For Cramps in the Stomach of Six Years' Standing.

"I was troubled with cramps in the stomach for six years. I tried many kinds of medicine, also was treated by three doctors.

"They said that I had nervous dyspepsia. I took the medicine for two years, then I got sick again and gave up all hopes of getting cured.

"I saw a testimonial of a man whose case was similar to mine, being cured by Peruna, so I thought I would give it a trial. I procured a bottle at once, and commenced taking it.

"I have taken nineteen bottles, and am entirely cured. I believe Peruna is all that is claimed for it."—Mrs. J. C. Jamison, 61 Marchant St., Waterville, Cal.

## Alcohol and Race Suicide.

Alcohol is a cause of race suicide among animals, declared Dr. W. S. Hall, of Chicago, in pointing out that it cannot be considered a food, in an address before the American society for the study of alcohol and other drug narcotics. Dr. T. A. Williams, of Washington, took a fling at alcohol when he declared that the mother who gratifies every caprice of the child to keep it quiet, and the father who studies every form of amusement to attract and interest his boy, are cultivating inebriety in it which will develop in the future with the slightest existing causes.

## STRUCK DOWN.

Worn Out and Prostrated With a Treacherous Trouble.

Miss Emma Shirley, Kill Buck, N. Y., says: "Under my doctor's treatment for general debility and stomach trouble I failed to improve, and had to take to my bed. I was terribly nervous; headache and dizzy spells and awful spells of pain in the back racked me. The kidney secretions were much increased. I consulted specialists, but without relief, and sank lower and lower until given up to die. Kidney trouble was the cause all the time, and when I began using Doan's Kidney Pills I began to improve right away. In good time I was cured, and gained every bit I had lost."

## Paints Will Fade.

The picture of modern artists will be colorless when many of the works of the old masters are as bright as they show today. Just as the secret of dyeing has been lost, so has the secret of preserving the colors of artists' paints.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years supposed to be incurable. Science has proven years ago that a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven Catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case that fails to cure. Send for circulars and testimonials. Address F. J. Cheney & Co., Toledo, Ohio.

Sold by Druggists. Take Hall's Family Pills for constipation.

Some Discrepancies Noticeable. When we see one judge inflicting a fine of \$29,000,000 and another judge in the same case throwing it out of court on the ground of insufficiency of evidence, it is not strange that there is still some skepticism as to the claim that the law is an exact science.—Louisville Courier-Journal.

Data compiled by the Texas Railroad Commission indicates a loss by the railroads of the State during the last nine months of \$4,000,000, as against twice that amount reported by the companies. The commission asserts that fifty per cent. of the losses claimed by the railroads is fictitious, due to the new system of bookkeeping.

## FIGHTING MOSQUITOES ABROAD.

The Arzolla Plant Has Proved Effective in Germany.

According to Consul-General Richard Guenther, of Frankfurt, the department of the colonies at Berlin is investigating the arzolla water plant at Biebrich, contemplating the introduction of this plant in the German colonies in Africa, in order to eradicate the mosquito.

The director of fisheries at Biebrich, Mr. Bartmann, has, after experiments covering a period of fourteen years, found that the most reliable means against mosquitoes in stagnant waters is the growing of the various kinds of semi-tropical plant arzolla. His numerous and always successful experiments induced the director of the imperial colonial office to call him to Berlin in the spring of 1907, and the colonial office ordered that the test of his method should be made by the Institute for Tropical Hygiene at Hamburg, where Director Bartmann had the use of the State Botanical Institute for propagating the arzolla plants.

As, however, Wilhelmshaven possesses a malaria station, and as especially in its vicinity hundreds of cases of malaria occurred, the experiments were made in that territory, which is full of stagnant waters and swamps infested with mosquitoes. While the proximity of the sea and the abnormally cool temperature of the summer of 1907 had an unfavorable influence upon the growth of the plant, it, however, covered the experimental waters in a short time with a layer of about six centimetres (2.362 inches), which suffocated all the mosquito larvae below, and prevented the living insects from depositing their eggs in the water.

Gold Carpet of the Mint.

A small carpet in the San Francisco Mint is worth more than its weight in gold and is soon to be burned in order that the precious metal fittings that have been sprinkling it for several years may be recovered. The carpet is in the adjusting room, where files are used to trim surplus gold from coins after they are stamped. It frequently happens that a piece of overweight falls to the floor and becomes imbedded in the grain of the carpet, and it is nothing unusual for the Government to get \$5000 worth of gold dust out of the ashes resulting from the burning of one of the floor coverings. The floor sweepings are treated with the utmost care, as they furnish enough money to pay the salary of the janitor several times over.—San Francisco Call.

# FINANCE AND TRADE REVIEW

## DEMAND IS BROADENING

Business Continues Dull, However, in All Lines of Steel Except Structural.

New York.—R. G. Dun & Co.'s "Weekly Review of Trade" says: "Favorable conditions in crop growing sections promise well for the future and the reasonable weather generally prevailing is helpful to trade, advices from the Northwest being particularly cheerful. The tariff discussion in congress bears heavily upon many trades and the end of the debate is variously estimated at not before May 15 to July 1.

"Whatever progress is making in iron and steel is mostly confined to structural lines. The recent slight improvement in this division is being maintained. A better inquiry is received from the railroads, the tonnage pending aggregating in good volume. Further reported reductions in price of material have also broadened in demand for construction work and undertakings that had been deferred are again appearing. Business in steel rails is still limited, although several small contracts are noted. Stocks of pig iron continue to accumulate in the principal sections of the country and there is still talk of reduction in active capacity.

"In the primary dry goods market demand at present is entirely confined to immediate requirements. Locally, there is little activity among distributors, and although the volume of business transacted shows a moderate increase as compared with the corresponding period of 1908, sales by no means approach normal. Export demand has practically ceased, although some tentative inquiries are still being received.

"Trade in all kinds of footwear is still very dull, buyers awaiting developments, but stocks are further depleted. The recent large sales of domestic hides have caused a sharp advance in prices, especially in the country market. The leather trade is decidedly dull in all lines, buyers showing no disposition to operate at any price."

## Wasted Mistletoe.

Another illusion dispelled. Mistletoe, it seems, is not a Christmas decoration. "Holy, the box and the bay" should deck forth our houses and churches at Yuletide, but mistletoe should not make its appearance till the New Year. It may help to restore the practice of making the hanging of the mistletoe separate New Year's ceremony to state that its efficacy is entirely lost if it is hung and used for the encouragement of osculation before the first day of the year.—Lady's Pictorial.

There is good reason for urging legislation to restrain the traffic in cocaine, morphine and other crazing drugs, observes the Pittsburg Dispatch. Many good people are obsessed by the idea that alcoholic beverages should be prohibited, but they fail to appreciate the much greater harm of the drug habits.

# ECZEMA BURNED AND ITCHED.

Spread Over Hand, Arms, Legs and Face—It Was Something Terrible—Complete Cure by Cuticura.

"About fifteen or eighteen years ago eczema developed on top of my hand. It burned and itched so much that I was compelled to show it to a doctor. He pronounced it ringworm. After trying his different remedies the disease increased and went up my arms and to my legs and finally on my face. The burning was something terrible. I went to another doctor who had the reputation of being the best in town. He told me it was eczema. His medicine checked the advance of the disease but no further. I finally concluded to try the Cuticura Remedies and found relief in the first trial. I continued until I was completely free from the disease and I have not been troubled since. C. Burkhardt, 236 W. Market St., Chambersburg, Pa., Sept. 19, 1908." Potter Drug & Chem. Corp., Sole Props. of Cuticura Remedies, Boston, Mass.

## Modern Masonry Defective.

Probably not one out of every 10,000 buildings standing in all parts of the world and built by modern masons will be standing 500 years hence. We do not know how to put stones and brick together as the ancients did, and consequently the buildings we raise nowadays are really mere temporary structures, and will be in ruins when the ancient buildings of Greece and Egypt, built thousands of years ago, are in as good condition as they are now.

## A Powerful Dredge.

An unusually powerful dredge is being built for the docks and harbor of Mersey. It has an overall length of 487 feet, a beam of 69 feet and a depth of 30 feet 7 inches, and its hoppers will carry 10,000 tons of sand. The two suction pipes are 42 inches in diameter and 90 feet long, and each is connected to a pair of centrifugal pumps, each driven by a triple expansion engine. The suction pipes can dredge down to 70 feet below the water surface.

Death Valley is a desert valley in Inyo county, Cal., lying between the Panamint range on the west and the Funeral, Amargosa and Grapevine ranges on the east. Much of the valley is below sea level, and there are only a few places where ordinary drinkable water can be obtained. The valley was formerly the bed of a salt lake along the east side.

## Aeroplane Expectations.

In a four years horoscope, Colonel Baden-Powell anticipates the progress of aerial navigation. During this year, he expects to see three and four hour flights and journeys over a hundred miles. In the second year there will be many aeroplanes and they will be able to start from any ground and stem the gales. There will be races and cross-country journeys, and pleasure flights. In the third year, the aeroplane will be quite common. There will be hundreds in the country, and nearly everybody will have the chance to see one coursing through the air. And as to the fourth year, he says: "At this rate, in four years' time we may be able to say that flying is common. It may perhaps still be looked upon as a somewhat venturesome practice, and among the general community may not be exactly an every-day experience, but most well-to-do people will have made a trip, and many will own machines and made almost daily runs. It will be 'quite the thing' to take your friends for a fly."

## Horse Census.

The government has been taking a census of the horses of the country, and reports that there are over 20,000,000 horses and nearly 4,000,000 mules in the United States. This is a greater number of horses by several hundred thousand than were reported previously. The horseless age is evidently not yet in sight.

# Society Women of Molo.

In Molo the Woman's Peace League gave us a reception, and one could not but smile at the thought that the pink, blue and green little fluttering creatures bedecked with diamonds, who offered us sickeningly sweet ices and politely asked us if we would like a glass of whisky, were really the ladies in the movement for the emancipation of women we had heard so eloquently described by a brilliant young orator. We were often offered glasses of whisky by these misguided natives, who think all Americans, male and female, drink it by the bottle. One dainty little mestiza vainly pressed a large beer mug full on our member from Vermont. He told her that Americans do not drink so much whisky. She however, looked calmly at him and said slowly and distinctly: "You lie!" an instance of the kind of English these people are learning.

Sold by druggists and dealers, 25c.

## Saving Daylight.

A piece of peculiar legislation is the daylight saving bill which has reached its second reading in the English parliament. The object of the measure is to have the British day begin earlier in the morning, to put the matter facetiously. During the five summer months, the working day is to begin an hour earlier than at present to take advantage of the early sunrise at that time of the year, and give the working class a longer period of daylight recreation at the close of their work.

## Future of Steel.

President Charles M. Schwab of the Bethlehem Steel Company is optimistic on the future of the steel industry. The present cut in prices, he says, will not last long. He predicts that in ten years the annual consumption of steel in this country will be 40,000,000 tons, or nearly double what it was in 1907. He says it takes nearly 1,000 tons of steel rails per day merely to replace worn out rails.

# AFTER DOCTORS FAILED

Lydia E. Pinkham's Vegetable Compound Cured Her.

Willimantic, Conn.—"For five years I suffered untold agony from female troubles, causing backache, irregularities, dizziness and nervous prostration. It was impossible for me to

walk upstairs without stopping on the way. I tried three different doctors and each told me something different. I received no benefit from any of them, but seemed to suffer more. The last doctor said nothing would restore my health. I began taking Lydia E. Pinkham's Vegetable Compound to see what it would do, and I am restored to my natural health."—Mrs. ETTA DONOVAN, Box 299, Willimantic, Conn.

The success of Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, is unparalleled. It may be used with perfect confidence by women who suffer from displacements, inflammation, ulceration, fibroid tumors, irregularities, periodic pains, backache, bearing-down feeling, flatulency, indigestion, dizziness, or nervous prostration.

For thirty years Lydia E. Pinkham's Vegetable Compound has been the standard remedy for female ills, and suffering women owe it to themselves to at least give this medicine a trial. Proof is abundant that it has cured thousands of others, and why should it not cure you?
