are crystalizing with lightning rapid-ity. News has reached here from sev-eral sources that two definite strokes are impending which cannot fail to bring matters to a crisis, and per-haps force and immediate war. One is the proclamation by Price Ferdinand of the independence of Bul-garia, which will include Rumelia, taking for himself the dille of "czar." The other is on announcement of Austria-Hungary of the practical an-niexation of the province of Boshia and Herzegovnia as appanages of the Austro-Hungarian crown. Either action will be equivalent to the tearing up of the treaty of Berlin, while Pince Ferdinand's course seems almost certain to precipitate a war between Bulgaria and Turkey. Both armies are reported to be quietly and swiftly mobilizing near the borders.

United Kingdom is being seriously considered by the government author-ities, all of whom agree that the num-ber of persons out of work will be greater the coming winter than in many years before. No estimate has been made of the unemployed in London, but a census taken by the newspapers of provincial cities shows alarming numbers. The conditions at Glasgow are probably worse than in most of the other cities, there being 22,000 men now seeking work at that place. Sun-derland has 13,000 unemployed, Birm-ingham 10,000, Liverpool 14,000, Man-chester 8,000 and other cities from 1,000 to 5,000 each. These figures do not include the great army of strikers in the Lancashire cotton trade. Distress funds are now being raised throughout the country.
