the loss of

Headache, Backache, Sideache, A Worn-out Feeling.

These are especially women's afflictions. They are caused by irregular working of some of the functions of the body. It is of the utmost importance to every woman to know that there is no medicine so valuable for her, so helpful, so strengthening, as

Lane's Family Medicine
(called also **Lane's Tea**)

This tonic-laxative is a great blood medicine and is the favorite regulating medicine of old and young. All druggists sell it in 50c. and 25c. packages.

Couldn't Fool Him Twice. Voice. "Get closer to the phone!" Farmer Hay back. "Haw! haw! No much! I see a feller do it in a show wunst, an' he got flour blowed in his face."—New York Evening Journal.

Only One "Bromo Quinine" That is Laxative. Bromo Quinine. Look for the signature of E. W. Grove. Used the World over to Cure a Cold in One Day. 25c.

All At Sea. The proofreader said, with a sigh, "It would make me most happy if I could make up my mind. If some things that I find are dialect pieces of pi."—Washington Star.

To Break in New Shoes. Always shake in Allen's Foot-Ease, a powder. It cures hot, sweating, aching, swollen feet, corns, ingrowing nails and bunions. All druggists and shoe stores. 25c. Don't accept any substitute. Sample mailed FREE. Allen S. Olmsted, Le Roy, N. Y.

He's Doomed Either Way. If a woman can't marry a man herself because she already has a husband she'll marry him to somebody else, anyway.—New York Press.

Sore throat leads to tonsillitis, Quinsy and Diphtheria. Hamlin's Wizard Oil used as a gargle upon the first symptoms of a sore throat will invariably prevent all three of these dread diseases.

Not a Country for Police Brutality. The brutality of the treatment that the police deal out to suspected persons—subjecting them in nearly every American city to extreme insult and physical violence—is grossly un-American. The law of despotic countries is based upon suspicion—the disbelief of man in man. But the law of free states assumes the general innocence and honesty of men. It holds men innocent until proved guilty. The whole abominable Russian "sweating" system in all its degrees should be driven out of this land. Republics are not built on craft and cruelty.—New York Craftsman.

The municipal electric light plant of South Norwalk, Conn., was put out of commission the other night by a child's hoop, which, lodged between two wires on a remote circuit, connected the commercial and the arc currents, burning out some of the machinery at the plant and crippling the entire service.

Useless to Force Food.

It is useless to force any kind of food on an animal. An animal may be compelled to eat something that it does not desire, but it will not thrive. It is necessary, therefore, to observe their individual peculiarities and supply them with whatever they prefer. What may be a delicacy to one may be repugnant to another.—Epitomist.

Fashion in Blood.

Fashion in blood lines is continually changing. By carefully studying the records and analyzing the blood lines of the winners, students of the breeding problem and practical breeders can foresee the change in fashion that is likely to occur. The breeder who can do so and take advantage of the coming change will reap the greatest advantage from it. The safer way for the average small breeder, however, is to breed in the best of those old, well-tested, successful producing lines that have been most successful in producing speed with uniformity in the past.—American Cultivator.

New Cow Feeding Tests.

An experiment in feeding cows, which it is believed will be watched with keen interest by the dairymen of the State has been started with the college herd at the Connecticut agricultural college. The test will run for an indefinite period and will consist of feeding two separate rations to two different groups of cows. One group will be fed a very narrow and the other a very wide ration, and the outcome of this experiment will determine whether high or low feeding has any effect on the vigor, fertility or production of the dairy cow. It is hoped to have these experiments carried on for at least twenty years.—American Cultivator.

Legs of a Draft Horse.

The construction and set of the hind legs of a draft horse are of vital importance. A great many of the diseases to be found in these regions are largely due to the wrong set of the limbs. In a correctly constructed hind limb, viewing it from the side, a line dropped from the hindmost point of the slope strike the top of the hock and continue parallel with it until the pastern joint is reached. If the conformation of the leg be such that the lower part of the leg is thrown more under the body, thus making it more subject to a strain of a tendon or ligament just below the hock, it is termed "sickle hocked," and it is very likely that it will become curby.—Weekly Witness.

Potato Scab Control.

The potato scab disease, says the Indiana Farmer, has been pretty thoroughly studied by potato specialists. This well-known malady is the result of a fungus infestation which also causes scab on beets. Its germs occur in great numbers on scabby smooth tubers. Much of the loss from scab is directly due to the use of infected seed. When the fungus is not present in the soil a clean crop is assured if clean seed is used. It is cheaper to abandon potato growing upon badly infected soil for a time than otherwise to combat the pest. Chemical disinfection of soil is not effective enough to warrant the cost. Seed potatoes can be effectively disinfected either by soaking one and a half hours in a solution made by dissolving one ounce of corrosive sublimate in two gallons of water; or by soaking two hours in a solution made by diluting one-half pint of formalin with fifteen gallons of water.

Insist on Stable Cleanliness.

In the production of commercial milk the dairyman must not only keep himself and his own cows clean, but he must not draw the milk from the cow in a stable filled with dust. He never should feed hay before milking. He should not feed grain nor disturb the bedding before milking.

I may get into an argument in regard to this statement, for there are those who claim that the stable should be cleaned before the milking is done. I maintain not, for you know the more you disturb some things the worse they smell. The dairyman must not feed silage before he milks, for if contamination of the air of the stable occurs with the acid odor of silage the milk will certainly be tainted. It may not be detected at once, but the city neighbor who attempts to use this milk when forty-eight hours old will certainly detect an unpleasant flavor.—John D. Nicholls.

Don't Use the Ax.

A complaint we often hear is, "Egg eating." This also can be stopped. Some say "Use the ax." No, don't! It is better to lose ten minutes time than a dollar. Take an egg shell, fill it with pepper, put in a few of those things which Mrs. Hen hates, and put it in the nest. When the hen tastes of its contents she wonders whether or not she is eating an egg, or perhaps she has a funny taste in her mouth. She may take another swallow, but to her disappointment, find that she has

been stung sharper than before. She feels rather faint and quickly runs for the drinking fountain. Immediately she makes up her mind never more to eat eggs. Another way to put an end to "egg eating" is by collecting the eggs as soon as possible after they have been laid and putting nest eggs in their place. There are other ways of curing this action which you may know, but think you will find my ways helpful. Try them, and see.—From Farmer's Home.

Talk to the Horse.

Some man, unknown to the writer hereof, has given to the world a saying that sticks: "Talk to your cow as you would to a lady." There is a world of common sense in it. What else is it but the language of the Bible applied to animals: "A soft answer turneth away wrath." A pleasant word to a horse in time of trouble has prevented many a disaster where the horse has learned that pleasant words means a guaranty that danger from punishment is not imminent.

One morning a big muscular groom said to his employer: "I can't exercise that horse any more. He will bolt and run at anything he sees." The owner, a small man and ill at the time, asked that the horse be hooked up. Stepping into the carriage he drove a couple of miles, and then asked the groom to station along the road such objects as the horse was afraid of. This was done and the horse was driven by them quietly, back and forth, with loose lines slapping on his back. The whole secret was in a voice that inspired confidence. The groom had been frightened at everything he saw that he supposed the horse would fear. The fear went to the horse like an electric message. Then came a punishing pull of the lines, with jerking and the whip. Talk to your horse as to your sweetheart.—Horse World.

Ladybirds.

Editor Indiana Farmer: Not long after noting what the editor had to say concerning ladybirds (lady bugs) I happened to see some interesting tactics of one in our garden.

There are several different species of ladybirds, one kind which the Department of Agriculture imported was for the purpose of destroying the San Jose and other scale insects, and the Year Book tells us of their behavior and propagation in America, showing in half tones the screen cages they are kept in, for the purpose of watching them attack the San Jose scale; however they seemed to increase slowly, and for this reason were not altogether successful.

The one I saw recently was much like the species described by the Department; its shape was that of a hemisphere, or in other words, was the shape of a ball cut into halves; was jet black, with one orange yellow spot on each wing shield (beetle, hard shell).

I am not an entomologist, yet I do pay some close attention at times to insects, for they are one of nature's forces which the farmers should understand.

My attention was drawn to this insect on the limb of a pear tree. I looked closer; it was hunting, hunting on the same style of a bird dog—this way, then that way, I became interested, and noted it was hunting for scales, and when it came onto any little unheaval in the bark, which resembled a scale it stopped, carefully examined it, then proceeded on its search, examined any and all places resembling a scale. I concluded to remove it and place it near a scurfy scale, but the little fellow became frightened and made a dash for liberty.—O. R. Abraham in the Indiana Farmer.

Farm Notes.

More pigs are under than are overfed.

Give them salt often, also plenty of fresh water daily.

Don't let the hogs have access to dirty or filthy water holes.

Never use a scrub male and then expect a fine litter from a good sow.

Pigs that mature early are the ones for profit when well cared for.

Wood charcoal, wood ashes and salt should be accessible at all times.

Ground wheat and corn give better feeding results than ground wheat and rye.

The profit in feeding young pigs is with those that are not stunted in their food.

The greatest profit of the dairy consists in converting the by-products into pork.

Oats fed to sows during pregnancy, by sowing them broadcast on the ground, increase size of the unborn pig, also helping to keep the sow and litter in good condition.

A large saving in the cost of raising a hog may be accomplished by boiling all its food. A half-bushel of corn boiled will go as far again and fatten better than as much corn fed dry. If the table refuse can be added to the kettle it will be still better.

Red, Weak, Watery Eyes

Relieved by Murine Eye Remedy. Compounded by Experienced Physicians. Conforms to Pure Food and Drug Laws. Murine Doesn't Smart; Soothes Eye Pain.

The clock at St. Chad's, Strawberry, has a record pendulum, its length being 22 feet and the weight of the ball 200 pounds.

On the Danish island of Sjælland there is an electric lighting system which is driven by a windmill. The wheel is 46 feet in diameter, and is supported by a tower 43 feet high.

ITCH CURED IN 30 MINUTES BY WOOLFORD'S SANITARY LOTION. NEVER FAILS. AT DRUGGISTS.

It requires 15,200 stenographers to do the office business of New York City.

THE RIGHT WAY

In All Cases of DISTEMPER, PINK EYE, INFLUENZA, COLDS, ETC., Of All Horses, Brood Mares, Colts, Stallions, is to

"SPOHN THEM"

On their tongues or in the feed put Spohn's Liquid Compound. Give the remedy to all of them. It acts on the blood and glands. It relays the disease by expelling the disease germs. It wards off the trouble, no matter how they are "exposed." Absolutely free from anything injurious. A child can safely take it. 50 cts. and \$1.00; \$3.00 and \$5.00 the dozen. Sold by druggists, harness dealers, or sent, express paid, by the manufacturers.

DROPSY NEW DISCOVERY! gives quick relief and cures worst cases. Bank of testimonials and 60 Days' treatment free. Dr. H. H. GILBERT'S 8000, Box B, Atlanta, Ga.

THE VALUE OF PERSONAL KNOWLEDGE

Personal knowledge is the winning factor in the culminating contests of this competitive age and when of ample character it places its fortunate possessor in the front ranks of

The Well Informed of the World.

A vast fund of personal knowledge is really essential to the achievement of the highest excellence in any field of human effort.

A Knowledge of Forms, Knowledge of Functions and Knowledge of Products are all of the utmost value and in questions of life and health when a true and wholesome remedy is desired it should be remembered that Syrup of Figs and Elixir of Senna, manufactured by the California Fig Syrup Co., is an ethical product which has met with the approval of the most eminent physicians and gives universal satisfaction, because it is a remedy of

Known Quality, Known Excellence and Known Component Parts and has won the valuable patronage of millions of the Well Informed of the world, who know of their own personal knowledge and from actual use that it is the first and best of family laxatives, for which no extravagant or unreasonable claims are made.

This valuable remedy has been long and favorably known under the name of—Syrup of Figs—and has attained to world-wide acceptance as the most excellent family laxative. As its pure laxative principles, obtained from Senna, are well known to physicians and the Well Informed of the world to be the best we have adopted the more elaborate name of—Syrup of Figs and Elixir of Senna—as more fully descriptive of the remedy, but doubtless it will always be called for by the shorter name of—Syrup of Figs—and to get its beneficial effects, always note, when purchasing the full name of the Company—California Fig Syrup Co.—printed on the front of every package, whether you call for—Syrup of Figs—or by the full name—Syrup of Figs and Elixir of Senna.

PUTNAM FADELESS DYES

Color more goods brighter and faster colors than any other dye. One 10c. package colors all fibers. They dye in cold water better than any other dye. You can dye any garment without ripping apart. Write for free booklet—How to dye. Heisen and Mix Colors. MONROE DRUG CO., Quincy, Illinois.

BOY REMOVES APPENDIX

Not From His Body, However, But From Priceless Books of His Father.

Johnny loved his papa, there was no doubt about that, and one morning, after he had listened to a long disquisition from the author of his being, addressed to his elders, on the general uselessness of the vermiform appendix, ending up with the broad statement that he hoped he'd see the day when every appendix in creation was cut out, the little boy resolved upon an agreeable surprise for his daddy. He worked in secret for several days, and then sprang it.

"See what I have done for you, daddy!" he said, leading the wondering father into the library and showing him a neat pile of many pages which he had accumulated. "I've cut the appendix out of every book in this library."

It was then that words failed, and Johnny's father's vocabulary made a general assignment for the benefit of its creditors.—Judge.

HAD SEVERE WEEPING ECZEMA.

Face and Neck Were Raw—Terrible Itching, Inflammation and Soreness—All Treatments Failed—Cuticura a Great Success.

"Eczema began over the top of my ear. It cracked and then began to spread. I had three different doctors and tried several things, but they did me no good. At last one side of my face and my neck were raw. The water ran out of it so that I had to wear medicated cotton, and it was so inflamed and sore that I had to put a piece of cloth over my pillow to keep the water from it, and it would stain the cloth a sort of yellow. The eczema itched so that it seemed as though I could tear my face all to pieces. Then I began to use the Cuticura Soap and Ointment, and it was not more than three months before it was all healed up. Miss Ann Pearsons, Northfield, Vt., Dec. 19, 1907."

Potter Drug & Chem. Corp., Sole Props. of Cuticura Remedies, Boston, Mass.

METALLIC HEELS AND COUNTERS

Made of Steel

For Miners, Quarrymen, Farmers and All Men Who Do Rough Work.

Support the ankle. They will make your old shoes as good as new. Easy to attach. Any cobbler can put them on. Your shoe dealer has shoes fitted with them. They are lighter than leather, but will never wear out. Send for booklet that tells all about them.
