

This woman says that after months of suffering Lydia E. Pinkham's Vegetable Compound made her as well as ever.

Maudie E. Forgie, of Leesburg, Va., writes to Mrs. Pinkham:

"I want other suffering women to know what Lydia E. Pinkham's Vegetable Compound has done for me. For months I suffered from feminine ills so that I thought I could not live. I wrote you, and after taking Lydia E. Pinkham's Vegetable Compound, and using the treatment you prescribed I felt like a new woman. I am now strong, and well as ever, and thank you for the good you have done me."

FACTS FOR SICK WOMEN.

For thirty years Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, has been the standard remedy for female ills, and has positively cured thousands of women who have been troubled with displacements, inflammation, ulceration, fibroid tumors, irregularities, periodic pains, backache, that bearing-down feeling, flatulency, indigestion, dizziness or nervous prostration. Why don't you try it?

Mrs. Pinkham invites all sick women to write her for advice. She has guided thousands to health. Address, Lynn, Mass.

Mukden, Manchuria, has 40 iron-ore mines and a large fur trade, both local and export. Prices are 15 to 20 per cent lower than a year ago.

How I Cured Sweeney and Fistula.

"I want to tell you how I saved one of our horses that had a fistula. We had the horse doctor out and he said it was so bad that he did not think he could cure it, and did not come again. Then we tried Sloan's Liniment and it cured it up nicely."

"One day last spring I was plowing for a neighbor who had a horse with sweeney, and I told him about Sloan's Liniment and he had me get a bottle for him, and it cured his horse all right, and he goes off now like a colt."

"We had a horse that had sweeney awfully bad, and we thought it was never going to be any good, but we used Sloan's Liniment and it cured it up nicely. I told another neighbor about it and he said it was the best Liniment he ever used."

"We are using Sloan's Sire Colic Cure and we think it is all right."

A. D. Bruce, Aurelia, Ia.

A color resembling pewter may be given to brass by boiling the casting in a cream of tartar solution containing a small amount of chloride of tin.

BABY'S AWFUL ITCHING HUMOR.

Nothing Would Help Him—Mother Almost in Despair—Ores Quick Cure to Cuticura.

"Several months ago, my little boy began to break out with itching sores. I doctored him, but as soon as I got them healed up in one place they would break out in another. I was almost in despair. I could not get anything that would help him. Then I began to use Cuticura Soap and Cuticura Ointment, and after using them three times the sores commenced to heal. He is now well, and not a scar is left on his body. They have never returned nor left him with bad blood, as one would think. Cuticura Remedies are the best I have ever tried, and I shall highly recommend them to any one who is suffering likewise. Mrs. William Geeding, 102 Washington St., Attica, Ind., July 22, 1907."

New York City has the third largest German population of any city in the world, only Berlin and Hamburg being ahead of it.

The hands of the housewife will be kept soft and white and free from all chaps, redness or roughness if borax is used.

Cheaper Coffins.
Some undertakers, whose customers are poor people, are using coffins made of paper. The coffins are made in all styles of pressed paper pulp, the same as the common paper buckets. When they are varnished and stained they resemble polished wood and in point of durability it is said they are much better than wooden ones.

WOMEN'S KIDNEYS.
Are the Source of Most of Women's Sickness.

Mrs. Rebecca Mock, 1795 E. Rich Street, Columbus, Ohio, writes: "I believe I would still be a victim of kidney troubles but for Doan's Kidney Pills, for when I started using them I was in constant pain with my back, and no other remedy had been of any use. The kidney secretions were irregular, and I was nervous and lacked energy. But Doan's Kidney Pills gave me prompt relief and continued use cured me."

Sold by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

GARDEN, FARM and CROPS

SUGGESTIONS FOR THE UP-TO-DATE AGRICULTURIST

Exercise for Birds.
Exercise is important for breeding birds. They may be well fed and not too fat, but they may have lacked the opportunity to take such exercise as would have hardened the muscles, made the tendons strong and perfected every function of the body. Scatter all grain in a deep litter and make the fowls work for what they get.—Farmer's Home Journal.

Fattening Hogs.
A hog fattens more quickly by being fed no more at any time than it will eat. It should always clean up all in the trough. When it has fed, clean out the trough and do not feed again until you are sure that it is hungry. It will lose less in weight to permit it to go without food a day than it would by continuing to feed it beyond its appetite. When a hog begins to feed differently food should be discontinued until it shows signs of keen appetite. Overfeeding is one of the most common mistakes of hog raisers.—Epitomist.

More Corn Per Acre.
A few years ago we heard a good deal about increasing the protein content of corn, so that it might be in itself a better balanced feed for live stock. Now comparatively little is said about this. The clovers including alfalfa, other legumes such as soy beans and cow peas, and concentrated feeds are and will probably continue our main sources of protein. The farmers as well as the corn improvers of this country have realized that the greatest work to be done with corn, the most important and profitable improvement to be made in it now, is to increase the yield per acre. Considered in its entirety this is a mighty problem, involving the seed, the cultivation, the improvement of the soil and the many and vital questions that arise in each of these three main divisions. With all these things under consideration it is not surprising that little attention has been paid to protein content. The people of this country feel that they can get along without more protein if they can get more good corn and no doubt they are correct in this view. When an increase of five bushels per acre means an addition of 475,000,000 bushels to our crop, we see something of possibilities of a general movement for corn improvement. Professor Christie of Indiana showed in a local test that some corn yielded twice as much as other corn on the same ground and with the same treatment. And he showed one farmer then and there how he had failed to harvest \$19,000 worth of corn simply because he had for years raised the wrong variety for his section. An extreme case, no doubt, but such are the possibilities to the individual, in the corn problem, and yet this matter of variety is only one phase of the great problem that is and should have first place with American corn producers. The work of growing more corn to the acre has barely begun. We know that certain men have been credited with increasing the average yield of their state several bushels per acre; but their work has not yet progressed far enough to affect averages materially. They were given this big credit in a good corn year, when nature assisted them. But the work is under way, the enthusiasm is growing, and averages will be affected ultimately by the slogan "More corn per acre!"—National Stockman and Farmer.

Removing Stones.
In regard to picking up stones, do I understand you turn the A harrow around the other way and remove the front teeth? or how? My land is full of those small stones, and I should be pleased to obtain help to get rid of them. H. A. L. The stone gatherer mentioned on p. 312, 1907, is simply a one-horse cultivator, A-shape, drawn point forward. The harrow's spike teeth gradually push the stones outward, and by passing twice in a place the stones assume a row-like position ready for the loading fork. Another style, drawn by a team, has a cross-bar and pole cross-bar filled with teeth, part 3 to 5 feet long, teeth 3 or 4 inches apart. You simply lift to dump it and the stones may be left in rows.—R. H. Dixon in the Country Gentleman.

Anchoring a Wire Fence.
We notice that many farmers who use woven wire fencing have them staked down by criss-crossing small stakes over the bottom wire in order to prevent hogs creeping and forcing their way under and into adjacent fields where they are not wanted.

We use a better method. Between each post we dig down eighteen inches and place a loop of heavy galvanized wire and into each hole sink a small stone or piece of old casting and cover deeply.

Then with our foot we hold the fencing tight to the ground surface and with the pliers twist the ends of the buried wire about the bottom fence wire. This makes an anchor that lasts as long as the fence lasts and is not rotting off or being lifted with the frosts every winter as stakes do.

If the fence posts are exceptionally far apart two or three of these anchors may be placed between each post.—George W. Brown in the Epitomist.

Large Breed, Large Horses.
Weight and power are the telling points which have won favor for the Shire horses in America and elsewhere. No other breed produces draughts that can throw into the collar more concentrated force than they. Stallions that tip the scale beam at 2500 pounds are not uncommon, and geldings that weigh upward of a ton can be seen almost any day in the great Bull's Head horse market where fancy draughts are sold. The prevailing color of the Shires is a yellow bay, and there is a strong tendency to white faces and legs. From the knees and hocks down the legs of the Shires are feathered with an extraordinary growth of long, coarse hair, which in England is considered one of the show points of the breed, though many users of draught horses object to it here. In snap, action and quality the Shire is no match for the French draught horse, which seems strange when it is remembered that English breeders have close at hand in their thoroughbreds the source of pretty much all quality in modern horse-flesh.—New York Herald.

Buy Good Sheep.
The best investment a beginner in the sheep business can make is to buy good stock and the worst thing he can do is to get poor stuff because it is cheap. The better sheep one has the more pride he will take in keeping them up to the standard. He feels that he cannot afford to let them run down

FINANCE AND TRADE REVIEW

DUN'S WEEKLY SUMMARY

Retail Trade Shows Little Improvement—Dullness Continues in Iron and Steel Business.

New York—R. G. Dun & Co.'s "Weekly Review of Trade" says: "Light weight wearing apparel is in better demand in response to more seasonable weather, but retail trade, as a whole, shows little alteration, and the crops have not made sufficient progress to encourage normal preparation for future business in wholesale and jobbing departments. Payments are a little more prompt, owing to the ease of money."

"Dullness continues in the iron and steel industry, the outlook for the year being indicated by a reduction in the estimate of ore shipments to 20,000,000 tons. Several mills have resumed, including some of the leading rail plants, but these are not started at more than one-third full capacity. Although it develops slowly, there is much encouragement regarding the outlook in the pipe trade."

"Some increases in the attendance of buyers is noted in certain quarters of the primary markets for cotton goods, and improved financial conditions cause less question regarding terms of settlement, but the percentage of idle machinery is larger and the outlook for a broader market is not bright. Stocks accumulate in some departments, but as a rule jobbing houses are in a healthy condition as to the size of supplies."

"In men's wear woollens most manufacturers have secured a fair distribution of sample pieces, and anticipate duplicate orders in sufficient number to absorb the season's output. Footwear factories are curtailing production, and shipments from Boston continue light. All markets are quiet, but there is a fair demand for summer specialties, notably tan calf shoes. These contracts are placed for immediate delivery, but there is little inquiry for staple lines, and the higher priced black goods are exceptionally dull."

"Trade at the West has also fallen off, but is still relatively better than in New England. Weakness is noted in all varieties of leather."

Rus in Urbs.

All sorts of queer loads are carried in hansoms, as any one may observe in the Longacre square district of nights and early mornings, and on top of them. But the queerest sight of this kind was observed on Nassau street the other day when an empty hansom went slowly down town with an empty dog house, such as one always thinks of in connection with a back yard in a country house, perched up on the roof of the cab in front of the driver.—New York Press.

It is just as easy, thinks the Walde Press, to go about with a perpetual expression of good nature, seeking some one to whom to show a kindness, as to carry around a frowning face and always be on the lookout for some one to knock.

HAD CATARRH THIRTY YEARS.

Congressman Meekison Gives Praise To Pe-ru-na For His Relief From Catarrh.

CONGRESSMAN MEEKISON COMMENTS PE-RU-NA.

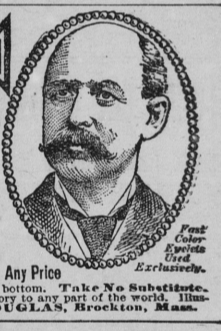

"I have used several bottles of Peru-na and I feel greatly benefited thereby from my catarrh of the head. I feel encouraged to believe that if I use it a short time longer I will be fully able to eradicate the disease of thirty years' standing."—David Meekison.

OTHER REMARKABLE CURES.
Mr. Jacob L. Davis, Galena, Stone county, Mo., writes: "I have been in bad health for thirty-seven years, and after taking twelve bottles of your Peru-na I am cured." Mr. C. N. Peterson, 132 South Main St., Council Bluffs, Iowa, writes: "I cannot tell you how much good Peru-na has done me. Constant confinement in my store began to tell on my health, and I felt that I was gradually breaking down. I tried several remedies, but obtained no permanent relief until I took Peru-na. I felt better immediately, and five bottles restored me to complete health."

A SINCERE RECOMMENDATION.
Mr. D. C. Prosser, Bravo, Allegan Co., Mich., writes: "Two years ago I was badly afflicted with catarrh of the stomach. I had had a run of typhoid fever, was very depleted. I could find nothing I could eat without causing distress and sour stomach. Finally I came to the conclusion that I had catarrh of the stomach and seeing Peru-na advertised, began to take it. It helped me soon, and after taking three or four bottles I was entirely cured of stomach trouble, and can now eat anything."

Manufactured by Peru-na Drug Manufacturing Company, Columbus, Ohio.

W. L. DOUGLAS SHOES
\$3.00 SHOES AT ALL PRICES FOR EVERY MEMBER OF THE FAMILY.
MEN, BOYS, WOMEN, MISSES AND CHILDREN.
W. L. Douglas makes and sells more men's \$2.50, \$3.00 and \$3.50 shoes than any other manufacturer in the world, because they hold their shape, fit better, wear longer, and are of greater value than any other shoes in the world to-day.
W. L. Douglas \$4 and \$5 Gilt Edge Shoes Cannot Be Equalled At Any Price.
CAUTION: W. L. Douglas name and price is stamped on bottom. Take No Substitutes. Sold by the best shoe dealers everywhere. Shoes mailed from factory to any part of the world. Illustrated Catalog free to any address.
W. L. DOUGLAS, Brockton, Mass.

Swearing Prohibited.
Orders have been posted in the shops of the Pennsylvania Railway system prohibiting swearing among the men while at work. The penalty will be an enforced vacation.

FITS, St. Vitus' Dance, Nervous Diseases permanently cured by Dr. Kline's Great Nerve Restorer. 23 trial bottle and treatise free. Dr. H. R. Kline, Ltd., 381 Arch St., Phila., Pa.

Great Contrast.

A greater contrast could hardly be furnished by modern nations than that between the fleet under Commodore Perry, the presence of which in Japanese waters exercised so profound an influence on Japan's destiny at the turning point in his career, and that which is to call at Yokohama on its long homeward voyage from the Pacific coast. The naval demonstration of 1854 marked the beginning of the relations of Japan and the United States, relations which in commerce and diplomacy have been of unbroken friendliness and mutual advantage. There is no present reason to doubt that the coming visit of the fleet, with its impressive revelation of the revolution which has taken place in naval affairs in the half century and more that has elapsed since Perry's sidewheelers churned the waters of the Bay of Yeddo, will cement that friendship and lead to a clearer appreciation on both sides of the importance of preserving that happy relation unbroken and untarnished by distrust and suspicion.—Philadelphia Public Ledger.

Do Your Feet Ache and Burn?

Sink into your shoes Allen's Foot-Ease, a powder for the feet. It makes tight or new shoes feel easy. Cures Corns, Bunions, Swollen Feet, Smarting and Sweating Feet and Ingrowing Nails. Sold by all druggists and shoe stores, 25 cts. Sample sent FREE. Address Allen S. Olmsted, LeRoy, N. Y.

With the assistance of 32 hens Miss Maud L. Loud, Westchester county, N. Y., is paying her way through college.
