RECIPE,

CUT-OUT

Pickled Onions.—Peel small white when and cover them with one and one-half cups sait and two quarts of boiling water and let stand two days. Drain and cover with fresh brine the same as before; let stand two days again, and drain again. Make more brine and heat to the boiling point. Put in the onions and boil three minutes. Put in jars, interspersed with bits of mace, white pepper corns, cloves, bits of bay leaf and slices of red pepper. Fill jars to overflow with vinegar scalded with sugar, allowing one and one-quarter cups of sugar to one gallon of vinegar. Cork while hot.—American Home Monthly.

A doctor tells me of a note he re-ceived from a woman saying that her husband, who was about to make him a professional call, found constant fault with the dinner she prepared for him. She appealed to the physician for aid.

The doctor examined his patient,

Mrs. Rose, of Melrose.

Mrs. Geraldine Farrar, the prima donna, attended a luncheon of debutantes in New York. Miss Farrar told the debutantes that there was happiness in work. She urged work upon all of them. Work, she said, would preserve them from degeneration into such a type as Mrs. Rose, of Melrose. "Mrs. Rose's type is too familiar," she said. "To show you the sort of type she is: Mr. Rose came home from business. Mrs. Rose lay on a couch. He sat down by her side and said: "What did the doctor say, dear?" 'He asked me to put out the street of the scheme of the property of the woodshed ceremony.

'Then, my dear,' he said, firmly, 'you'll have to give it a rest. I have perfect confidence in that doctor.'"—New York Tribune.

of this costume, and the hat was the only medium. The straight-cut suit gave a perpendicular line, to eliminate which a horizontal one was required, hence the wide hat; and this, by contrast with the rigidity of the suit, had to be ornamented with trimming in broken lines, so we had endless irregular loops and all kinds of fantastic feathers. Of course, then, when the hat trimming was regular and "set" the purpose of this style of hat was defeated.—Harper's Bazar.

Luminara, published in Madrid, was probably one of themost remarkable freak newspapers ever printed. It was printed with ink containing phosphorus, so that the paper could be read in the dark. Another curiosity was known as the Legal. This was printed with non-poisonous ink on thin sheets of dough, which could be eaten, thus furnishing nourishment for body as well as mind.—Literary Digest.

desired by every man, because wealth is a mighty factor in the world in which we live.

Think of what wealth can do for the individual. It can give opportunity to acquire high and noble tastes. It can give leisure for study and research. These in turn will cause the mind to grow stronger and the character to grow nobler. Wealth can purchase length of days, and it can secure to us the atmosphere in which human love can blossom and bear fruit to perfection.

Think of what wealth can do for the family. It can surround our loved ones with books and paintings and statuary. It can provide the highest culture for our children. It can enable us to dispense a generous hospitality and to make our homes the centre of a delightful and ennobling religious, social and intellectual circle.

Think of what wealth can do for society. It can lift up those shattered and maimed victims of vice and poverty. It can leanse the augean stables. It can send the brightness of day into the loathsome, fetid hauns of day into the loathsome fetid hauns of day into the loathsome fetid hauns of darkness. It can lay out and beautify parks. It can establish and perpetuate universities and libraries. It can support artists and scientists that they may devote their time to creating the beautiful and the useful. It
