While alighting from a street car in this city, last Saturday, John Fresh failed to wait until the car stopped, and as a result was thrown violently to the ground. His face looks ever since the fall as though some one had borrowed it to fight a bulldog. John doesn't mind it much, however, and he is worth more than a regiment of dead men, in spite of all his wounds.

N. G. Keim, of Elkins W. Va., was here the first of the week visiting his mother and sister, Mrs. S. C. Keim and Miss Cora Keim. He was also transacting some business here. It is needless to say that Mr. Keim is jubilant over the recent great Republican victory, and especially so over the fact that the state he resides in demonstrated her loyalty to the party of progress and noble achievement.

The Somerset Telephone Company has erected new poles in this borough, and they are the right kind of poles. They are smooth and straight, and high enough to keep the wires out of the way of shade trees. All the other companies having poles in this borough should be required to erect poles like those of the Somerset Telephone Company. No company should be allowed to use poles that are an eyesore to the town, and it is about time to call a halt on the butchering of shade trees.

If you suffer from constipation and liver trouble, Foley's Orino Laxative will cure you permanently by stimulating the digestive organs so they will act naturally. Foley's Orino Laxative does not gripe, is pleasant to take and you do not have to take laxatives continually after taking Orino. Why continue to be the slave of pills and tablets. Elk Lick Pharmacy, E. H. Miller, proprietor. 12-1

A school boy's composition on "The Editor," ran as follows: "The editor is one of the happiest beggars in the world. He can go to the circus in the afternoon and evening without paying a farthing, also inquests and hangings. He has free tickets to the theaters, gets wedding cake (?) sent to him, and sometimes gets licked, but not often, as he can take it back in the next issue, which he generally does. While other folks have to go to bed early, the editor can sit up every night and see all that is going on."

Foley's Honey and Tar clears the air passages, stops the irritation in the throat, soothes the inflamed membranes, and the most obstinate cough disappears. Sore and inflamed lungs are healed and strengthened, and the cold is expelled from the system. Refuse any but the genuine in the yellow package. Elk Lick Pharmacy, E. H. Miller, proprietor. 12-1

Do not lie in bed in the mornings. The early bird catches the worm, and if you are up a sufficiently long time before him you may read your neighbor's papers before he comes down to take them from the step. Your gains will depend largely upon the number of papers your neighbor takes, but one cent a day nets you \$3.65 a year, except in leap year, when you will make a cent more. In following out this plan, remember it is not compatible with the obligations of good neighborhood to cut out items which you think will interest your wife, says an exchange.

Winter blasts, causing pneumonia, pleurisy and consumption will soon be here. Cure your cough now, and strengthen your lungs with Foley's Honey and Tar. Do not risk starting the winter with weak lungs, when Foley's Honey and Tar will cure the most obstinate coughs and colds, and prevent serious results. Elk Lick Pharmacy, E. H. Miller, proprietor. 12-1

Governor Edwin S. Stuart has fixed Tuesday, November 24, 1908, as the day on which the monument erected to commemorate the services of the Sixty-seventh, Eighty-seventh and One Hundred and Thirty-eighth Regiments of Pennsylvania Volunteer Infantry on the battlefield of Monocacy, Md., is to be dedicated, and the Adjutant General, in pursuance thereof, will issue transportation to honorably discharged Pennsylvania soldiers who were members of either of the above mentioned regiments. The monument is a very fine piece of work, it having cost \$5,000 to erect it.

Tell me not in mournful numbers that the town is full of gloom, for the man's a crank that slumbers in these bustling days of boom. Life is real, life is earnest, and the grave is not its goal; every dollar that thou turnest helps to make the old town roll. But enjoyment, and not sorrow is our destined end or way; if you have no money, borrow—buy a corner lot each day! Lives of great men all remind us we can win immortal fame. Let us leave the chumps behind us, and we'll get there just the same. In his world's bread battle, in the bivouac of life, let us make the dry bones rattle—buy a corner for your wife! Let us then be up and doing, with a heart far any fate; still achieving, still pursuing, booming early, booming late.

MIND YOUR BUSINESS!

If you don't, nobody will. It is your business to keep out of all the trouble you can, and you can and will keep out of liver and bowel trouble if you take Dr. King's New Life Pills. They keep biliousness, malaria and jaundice out of your system. 25c. at E. H. Miller's drug store. 12-1

To Extract a Splinter.

When a splinter has been driven deep into the hand, it can be extracted without pain, by steam. Nearly fill a wide-mouthed bottle with hot water, place the injured part over the mouth of the bottle, and press tightly. The suction will draw the flesh down, and in a minute or two the steam will extract the splinter and the inflammation will disappear.—November Woman's Home Companion.

SEVEN YEARS OF PROOF.

"I have had seven years of proof that Dr. King's New Discovery is the best medicine to take for coughs and colds and for every diseased condition of throat, chest or lungs," says W. V. Henry, of Panama, Mo. The world has had thirty-eight years of proof that Dr. King's New Discovery is the best remedy for coughs and colds, la grippe, asthma, hay fever, bronchitis, hemorrhage of the lungs, and the early stages of consumption. Its timely use always prevents the development of pneumonia. Sold under guarantee at E. H. Miller's drug store. 50c. and \$1.00. Trial bottle free. 12-1

SHAKE IN A BOTTLE.

Advice of Noted Authority, Also Gives a Simple Prescription.

Now is the time when the doctor gets busy, and the patent medicine manufacturers reap the harvest, unless great care is taken to dress warmly and keep the feet dry. This is the advice of an old eminent authority, who says that Rheumatism and Kidney trouble weather is here, and also tells what to do in case of an attack.

Get from any good prescription pharmacy one-half ounce Fluid Extract Dandelion, one ounce Compound Kargon, three ounces Compound Syrup Sarsaparilla. Mix by shaking in a bottle and take a teaspoonful after meals and at bedtime.

Just try this simple home-made mixture at the first sign of Rheumatism, or if your back aches or you feel that the kidneys are not acting just right. This is said to be a splendid kidney regulator, and almost certain remedy for all forms of Rheumatism, which is caused by uric acid in the blood, which the kidneys fail to filter out. Any one can easily prepare this at home and at small cost.

Druggists in this town and vicinity, when shown the prescription, stated that they can either supply these ingredients, or, if our readers prefer, they will compound the mixture for them.

FORESTRY IN JAPAN.

Just at the time when this country is beginning to struggle with the problem of husbanding its forest resources, of protecting its mountain slopes, and of improving the waterways, it is interesting to know that the Japanese have successfully attacked the same problem, before the land suffered severely from the evil effects following deforestation. The farsighted people of Nippon have foreseen the results of the destruction of their extensive mountain forests, and have safeguarded themselves by placing all of these under government control.

The practice of forestry has been carried on in Japan for a longer time than in any other country. For 1,200 years the people of Japan have been planting and growing forests, with a success that has been a little short of marvelous. Under careful management, the Japanese forests yield very high financial returns. This high yield is only made possible by the close utilization of every bit of the tree, so that scarcely a twig is wasted, and by the improvement of the growth of their forests by carefully conducted thinning and tending. The woods are first thinned at the age of thirteen years, and then every five years after that, up to the time of the final harvest, at 120 years.

It was with the opening up of the hitherto inaccessible mountain forests that the Japanese government became most intensely interested in forestry. The mountains were still government land, so all that was necessary to protect them was to place proper restrictions on the sale and cutting of timber. This was effected by declaring the forests on the steep slopes as reserved forests, in which the only cutting should be done under government direction. The forests on agricultural lands, not needed for protection, are classed as available forests, and here the cutting is not so carefully restricted.

Thus Japan has effectually prevented the stripping of her mountain slopes before any great damage has been done. In some districts, where the mountains are near the towns, the steep slopes have already been cleared, and this has resulted in floods and the washing down of the soil from the slopes onto the farm lands. But these cases have been exceptional, and have merely served as a warning, which Japan has heeded before it was too late to prevent widespread destruction.
