plank, which displeased most of the doctors of Somerset county, because most of them are in favor of any out-rage upon the people that will keep the doctors' purses well filled. However, not all doctors are grafters and boodlers, and not all of them defend vac cination, which is not only a grotesque superstition, but a legalized crime as However, most of the physicians and scientists who condemn vaccina tion are men of world-wide fame-men far above the ordinary country and village physician—men too great and too true to their fellow men to be concerning the windy man's travels, swayed by a few paltry dollars derived annually from a filthy, dishonest and criminal medical superstition. It is not often that a country physician can be found who is broad-minded enough to come out boldly and sanction the righteous crusade against compulsory vaccination, but nevertheless there are some of that kind among rural physicians, and all such deserve to be held in the highest esteem. There is one such physician over at Jenners, as is amply evidenced by the following let-ter received by the editor on April in a liberal sprinkling of ribald re-

All honor to Dr. Hertzler. The world needs more men of his stamp. now we want our readers to read an interesting letter from John Duke Mc-Faden, M. D., of Concordia, Kansas THE STAR has some readers who are well acquainted with Dr. McFaden, and they knew him to be a man of great natural intellect, as well as a deep thinker and man of fine scholarly attainments. For a number of years he was one of the most prominent clergymen in the Brethren church, but later entered the medical profession, in which he is recognized as a man of great skill, and, we think, at the present time presides over a sanitarium in Kansas, which, if we remember rightly, he is the founder of. Dr. McFaden is also the author of several books of wide circulation—books which critics have declared to possess great merit. He was a member of the World's Con-He was a member of the World's Con-gress of Religions which assembled in Chicago during the World's Fair, and in that body was one of the prominent and forceful characters. We received the following letter from Dr. McFaden,

In conclusion we wish to add that in recent letter received from Dr. A. Enfield, of Bedford, Pa., the doctor took occasion to touch upon our no litical platform, and here is what he said concerning it:

"I admire your stand all over. Local option must come, or this notion, like an improvement on the almshouse o Russia and China, sink into oblivion by the drug and liquor habit."

The fakir should have been arrested at once and promptly fined for indulging in epithets and threats calculated to promote a quarrel or fight. But the borough policeman stood there like a man of wood and allowed the fakir to vent his spleen to his heart's content. And the fakir wasn't satisfied with assailing his victim once with his vile tongue, but he reopened his windy attack a time or two, until Mr. Statler's wrath was kindled, and he, too, began to make use of names that wouldn't look well in print. But as soon as the home man began to retaliate and make use of epithets which the stranger could make use of with impunity, the policeman promptly threatened him with ar-
