to-day, were at first called "Outramways," but that was too clumay, so they became tramways and finally trams. It is a favorite form of reward in Great Britain to connect the name of an in-ventor with his invention, and it is to this custom that we wear Mackin-toshes to-day and ride on roads that are Macadamized.

Kingdom for Sale.

Kingdom fer Sale. A monarch by the name of Ybor-shie is advertising a kingdom for sale in several continental newspapers. He offers his throne, crown, scepter, dominions and subjects for sale, with 30 wives thrown in, for the modest sum of \$200,000. His realm is that of Avsbonh a strip of land in Africa 250 miles long and 90 miles wide. The power of life and death is the thore of the and death is the king's prerogative, and goes with the crown, as does the granting of all concessions. A special attrac-tion of the cfer is the reval crown, which is a near diadem made of bu-man skulls. The throne is made of skulls and thigh bones. Thus far his dusky majesty appears to have had no offers.

The Earliest Crosiers.

The Earliest Crosiers. The earliest mention that is so far discovered of the use of a crosier is of one carried by Ataidus, Archbish-op of Reims, who died A. D. 933, An ancient Saxon or Norman font in Winchester cathedral has a very old reputation of a bishop with a crosier, probably the earliest example to be found in England. A crosier of rude shape is cut on the tomb of Bartholo-mew, Bishop of Exeter from 1161 to 1184 — Wooderreft. 1184 .- Wooderaft.

MULE TEAM

Western Texas is proud of Mrs. Anney McElroy Brett, woman promo-ter. Today she is the telephone queen of the Southwest. She is pres-ident of the Southern Independent Telephone and Telegraph Company, and wreident and general promotion. and president and general manager of the Brett Construction, Telephone and Telegraph Company. These companies, representing more than half a million dollars, were organized by her without a dollar of capital to such with to start with.

The highest point to which man can ascend without his health being seriously affected is 16,500 feet.

One of the Essentials

of the happy homes of to-day is a vast fund of information as to the best methods of promoting health and happiness and right living and knowledge of the world's best products.

Products of actual excellence and reasonable claims truthfully presented and which have attained to world-wide acceptance through the approval of the Well-Informed of the World; not of individuals only, but of the many who have the happy faculty of selecting and obtaining the best the world affords.

One of the products of that class, of known component parts, an Ethical remedy, approved by physicians and commended by the Well-Informed of the World as a valuable and wholesome family laxative is the well-known Syrup of Figs and Elixir of Senna. To get its beneficial effects always buy the genuine, manufactured by the California Fig Syrup Co., only, and for sale by all leading druggists.

Not only softens the water, but cleans the skin thoroughly, removes and prevents the odor of perspiration, soothes irritation and renders the skin fresh, soft and velvety. Soap clogs the pores-Borax removes the soap and freshens the skin-Try it. All geners: 10-15C pkgs, and 5 lb. boxes. Sample, Booklet and Parlor Card Game, Ite. PACIFIC COAST BORAX CO., New York.

should be made. Start at the bot-tom and put on a layer of cement four inches thick. Ilowing it to reach six inches upward on the in-cline. At the top of this layer, six inches wide, place a piece of two by two so that it will extend one inch finishing with another two by two. Continue this till the entire incline has been covered. It is necessary to have the two by two imbedded in the cement to afford a foothold for the animal when it attempts to come out of the tank, as cement is very

slippery. In some of the Western States where the soil is naturally dry and where the soli is naturally dry and very hard, a great many make dip-ping tanks by simply plastering the interior walls of dirt with two or three coats of cement. Such a meth-od of construction will answer the purpose when none but hogs and sheep are to be dipped, but for the larger of dancer of larger animals, there is danger of the cement being broken and the dip wasted. It is much more durable and a great deal cheaper in the end to make four-inch walls as suggested

above. The tank should be so lo-cated that it can be easily fenced. Usually by placing it at one side of the hog pens, but one side need be fenced, the hog fence serving for the other side

Farm Notes. Carefully feed so that the digestion is kept strong and healthy.
