SHE COULD NOT WALK

For Months—Burning Humor on Ankles—Opiates Alone Brought Sleep — Eczema Yielded to Cuticura.

"I had eczema for over two years. I had two physicians, but they only gave me relief for a short time and I cannot enumerate the ointments and lotions I used to no purpose. My ankles were one mass of sores. The itching and burning were so intense that I could not sleep. I could not walk for nearly four months. One day my husband said I had better try the Cuticura Remedies. After using them three times, I had the best night's rest in months unless I took an opiate. I used one set of Cuticura Scap, Ointment, and Pills, and my ankles healed in a short time. It is now a year since I used Cuticura, and there has been no return of the eczema. Mrs. David Brown. Locke, Ark., May 18 and July 13, 1907."

Old Time College Penalty.

Old Time Coilege Penalty.

If the Yale faculty a century and a half ago dealt differently with student offenders, the offenders themselves were of a somewhat different order. It seems that "one Holmes, a student of this college, on the Sabbath or Lord's day, traveled unnecessarily, and that with a burden or pack behind him, from beyond Wallingford to this place; which is contrary to the divine and civil law, as well as to the laws of this college." The college officials having fined Holmes some 20d sterling, he subsequently made a public confession of his crime, and afterward became a highly respected minister of the gospel. This malefactor, says Thomas Wentworth Higginson, in Harper's Magazine for July, writing on the aristocratic prestige of old families in this republican country, was a granduncle of Dr. Oliver Wendell Holmes.

How Iron Expands.

How Iron Expands.

The increase of volume from the heating and cooling of cast iron has been the subject of many tests, and it has been shown that the swelling may amount to as much as 40 per cent. After heating in a gas furnace twenty-seven times, the highest temperature reached being 1,450 degrees. Fahrenheit, a bar originally one inch square and 14.8 inches long was found to have grown to one and one-eighth inches square and sixteen and one half inches long. This effect is suggested as an explanation of the trouble given by cast iron fittings for superheated steam, which produces, the same alternate heating and cooling.

says:

"I had been a sufferer for ten years with stomach and liver trouble, and had got so bad that the least bit of food such as I then knew, would give me untold misery for hours after

me untold misery for hours after eating.

"I lost flesh until I was almost a shadow of my original self and my friends were quite alarmed about me.

"First I dropped coffee and used Postum, then began to use Grape-Nuts, although I had little faith it would do me any good.

"But I continued to use the food and have gained twenty pounds in weight and feel like another person in every way. I feel as if life had truly begun anew for me.

"I can eat anything I like now in moderation, suffer no ill effects, be on my feet from morning until night. Whereas a year ago they had to send me away from home for rest while others cleaned house for me, this spring I have been able to do it myself all alone.

"My breakfast is simply Grape-Nuts "My breakfast is simply Grape-Nuts with cream and a cup of Postum, with sometimes an egg and a piece of toast, but generally only Grape-Nuts and Postum. And I can work until noon and not feel as tired as one hour's work would have made me a year ago." "There's a Reason."

Name given by Postum Co., Battle Creek, Mich. Read, "The Road to Wellville," in pkgs.

# The Larm

Raising Turkeys.

The farmers of the United States generally could profitably increase the number of turkeys they produce. This class of poultry always sells well, and anyone who can give turkeys a good range can make a profit from them if he handles them correctly.

Good Milkers,

well, and anyone who can give turkeys a good range crn make a profit from them if he handles them correctly.

The excessive death rate during the first few weeks of the poult's existence is the leading drawback to turkey raising, but most of the trouble which is so common at this stage can be avoided by careful and judicious management.

Be sure that the young do not get chilled while hatching or shortly afterwards, and have their coops made perfectly tight and free from drafts and dampness. Locate them in a well drained spot where the sun shines unobstructedly for the greater part of the day, until the arrival of sultry summer weather. This matter of freedom from dampness is very essential.

Keep the poults confined to the coop or to a covered run on damp, chilly mornings until all the dew has disappeared from the grass and weeds. Aside from such times, the youngsters may be allowed entire liberty after they are five or six days old. The mother turkey should be restricted, for a time at least, within limited range by means of a string or some other convenient method of this kind.

Vermin are frequent source of trouble and loss with poults and turkeys. This is a matter deserving of more attention than it usually receives, as lice are generally numerous on turkey fowls. One of the best things that can be done is to give the setting hen a thorough dusting with a reliable brand of louse powder two or three days before the eggs commence to hatch; this not only frees the hen from the vermin but prevents the poults from contracting the vermin from their moth-

This effect is suggested as an explanation of the trouble given by cast iron fittings for superheated steam, which produces the same alternate heating and cooling.

ALMOST A SHADOW Gained 20 lbs. on Grape-Nuts.

There's a wonderful difference between a food which merely tastes good and one which builds upstrength and good healthy flesh.

It makes no difference how much we eat unless we can digest it. It is not really food to the system until it is absorbed. A Yorkstate woman says:

"I had been a sufferer for ten years"

### FINANCE AND TRADE REVIEW

DUN'S WEEKLY SUMMARY

Growth of Confidence Evidenced by Increased Preparation of Fall Business.

Increased Preparation of Fall Business.

New York.—R. G. Dun & Co.'s "Weekly Review of Trade" says: "Encouraging reports of commercial conditions outnumbering adverse statements, and in almost every instance earlier gains are fully maintained, while the growth of confidence is gvidenced by increased preparations for fall trade and a revival of structural work.

"Retail trade is reasonably quiet, but wholesale and jobbing markets are responding to the usual attendance of outside buyers, while the big cotton goods auction sale had no demoralizing effect on prices. Scarcity of hides holds prices at a very high position, and leather is also relatively much stronger than other materials of manufacture, which retards business in footwear. Mercantile collections are irregular, but money is abundant and cheap, and prices of securities establish new high records for the year almost daily.

"More interest is shown in the iron and steel markets than at any earlier date this year, although the raliways are not buying freely. Prices are unchanged, but some furnace and foundry interests will take no more orders without an advance. Domestic roads have begun to buy rails, but most new contracts in this department are for export.

"Results of the first big auction sale of dress goods were most satisfactory relatively high prices being realized. As to the woolens, most interest is shown in the higher grades of men's wear. Confidence is shown by some mills that are purchasing raw wool freely, helping to prevent accumulation of stocks in Eastern markets, as the new clip comes forward.

"Footwear manufacturers in New England report that jobbers continue to purchase conservatively, placing only enough contracts to cover immediate needs."

TO REMOVE OLD PAINT. To remove old paint from wood-work, make a strong solution of wash-ing soda and apply it to the paint with a brush, being careful that it does not get on your hands or clothing. After a short time wash off with a mop, being careful, as before, not to let the liquid touch the flesh

r clothing.

Ammonia is also a good agent. Use diluted household ammonia and proceed as with washing soda. Begin to wash off as soon as the fumes pass off. The paint may be scraped or burned off, but this is a difficult thing

for an amateur to do.

To clean painted woodwork, take two quarts of hot water, two table spoonfuls of turpentine, one of skimmed milk and soap enough to make The mixture will clean and give

Paint can be removed from glass

when Cardinal Logue said to John D. Rockefeller, "You have a fine country," he did not use the pronoun "you" in a personal sense, as some have supposed, explains the Atlanta Journal.

shifted around?"

"How about this next one?" inquired the friend.

"He's guilty of something," asserted the keen observer. "No man stares at people in that bold, defiant way if he has a clear conscience."—Youth's Companion.

## CHINGS WORTH KNOWING

The average price, in Marseilles last year, of African peanuts wa \$55.90 per ton.

Canadians have been successfully growing figs near Niagara-on-the-Lake these forty years past.

Although France has had compulsory education for about twenty-five years, the percentage of illiterates reaches the high figure of forty per 1000 men and sixty per 1000 women.

Market abbreviations are "toms" for tomatoes, "cants" for cantaloupes and "cukes" for cucumbers.

Mrs. Emma Hancy, of Coopersburg, Pa., has an apple tree in her yard, in a hollow crotch of which a currant stalk has taken root, and this year has a small crop of berries surrounded by green apples.

The bone frame of the average whale weighs about forty-five tons.

An oddity in the dandelion line An oddity in the danderion file was found in Caribou, Me., recently. This blossom was a combination of five different blossoms on as many stems, yet all grown together and cemented into one compact whole.

The Ohio Dunkards have voted to hold their future conferences in tents exclusively. They tolerate the use of the telephone by brethren who have the price, but insist that it shall be used only in the transaction of business.

The California blackbird canno sing, but he is greatly beloved for the number of bugs he can consume between daylight and dark on any given day of the year.

The proud parents of triplets born in Delaware, Ind., named them, re-spectively, James, Whitcomb and Riley.

The Japanese were acquainted with iron from very earliest times. A sword that was used by one of the ancestors of the present emperor, about 800 B. C., is still in existence.

Boston waiters' and other unions are making an effort to have the license commissioners make a rule that women cannot be employed to serve liquor in any licensed place in the city.

A glass ball on the handle of a parasol concentrated the rays of the sun and started a fire in Northamp-ton, Mass.

Most of the coffee drunk in Smyrna was grown in Brazil. Only the wealthy can afford to drink

Fewer New Yorkers own their own homes than the residents of any other city in the world. The reason is a simple one: the land is so valuable that none but the very wealthy can afford its purchase. Of the 391,687 families living on Manhattan Island only 16,316 hold title to the bourses that of the same of houses they occupy.

AMERICAN HUSBANDS.

Safer Than Foreigners For American Women.

The longer the list of marriages between American heiresses and foreign noblemen grows the more certain it becomes that the average results are below the American standard. The proportion of divorces and separations is higher and the percentage of unmistakably happy families is smaller in European countries than in any part of the social world of this country. In fact, if the averages of shipwrecks in marriage were as formidable in the United States as it is in the matrimonial ventures which take American girls to Europe to be the mistresses of old castles, palaces and mansions, the world would be filled with contempt for American men and women alike. It would be said that American civilization was manifestly a failure and foredoomed to decay, unless it could be reformed radically. But these obvious facts will not prevent integnational marriages of the usual kind. The temptations seem too strong to be resisted. Every bride who takes the risk believes that in her case the dangers which have wrecked so many homes will be averted. She thinks that her venture will be of the happy kind seemingly rare. American men of the rich and favored classes are particular to the rich and the partic

venture will be of the happy kind seemingly rare. American men of the rich and favored classes are partly to blame for all this. If they were better representatives of the manhood of their own country, in many cases, the titled wooers from abroad would find fewer wives and fortunes in the United States.—Cleveland leader Leader.

Both Guilty.

The man who prided himself on his keen perceptions watched the witness on the stand with intensity, and nodded his head vigorously at the closing
words of the bewildered witness.
"That man's concerned in it," said
the keen observer to his friend.
"Didn't you notice how his eyes
shifted around?"

## THE COME AND SEE SIGN

This sign is permanently attached to the front of the main building of the Lydia E. Pinkham Medicine Company, Lynn, Mass.

What Does This Sign Mean?

It means that public inspection of the Laboratory and methods of doing business is honestly desired. It means that there is nothing about the business which is not "open and aboveboard."

It means that a permanent invitation is extended to anyone to come and verify any and all statements made in the advertisements of Lydia E. Pinkham's Vegetable Compound. Is it a purely vegetable compound made from roots and herbs — without drugs?

Is it a purely vegetable compound made from roots and herbs — without drugs?

Come and See.

Do the women of America continually use as much of it as we are told?

Come and See.

Was there ever such a person as Lydia E. Pinkham, and is there any Mrs. Pinkham now to whom sick woman are asked to write?

Come and See.

Is the vast private correspondence with sick women conducted by women only, and are the letters kept strictly confidential?

Come and See.

Have they really got letters from over one million, one hundred thousand women correspondents?

Come and See.

Have they proof that Lydia E. Pinkham's Vegetable Compound has cured thousands of these women?

Come and See.

This advertisement is only for doubters. The great army of women who know from their own personal experience that no medicine in the world equals Lydia E. Pinkham's Vegetable Compound for female ills will still go on using and being benefited by it; but the poor doubting, suffering woman must, for her own sake, be taught confidence, for she also might just as well regain her health.

Keeps the breath, teeth, mouth and body antiseptically clean and free from unhealthy germ-life and disagreeable odors, which water, soap and tooth preparations alone cannot do. A germicidal, disinfecting and deodorizing toilet requisite of exceptional excellence and economy. Invaluable for inflamed eyes, throat and nasal and uterine catarrh. At drug and toilet stores, 50 cents, or by mail postpaid.

Large Trial Sample

Discharged Because Doctors Could Not Cure.

Levi P. Brockway, S. Second Ave., noka, Minn., says: "After lying for
