A Change for the Better. A Change for the Better.

The life-long domicile of an old lady was situated several feet south of the dividing line of Virginia and North Carolina, and when that section of the country was re-surveyed it was discovered that the line ran a few feet south of the property in question. They broke the news to the old lady that from then on she was to be a resident of Virginia. "That's good," she exclaimed: "I've always heard that North Carolina was an unhealthy state to live in."—Success Magazine.

Knocked Out by Dead Man.

While Don McVean, of the undertaking firm of Gillen & McVean of Youngstown, Ohio, was embalming the body of a muscular iron worker, he met with the biggest surprise of his life. In turning the body the muscles of the right arm relaxed and the fist caught McVean square on the jaw, knocking him down and out for a few seconds. He was found by some of the employes on the floor. He did not finish the job.

TOO TRUE the big Boston fire was celebrated by the Veteran Firemen's Association of that city recently. The association numbers about two hundred members, and annually they get together to exchange tales of the memorable two days in 1872 when more than \$60,000,000 worth of property was destroyed, 800 buildings were leveled or made usless and eleven lives lost. A year ago the surviving members of the Common Council of that year met at Young's Hotel for a reunion. Of the sixty-four members there were seventeen survivers in 1907. "No one understands me!" he groaned; "no one on earth."

It is the old story wrung from many a tortured, youthful heart. The sufferer is generally mistaken, but the pain is no less poignant. Yet in this instance the man's complaint was true. Nobody on earth could understand him. true. Nobody on earth stand him.

Cuticura's Efficacy Proven.

"When about two and a half years old my daughter broke out on her hips and the upper parts of her legs with a very irritating and painful cruption. It began in October; the first I noticed was a little red surface and a constant desire on her part to scratch her limbs. She could not sleep and the cruptions g t sore, and yellow water came out of them. I had two doctors treat her, but she grew worse under their treatment. Then I bought the Cuticura Remedies and only used them two weeks when she was entirely well. This was in February. She has never had another rough place on her skin, and she is now fourteen years old. Mrs. R. R. Whitaker, Winchester, Tenn, Sept. 22, 1908."

Ostrich Feather Auction.

Ostrich Feather Auction.

The quantity of ostrick feathers offered at the recent auctions in London was extremely large, the weight being 105,000 pounds against \$4,790 pounds in July and 102.850 pounds in August last year, says South Africa, a London publication A leading firm reports that considering this was the largest quantity ever sold, the result must be regarded as satisfactory. There was a good attendance of buyers, but prices all around showed a decline, which was important in white boos, floss, and all inferior goods. The amount realized was about \$1,100,000.

A Long Sentence.

A Long Sentence.

The prize for the longest sentence ever written may fairly be awarded to the elder Dumas, who probably holds a further record for fertility of production. In the seventh of the twenty-nine volumes which compose the "Impressions de Voyage," there is a sentence describing Benvenuto Cellini, which fills three pages, or 108 lines, averaging 45 letters apiece. The sentence is broken by 68 commas and 60 semicolons; but as it contains 195 yerbs and 122 proper names, the reader is somewhat bewildered before the end is reached.—London Chronicle.

Deafness Cannot Be Cured
bylocal applications as they cannot reach the
diseased portion of the ear. There is only one
way to cure deafness, and that is by constitutional remedies. Deafness is caused by an
inflamed condition of the mucous lining of
the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed
Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will
be destroyed forever. Nine cases out of ten
arecaused bycatarrh, which is nothing butan
inflamed condition of the mucous surfaces.

Dolly, who is 6, had been sent to a boarding school. When she came home for a time she voiced her ob-

jections.

Love is sweet. In fact a good bit of it is taffy.

A Crying Need.

What is really wanted at the present time is a standard of misconduct. We are constantly doing things in doubt, as if we hadn't a right to do

we are constantly uoing things in doubt, as if we hadn't a right to do them.

The confusion caused by people doing things which in their circumstances we had no right to expect is the principal cause of our troubles. It ought to be definitely settled, for example, that any millionaire who has, say, over a hundred millions, will thereafter lead an honest life. If he has only fifty millions his life should be semi-honest, and if he has only a paltry ten millions, then it ought to be conceded that he can loot a few railroads or so until he gets on his feet.

Up to say, ten thousand a year no man can afford to be dishonest. He ought to get up in the cars and give up his seat to women under 35 at least, and of course he will not take the chance of robbing any safe. From ten thousand up to one hundred thousand he can engage in little dishonest flyers by making one of a pool or putting through a land deal or so for variety.

When he gets fifty millions or more together, however, every man ought to ask himself plainly the question whether from now on he ought not to be a philanthropist. Doesn't he owe this to his fellow-man?—Life.

Cargo of Five Thousand Cats.

Cargo of Five Thousand Cats.

Japan, it seems, is infested with rats, and the reason is explained by a Paris contemporary, via., that the Japanese cats, which are not prolific, are pampered to an extraordinary degree. During the last few days, the chronicier proceeds, a ship has left one of the principal German ports with 5.000 cats on board. These on arrival are to be settled in the various maritime towns of the Mikado's dominions, and we further learn that the present consignment of cats is to be followed by four others, each of 5,000. The name of the principal German port is not given.—London Globe.

"Why do they have those glass cases with the ax, hammer, crow-bar, etc., in on these cars," asked a traveler on the railroad going to New York.
